PREFACE

This guide is the first attempt to produce a comprehensive manuscript listing for Montana depositories, and must be viewed as preliminary in nature. It is hoped that through the use of this guide, the compilers will ascertain the best forms and methods to be used in future versions of a listing of Montana manuscripts.

Each section of this guide was prepared by the depository concerned. For this first listing, the sections were copied as prepared. Thus understandable differences of method, entry, and description are present. Also each section is paginated separately. In the future another version is contemplated employing standardized entries and approach. Because of the pressing need, this compilation must suffice for the present.

The completed guide must be credited to the excellent cooperation which has developed between the staffs of the contributing institutions. A work such as this should fill a glaring gap which has long plagued researchers in Montana and Northwestern history. It is to be hoped that this guide will begin to fill the gap, and with development, will ease the burdens of scholarly research.

To utilize the manuscripts listed, the researcher should contact the individual depositories. They are: History Department, Eastern Montana College, Billings, Montana; Montana Historical Society Library, Helena, Montana; Montana State University Library, Bozeman, Montana; University of Montana Library, Missoula, Montana.

PREFACE

This guide is designed to assist researchers in utilizing the manuscript and related materials in the archives of the Montana Historical Society Library. The basic descriptive procedures are patterned after the style of the Library of Congress National Union Catalog of Manuscript Collections, with certain modifications.

The arrangement of the 474 entries is alphabetical, representing in bibliographic form 2,938 linear feet of archival material and unmeasured microfilm footage. Collection numbers and cataloging information is omitted so that the result is a listing by title of all the Society's archival material, including Montana state archives, that may be presented at this time. Many small collections, despite their significance, are not listed.

More detailed policy and inventory information may be obtained through specific inquiry to the Montana Historical Society Library.

MANUSCRIPTS

MONTANA STATE UNIVERSITY LIBRARY

BOZEMAN

This guide is a compilation of processed and unprocessed manuscript collections in the Special Collections of Montana State University Library. The items for which there are restrictions are so designated. Unprocessed items are also noted.

The guide is divided into four sections, a listing of major gift collections from the point of volume or type of content and a listing of significant small items. Some items on the second list are of greater value and rarity than those in the first list, but they do not require description. We have many unlisted items which do not seem important at this time, they are included in the subject finding aid in our center. Items of general importance in the M.S.U. official archive are listed separately. Our holding of manuscripts of published works is very short, but it is also separated from our resource files.

The finding aids which are included with the description are based on order of processing prefaced by the type of storage given. Many of our collections have been received over a period of years without foreknowledge of additional gifts. Such collections have several finding aids. When we expect additional material we delay processing.

Inquiries about historical manuscripts should be directed to Minnie Paugh, Special Collections Librarian, archive requests should be directed to David Pibel, M.S.U. Archivist, Montana State University Library, Bozeman, Montana 59715.

Ranch papers, 1888-1965; personal papers 1835-1965; pictures and portraits. The documents start when Harry and John W. Hart came to Dornix (Big Timber) from England. Joe Hooper employed them to run a ferry across the Yellowstone River and they soon acquired a lease to a new toll bridge. Harry was interested in Hooper's horses and they sold their lease to acquire the Eureka Horse Ranch in 1886 so that they experienced the horrors of that winter, however horses winter better than cattle. Harry married the Dean of the Margaret Morrison Carnegie School for Women. The female branch of Carnegie Tech. John married Eleanor Armstrong a fashion designer for Paquin and Coutourier. She was from the family which produced machinery near Chester in England.

The collection includes Anne's diaries from 1912-1964 and her letters before and after she married Harry in 1909. The papers and publications of her grandfather, Hamilton Lamphere Smith who was a professor at Hobart College are included and are of interest because he was a pioneer in the field of microbiology (microscopy) and invented the tin type. There is also geneology for both sides of the family.

The ranch started to accept paying guests in 1910 and operated as a dude ranch until 1964. There are pictures and volumes of guest lists to support this activity as well as many family pictures. Harry's son Bob encouraged Bob Stevens to buy the American Fork Ranch from Wallis Huidekoper and he operated it until his death (1945-1949). The collection also includes information about the Van Cleve Company which adjoined the Dot S Dot.

The Dot S Dot is now in great disrepair and is being used as a training center for the Peace Corp trainees based at MSU.

AGRICULTURAL ECONOMICS DEPARTMENT
Papers 1917-1941 78 Feet

The Agricultural Economics Department of the University played a major role in the development of agriculture and agricultural policy in the state and nationwide. The papers of the Fairway Farms Corporation are part of the collection. Financed originally by a loan from John D. Rockefeller, the Fairway Farms Corporation was an experiment in farm tenancy and farm ownership. It involved numerous experiments of scientific, engineering and economic importance. The experiment, which began in 1924 and lasted through the worst years of the depression, provides a picture of the major problems confronting all Montana farmers during the disastrous years of drouth and depression.

The collection includes the papers of M. L. Wilson through his years at MSU (1914-1933) and to some extent, after he moved to the U.S. Department of Agriculture.

