THE WEEKLY EXPONENT

Vol. 1. BOZEMAN, MONTANA, FRIDAY, MAY 6, 1910. No. 18

GOOD TIME FOR ALL

POSTPONED BASE BALL GAME PLAYED TUESDAY AFTERNOON.

ATTENDANCE BREAKS RECORD

City Officials Lose Game by One-Sided Score—Many Novel Features.

The postponement, made necessary by last week's storm, only served to whet the appetite of the Bozeman public for the big base ball game between the city officials and the college faculty. The sun shone brightly last Tuesday upon one of the liveliest gala days Bozeman has ever experienced. A large number of business houses, as well as the college and Gallatin high school, were closed for the afternoon, and at 2 o'clock a big street parade, led by Mayor Berthot, began the ceremonies. The two ball teams in bright uniforms marched to the music of the M. A. C. regimental band, while floats of various kinds represented clubs from the student body. The band boys were in masquerade and the outfits were nothing short of a scream. The civil engineers contributed a float, bearing a transit of giant proportions, and the agricultural club rode amidst shocks of grain and other typical decorations. The electrical and mechanical departments each exhibited floats of suitable design. The distinct feature of the parade was the float of the domestic science girls. It was neatly trimmed in the college colors, set off with a variety of pennants, and the girls finished the charming effect, seated as they were in tiers on either side of the float. Each girl was dressed in plain white, with her hair set-off with two large crysanthemums of gold or blue tint.

After countermarching on Main street the pageant proceeded to the fair grounds, where two games were played. The first was rather a burlesque affair and lasted only one inning long enough however, to afford the crowd a lot of fun. The line-up in this contest was as follows: City—Burke, c. f.; Orton, c.; Widener, 1st; Werling, 3rd; Robinson, p.; Long, s. s.; McElwee, 2nd; Howard, r. f.; Callaghan, l. f. College—Hamilton, s. s.; Thaler, r. f.; Clark, 1st; Atkinson, [illegible]Cobleigh, p.; Cooley, c; Swingle, [illegible] Brewer, 2nd; R. A. Cooley, s.s. President Hamilton proved himself a batsman of sterling quality in connecting with Robinson's dew drops, while Prof. Thaler seemed to suffer some difficulty in wielding a giant tin bat, which was constructed especially to suit his style of efficiency.

The real game started immediately following the opener, and the officials went down to defeat by the score of 18 to 7. The line-up was as follows: City—Brandenburg, c; Hartman, p; Brown, 1st; Berthot, 2nd; Oakwood, ss; Cain, 3rd; Davidson, l f; Long, c f; Alexander, r f.

College—Brewer, c f; Challender, r f; Jones, 1st; Griffin, c; Schoppe, 2nd; Taylor, ss ;Carlson, l f; Robinson, p; Whipple, 3rd.

Policeman Brown's catch of Challender's drive down first base alley was the feature of this contest. The game was close until the fifth and last inning, when the learned brain manipulators got vicious and batted in a total of eleven runs.

During the progress of the game a party of Chinese, a la college student, headed by John Lee Sing Booker, went quietly about their daily work in a portion of right field, washing a variety of wearing apparel and hanging it to dry on the cross bar of the foot ball goal, which stood in plain view of the spectators.

This unique affair brought out features which will long be remembered by students and people of Bozeman, who went to make up the big crowd present. In general the sight of men high in civic and intellectual circles of the state, throwing off dignity and joining wholeheartedly in sport in order to advance a good movement, will not soon be forgotten nor its example despised by those present. One may not often have the opportunity to see a mayor of Bozeman digging up the hot ones at second base, or the president of the college sprinting around the base ball diamond. The memory of the faculty battery with the amusing contrast between the size and action of its two components cannot soon be erased. In this capacity Profs. F. S. Cooley and W. M. Cobleigh were an undisputed success.

Too much stress can scarcely be laid upon the public spirited manner with which officials and faculty entered into a contest, the proceeds of which were destined to go to the purpose of athletic advancement at M. A. C.

With the big turn out and the assistance rendered by the Y. M. C. A. refreshment stand, the net proceeds of the game were swelled to a figure somewhere near the $500 mark. This amount, used in conjunction with that appropriated by the college to the same good purpose, will undoubtedly insure a fine athletic field. Next fall can be expected to inaugurate a new activity in athletics at M. A. C., with the stimulus of a fine field and general support from town and college.

