

tani-masako-2015-12-14.mp4

[00:00:10] So one of the the. The fishing spot is a the name of the Rock Creek. In Montana. I've had it that. I don't know it's a one and ten years ago that was a my. My most. Kind of a. That's a special spot and I haven't ever had a center. Perfect fishing. And beautiful studio. But it's more than beautiful luxury in. The kitchen. Did this Pop. Pocket. Water. Some good some water. It's. Just. That. I expecting that the fish are coming out right. Right. There or something like that. And I. Some. Fry then and. They are coming. Right there. Which is unexpected. So you are not going to work that way. That should be coming from there that that. Usually not coming or a.

[00:00:57] Different way to go. That is it dealt with a project which I expect. It. Is a great fishing. So but it was a somebody is at the property. Private property. So. My. My husband's. Brother. Knows a person who own. Property. So that I could. Go fishing. There. Is a. Great. Place and I really wanted to go back. Sometime soon after that. Then he sold to that. Somebody. Legit. Now it's. Becoming. Expensive very rather the. The resort. Spot. So we can stay there. They'll. Have to pay it. More than twenty five hundred dollars. Per day or something like that. Lots of Sara very late to state stand there though. I cannot. So no more or less pot and I haven't ever. Dealt. That was the first. First and last one. Which is. Almost. 15 years ago. Well I really want to go back there. But. I cannot. Let. The dream spot. Still possible bill but it's. Almost impossible for me. To do.

[00:02:07] Then. That was. My. Favorite. Creek. Fishing spot. I haven't never had. So I started. Fishing. Next in Japan when I was very young. So then everybody is saying My because my husband is at the Fred Fisher. Shirt. Pretty famous. So that's why it did. So everybody believing and I studied fishing in this country. But it's already I did. Fish in Japan. That's why that's the reason I. Am. Now. I'm leaving this country. Maybe a chance to married with my husband too. So. But the. Japanese. In Japan actually that the. Fishing. Spot most of the fishing. Type of river is a cooperative different from this country. So for example. Most of the not everywhere though that at the most of the. River. In Japan is a. Mountain stream. More smaller and more. Kind of darker. More loop. And that lots of. Logging. I mean actually that. Bushes and stuff. Then. This country is at the not everywhere. But a typical good fishing spot is more like. Frat. And more bigger. And sometimes we have to use a boat and stuff. But a danger here and that so many places we have to use a boat. You Jerry run. Walking through. My.

[00:03:54] Then of course we do have a trout. Typically. To kind of trouble. But it's a. Different from this country. So we do have our rainbow trout though. But I think it's in that nature native it's coming from somewhere. So. We're where. We are now. Nowadays that we're fishing a lot. So hatchery fishing. So then we have a lot of paper and stuff to do that. I don't go to that kind of place. Usually lots of people do that. But I like nature. And I like. The river. The river is completely different from. Which I said. The. Japanese. River is more smaller. Than more. In the mountain. We have to lock. In. Different trout. So. I can't say which one. I like. I liked Japanese dream but we don't how. Many. Big one anymore. Actually in this country too though. So. So lots of different messenger Japanese screen. Do you guys get to go back there and fish at all. I do sometimes but it's a bonus. Speaking at the. Nets. You know I do have a lot of friends who is fish fishermen. And. Reactionary. Fishermen. Most of the people with a kind of a. Credit. Many reason they're coming to order. They're becoming that. Maybe. Tired about it and not catching many fish. Or find something in a different. Fund to do. Instead of fishing. Maybe. Not so many people that continue to do fishing. I'm. Fortunate. So. I don't. Then also that that changing a lot. I love Japan actually. 20 years ago. Now. From. Now. I mean. Since I. Left Japan. 20 years so

means. Honestly speaking I don't know. We trigger it now. It's good. Or better or. Still OK. Or something like that. So. I have no idea. I was living in Japan. I was raised in Tokyo. So that's why I did it anyway. When. I was leaving in. Japan I have to go somewhere. A long way from Tokyo.