M. L. WILSON
Papers 1935-1960 12 Feet

This collection should be used in conjunction with that of the Agricultural Economics Department. M. L. Wilson was Montana's first County Agent Leader and while head of the institution's Agricultural Economics Department, became known nationwide as a brilliant theoritician as well as a practical farm economist. He was one of the major architects of President Franklin Roosevelt's Agriculture policies. Wilson went from the Bozeman institution to become Under-secretary of Agriculture under Henry Wallace and became Director of Extension from 1940 until the assumption of power by President Eisenhower in 1953.

EXPERIMENT STATION AGRONOMY
Research Reports 1913-1968 87 Feet

The experiment stations have conducted a number of experiments in dryland farming, irrigation, weed control, insect control, dairy and beef herds, and in various phases of agricultural engineering. Most of this work is unpublished and requires permission for publication.

ZOOLOGY AND ENTOMOLOGY DEPARTMENT
Papers 1918-1959 36 Feet

This Department was an important force in the state from the beginning of the institution's existence. The first state entomologist and all subsequent holders of that title have been members of this department. Much of the work in the fight against Rocky Mountain Spotted Fever involved members of the institution, two of whom died from the disease. The various federal programs to control grasshopper infestations in Montana were coordinated by this department.

COOPERATIVE EXTENSION SERVICE
Annual Reports 1914-1965 156 Feet

The reports of the extension specialists, county agent leaders, and county agents is a rich source of the development of Montana agriculture as well as the relationship of individual farmers with national and state agencies.

Smith remained as superintendent and "watch dog," becoming a part owner, until late 1886. By that time the company had reorganized as the Skookum Mining Company. The company failed and in 1887 Smith became superintendent for the San Francisco Consolidated Mining Company which had reorganized in August of that year. M20. YELLOWSTONE PARK COMPANY PAPERS -

The Yellowstone Park Hotel Company was organized in the early 1880's and began building at Mammoth Hot Springs, but soon entered bankruptcy and was taken over by the Northern Pacific Railroad. In 1891 another company, the Yellowstone Park Transportation Company, was organized by Silas S. Huntley to operate the transportation facilities throughout the park. One of Huntley's associates in this venture was Harry W. Child, a Helena resident who had come to Montana in the 1880's and had engaged in mining and ranching activities within the state. Upon the death of Huntley in 1901, Child assumed direction of the transportation company. During the early years of the Twentieth Century, following the sale and reorganization of some of the different companies operating facilities within the park, Child came into control of the hotel company, the transportation company, the camping company, and the filling stations. In later years, all of the Child controlled operations were combined under one organization, the Yellowstone Park Company.

Worden and Company, owned and operated by Frank L. Worden and Christopher P. Higgins, began its merchandising operations at Hell Gate near Missoula in August, 1860. The men laid out the townsite, built bridges, established a water works and bank, and generally fostered the town's growth. Both men were active in local and territorial politics and had diverse side interests. Worden and Company was clearly the dominant mercantile establishment in western Montana until the late 1870's when Eddy, Hammond and Company entered into serious competition. In July, 1886, in an attempt to gain more capital, Worden and Company merged with Murphy, Hart and Company of Missoula. The new firm adopted the name of Murphy-Worden and Company. The bank survived the depression and the bank holiday, but in April, 1934 the directors decided to liquidate the bank "in view of the fact that changing conditions and more rapid means of communications and transport have removed the need for an institution of the kind in a relatively small community." The depositors were paid off in full at that time, but the liquidation process continued into the 1950's.

28. NEW MINE SAPPHIRE SYNDICATE PAPERS -

Originally discovered by prospectors in search of placer gold, the rich sapphire bearing ledge was located and claimed by three Montanans in 1896. The New Mine Sapphire Syndicate, based solely on the Yogo Sapphire District near Utica, Montana, was incorporated in 1898. Soon after the turn of the century, the corporation came under the control of British investors and was to remain so until 1949. The Yogo mines operated profitably until 1927 when a flash flood destroyed the surface workings of the Syndicate's operation, and after that date, little was done to exploit the remaining sapphires. In 1956, after negotiations beginning in 1949, Thomas Sidwell succeeded in purchasing the controlling interest in the Syndicate. Lack of capital hampered his operations until 1956-1957 when the Syndicate's stock was reissued and some work was undertaken at the mine. Law suits, prior claims, poor management, and bad luck combined in ruining the renewed operation of the corporation, and the venture was bankrupt by 1961.

The collection contains two distinct segments, the correspondence and business records of the British phase, 1898-1949, and the correspondence, court papers and business records of the corporations "rebirth," 1950-1967. Although covering the entire period, the correspondence of the British phase is not extensive and is concentrated in the years 1898-1930. The business records of this early period are more complete, including all the original mining claims, many of the original agreements entered into, the balance sheets, state and federal tax returns, general ledger (1914-1936), private ledger (1922-1953), cash book (1911-1936), share register (1914-1949) and journal (1931-1949). Much varied financial material is also included.

Records for the later years are virtually complete. The correspondence runs from 1950-1963 with the bulk of this concentrated in the years 1956-1960. The financial records are as complete. Included are two general ledgers (1955-1958, 1958-1960), records of checks issued, complete records of taxes paid, and all of the records relating to the re-issuance of stock in the corporation. Balance sheets, operating statements, and much other material of a financial nature exist. The collection also contains court papers

concerned with the several suits involving the Syndicate, including those of Gadsden vs. New Mine which was taken to the Montana Supreme Court.
