BIG MIXER TONITE BE THERE

The Weekly Exponent

FROSH WEAR GREEN CAPS THURS.

VOLUME XV. BOZEMAN, MONTANA, WEDNESDAY, SEPTEMBER 26, 1923 NUMBER 1.

Good Morning Mr. Gallagher We Are Here

By C.

"There are two funny men; the best we've ever ———."

You know how it goes. You have danced it, and sung it and watched the contortions the piano player managed to produce with the aid of a piano bench and a little muscular exercise, as he played it.

o—O—o

Everybody knows it, and most of us can sing a chunk of the chours, even though the dog happens to think someone is in agony, and starts to give his verbal sympathy.

o—O—o

But Mr. Gallagher and Mr. Shean weren't the objects of my spite this morning. I wanted to introduce myself, and needed a—a—a—, one of those "vehicles" to do the trick with. This is one of those "engineless Fords" without a self starter, dimmers, one-hand driving appratus or any of the rest of the modern equipment that Eli employs for your amusement. Yes, we have no copies of Captain Billy's monthly or anything that might have been employed by the editors of Life, Judge, Humor, True Confessions, Hot Dog, or Jim Jam Jems. Ours is to be (until the editor gives us the hook) a straight column. Look it over and see if that isn't so.

o—O—o

What I want to try and "pan off" on you is a collection of everything from Liberal Arts to Libel, providing you'll stand for it. I'll do it only with the understanding that the scandal be kept out, and that only readable material get under the titles.

o—O—o

It is my hope that I am not infringing upon the editor's private domain. Instead I want to start some discussions of various phases of college life that it appears have not been touched enough in the columns of the Exponent. I may try to imitate Professor Tallman occasionally, and start discussing the fourth dimension or may take a hand with Professor Cobleigh and review freshman chemistry and the electronic theory, or I may appropriate some of Dean

(Continued on page four)

CALL FOR CHEER LEADERS

Under a ruling adopted last spring, the position of Commissioner of Demonstrations in the Student Senate will be filled by a student who has demonstrated his ability and interest in the position by working as Assistant Cheer Leader. Any under class men wishing to compete for this position should see "Stew" Avery at once.

S. E. AVERY,
Commissioner of Demonstrations.

Football Games Are Scheduled

Freshmen Have Full Schedule.—Bobcats to Meet Bruins November 17

Complete schedules have been announced for both the Bobcats and the Bobkittens. The schedules are particularly attractive this year, several of the games being with Rocky Mountain Conference teams. Coach Romney has arranged for ten games for the Varsity and nine for the Frosh. Half of the Bobcat schedule will be held here at home while the Freshmen will play six of their games here. The trips are of special interest this year. The first Varsity trip extends over twelve days and includes games with Brigham Young University and Idaho Tech. The last game of the season will be played with the University of New Mexico at Albequrque. The Freshmen have one trip outside of the state, playing Ricks

(Continued on page two)

VARSITY FOOTBALL SQUAD LEAVES FOR SOUTHERN TOUR

25 Men Leave Wednesday For 12 Day Trip to Utah and Idaho

HARD GAMES SCHEDULED WITH B. Y. U. AND IDAHO TECH.

Yea, Bobcats! The football season opens with twenty-six men of the Varsity squad down in the Morman state. The squad leaves on Wednesday, the 26th, to be gone until October 8th, with two hard games to be played on the trip. The first game, on September 29th, is with the Prigham Young University at Provo, Utah, and the second game, October 6th, is with the Idaho Tech at Pocatello.

Rooms have been reserved at the Hotel Utah, in Salt Lake City from September 28th to October 5th. The Desert gymnasium and several athletic fields have been placed at Coach Romney's disposial.

Wednesday, the 26th, the boys leave for Butte, where they will practice in Clarks Park and leave for Salt Lake at 5 o'clock that afternoon. At Salt Lake their headquarters will be at the Hotel Utah.

On September 29th, the squad goes to Provo, Utah, via automobile, for the first game of the season with B. Y. U. on that afternoon. This is a conference game and will be a real test for the Bobcats. The B. Y. U. had a team which outweighed the U. of U. and U. A. C. about ten pounds to the man last year and which played the U. of U., Rocky Mountain champions last year to a scoreless tie the first half. They were green athletes but they were beautiful specimens and they were not too green to beat the U. of Wyoming. Their Frosh

(Continued on page four)

Good Prospects for Stock Teams

Coaches McChord and Haslerud Have Good Courses Planned. Trips to Be Announced Later

The prospects for the stock judging teams are better this year than they have ever been before. The intensive training started last year will be resumed with the opening of the judging classes, and in addition those of the prospective judges who are able to go to the State Fair at Helena this week will get pointers on the fine points of the game there. Many fine classes of stock from all parts of the west will be exhibited at the State Fair and Coaches McChord and Haslerud will be able to give the men pointers on breeds of animals which they do not have access to here in Bozeman.

The plans this year call for two teams, one for general judging on all classes of animals, and one team judging only dairy stock. The trips have not yet been announced, but will include the important Western shows this fall, and probably the International Livestock Show at Chicago in December.

The team which went to Portland last year won third place in competition with strong teams from all parts of the West and a team from British Columbia. As this was the first team which M. S. C. ever sent out, and as the training for the trip was very short, it was a very encouraging start. With the training last year and the intensive drills which will be given this year, we may look forward to some real victories.

