

Day 68, eclipse: *use on day after - "no doubt-yolked day"?*

unused: double-yolked day

--moon and sun, silver wafer and gold

--tryst

Eclipse, 7:26

swallow daybreak

- light retreats

7:18 day's amt of light has quit inc'ing
b post few mins.

Sagull o lit standid - sculpted
white (1 more) 7 west & bed

- held breath

7:56 infant spans to planting of
and bldg - west-west-west

- eye 7 light 10. SE - drag alps -
showing slopes 7 cases, y S, it is
darkening

Jim deR: - best place to see ~~road~~
to Mont, in mo.

- helipln pass'g over freeway - a
darker bug than it was 1/2 hr ago.

- few min after 8, let breezy lift
, US & Wn flags to front of Ad

8:03 - Cases percep dim'g

- student atop brick prom try @
offic bldg sleep, finally std SE

by do u wana watch it get
dark, I don't every day

8:11, plot 7 again got over

8:12 - cans at 110 gane

8:14 - birds are quieting
- details of ~~the~~ engine beyond PVI
are fading

8:15 - plot 7 birds, like pillar -
heady look w/ to next -
chattering

8:16 WFO! Case lower seen

clouds go deeper gray

apexes: pul 1-2 there, plankton
chatter

heaps dead still, start on
Hogpole

- ~~test~~ - ~~test~~ - (mildew)

For 7-7-7-7

Students & clumps & front 7 al
Hogs

8:21 - beginning to lift, part

- a₁ given down

8:22 - birds begin to and normal

8:30 - lift out