—o—

ARENA WILL GIVE ASSEMBLY PROGRAM

The Arena Literary Society has agreed to give the final assembly program of the year on May 27 and have posted the following program for that time: Solo, Edna Hagerman; recitation, Dorothy Gatton; debate—Resolved that the Bozeman theatres should close on Sunday—affirmative, Rhoda Dawes and Samuel Pound; negative, Jack Taylor and Margaret Edwards; song, Boys' Quartette.

The debaters are to be allowed five minutes for their arguments and the leader on the affirmative will have two minutes for refutation. The members of the reorganized society are taking hold of matters with the spirit that wins and promise the most interesting assembly of the year.

SLOAN IS ELECTRICAL EXPERT

Has Had Steady Promotion Since Graduating in 1903.

Among the promising and steadily advancing graduates of M. A. C. is W. Frank Sloan, who received his degree as Bachelor of Electrical Engineering in 1903. Mr. Sloan is at present in the employ of the Wisconsin State Railway commission, but has been temporarily loaned by them to the Los Angeles city government to assist in solving certain municipal problems.

Mr. Sloan was known as a capable

man during his college life and was at that time prominent in student affairs. He attended the University of Wisconsin after graduating here and filled acceptably positions with the Telluride Power Co., Mont; the Union Light & Power Co., St. Louis; the Chicago Edison Co.; and the B. J. Arnold Co.; besides the position now held with the commission.

At the recent election held by the Alumni association of this college, Mr. Sloan was the choice for president. It is thought that he will be in Bozeman for Commencement time for he will finish his work as electrical expert in Los Angeles during this month, and will probably visit here on the way back to Wisconsin.

It has been characteristic of Mr. Sloan throughout his active life that he has given satisfaction in whatever field he might be engaged. He has received some flattering, though deserved, recommendations from the management of the different concerns for which he has worked since graduating.

—o—

DEMONSTRATION BY CLASS IN DIETETICS.

An unusually instructive, as well as interesting, demonstration was given Monday afternoon in the Domestic Science rooms by the class in Dietetics. All members of the faculty, together with their wives, the senior girls from the high school and the students in the home science course were invited, and most of these took advantage of the opportunity to attend.

The demonstration was conducted by Misses Ruth Flager, Mary Davidson, Effie Carmichael and Helen Fisher. Miss Flager read an extended paper on the methods of studying the science of dietetics which she defined as the branch of hygiene dealing with the recovery or maintenance of health by proper habits of eating and drinking.

The field is only partly developed and much of the work done in the class here is along original lines. According to this science the occupation, height, weight and age affect the amount of carbohydrates, fats and proteins, which should be consumed as food by the subject.

An experiment along this line was conducted by the class a short time ago at the "scientific luncheon" where the amounts of the different constituents eaten by those present were carefully ascertained. The weight of food consumed on the average by each person present was 707 grams of which 29 grams were protein, 40 grams fat, and 129 grams carbohydrates. The total heat value of this food is 944 calories. These and other experimental results were given and explained by the speaker.

At the close of the lecture the girls served a scientifically prepared meal for one person, showing the relative amount of the various foods necessary to an ordinary person doing an average amount of work.

The guests were then invited to the reception rooms where dainty refreshments, prepared by the girls of the course, were served. The perfect menu as served in the demonstration consisted of fruit cup, bouillon, wafers, chicken croquettes, potato, asparagus on toast, bean salad, cheese straws, bread and butter, pineapple ice, sponge cake, cream and sugar for coffee.

—o—

BAND CONCERT WELL ATTENDED.

The third annual regimental band concert took place at the opera house last evening. The strongest program ever undertaken by this organization was rendered. The proceeds, which amounted to about $200 will be used by the band to cover their expenses while at Missoula next week, where they will play all three days of the inter-scholastic track meet. The baritone solos as sung by Prof. A. H. Currier, assisted by Prof. Ewald Sontum on the piano, were especially excellent. The following program was given.

National Emblem, March.....Bagley
Stubborn Cinderella, Selection..Howard
Little Duchess, Overture .....
Baritone Solo.....A. H. Currier
Glow Worm, Medley .....La Farge
Charmer, Cornet Solo.....L. L. Howard
Algonquin, Overture ..... Sherman
Baritone Solo.....A. H. Currier
Il' Trovatore, Overture .....Verdi
A Day at West Point, Descriptive Selection .....Tobani

—o—

SENIORS PLAN EXERCISES.