[00:13:37] Better efficient and probably instead of not being lighter but it's a good fisherman. Not usury good fishermen are not good rider. Normally I have never seen so many. Very few very few people who can't write most of this fishery that are deficient there. Oh here's a good fisherman. Usury he is not a good writer. From my experience so that the fishing. Good good fisherman is not good writer. Which I told you. Earlier though. I like I like Yamani trumped so we do have in Japan at that Yama trout and and and the two kind of kind of shroud actuary that the best one for me of the among the money is a law rather than in a mountain actually a little higher to go but at the most of the river how is that the harmonic beast in it and. Capital Area in Japan. Then Yamamoto goes to that a little bit east then I'm sorry list then goes to that the different name luxury model but it's a kind of same thing that looks a lot of different. So in for example the people who live in Tokyo so to most of that the that the trout. So we just like trout and others kind. I like that too though. But. If. You I. Choose and I like it a lot. Yes they're living more often more high elevation area.

[00:15:38] Observation is a I cannot trust that the real really about conservation. There are lots of people or organization and trying to do something. But it's for me it's more like just talking about it. Money money money money money. So I don't like that way to go to the conservation. You know we can do other way to do it instead of just doing that kind of way. Each person you know so I act that way instead of trying to do trying to make big group plan and trying to get the money. Such a such I cannot say I like that. Unfortunate true that I don't feel like in discuss trade in Japan. Those mean probably everywhere in the world or probably from my experience and I've been fishing in other countries too though. Nothing better about fishing. I. Mean that the get worse than unfortunate tree. Before that in the future so probably not going to be better. Probably going to be worse. I think many reason usury that the because it is not nature is that amazing that the nature of becoming worse than everybody said it because the people are because they're deficient and you know that typically you know the fishermen at the catch in all of them. And keeping them in is such a such probably that one of the reasons. But. Too many reasons.

[00:17:42] Try not to be better or becoming worse. Unfortunately I cannot explain everything but it's in future. I'm not happy with that though going to. Gonna be that way. I think that great. I don't know. We do do have a steel drums and stuff you know. So then that the water. Water. Water it is not that you know if the air is that great you know the people life isn't that great. Even now not only the fish you know even further that might make it we leave. I mean people even it's becoming worse for hell. Not healthy anymore. You cannot be that that can be that. Not just a dam or a just such a kind of those kind of reason. More than that at the nature is it becoming worse. So means I can think of it that way more than dumb or deficient or something like that.

[00:18:56] Of course I know all all kinds of stuff it becoming everything or still so. So what did you think that you think climate change is a threat to travelers. Yeah. Yeah I can see that too that that credit change mean that it probably did something wrong with the people to people's life you know.

[00:19:23] You know maybe God might not might not be happy with that way with something like that. That's that's that's way to help him do that. You know that the weird

weather and stuff you know so it's possible to. In this situation now even not even worse in the future I cannot say and I'm sorry about that. When I studied fishing long time ago more than 30 years ago even I wish I could fish and 10 years ago or 20 years ago even that time too so that the situation is deficient straight and you have to become a worse and more than a more difficult to catch fish more difficult to catch in number than how big such as such. So that's why. I'm so I feel sorry. No I'm great. I wanted to enjoy that nature more than fishing. I'd like to say that to the new angler. Enjoy the nature. Then probably they can enjoy a more efficient so have to be nature. That's why I don't like that the fish and game in the paper and stuff. I want to be in the nature real nature healthy nature. Would you give different advice if it was a man or woman. You know the women. You know it so many women fishermen I'm straight.

[00:21:03] I'm so happy with that. Because they used to be its fishery. When I studied in Japan a long time ago. Almost nobody won it. I think it's the reason I think that normally that the woman doesn't have that. How can I say that. Men and women it's a complete dream. Different people you know as a man. The mankind is different. So. Men is more like competition killing each other such as such. So they love to do that kind of stuff. But as a woman doesn't know that's why the doors kind of feeling. Normally a woman doesn't have didn't have. So that's why the problem is that so many people want to do kitchen fish. So it's the reason it's not your reason which is a woman that just did right. I mean having children and raising children is such a such an and trying not to to be being fight together or something like that at the calm down. So that's why did the woman at usury try not to catch the fish. It's an all the same thing happening. So we don't have I don't want to have it either but it's the fishing is a more like hunting to other leagues. So that's why I don't know why I like fishing actually as a lemon. But it's fun. I love kids I'm picking berry picking native. I mean like vegetables and such as such Soledad. So I can feel that way too that the fishing a little bit catching picking something but it's a I don't know more bigger fish or more better fishing more than my friend or something like that I never thought about that. So. So I don't know what the woman is.

