Dear John:

I wonder if you could send me a copy of a paper that you published with Jennis on the content of the Bear Milk. Also, you have the compilation of the elk kills where we tallied the number of the grizzlies coming in. I have notes of some of these but not complete as Maurice and I worked these up together and the data is in the files at the University. I would also like the figure on the maximum weight of the biggest bear that we weighed in the course of the study. I wonder if you have any information on the fate of grizzly No. 170, the one that we instrumented on the homing research.

Sincerely,

Frank Craighead

Dear John:

I have been getting together my various reports and publications and I find that I do not have any annual reports on our grizzly bear work beyond 1964 and this latter is just a summary. I do have the highlights of 1965. I wonder if you could send me the reports to complete the data worked up on the grizzlies.

The material I gave you on the chronology of the grizzly bear research is incomplete and you should add anything that you feel is pertinent. I will continue to do so. There are of course many other meetings, events and correspondence that could be added but I don't think we should include any other than those that might be relevant to a general discussion of this subject or testimony in court where dates and their events are needed.

Sincerely,

Frank
