1984 Montana State University Honors Lecture*

Dr. Ivan Doig

George Noe

A 1936 graduate of Montana State University and a native of Forsyth, Mr. Noe has lived in Australia for more than 40 years. According to a contemporary, his career is "almost a history of building and construction in Australia and the Southwest Pacific." His major accomplishment is the construction of the Sidney Opera House in 1972, now a worldwide landmark.

Richard Gray

Founder of the Freshwater Biology Foundation in Minnesota, Mr. Gray has been a strong supporter of research at Montana State University. In 1980 he established the R.G. Gray endowed chair in biology, the first such designation on this campus. As a business leader and an advocate of the values of research, Mr. Gray has long demonstrated a deep concern for environmental matters.

Ivan Doig

A Montana native, Dr. Doig has written several books, but his most critically acclaimed work is *This House of Sky*. The book is the story of his coming of age on a sheep ranch near White Sulphur Springs. Dr. Doig's most recent work, a novel set in the Choteau-Dupuyer area titled *English Creek*, is scheduled for publication next fall.

*In 1983 MSU began the tradition of publishing the Annual Honors Lecture. We are pleased to make Dr. Doig's lecture the second in our series. It will be available by year's end.