[00:23:21] I'm so gratified that the woman at this study to do the fishing otherwise I think that the reason is a fortune entry that I have a lot of fishermen I mean angry friends. But at that there those people are that kind of quit it already. They're becoming in order to though that is kind of quit. So that not so many younger generation at this not started fishing anymore. I'm fortunate I can see in this country too and that so many young under here young I mean the most most of the time it's man yeah instead of the younger angrier man's angrier. Several not young women angrier more people started fishing in this country. I think age. I don't know about in Japan what happening now. But it's might be same same way. So it's a lot of the reason it's because the men is not doing so many too much. Then the one woman studied. I think it does something changing at the people that used to be for example that for nurse the people that not mean the men is not doing and becoming nurse now. Not a lot of people nurse you know Mad Men as men nurse. Sure. Yeah. So I cannot believe this. But it's analogous. It's true that the same thing that you know forget about hair dress designer hit cutting hair and then stuffing usury.

[00:24:59] That woman job but now a lot of men do it. So kind of mix it up and then kind of normal probably more and more becoming. Yeah. For me it's a Dave Hughes my house. So I do have some other people at all. But the is the best not not because not that he has my husband he is a I don't know his golf course that a good fisherman. He knows many things which I don't know to them but that I know more than that actually. Here's a bit for me it's very comfortable with him. Even he is not my husband probably. He is the best partner maybe and sometimes he has a very good guide fishing guide. So we have a

chance to we did have a chance to do a fishing with a real guide on the commercial guide. We've had some damage that he has a much better guide than the professional guide. Sometimes many times so that I feel like I'm always at the fish into his hand me that always fish I know is the best guide in my life. Wonderful. Yeah. From my experience I've seen that a lot of good fishermen in Japan and good fishermen I mean anger in this country too. So I can compare jury because in surrounding me in this word in this country you screwed my husband. There are so many good fishermen. I mean good and we're in this country. I had a chance to see but if I think about that a general efficient general anger normal anger and not.

[00:27:13] Top crust you know so that if it generates lately say probably that the Japanese angler is much more higher level of the tech as a technique. I don't fit the angler which is a much better fisherman I think. Because if the proper personality different a little bit this fishery that the Japanese typical Japanese fly fishing fishery the person who wants to be the fresh fish in actuary the person who is more something special something more technical stuff and and wants to do something at the Special One then if he's studied to do it proficient whatever I think that person Japanese person who's studied to do something. More Japanese Japanese is a more skillful than war finger. Technique and it's more can do something tiny stuff for even just a it time flight and not only the time flying out the. More. Questing or world or more. Think about it than trying to be more better. More. More better. Chester a lot more better catching fish that wants to be becoming better than. Other person or. Something like that. Probably then tried to do more.

[00:28:39] Practice and one more focus to do something. So that's why that's the. Then also if they started to get focused to do something. Typical. High quality person. Which is a. Who is a. Food. For example loves wants to be the fresh fish in. The morning like. So then then that's why they there wants to do the time fried and. Then then started to do more learning the bleeding. And in researching and it was such a such minimal focus to do then they can do that. So that's why. That's. Typical just obsolete fly fisherman so. Good. View is. This country. I think. This country is probably boiling. It's OK if I can catch fish. I can't catch fish. It's legit. Fun. So. That's it. Something like that kind of level of the people I laughed. I think. So that it's a. More normal level Japanese. Fry fisherman fishermen. More and more. No one wants to do better lay that. That's a lot different from a lot of people and such as such. More trying to do that. Than. Focus to do that. So I can tell that kind of.

[00:29:59] And what I'm doing. I've been doing it long time. So that the doing for the kind of skill that have to be taken a long time. Many years. That have to be focused have to be patient. So that probably Japanese I'm more patient. That's why it can be more better. Than a job. So that. So I can say that. About free fishing or fishing at the same way so mean that the. Fresh fish and it's coming from. I mean. This country and I mean. Before coming to Japan actually so. That it's now it's a technique. So probably Japanese fishermen it's more higher.