NEW BUILDING FOR MATH AND COMMERCIAL COURSES

No longer will freshmen and sophomore engineering students hold their math classes on the second floor of Main Hall. No longer will he secretarials "pound the Remingtons" in the section adjoining the math department. Instead the mathematics and secretarial departments will be housed in the old engineering building. Even the engineers wouldn't know their old hangout that is to be used for subjects mathematical and subjects commercialized.

WELCOME

On behalf of the faculty and citizens of the college community, and the city of Bozeman, I desire to extend a cordial welcome to the students who are taking up their work for the college year 1923-24.

Our new facilities are now in shape for use, and the "new day" at Montana State College is now in process. The college is now in a position to offer its courses under more favorable conditions. The organization and interest in the general life of the college and its marginal activities is such that they should contribute much to the pleasure and satisfaction of the year. The former students returning, and the new students who are entering, should quickly sense the new spirit of Montana State and together students, faculty and college community, should bring about the unbuilding of a great Alma Mater for the rapidly growing number who are registering here.

ALFRED ATKINSON, President

MANY NEW FACES ON COLLEGE STAFF

TWELVE NEW MEMBERS OF FACULTY TO TAKE PLACES OF THOSE RESIGNED

Many changes have been made in the personnel of the faculty of M. S. C. during the summer. Eleven of the members of the teaching staff are new to Montana State and some who have been absent on leaves of absence have returned.

Mr. W. A. Murray is Assistant Professor of Electirical Engineering, succeeding R. D. Sloan, who is now at Washington State College. Professor Murray graduated from the University of Idaho in 1914.

He spent two years in research work for the General Electric Company. Following this he was an Electrical Engineer in the mining districts of Idaho. During the war he served as Radio Instructor in the United States Army. Since 1919 he has been Instructor in Electrical Engineering at the University of Idaho.

Mr. Alfred Ludwig has returned as Assistant Professor of Civil Engineering after a year's absence. He was given a year's leave of absence last year on account of ill health. During the coming year he will handle the work of Mr. Grant, who plans some special work in Chicago.

The vacancy caused by the resignation of Mr. R. E. Glover, Instructor in Civil Engineering, will be filled by M. R. Good., Mr. Good graduated from O. A. C. last year with high honors. He was winner of the Johnson prize

(Continued on page three)

FANGS PROMOTE COLLEGE AFFAIRS

UNDERCLASS ORGANIZATIONS DO MUCH TOWARD PROMOTING COLLEGE ACTIVITIES

The new students on the Hill will be particularly interested in the school "pep" organization, commonly known as the Fangs. The real name of the organization is the Fangs Chapter of Intercollegiate Knights, a national society. This is an underclass body organized to promote every worth while activity and undertaking on the Hill. Their field of work is large. They promote school spirit, foster athletics, enforce traditions and make themselves generally useful wherever the opportunity presents itself.

The local chapter was organized in 1921 by 21 members of the sophomore class at that time. This body existed as a local organization until the spring quarter in 1922 when it became one of the charter chapters of the national organization of Inter-Collegiate Knights which was founded by the Knights of The Hook at the University of Washington. The national charter made little change in the purposes of the Fangs other than enlarging them.

The personnel of the organization at the present time consists of 22 men, 11 sophomroes and 11 frosh; two sophs and two frosh being chosen from each of the four social fraternities and three sophs and three frosh from the non-fraternity group. This makes the body truly representative.

(Continued on page four)

Bobcats Play First Game With Fast Bobkitten Squad

Fair Crowd Sees Game on Gatton Field Saturday, Freshmen Show Good Form. Varsity Scoring Machine Still a Little Ragged. Many Prospects Are Being Developed

The Blue and Gold football season started last Saturday when the Varsity eleven downed the first year string by a score of 13 to 0. In spite of the fact that it was an early season game and that Coach Romney used nearly every man of his squad of forty-five in the contest the results were favorable and the M. S. C. supporters were given cause to look forward to a bright year in their football activities.

The first score of the game came after the Varsity had taken the ball from the kick off down the field against a stubborn resistance set up by the first year men. Capt. "Scotty" MacDonald was forced to punt and the ball hit a frosh player to roll over the line where Mashin fell on it for the first score. "Scotty" kicked goal and the counter stood 7 to 0. For the remainder of the first half neither side was within scoring distance.

The second counter of the game came at the beginning of the last quarter. During the last part of the third quarter the Frosh found themselves being pushed back steadily and the quarter found them on their own twenty yard line. The final period opened up with the Varsity getting closer and after overcoming the strongest kind of opposition pushed the ball over for the second and last tally of the contest. Romney missed goal.

All during the game there were slow periods, new plays getting off to a slow start, and forward passes incompleted due mainly to the high wind that prevailed during the play. Frequent changing of men and positions retarded the game some, but the results of the fray were very favorable and the coaches were able to see the possibilities of their squads under certain conditions and with certain combinations.

The line up at the start of the game was as follows:

Varsity (13)		Freshmen (0)
	Center	
McIver		Wilson
	Left Guard	
Cashmore		Hudson
	Right Guard	
Hannon		Haley

(Continued on page three)

Fraternities Have New Rushing Rules

Mens Caucus Adopt Rules to Go Into Effect This Fall Quarter

SIX WEEKS OF SUSPENDED PLEDGING

Last spring, the Men's Intrafraternity Caucus adopted new rushing rules which are to go into effect this fall quarter. The new plan is one of suspended pledging, the closed period covering the time from registration to the Saturday following roundup week. This Saturday is to be known as Pledge Day.