At a business meeting of the Senior class, held in Prof. Tallman's rooms, last Wednesday, it was voted by the class to comply with the faculty's wish, that the Baccalaureate address be given in the Presbyterian church, in order that the pipe organ may be used in connection with the musical part of the program.

R.B. Barnard, chairman of the committee on arrangements for class day exercises, reported having a short play, or rather a sketch, which he thought suitable to be given by the class. After hearing a short synopsis of the sketch, the class decided to adopt it and empowered the committee to assign parts as early as possible.

A general discussion was then taken up, of questions submitted by President Hamilton regarding the College Oratorical society, and it was finally decided to put a copy of these questions in the hands of each member of the class and have them write their answers and send them to the president.

UTAH WINS DEBATE

CLOSE CONTEST RESULTS IN DECISION AGAINST COLLEGE.

ATTENDANCE FIVE HUNDRED.

Team Returned Wednesday Morning After Enjoyable Trip.

In the first inter-collegiate debate ever held with a college outside the state, the Montana team, composed of Marvin Spain, William Kremer and James Bell, alternate, were defeated by the Utah Agricultural College, which was represented by R. O. Porter, Verne Wooley, and A. C. Decker, alternate. The Montana team, accompanied by E. A. Duddy, instructor in public speaking and forensics, arrived in Logan, Utah, Thursday evening, where they were met by Mr. Porter and taken to the hotel. The evening was spent in reviewing some of the hardest points of the question and in preparing argument for rebuttal in which Mr. Duddy gave very valuable assistance. The following day the Utah Agricultural College was visited and the boys were shown through all the various departments, attended the chapel exercises, and were then taken to the Domestic Science department for lunch.

The debate was held in Chapel Hall and although the rain came down in torrents a crowd of about five hundred people assembled to hear the contest.

The debate itself, in the estimation of the judges, was a very creditable performance. The question was a difficult one but was handled with almost equal efficiency in preparation and argument by both sides. The delivery of the Utah speakers was especially effective,—R .O. Porter doing the best work for the affirmative. The negative speakers easily excelled in rebuttal, but were somewhat halting in their main speeches. The debating tactics on both sides were remarkably clear, the speeches fitted nicely together ,and both sides showed good team work. The decision was secured by the affirmative chiefly for their superior excellence in delivery.

After the debate a sumptuous banquet was given in honor of the visiting team, at which the judges, a few members of the faculty, and a few students were present. The Montana boys were royally entertained throughout their stay in Logan and came back with many words of praise for U. A. C.

BOZEMAN LOYAL TO COLLEGE.

The big base ball game is over and the prospects for a finished athletic field are confirmed. What is said to have been, and most likely was, the largest attendance ever at an athletic contest in Bozeman was at the fair grounds Tuesday afternoon. As a result over $500 was raised for use in completing the athletic field within the quarter mile cinder track south of College Hall.

This money was drawn from college and town people alike, and there was nothing in the least savoring of extortion in securing it. Everybody who attended was satisfied that the games and special features were worth many times the price of a tag.

The enthusiastic support given college activities by the business men and people of Bozeman was thoroughly demonstrated by this affair. They worked hard to make it a success and, in many instances, sacrificed personal interests to that end. They have conclusively proven their loyalty and are in turn entitled to the gratitude and support of the students.

Along with the town people, the faculty and students themselves worked energetically and are certainly deserving of praise for their part. The faculty unhesitatingly cast aside their dignity for the time, and their antics when thus relieved made the event uproariously funny.

Space will not permit dwelling in detail on the performance and parts taken but the informality and general good feeling in connection served to impress it on the minds of all those in attendance, so that for years to come this event will be looked upon as the most exciting of an athletic nature in the history of the city.

DEBATERS PLEASED.

Though the debaters did not return from Utah with a victory, the members are jubilant over the trip and the experience which they gained. This was the longest trip ever taken by a debating team from this institution and the beginning of such relations with our distant sister college marks an epoch in debating here.

Next year Utah will come here and it is planned to provide for them an entertainment as nearly equal to that given our boys as is possible. The reports indicate a most cordial treatment on the part of the Utah boys and, as one of the debaters expresses it, "It was a pleasure to lose to such men." After all, the value of a debate lies more in the practice and broadening effect on the speakers than in the decision of the judges, although the latter is a pleasant and welcome attribute. In this case no one has fault to find with the decision, but all interested are resolved to make things hum in this branch of activity next year.

