

paroiya-sanjeev-2017-01-14.mp4

Sanjeev Paroiya [00:00:10] It was a very very long time actually very, very long time. I learned this game from my [not sure]. He was doing that time his angling. So I learned this game from him.

James Thull [00:00:21] Ok.

Sanjeev Paroiya [00:00:21] That was [unintelligible] and that will be I think 10 years ago, 12 years ago, something like this.

James Thull [00:00:27] What type of fish was it?

Sanjeev Paroiya [00:00:28] Oh that was bait fishing. Bait fishing.

James Thull [00:00:30] Bait fishing? What type of fish did you catch?

Sanjeev Paroiya [00:00:33] [four?] mahseer. Basically [four?] mahseer that time.

James Thull [00:00:35] Yeah, big fish? Little fish?

Sanjeev Paroiya [00:00:38] That was uh, my first one was not a big one. That was approx a five to six pounder. Yeah.

Sanjeev Paroiya [00:00:48] They had a good fight, yes. And we had- sometimes we had such a good fights from the, from the species. Yes they are very strong. Very fast, yeah.

Sanjeev Paroiya [00:01:03] For mahseer, we always go for the [nettle ???], like small fishes. Sometimes we go with a deadweight. Sometimes we can go with a light weight. And sometimes we tried some different bait, like dough, like a piece of meat, like chicken [guts?], something like this.

Sanjeev Paroiya [00:01:27] My biggest catfish was 87. JACOB movement. For the school official eat fish warrior.

[00:01:36] Yes. Yes. You know some very famous fishermen you know Jeremy waves. Yeah. That's very nice guy. Do you have movie. I. Pete I played three times for Jeremy. Yes.

[00:01:51] Well he was fishing for Gooch moon shot big fish. Yeah. Yeah. Wonderful. He he on this such a man eating fish. Yeah yeah. That's. That was fish. Yeah yeah yeah.

[00:02:07] It's not possible to get any dealt with it. Actually you have to use some spinners. And some flies. So with fly then it is minus a spoon. It's possible but with a bait it's not possible. Oh.

[00:02:26] Actually they don't have any big sites. So with their size. That's a good idea.

[00:02:32] Yeah. Yeah. Did they jump out of the water yet. Yeah. Yeah. Wonderful.

[00:02:41] We'll see if they can live better because because God is living very very deep. That's why they they can't go there. I said. So they still. Stand with the service.

[00:02:58] Yes it is. And they wait for the food to come to them actually.

[00:03:03] Must have been massive. It's possible drought. They are very crazy. They are more aggressive than that are massive. Yes. So that is that ping yes. Oh I love I want to. Know. About many many species actually that I am doing my fishing. I want to know about many many species of this river. So that's why I'm going fishing for new species. Yes it's a recession. Of species. In summer. After much after summer and after rainy season. Then it will be.

[00:03:51] Others September. So before and after the monsoon. Yeah I said yeah because other spawning season the always. Hungry. Because of their.

[00:04:02] Eggs that they lay their eggs. Then they feel hungry. Yes. Yes at all. Costs.

[00:04:13] Wildlife. A tiger Blackbird elephant deers. Many many thanks very much. He is so beautiful birds to. The specialized off fishing actually.

[00:04:29] Giving fishing breaking birdwatching and gapping expeditions camping so you can't write down the rivers.

[00:04:36] Oh very nice very nice. And what type of fishing especially for mercy from our series. And where do your guests come from. Who. From from. From the world. All over America United States from you. Yeah. Yeah. Very nice very nice.

[00:04:59] I love them. Yeah because I feel because if I have. I'm on sanctified net list off without Joe Goldman. Oh yes I have my circulation. I did cause for this celebration. Let's go.

[00:05:14] So you did a course to get certified as a naturalist. Yes. And what does that entail. What does that mean. Oh that means. My hobby.

[00:05:24] Because of my hobby. I love boats I love. Creatures. God made by God. That's I. I did get one.

[00:05:38] That's my name off my religious Germany. And he is just just behind this mountain just behind it. OK so very close. Yes. I see.

[00:05:52] Yeah. One day I got a call from my friend. He said I saw a snake in somebody's house. So I was actually I was not here at that time. I was 70 80 km far from that place. So when I come back. First time in my life I saw that COBRA that was a king Gouda of sixteen and a half feet 60 now feet.

[00:06:16] Yes. So my plus died. How did you catch him. Kuwait. I with my hands just with your hands. Then when you you know when you know them. It makes it easier.

