

California Experiment Station, Berleley, Calif.

Received  
April 30, 1954

DONALD E. CLARK, Regional Forester      By:      FRED H. KENNEDY      Acting

R-CAL  
REPORTS  
Station's Annual

Your annual report for 1953, recently received in this office, was read with much interest.

On page 40 of the report, we notice a reference to a grazing system which was developed at the Burgess Spring Experimental Range. We have not seen an Experiment Station release on the grazing system mentioned, and would be very much interested in receiving whatever publications or printed material has been put out in regard to this subject.