Up to the time of going to press there has been no reply from Adjutant General Greenan on the turning over on the cannon which now decorates the library, to become the permanent property of the college. There is probably considerable red tape proceeding to go through before this can be accomplished, but it is sincerely hoped that the permission can be secured, as it would insure the preservation of this most interesting relic of early days. An interesting and rousing program of dedication has been suggested in the event the move is successful but its realization will require prompt work on the part of the student. In the meantime the reply is anxiously awaited.

A committee of the faculty has been appointed to draw up resolutions of thanks to the city officials for the part they played in becoming boys again for the purpose of helping along the move for a better athletic field at the college. That the students, themselves are grateful admits of no doubt, but a formal statement of their gratitude would help to improve the already cordial relations between the city and college.

Pictures of President Hamilton sprinting to first and of Prof. Cobleigh sliding to second should be hung in Assembly Hall to constantly remind the students that even these men on occasion can unbend and discard their dignity.

Notes of Alumni and Ex-Students

Ellie Moore, '01, arrived in Bozeman last week from the west. He is in the insurance business and expects to be in Bozeman and vicinity for a month or six weeks.

Warren Griffith, '07, who is doing electrical work in Spokane, has lately been advanced by the company for whom he is working from operator to a position in the city department.

Arthur Wade, ex-'10, was in Bozeman the first of the week visiting college friends. He returned Tuesday to the Madison, where he is employed by the Madison River Power Co.

Floyd Lorentz, '07, has recently been employed as an electrical engineer by the Keating Gold Mining company, at Radersburg, Mont. Mr. Lorentz is working on a thesis for his degree as electrical engineer. His subject is, "General Equation for the Design of a Transformer."

On Wednesday, April 27, Bert Hind, '07, was married to Miss Gertrude Mitchell, whose home is near Revenue, in Madison county. Mr. and Mrs. Hind spent several days in Livingston, returning to the Madison canyon the first of the week, where Mr. Hind is in the employ of the Madison River Power Co, at which place they will make their home for the present.

The executive committee of the Alumni association met Tuesday evening to canvass the returns on their recent election. The count resulted in the selection of the following officers: President, Frank W. Sloan, '03; vice president, Edna Maynard Morris, '00; secretary-treas., Elwood Morris, '09; corresponding sec'y, Erma Noble, 09; executive committee, Edmund Burke, '07; Frank Ham, '03; Edna Tracy, '08.

Leslie A. Bechtel, who gained some reputation while at M. A. C. as an orator and debater has been appointed by the president of the class of '10 to give the "Ivy Oration" at the class day exercises of the University of Wisconsin. Mr. Bechtel completed a commercial course at M. A. C. in the spring of '04 and graduated from the preparatory department in '06. After completing his freshman year here he registered at the University of Wisconsin, in order to obtain courses directly in line with his future law work. Mr. Bechtel expects to enter the law department of Columbia University next fall.

News of Other Colleges

Only eight members of the graduating class of 221 girls at Wellesley, Mass., college intend to become wives, according to the statistics collected by the class secretary.

Victoria and Vancouver are fighting to become the seat of a great university—one that will rank with the highest seats of learning in the world. A commission appointed by the provincial parliament has the picking of a suitable location. Particular stress will be laid on courses in technical branches, including mineralogy, mining engineering, forestry and horticulture.

One million dollars is the amount the University of Washington will receive from the Rockefeller Foundation for the purchase of athletic equipment according to a letter received on the campus on April 1st by secretary of the board of regents. There are no conditions attached to the donation. This gift is part of the $32,000,000 which the oil king has set aside for distribution among the leading colleges.

The Harvard commencement this year will be marked by the presence of two of the country's distinguished men, ex-President Roosevelt and Governor Hughes of New York. Ex-President Roosevelt will speak as president of the Harvard alumni at the alumni dinner, June 24. He is expected to come to Harvard directly from his New York reception, which will be held immediately after his arrival in this country, probably on June 17. Governor Hughes will deliver the Phi Beta Kappa address on June 25.

The faculty of Oberlin College has voted to exclude Freshmen from participation in intercollegiate debates and oratorical contests, as well as from membership in the glee club. This regulation does not become effective until the fall of 1910; although thus excluded, Freshmen if they desire, may participate in the preliminary contests in both debate and oratory. The action of the faculty was taken "to prevent the Freshman from devoting to outside interests time that he should be spending on his studies."