The following rules and restrictions apply only to men registering in Montana State College for the first time. The rlues adopted for the plan are:

Before 12 o'clock noon of the Thursday preceeding Pledge Day, each fraternity shall have placed in the hands of an agency, or person, to be selected by the men's caucus, a written, sealed, addressed bid for each of their rushees.

Each rushee shall be notified by this agency or person that he has a bid to some fraternity and that he is to call for the same at some certain place—to be selected by the men's caucus.

A representative shall be present at the presentation of bids.

The rushee shall notify the fraternity he chooses before 6 o'clock P. M. Pledge Day, by calling at the fraterninty house.

There shall be a period of silence from midnight Thursday before Pledge Day to 6 o'clock P. M., Pledge Day or to the time of accepting a bid, during which time no fraternity man shall hold conversation with a rushee.

No fraternity shall entertain a rushee more than once a week during the closed season and no fraternity shall entertain more than four men at

(Continued on page three)

Underclassmen Will Fight it Out Saturday

Organized, Supervised Contests Will Be Held on Athletic Field. Rivalry Is Keen

Who's who and what's what in the way of class scraps and contests this year? Here's the dope. The rest is up to the underclassmen.

At a meeting of the associated students last spring, it was agreed to change the character of the underclass contests to some degree. Heretofore, means of hazing have been carried out on many lines. Hair clipping, free auto rides on "one-way" trips and mixes in general, often resulting in misplaced teeth and dislocated joints, have all been featured. But that is mostly history now. A change was necessary for several reasons, scholarship being the outstanding one. Hair clipping expeditions are tough on the class work of the best students and three weeks of night hostilities means just that much time wasted.

Two occasions have been set aside for the holding of these organized, supervised contests between the freshmen and sophomores. The first, on September 29th, will be devoted to mass contests in which as many as possible of the men of both classes will take part. These contests will consist of mass ball, a mass race, shuttle relay race, a sack rush and a flag rush, and will certainly be of interest.

The second of these occasions October 3, will be devoted to contests between picked teams from the two classes and will consist of a foot ball game, a cross country race and an obstacle race.

The old M. S. C. fighting spirit will still be very eminent in the organized contests that have been arranged and there will be enough "punch" to the activities to make things interesting. Gatton Field, where the contests will be held, is a little softer for the "mixers" to fall on than a hard pavement and certainly offers more accommodations to spectators than are available in a dark alley on a dark night. A large crowd is expected to witness the activities.

The Fangs will have charge of all of the contests.

See the team off this afternoon.

THE BEGINNING OF OTHER YEARS AT OUR M. S. C.

A Short History of The Growth of The Institution

MANY INTERESTING CHANGES ARE NOTED

(By Dean Hamilton.)

Montana State College has completed thirty years of educational service and is this week beginning the most significant year in its history. The use of the splendid new buildings makes such a great addition to the plant and equipment that this year will mark the beginning of a new era in the growth of the college. No one can appreciate the wonderful progress of Montana State College without a backward glance at the conditions that prevailed at other openings of college years.

The first and real birth of any institution like that of a human being is the most important of all. September 15, 1893, the college opened for its work. There were no buildings on the newly acquired campus. The president's office and some recitation rooms were in the Irving School Building. Most of the work was done in a frame building which stood on the site of the Catholic Church. The faculty consisted of a president and six members and during the first year 139 students were registered. But one year of preparatory work was required for admission to the freshman class. There were eight sophomores and thirty-four freshmen the first year, the other ninety-seven were preparatory and special students. During the summer of 1894, the brick veneer building lately used for biology was erected and at the opening of the second year in September was occupied by the offices of the experiment station and the classes in agriculture.

The next great opening anniversary was in the autumn of 1898. In 1895 the state legislature had provided thru a bond issue $100,000 for buildings. Out of the money derived from the sale of these bonds, the Main Building (Montana Hall), the old chemistry building which burned, the stone portion of the old engineering quarters, the old gymnasium, and the main part of the old frame shop building were erected and partly equipped. The corner stone of the main building was laid October 21, 1896, and the build-

(Continued on page four)

EXPONENT MEETING

There will be a meeting at the Omega Beta Fraternity house at four o'clock Sunday afternoon, September 30th, for all students interested in work on the Weekly Exponent. The Exponent work will be discussed and assignments will be given out to those desiring to try out for reportorial positions on the staff.

HARRY McCANN,
Editor.

New Buildings Are Opened

Several Old Buildings Being Remodeled. All New Equipment Now Ready

The opening of school this fall finds the new buildings all completed and occupied. In addition some of the old buildings are being remodeled and renovated for use by other departments. This together with the new driveways which are rapidly nearing completion makes the campus a picture of contrast to those we knew at M. S. C. four or five years ago; and to those who have the interests of M. S. C. at heart, the contrast is indeed pleasing.

The gymnasium which was opened last wniter is now being occupied by the football squad and should prove to be a great drawing card to the high school athletes of Montana.

One of the finest buildings of its kind in the northwest will now house

REPORTORIAL

Reporters being selected by Competition

OFFICE HOURS

TOWN OFFICE—Room 1, Courier Building; Phone 80 Monday 1 to 6 P. M.

