

Important test  
Seedlings 24hrs @ 78°F  
Wet seed excised → seedlings to 60mm

Oct 9 9AM Seedlings into 78°F      Excellent control  
" 10 9AM " out "      of temp

Oct 15 9AM All seedlings dead - Roots killed  
{ Hypo<sup>2</sup> on about 30% alive  
{ (Cots red, green)

0% 27°F very definitely lethal → no live tissue  
0% 78°F Border lethal  
100% 79°F No effect Normal growth

End