By banding together the progressive college girls of America into an organization that will bar matrimony until the assigned work of each member in the cause of the suffragists is completed, the most radical movement yet devised by the leaders of the woman vote workers is soon to be put into force. Each of the college suffragists in Wellesley, Bryn Mawr, Vassar, Smith, Radcliffe, and other women's colleges, will bind herself to foreswear the marriage vow until she has won over to the women's suffrage cause 500 bona fide men voters.

If your eyes bother, see L. E. Gage, the optician.

Clothes Built for Young Men

With that exclusive dash and style sure to prove popular with the critical young man. We are laying special stress upon the superior merits of our stock of young men's clothes, inexpensively priced. For fit, style, pattern material and tailoring they are unequalled at the prices of $10, $12.50 and $15

College Notes

A baby girl was born to Mrs. F. S. Cooley at the Bozeman Sanitarium last Friday.

—o—

Prof. F. B. Linfield and John Taylor were at White Sulphur Springs last week giving lectures in connection with the high school extension work.

—o—

The S. N. L. Club was entertained at the home of Ethel Van Camp last Saturday evening. Some of the girls were dressed in unique costumes representing various characters. After a delightful evening delicious refreshments were served.

—o—

M. L. Dean, state fruit inspector, and E. H. Metcalf, both of the Bitter Root valley were visitors at the college last week. Mr. Metcalf is advertising manager of the Better Farming Special and was making some of the arrangements for this tour while here.

—o—

The corn seed for the prize corn growing contest to be conducted by the Great Northern railway this year was sent out to the various applicants last Saturday. In all over four hundred packages were mailed. The different varieties distributed were Northwestern and Golden Dent.

—o—

Do not forget the college seal pins, buttons, hat pins and fobs, at Leslie E. Gage, jeweler, also the new college pottery.

The Arch of the In-Step

Is an important feature in a shoe, particularly a man's shoe. It is his "sole support" so too speak, and should hold the foot right in natural shape when working. It prevents flat feet and other incurables. We are showing some fine shoes on new lasts, beautiful yet strongly made, and certain to appeal to dressy men at their low price.

$3.50, $4 & $5

NICHOLSON'S

Shoe Store

Students wishing gummed stickers, emblematic of this institution, may procure them at Gracey's print shop. They will be especially good for those taking the Missoula trip.

—o—

Miss Francis C. Gage, executive secretary of the Northwest Territorial Committee of the Y. W. C. A., writes that she will come to Bozeman May 16 for work in the interest of the local branch of that society.

—o—

John White, who played tackle on the football squad last fall, is in the city again after spending the winter at Fargo, N. D. Mr. White is still in the employ of S. Birsh & Sons, cement contractors, and will be here the remainder of the summer.

—o—

The freshman class wish to announce that due to a judgment of the faculty, no play will be given this spring as planned. Preparation was going on busily and the play was shaping up nicely. The action of the faculty was based on consideration of the rush of work which is inevitable at this time of year.

—o—

The college faculty will indulge in a picnic at Bozeman Hot Springs on Arbor Day. No program has as yet been arranged, but little doubt exists that the shortcomings of under-graduates will be totally set aside from consideration for this occasion and a jolly good time enjoyed to the full.

—o—

Miss Edith Armstrong, who has been taking work at the college for the past few months, has withdrawn from the student ranks and departed yesterday for Kansas City where she will visit with friends for a while, and then proceed to Washington, D. C., where she will resume her studies for the summer.

—o—

Prof. F. A. Hoverstad, director of the farmers institute work at the North Dakota Agricultural College experiment station, has signified his intention of cooperating with the college station in the tour of the demonstration train to be run by the Northern Pacific. The dates for stops through North Dakota will precede those of Montana by about three weeks.

—o—

Miss Kate Calvin has been appointed delegate to the World' conference of the Y. W. C. A. to be held in Berlin this month. Miss Calvin's stay in Berlin this winter gave the local branch the opportunity of recommending her to the National board for this privilege, and she writes "I would be glad to send a report of such meetings as I can attend and would be delighted to do anything I can in the interest of the Y. W. C. A. in Bozeman."

—o—

Watch, clock and jewelry repairing, glasses repaired or new lenses furnished and the frames carefully adjusted. See Gage, jeweler and optician.

