April 26

50

SUPERVISOR, LASSEN NATIONAL FOREST

FROM: STEPHEN N. WYCKOFF, Director

Dear Art:

The cattle guard arrangements you described in your April 20 memorandum are perfectly satisfactory. Go ahead on that basis.

In another day we will have a second set of maps of the Harvey Valley allotment colored and ready to send to Washington, as requested by Kotok, together with supplementary tables showing acreages and other values brought out on the maps. We will also send on a report of the Regional Office meeting on April 14; and we are hoping for a favorable reaction. We will send you a copy of this letter. Incidentally, Talbot and Hormay have told me of the excellent progress made at that meeting toward putting the Burgess Spring findings to the best use and, at the same time, meeting the Washington Office desires for a demonstration allotment. With this kind of three-way cooperation, I share your enthusiasm over this opportunity to speed up our pace in getting on top of some of our mountain-range problems.

In the next three or four weeks we will send you some summarized tabular material and copies of two of the more vital maps: one showing the location of proposed management facilities, fences, water developments, etc., the other showing the areas where reseeding and spraying are indicated--for any reference and planning value they may have at this time.

STEPHEN N. WYCKOFF
