

George Harvey, or Two Circle Knot
(from Herb Wellington)

1. Make 2 circles with tag around standing
2. Put tag through both circles twice
3. Pull both ends together. Knot will clinch over eye.

NOTE: Everything goes from towards you to away from you.

I, however, still favor my "figure-8 Turtle". It was taught to me by Harry Darbee in the '40s, and has never failed me once - either for trout or salmon. I can tie it a little faster. It is just a Turtle, but tied with a figure-8 instead of an overhand knot.