Miss Paxton, a missionary from China, who is now travelling for the Student Volunteer Movement, will be here next week from Tuesday until Friday. Tuesday evening at 8:00 o'clock, at the Presbyterian church, she will talk to the young people and their friends. Wednesday noon there will be a special Y.W. C. A. meeting and Miss Paxton will address the girls. Thursday afternoon the girls will hold a reception for her at the college.

—o—

Word has reached this city of the death, in California, of Dr. H. S. Ricketts, a collaborator in the investigation of fever carrying insects. Typhus fever was the cause of death, and it is said resulted from the sting of an insect. Prof. R. A. Cooley is now in the Bitter Root and it has been rumored that the tick investigations carried on there may be discontinued because of the danger to which the workers are subject.

—o—

Kyle Jones, who won the local oratorical contest, and Edward Hodgkiss, the alternate, accompanied by Prof. Duddy, departed for Missoula on No. 7 yesterday, where the winner will enter the state contest at that place. The other schools in the affair are the Wesleyan University, State Normal School, and the State University. Mr. Jones will have for his subject the same question upon which he won the preliminary affair here, i. e., "The Negro Problem." The state contest is to take place in the Assembly hall of the university to-night, and the boys will probably remain over for the athletic meet next Wednesday afternoon.

—o—

At a faculty meeting held Wednesday afternoon, Capt. Griffin, of the faculty ball team, presented President J. M. Hamilton with the loving cup which was put up by "The Bozeman Business Men" for the winners of Tuesday's game. The cup was of ample proportions and of a properly designed lactile variety. Temporary inscriptions graced its surface at the time of its presentation but these will shortly be replaced by permanent ones in modern gothic. In his speech of acceptance President Hamilton indicated his pleasure and gratification as the recipient of so graceful an ornament and said, "I assure you that I will guard this award as jealously as lies within my power."

—o—

UTAH WINS DEBATE.

Continued from page 1

On Sunday morning they left for Salt Lake City, accompanied by Prof. Goddard, who acted as guide in showing the visitors through Temple Square and other interesting points in the city.

Prof. Roberts, a class mate of Prof. Duddy, and instructor in debating in the university, was then very kind in taking the party to other points of interest, and on Monday the university was visited and the boys from M. A. C. taken thro' the various departments by the "U" debating team. In the afternoon a trip was made out to Saltair, where a swim in the Great Salt Lake was enjoyed.

Next year a return debate will be held in Bozeman.

College Athletics

TRACK TEAM CHOSEN

The track team which is to compete in the big triangular meet next Wednesday afternoon, will leave for Missoula on No. 7 Tuesday, May 10th. They will be accompanied by the full regimental band and by several rooters.

The men who will constitute the track team and the events they will enter are as follows: Annin and Brabrook, hurdles and jumps; Pool and Allard, 100 and 220 yard dashes; Pool and Willson, 440 yard dash; Donaldson and Sleeman, 880 yard run; Williams and Morgan, mile and 2 mile; Sleeman and Taylor, discus; Taylor and Annin, shotput; Taylor, hammer throw. The relay team which is to compete for a separate pennant will be picked from the following men: Pool, Annin, Allen, Willson, Sleeman and Brown. The relay points will not be counted in the total score.

Of all the members of the team Capt. Pool has had perhaps the most experience. He is a senior in the college and has been a leader in the sprints for three years. He is depended upon to win points in the 100, 220 and 440 yard sprints.

Ralph Brabrook, a freshman, is a former Rockford high school track star. He has competed for two years in high school athletics and was the winner of the high jump in the Illinois high school meet of last year.

James Annin, a junior, is one of the best men, but has had little experience in track work. This will be his first inter-collegiate meet but his work may surprise his 'Varsity friends.

Noble Donaldson, while a sophomore, has only one year's previous experience, and that with the Helena high school in 1908. He has trained consistently and has proven a srprise in the 880 yard run, and is considered a sure point winner in that event.

Willson, Sleeman, Allard, Taylor and Morgan are new in track athletics, this year being their first extensive training. They are all showing up as very promising material and will not only well represent M. A. C., but will be the bulwarks of future teams.

Elmer Williams, the entree in the 1 and 2 mile events, had his preliminary training while in the Great Falls high school. He won the mile run at the interscholastic in Missoula in 1907, and captured second in the 880 yard run the same year. While suffering at present from a stone bruise received in vaulting, he is improving and will probably be in good condition next week.