[00:06:31] To see them. They know he's our you know he's not our enemy and his force for saving us. That's not always. Good. Yeah yeah yeah. They can understand us.

[00:06:45] Yeah. And so then you catch them and then really suddenly it's a while. Of course.

[00:06:51] I always make God for flies department. They come. Then I. Handle that. Go to. Them. Or in inside the park. No. But nearby BERKUS. Yeah I am living here since David continuously. Yes we can live without eat. But we can't live without water. It is very necessary for us. For peace for both species. Park Annie. And Esposito. So it's Venus. Yes.

[00:07:39] The guard is nearby. We have lots of big markets nearby the he. So from from that market. Lots of others come to the river coming to the river. So that's the really bad so pollution yes is overpopulation a concern or overuse. Overpopulation we get see.

[00:07:59] Yeah and oh we used to. Yes I say yes. Yes actually we don't have enough water to.

[00:08:10] Drink. So their side going right is you know pulling. They have a big big system for pulling orders from the river to the top. So we have lots of potholes nearby what we have one nearby. So that is the problem that can be a problem. Interesting. Because what live is just going down down down the middle. Yeah. So that can a problem.

[00:08:39] Was this time this actually does. This time is not good. But few years I will. That was really awesome. But now. It's. Changing. And here we when we go to the river that or if you. If you go to the river venue you can see many many big sizes of fish Gooch droughts eaten. And other species. But this time you're gonna see some of them not. Not. A. Lot. So that is the change. Why is it they don't know about.

[00:09:19] This thing. They do. Indian government. I think. The government leaders they don't know about and link they don't know about feces is disease officials. They don't know how how to get them how to release them. What is the game. Catch and release. So. They are. Not good for this.

[00:09:43] It is rising. OK. Now it is rising. And now I can say it. It is. It is a popular game in India. It is. Yes. Very good. Yes. Now a lot of people are doing this game but some et al where you can see. Many many peoples. But now they are having an interest. Yes. Yes. You know.

[00:10:05] Well yes it is because a few years there will be. We have a committee for this. Massive condemnation. But it's close not. To the level people knows. That is a good thing for us and fishers would up and river. But now this is closed. No one is. Doing the right thing for this. So it's. A bit complicated. Xenia. Got it. This is the only one we who can help. Do this. Tourism is Venus cities.

[00:10:43] Yes. So maybe that the economic value of tourism that locals will see the value in the fish. Yes. I supply everything for am looking for their lifestyle for the value of.

[00:10:57] The nature of nature. Everything. Here. It is very important.

[00:11:08] This time because this is not a good season.

[00:11:10] Yeah but I mean more so is it on the rise and more coming every year. And what countries do they all come from what countries have you official.

[00:11:19] Lots of people are coming from England. Lots of people are coming from the US from Japan from Canada from Ivy every place abroad.

[00:11:27] Yeah. In order to fish for messier and you inch an Indian Trail. Yeah. And many many other services.

[00:11:38] I think that in my eyes we have a more than 26 US bases in this field. Some some are tiny. Some are some giant. Japanese so we have freshwater eels. We can do a fish sport. That's our deal here. We can do fish for Gooch. We're going to fish one we have a fish like bats catfish but in Hindi that's guy money. So we go to fish one Mali Indian tribes and Mongolia and a snakeheads.

[00:12:06] So many many services during snakehead fish for those in the Philippines. Yeah yeah right. We have a beautiful fish. Yes of course but yeah. The people who are coming from India in from my country.

[00:12:26] They are doing most little fixing. Some people are using its veto. Some people are using spoons but. Lots of people are coming from the England from it. I believe I love fly fishing. Yes.

[00:12:44] Who. That's that's a good esports actually you kinda get bored who fly fishing. Yes because you have to do lots of what. Fly fishing and it's fun.

[00:12:55] Yes. Have you fish with dry fire. Oh yeah yeah. Yes.

[00:12:59] Watching the I do fly fishing I do is spinning I do get fishing every day for fishing. Yeah. Yeah. Yes. All types of fish. Yeah. Good.

[00:13:12] Well former sheet bit fishing. Yeah yeah. Yes. And just for sport her to eat her. No no for pie sports. Get injuries. I sit here. I see.

[00:13:26] Who. Maybe. Pardoning. 13 year as I say. Yes. I have. Actually I want to see. Open this concentration. Don't play like this with the rivers so condensation is very very important part. Us for rivers for those season. So just do it. I will exit.