With the opening of the college year of 1923-24, the Montana State College of the Greater University of Montana, enters into a new and greater field of higher education. The new buildings and equipment, that are all now complete and ready for use, offer greater privileges and opportunities to the student than was ever possible before. When registration is completed, a record student body will be enrolled and will have the opportunity to enjoy all these privileges to the fullest extent.

That you are here now means that you are part of the fortunate body of high school students of the country who have the opportunity to attend an institution of higher learning and that you are here at Montana State also means that you have made an excellent choice of the College where you are to reap the benefits of your opportunity. We congratulate you.

To the young man and woman who are here with a serious purpose in mind, who are here for business, Montana State College will pay large dividends. No college in the country can pay larger. For the drone and loafer, the person that comes only for a good time—Montana State College has no place.

We assume that you are here for business. Get busy right away, don't wait until "next week." Keep up with the work of your classes. If you have been accustomed to just "getting by" in high school, raise your sights here. Remember that you are in college—and for business. You will get out in value received just what you put in effort.

Here, your time is your own. You can do practically as you please but remember, the habits that you form at college are the habits which will characterize your career after college. Develop your personality, associate with your fellow students and get their ideas, take an active part in the student life. Spend your spare time wisely. The part that you take in the activities of college life will be much the same as the part that you will take in your community when you are through college. You don't want to be looked on as a "dead one" in your community. Be a "live wire" and a booster here and one in your community later. Make it a point to attend meetings, to support student organizations and to be prominent in at least one student activity. Try out for a place on an athletic team, debating squad, the Exponent staff, the band, glee club or any other college organization. Aim to do effective work in one or two activities, don't dabble in several. Above all, put your shoulder willingly to the wheel and be a BOOSTER. Knocking hurts your associates; it hurts yourself most of all.

If you make your first year at college a big one the rest will take care of themselves. Again, we are glad that you are with us and we wish every success.

APPRECIATION

The Editor expresses appreciation, on the part of the staff, for the help given by several members of the faculty toward publishing this first issue of the Exponent. The articles contributed by the faculty are of interest to all readers, old and new and express facts of especial value at this time.

THE STAFF

The staff selected by the Editor to start the paper this fall appears in this issue. The selections were made purely from the standpoint of merit and service. Future advancements and appointments will be made on the same basis. It will be the aim of the Staff to cover the College news each week in a thorough and impartial manner. The Editor trusts that the Staff as selected will meet with the approval of the Student Council.

As usual there are places on the Staff that are open to new students. News paper experience is an asset but by no means a necessity. Dependability and willingness to work are the only requirements.

The Editor will be glad to talk over the work of the Exponent with all who are interested. For this purpose a meeting will be held Sunday September 30th at four, at the O. B. house on South Willson. Members of last year's reportorial staff, and new students who are interested in newspaper work are cordially invited to attend.

WHAT'S DOING AND WHEN

Tuesday, September 25, 1923, 8:00 A. M. to 5:00 P. M. —Registration.

Wednesday, September 26, 1923, 8:00 A. M. to 5:00 P. M.—Registration.

3:30 P. M.—Meeting of all freshmen in Assembly Hall, Main Building, called by the President.

9:00 P. M.—Women's League Dance, Gymnasium.

Thursday, September 27, 1923.—Classes as per schedule.

Friday, September 28, 1923 —Classes as per schedule.

Saturday, September 29, 1923—Classes as per schedule.

2:00 P. M.—Freshmen-Sophomore Mass Contests.

8:30 P. M.—Faculty Reception and Associated Students Dance, Gymnasium.

Saturday, October 13, 1923. —2:00 P. M.—Freshmen-sophomore Games.

25 FOR VARSITY AT BRUIN CAMP

Backfield Is Stronghold; Stewart Must Build Line

Missoula, Sept. 24.—(Special to the Exponent)—Football is at it's height of pre-season workouts, and with today the last of initial training, the Bruin varsity aspirants are giving their best for berths on the team.

And practically all of the material out for the varsity team, which has not numbered over 25 candidates since the season opened on September 12, will be used in the schedule that faces the Bruins this fall. Starting with Mt. St. Charles on October 6 at Missoula, the Bruins will have a tough schedule until December 1.

At present the schedule for the Bruins reads as follows:

Oct. 6—Mt. St. Charles, Missoula.
Oct. 13—U. of Idaho, Moscow, Ida.
Oct. 20—Miners, Butte.
Oct. 27—Gonzaga, Missoula.
Nov. 3, Whitman, Missoula.
Nov. 10—U. of Washington Seattle.
Nov. 17—Bobcats, Bozeman.
Dec. 1—Pacific U, Portland, Ore.

Those answering for practice calls that wear Bruin 'M" sweaters are Maudlin, Silvernale, Shaffer, Johnson, Hoffman, Christie and Taylor. Of this squad Silvernale, Johnson and Christie are backfield men while the remainder were in line positions. Promising cub material in Shugure, Illman and Griffin is out for varsity places this year, while several of the Cub team of last year are bidding for line positions.

But it is in the line that the Bruins will have their weakness this season unless Coach Stewart can get some men into shape for work. So far 15 linemen are trying for positions while 7 are trying for varsity backfield positions.