Manager Allen, who will probably help in the relay, is a senior pharmacist. He secured his preliminary training while a prep here. He has an unofficial time of 5 1-2 seconds in the 50 yard dash. His ankles are at present in poor shape, but it is his hope to be fit as a strong contender in his event.

While M. A. C. is making no predictions of winning the meet, the feeling exists here, that both the 'Varsity and the Miners will know that they have been in a contest, and the hope is that the majority of points come in this direction.

—o—

It has been decided to carry an extra track man to Missoula who will be kept fresh for the relay.

On account of not being able to secure games, either practise or for championship, the base ball team has disbanded.

The school of Mines boys have become discouraged by reason of the fact that but few men have turned out for the track team there and they are talking of not being represented at the Triangular track meet in Missoula next week. It is to be hoped the Miners will compete.

Two more changes have been made by the football rules committee. The forward pass will be restricted to plays back of the line and the distance to be gained in three downs will be eight yards instead of ten.

Spring football practise, in which the new rules will be tested, will be had the week following the return of Coacch McIntosh and the track team from Missoula.

The eight changes in the football rules are as follows: (1)—Seven men are required to stay on the line of scrimmage at all times. (2)—Flying tackles are barred. (3)—The first man who receives the ball from center may cross the scrimmage line anywhere. (4)—The game is divided into four fifteen minute periods. (5) The onside kick must travel 20 yards into the opponent's territory to be legal. (6)—The runner shall not receive help, either pushing or pulling. (7)—There can be no forward passing except back of the line. (8)—The distance to be gained with the ball is eight yards in three downs. Another rule talked of is to allow a player who has been taken from the game to return later. Still another restriction requires the ends on defense to play inside the ends of the offensive side. Thus it can be seen that the game will have been materially changed.

It is planned to have the work on the athletic field done before school closes in June. The cinder track will probably be two yards wider next year.

Chances are bright for the Gallatin high school boys to win as good as second place at the Interscholastic meet. At least they should do better than ever before.

The track team owes a debt of gratitude to the Domestic Science girls for decorating the jerseys with gold and blue ribbons.

If the M. A. C. track team should have the good fortune to win the Triangular meet there'll be a hot time in Bozeman that night.

President Hamilton and Prof. Cooley are suffering from "charlie-horse" as a result of their sprinting efforts during the faculty-city officials base ball game.

Chris. McDonald, the promising Freshman sprinter, has been called home on business and will not compete with the M. A. C. track team at Missoula.

—o—

ORATORIO TO GIVE CONCERT

The Bozeman Oratorio society will give a high class concert at the Bozeman opera house, on the evening of May 26th, 1910. The following are some of the selections which the organization will render, under the leadership of Prof. Ewald Sontum: "The Heavens are Telling," (Creation); "Hymn to Music," (Dudley Buck); "Gypsy Life," (Schumann); "The Gloria" from the Twelfth Mass, by Mozart; and "Avia Maria" (Brahms), the latter to be rendered by ladies chorus.

—o—

CEMENT COURT SOON TO TO BE READY.

In spite of a bad wind a number of fellows were out working on the new cement tennis court Wednesday afternoon. Late last week the surface of the court was excavated to a depth of some seven inches to make room for cinder and concrete surface. The volunteer crew are now engaged in hauling gravel, digging ditches and tamping in a layer of cinders. Fred Walchli is desirous of seeing a full crew out Saturday so that this little, but important, job may be finished before attention is diverted to the happenings at Missoula.

—o—

WALTER AITKIN GIVES ASSEMBLY ADDRESS.

Walter Aitken, city attorney of Belgrade, addressed the students of M. A. C. at assembly Friday. This is the last lecture to be given this year.

Mr. Aitken said that this was the first time he had had the honor as well as the pleasure of addressing the college students. Though not a college graduate (through no fault of his own) he married a college girl and so the deficiency was supplied to some extent.

The engineering department appealed particularly to Mr. Aitken because he had been interested in one or two cases where graduate students were on the witness stand, and they knew the facts. Another department that appealed particularly to Mr. Aitken was the Home Science, from which he claims one gets the most pleasure, and which is the most useful.

His one message was that technical knowledge must be applied practically to be of use. Mere theoretical knowledge is of no value in itself, one must have the practical side as well. Mr. Aitken concluded by saying that the students were not as terrifying as he had been led to believe, and that he would like to address them again.
