I like about Swan that he had arithmetic in his eye.
March 19, 1880 - proteolytic sheet:

"worked pretty constantly all day."
027, '62: Capt. Jim's ND by walking and too much
N24, '59: wasn't 7 5p. tiles
Apr 26, '61: 5 measures Tetanus light
N 20, '61: S measures cleaning at N Bay - approved
90% of time Webster not at N Bay?
Jan. 15, '79 (Day 26)--temp 41, cloudy innocuous day. A new cat today, a black-and-white perched atop the farthest uphill post, on far side of Cochrane's yard. An evergreen branch obscures the post below the cat, and it seems to sit in mid-air, straight from Cheshire.