The Bruin backfield is fixed so far as material is concerned. Johnson, Silvernale, Illman and Shugrue look good for backfield berths. All of them are fast, hard-hitting men. Silvernale is known for his ability to get through holes while Johnson is equally well known. Illman is good backfield material having played fullback on the Cub team last year, and playing the same position in his trials for the varsity.

the spring at the time the seniors appear in their derbies.

The freshmen class serves as a committee of the whole to render any help asked of them by the athletic managers.

On October 12th, the freshmen class gives the "M" a coat of whitewash, and afterwards holds a class picnic in Bridger Canyon.

Freshmen shall not enter college buildings through the front doors untill after the underclass mix on October 13th.

The members of the freshmen class are expected to supply wood for rally bonfires.

Freshmen are not allowed to have "dates" until after the underclass mix, and are not allowed to "fuss" on the campus.

Senior advisers are selected by the Senior class each year for the freshmen. The freshmen girl's advisor is Miss Ella Clark. Charles King is advisor for the freshmen men.

Freshmen are not allowed to sit on the "Senior Bench", east of the Main Building.

The tradition and customs of Montana State College are enforced by Septemviri thru the Fang Chapter of Intercollegiate Knights. Students violating them are punished according to the offense.

The freshmen customs are usually enforced by members of the sophomore class, and the punishment is rather drastic, consisting of a dip in the "frogpond".

FOOTBALL GAMES SCHEDULED FOR VARSITY AND KITTENS

(Continued from front page)

College at Rexburg, Idaho. The complete schedules are as follows:

VARSITY

September 22—M. S. C. Frosh at Bozeman.
September 29—Brigham Young University at Provo, Utah.
October 6—Idaho Tech at Pocatello.
October 18—Denver University at Bozeman.
November 3—Montana Wesleyan at Bozeman.
November 10—Mount St. Charles at Helena.
November 17—Montana University at Bozeman.
November 24—Colorado Teachers College at Greeley.
November 29—University of New Mexico at Alberqurque.

FRSEHMEN

September 22—Varsity at Bozeman.
September 29—M. S. C. Second Varsity at Bozeman.
October 6—Jefferson County High at Bozeman.
October 6—Park County High at Bozeman.
October 13—Sophomores at Bozeman.
October 20—Montana University Frosh at Missoula.
October 30—Brigham Young U Frosh at Bozeman.
November 12—Ricks College at Rexburg, Idaho.
November 29—Billings Poly at Billings.

SEPTEMVIRI GOVERNS TRADITIONS AT M. S. C.

Of all the organiations at M. S. C., the one of most importance to the incoming freshmen is Septemviri. Septemviri was organized for the purpose of perpetuating, creating and governing the traditions of Montana State College. The members of Septemviri are selected from the Junior Class each spring and serve during their Senior year.

The membership is limited to seven active members, chosen by a faculty committee. The election is on a basis of scholarship, leadership, personality, and activity in school affairs.

The organization serves in an advisory manner and its work is carried out largely through the Fangs Chapter of Intercollegiate Knights. At the beginning of each year, Septemviri takes charge of the underclass scraps, and makes the incoming freshmen familiar with the traditions of Montana State College.

The present members of Septemviri are Emmett Moore, chairman; M. A. Bell, vice-chairman; Harry Wallace, secretary-treasurer; Charles Schurch; David Willson; William Flood; and LeRoy Powers.

Many Customs and Traditions at MSC

In the twenty-six years that have passed since Montana State College was founded, certain custome have been evolved. Some of these were started by some class and by common consent retained by the succeeding classes, while others were more or less formally adopted by the student organization.

Up until this year there has been more or less organized hazing in the form of hair-clipping, free rides into the remote sections of the Gallatin valley with one-way tickets, and involuntary baths in the pool known as the frog pond. This hazing has been discontinued on account of the effect it had on the scholarship and athletic activity of the members of the underclasses.

By agreement of the Associated Students, smoking is prohibited in buildings and on the steps of buildings on the college campus.

Every student is expected to attend the weekly assemblies held each Friday, and any special assemblies that may be called.

From time to time, rallies are held for the purpose of working up enthusiasm for athletic contests. It is expected that all students will attend these rallies.

Freshmen and Sophomores are not to wear dress suits to any college function.

By agreement of the Associated Students, the wearing of high school letters, or letters of other colleges, is forbidden on the campus.

Freshman Class Customs

Green caps are worn by all fresh-

Green caps are worn by all freshmen boys and green ribbons by all freshmen girls as a distinguishing mark until after October 27. Caps and ribbons must be worn again in

GREETINGS TO WOMEN STUDENTS OF MONTANA STATE COLLEGE

You are very welcome, the women who are returning and the women who are registering here for the first time. One of the very greatest reasons that a technical college brings us a sense of satisfaction is; that the student comes here with a real objective point and sometimes with a vision. Our career is but the measure of our vision.

When we look into the lives of men and women who have reached high places who have moved forward with the years, we always find that they were inspired with some great purpose.

If we were to analyze their success, we would find that it was achieved because they pictured again and again the thing that they wished to accomplish and refused to let the vision go. The trouble with most of us is, our dreams are intangible, they are confused in our minds, hence, they fail of accomplishment. Let us make 1923-24 perfect in the planning—bending every effort toward the execution of our plan. Then, when our vision is beginning to be realized —as it will—if we are faithful, God forbid, that we shall grow smug and satisfied, but let us keep on striving.

Always,
UNA B. HERRICK.

