MEMORANDUM FOR

A. L. Horway

GPO 8-10802

Yes: Here are the seeds of Peruvia glandulosa? I gathered sometime ago and planned on cleaning, but never got to it. I thought probably you would like to have them uncleaned than not at all so am sending as is. - These were gathered on Little Pine Creek just outside of the town of Big Pine. Some were collected on the old burn we looked at while you were here.

Some of them did not mature or develop
viable seed, but hope they will
be some good to you.

Del Sauer