TO HOLD ANNUAL MIXER IN GYM WEDNESDAY NITE

In order that the faculty members, extension workers, clerks, student body and everyone interested in Montana State College may become acquainted at the beginning of the year, a general mixer will be held in the gymnasium on Wednesday evening at eight o'clock. Several prominent faculty members will give short talks on affairs of interest to the college community and a musical program will be given by the musicians in the department of music.

Immediately following the program, a dance, given by the Women's League, will be held in the auxiliary gym. This will be strictly informal with introductions unnecessary.

This first-get-to-gether of the year promises to be a good one and every one interested in college affairs should take this opportunity to become acquainted. Get the true M. S. C. spirit "right now" and be at this mixer all ready to —"Just walk right up and say Hello".

SOCIETIES

An announcement was made on September 11, of the secret marriage on November 11, last, of Miss Helen Chase and Mr. James Robert Walter. The marriage was solemnized in Missoula at 6:30 in the evening, after the University and College football game. Miss Mary Baldwin, Miss Margaret Conkling and Ted Johnston witnessed the ceremony.

The marriage of Madeline Shaw and Eyrle Daws took place in Big Timber on September 19th.

Isobel Haughland and William Haley were married in Los Angeles, California, in September.

Members of the Chi Omega Fraternity have moved into their new home for the year. The chapter house is the former home of General and Mrs. L. S. Willson, 504 So. Willson Ave. There will be about fifteen girls staying at the house with Mrs. Sarah B. Jones as chaperone.

The announcement of the marriage of Valborg Rivines and Lee Popham on April 8th was of special interest to students on the Hill. Mr. opham is a member of the S. A. E. fraternity and is in the class of '24. Mrs. Popham belongs to the Alpha Omicron Pi fraternity and is a member of the class of '23. At present they are residing on West Koch. Mr. Popham is employed by the College Extension Department.

Pi Beta Phi fraternity, with seven active girls and two alumni living in the house, will be located at 404 West Olive this year, in the house formerly occupied by G. R. Powers. Mrs. Zula Montgomery will be fraternity housemother. The following non-resident girls have returned and will live at the Pi Phi house: Ruth Davidson, Katherin Andrews, Evelyne and Elva Ayler, Ethel Sanford, Margaret Williams, Margaret Connors, Eleanor Marston and Edith Stanley.

Virginia Pollard, '26, has entered Washington State College at Pullman, this year.

The Iota Delta's have moved into their new house, the Dave Reed house at 521 So. Sixth.

Word has been received of the marriage of Miss Ethel Briner and Sidney S. Sutherland, graduates of M. S. C. in '23. Miss Briner was a member of the Iota Delta fraternity and Mr. Sutherland of the Omega Beta fraternity.

Miss Gale Tidland, of the class of '25, is attending the College of Idaho.

Miss Mildred Roberts, '26, of Anaconda, and Elmer N. Wanamaker of New Jersey, were married on September 10th and are now living in Perth Amboy, New Jersey. The bride ws initiated into the Pi Beta Phi fraternity in February of last year and completed her freshman year in college.

Misses Alice Stranahan, Mary Baldwin, Margaret Crystal, Lillian Evers and Solveig Rivines have already taken up residence at the Alpha O. house.

A June wedding of interest to M. S. C. students is that of Hazel Davidson and Thomas Gleason. They are making their home in Livingston.

Miss Alice Metcalf is Iota Delta house-mother for the coming school year.

Summary of the play follows:

Gains—From scrimmage: Varsity, 333 yards; Frosh, 104 yards. From forward passes: Varsity, 33 yeards; Frosh 18 yards. Total gains: Varsity, 366 yards; Frosh, 122 yards.

Forward passes—Grounded: Varsity, 6; Frosh, 9. Intercepted: Varsity, 0; Frosh, 2.

Kickoffs—Frosh kicked off four times, totalling 170 yards or an average of 42.5 yards per kick.

Punts—Varsity punted nine times, totalling 226 yads or an average of 25.1 yards per kick. Frosh punted 18 times, totalling 549 yards, or an average of 30.5 yards per kick. Varcity ran back seven punts 100 yards. Frosh ran back four punts 17 yards.

First downs—Varsity made 14 first downs. Frosh made six first downs.

Penalties—Varsity penalized eight times, totalling 75 yards. Frosh penalized two times, totalling 10 yards.

Losses behind the line—Varsity lost 17 yards behind the line. Frosh lost 28 yards behind the line.

SWEENEY—MENARD WEDDING

Alice Menard, '24, and Joe Sweeney, Missoula '25, were married Monday morning, September 24, at eight o'clock at the Holy Rosary Catholic Church. Margaret Connors and Louis Undem were attendants, and only relatives and intimate friends of the bride and groom were present at the ceremony. The bride was initiated into Pi Beta Phi fraternity in 1921, but for the past year and a half she has been living at the ranch home of her parents, Mr. and Mrs. T. E. Menard, and has not been attending college

The groom is well known in Bozeman, having attended college here for three years, where he was initiated into the Sigma Chi fraternity.

MANY NEW FACES ON COLLEGE CTAFF

(Continued from front page)

for scholarship, leadership and activities.

In the Home Economics Department, Miss Florence Fallgatter takes the place of Miss Edith Franks, who has resigned to go to Michigan Agricultural College as Assistant Professon of Home Economics. Miss Fallgatter graduated from the University of Minnesota in 1917 and has had graduate work in the University of Minnesota and Columbia University. She has had a wide experience in Smith-Hughes work in Minnesota, and will devote a part of her time to Smith-Hughes inspection work in the high schools of Montana.

Dr. Harry S. Cannon succeeds A. T. Connel as Head of the Department of Modern Languages. Mr. Connell has gone to the University of Southern California as Assistant Professor of Spanish. Dr. Cannon did his Bachelor and Master work at the University of Kentucky and took his Ph. D. degree at John Hopkins in 1920. Dr. Cannon majored in German and will take charge of the German courses which are being re-established. He will also teach some of the French courses. Dr. Cannon taught for one year at John Hopkins, four years in the University of Minnesota, and three years in the University of Kentucky.

Miss Sue M. Burton comes to M. S. C. from the University of Minnesota to teach Spanish and some of the French work. Miss Burton took her Bachelor degree in 1921 and her Master in 1922, both at the University of Minnesota.

Miss Emma M. Shoup takes up her work as Library Assistant, succeeding Miss Marguerite Kirk, who has gone to the Portland Public Library. Miss Shoup is a graduate of Purdue University and took her Library Training at Illinois University.

In the Department of Music, Professor Joseph Adam takes the place of Professor Jess Ewer, who has taken charge of the Music Department at Alma College. Professor Adam had his musical training at Trinity College at Hartford Connecticut and spent five years in study abroad. He has had wide experience as a teacher, pianist, and orchestra director and has composed some music of established merit.

Ninna B. Dorn, a graduate of the Cincinnatti College of Music and the Conservatory of Music, comes to M. S. C. as Instructor of Vocal Voice. Since her graduation she has been soloist with the Cincinatti Symphony Orchestra.

Miss Florence C. Hood will take the work in violin and viola. Miss Hood also took her training in the Cincinatti Conservatory of Music. Since graduation she has been teaching in California and has spent some time in concert work.

Miss Sarah W. Jennings will take the work of Professor W. F. Brewer, who is in Chicago University of Chicago on Sabatical leave. Miss Jennings took her Bachelor degree at Grinnell College, and her M. S. and Ph. D. degrees at the University of Wisconsin, where she has been assistant in the English Department for three years.

Miss Aline Burgess, M. S. C. '21, is Assistant in the English Department. Miss Burgess needs no introduction to the old veterans at M. S. C.

Professor Cecil Starring has returned to his work in the Horticulture Department of the College of Agriculture, after a year's work in California. He will have the work handled last year by Mr. M. M. Oliphant, who is in Smith-Hughes work at Big Timber, and some of the courses taught last year by Professor Harrington.

NEW FRATERNITY RUSHING RULES

(Continued from front page)

one time. An entertainment is construed to mean a period of not more than 24 hours during the Rushee's first week in school. After his first week in school, no rushee shall lodge at a fraternity house.

No rushee shall attend a calendar party.

After 6 o'clock P. M. Pledge Day the above restrictions will be raised.

The enforcement of the above rules will be in the hands of the Faculty Fraternity Committee.

TO THE OLD STUDENTS:
We welcome you back.

TO THE FRESHMEN:
We hope that you will like the College, our town, and us, when we become acquainted.

GOOD MORNING MR. GALLAGHER. I AM READY MR. SHEAN

(Continued from front page)

Hamilton's ideas on taxation problems. Then if fancy happens to turn, I might take a crack at literature (with the help of the English department) for I really know nothing of that subject. In other words, the typewriter will be allowed to take my fancies where and when it will. The idea is to make a column unlike anything in a college newspaper now appearing in the Treasure State.

o—O—o

Now, Eli is a "colyumist" and many people object to his collection of humor. But this can't be classed as anything in the same domain. I want to be original, if originality is possible in this age of lodge seats for two, runabouts for two, and those apartments that only two people can possibly get into. I admit I may do my turn like the English journalist who uncovered a sensational murder story only to find that the victim had been buried six months and the murderer hanged. He discovered it when he picked up an old American newspaper out of a garbage can. My only saving grace under that situation would be to distort the yarn to make the police believe it a brand new murder.

o—O—o

Yes, we have no more features today!

NEW BUILDINGS ARE OPENED FOR REGULAR WORK

(Continued from front page)

the engineering department. The civil and mechanical engineering departments will occupy the first and second floors, the electrical will reign on the third floor, and the architects will hold sway on the fourth floor. One of the features of this fine building is the engineering assembly room located in the east wing of the lower floor. It has a seating capacity of over two hunded and is equipped with the very latest type of movie machines.

The engineering shops have been generously furnished with up to date appratus and equipment making possible an excellent class of instruction in the various engineering laboratories.

The new biology building, known as Lewis Hall, with its hundred rooms furnishes ample quarters for the entomology, biology, and zoology departments. The modern language department will also be located in this building.

The old "bug building" will be the new quarters of the extension workers, while the old engineering building will be known as the Math building and will be occupied by the mathematics and secretarial departments.

ATHLETICS SEE NEW LIFE HERE

Physical Education Offers Much to College People

By Coach Romney

A magnificent new gymnasium—a home for physical education and play activity which leaves little to be desired—enables the department of physical welfare to assure you the golden opportunity for happy, wholesome, healthful and carefully directed recreation. Our splendid facilities beckon you and invite your participation in health-giving activity. And the institution and the particular department of physical education and athletics urge you to accept this invitation.

Here at Montana State College we choose to look upon our gymnasium, not only as a health factory, but in a bigger sense as a laboratory for the development of manhood and womanhood; as a training ground for sportsmanship and citieznship. We believe that the recreational facilities of the gymnasium should serve the larger ends of education in a social and a habit-forming sense.

We stress intra-mural athletics because we are trying to bring the satisfactions and benefits of cooperative, competitive play to all our students; we stress intercollegiate athletics because we believe that they not only pay a big dividend in education to the participants but they provide an opportunity for, and act as, the centralizing, spirit-firing, unifying, loyalty-inspiring agent in the student body—in fact for all the units which go to make up a college.

A splendid spirit of democracy and fair-play pervades the entire institution in al its activities and it is the aim of the athletic department to invite and tempt every man and woman in the institution into some play activity with the idea and assurance that he will be given every opportunity to make good, and that at least, he will learn to love and play the game and to appreciate its satisfactions.

We look for a happy year with our athletic teams, for we feel that a strong, sportsmanlike, unbeatable fighting spirit is firing the student body and its athletes to big achievements.

THE BEGINNING OF OTHER YEARS AT OUR M. S. C.

(Continued from front page)

ings were ready for use at the opening of the college year 1898. These new buildings in their day meant just as much to the college as the magnificent new buildings do in this autumn of 1923, and the rejoicing of the students, faculty and friends of the college was equally sincere and appreciative. It indeed was a notable day when the work of the college could be moved into its own buildings on the campus. In the intervening years, the faculty had increased to 19 and the number of students to 201. The requirements for admission to the freshman class had been raised to three years of preparatory work and the number of regular college students had grown to 36 only.

After the bond money was expended, no buildings of any considerable size were provided for several years. The old heating plant in the rear of the main building was built in 1901, the present veterinary building in 1902, the granary in 1903 and the dairy barn in 1904. It was not until 1905 that the money was appropriated for the Agriculture Hall, this building up to that time was the best on the campus was completed in time for the opening in 1908. This was time for great rejoicing in the agriculture and home economics departments and much envy on the part of the engineering faculty and students. Agriculture had been housed chiefly in the old biology building and the home economics department was in the basement of the main building under the library. At first it was not intended that home economics should share the new building with agriculture during the session of the legislature, the members visited the college in a body and were treated to such a fine dinner of roast chicken and pumpkin pie, that they agreed to appropriate money for the new building on condition that the home economics department should have one entire floor.

In 1910, the women students were given the opportunity for a celebration when Hamilton Hall was built. The hall was really occupied by a small group at the middle of the year but the real opening was in the autumn of 1911. Perhaps no building on the campus has added as much to the social and recreational life of the students as Hamilton Hall.

Many events such as the appearance of the first football team, the Weekly Exponent, the college annual, the first fraternity, have marked the openings of college years. But none of these things are so spectacular as the dedication and use of a new building. The erction of the buildings since Hamilton Hall is so recent as not to need notice. The students who enter Montana State College in the autumn of 1923 for the first time are most fortunate. They will have the use of these new buildings and the equipment and facilities which they house for the full four years of their course. Who can forcast the growth and progress which the class of 1927 will witness at Montana State College.

VARSITY SQUAD LEAVES FOR SOUTHERN TOUR

(Continued from front page)

defeated their Varsity on an average of twenty points. Put these two teams together and they will certainly produce some strong arguments Immediately after the game they will return to their headquarters in Salt Lake to go into a weeks training prior to their second game on the trip.

On Friday, October 5th, the squad leaves for their invasion of Idaho. Coach Hutchinson swears vengeance after the Frosh game of last year and chose the Varsity to even up with this year. He certainly means business.

This game will complete the schedule for the Bobcats. They will leave for Butte the following day and will arrive in Bozeman about eleven o'clock Monday, October 8th.

FANGS PROMOTE COLLEGE AFFAIRS

(Continued from front page)

There are four officers in the organization. The yell leader of the college is the ex-officio king of the body. The Duke, who is elected by the chapter, is the executive head and is the stunt duke of the college. The other officers are the royal scribe and the chancellor of the exchequer. The present officers are:

King—Stewart Avery.

Duke—

Royal Scribe—Morris Griffith.

Chancellor of the Exchequor—Geo. Scotten.

The present junior members will remain in office till after the class scraps when the new members take over their duties. The eleven sophomores are already chosen, and the eleven freshmen members will be chosen after the scraps. Membership is for two years, the freshman and sophomore years.

The emblem of the fangs is a Bobcat head, with bared fangs, mounted on a blue background, and is worn only by active initiated members as a breastplate on a white jersey. Pledges wear white jerseys while on duty. The pin of the ntercollegiate Knights is a gold shield surmounted with a silver helmet. Diagonally across the shield is a gold band, and in the opposite corners the letters "K." and "N". The pledge ribbon is red and blue.

The Intercollegiate Knights in some respects is not an honorary body, and its members are not chosen by virtue of school honors. It is a body for service to our alma mater and through this service it became an honor to be an Intercollegiate Knight.

CO-OPP BOARDING CLUB

The Co-Opp Boarding Club, organized last year at the suggestion of several members of the alumni association , is being continued at 702 South 3rd Street, the present year.

Mrs. Dora Mecklenberg, for 2 years at the Billings Poly Tech is to be matron in charge.

Before the opening of college, 70 persons had engaged board in advance.
