

THE WEEKLY EXPONENT

Vol. 2.

BOZEMAN, MONTANA, FRIDAY, MARCH 17, 1911.

No. 25.

TRAIN GOES MONDAY

BETTER FARMING SPECIAL WILL
MAKE LONG TOUR
OF MONTANA.

NINE CARS OF NEW IDEAS

There will be Many Exhibits and Displays. Practically all of the Agricultural Faculty Will Go.

The Better Farming Special agricultural train, which is being run over the main and branch lines of the Northern Pacific railroad by that company, will start its extensive tour next Monday at Wibaux, and will complete the work Saturday, April 1, at Manhattan. It will go as far north as Helena; to Dillon, very near the western boundary of the state, and as far south as Bridger. Every important town on the main line will be visited as well as two or three on each of the branch lines, leaving the main at Laurel, Drummond, Norris and Missoula. In all there will be thirty-seven stops, made in twelve days. At each place there will be a full two hours, during which time the visitors can inspect the cars, look over the exhibits and hear some very interesting and instructive lectures. The first stop each day will be made at ten o'clock in the morning, the second at two in the afternoon, and the last in the evening at seven. At each of the places school will be dismissed during the morning or afternoon sessions as the case may be.

This is the second tour of this kind of a train, which is run at the expense of the railway company, but under the direction of Prof. F. S. Cooley, superintendent of the Farmers' Institute work in this state. Last June it made its first run, which was very successful, but the attendance was rather light, due to the fact that at this particular time of year the farmers of the state are busy with their work. The purpose of running it in March is to make it possible for every one to be able to come to the train, as the spring work at this time is not very well advanced.

The direct object of running the train is to spread information which will improve the conditions of the agricultural industry in the state.

There will be general lectures along the best methods of tillage, seeding, harvesting and dry farming; concerning the care and breeding of livestock and the treatment of the common diseases found in the ordinary herds of the farm; ways of handling an orchard, pruning the trees and tilling them, packing and picking the fruit, etc.; and interesting discussions on the work which must be done in a dairy in handling the milk and its products; also a lecture on the care and management of the poultry industry.

The exhibits will be much better and much more extensive than last year. There will be nine cars, all of which are practically crowded with different exhibitions of the numerous departments. Seeing the train is the only way in which an idea of the amount of material which will be shown on these ten cars can be realized. For the past week the cars have been in the Bozeman yards and the entire station and farm force has been busy equipping and outfitting the train. For an example, one enters the animal industry car. Here they see a milch cow, specimens of the beef type of cattle, draft horses and running stock; two or three animals of both the mutton and wool breed of sheep, and specimens of both the bacon and lard type of hogs. And this is only one of the nine. In the cars will be stored grain exhibits, plants and flowers, machinery, home science utensils, implements which tend to make life on the farm easier, and other interesting things too numerous to mention. The laboratories and museums have been ransacked very thoroughly in getting out and arranging this display.

One of the most interesting cars will be that of the College and Boosters club. On this car there will be many pictures of the college buildings and campus. Pennants will be

strung all over the walls and ceiling. A neat corner will be arranged with a table from which literature concerning the college, catalogues, bulletins, and copies of the Weekly Exponent will be distributed. This car will be in charge of Charles H. Draper, as representative of the Boosters club. The final decorating will be done this afternoon by Dave Higbie, Charles Hansen, Earl Talmage and other volunteer members of the Boosters club.

The Home Science car will also be especially interesting, inasmuch as it was not part of the train last year, and the ladies of that department have been putting in considerable time in arranging a neat, extensive display. Misses L. A. Harkins, Abigail Hess, Florence Ballinger and Blanche Metheny are to be on this car.

The staff of lecturers is an excellent one and can be depended upon to give very interesting talks, which will benefit the visitors to a considerable extent. Among them will be found President J. M. Hamilton, F. B. Linfield, of the Experiment Station, F. S. Cooley, of the Farmers' Institute board, Alfred Atkinson, H. F. Patterson, O. B. Whipple, L. G. Schermerhorn, R. C. Jones, W. F. Schoppe, W. F. Brewer, W. M. Cobleigh, D. B. Swingle, R. A. Cooley, H. E. Morris and J. R. Parker. Other members who will accompany the train as representatives of the student body are Blanche Metheny, Chas. Draper, Lee Anderson and Ford Leinard.

With the present beautiful weather and the considerable advertising which has been done in connection with the train, the attendance should be good and the tour most successful. But the only way to achieve the highest success is for the people of the state to become interested and attend the meetings of the institute workers throughout the trip. There is no doubt that this kind of work in the state more than pays for the trouble and great expense which the state undergoes each year in carrying out the demonstrations. The train will be in Bozeman Saturday, March 25, in the evening and will stay here over Sunday.

COLLEGE WIDOW BY JUNIORS

Cast Selected for Presenting This Famous College Play to the Bozeman Public.

Plans for the Junior class play have just about reached completion and the first rehearsal will take place this afternoon. The committee in charge, working with Mrs. Una B. Herrick, have decided to put on "The College Widow," granted by many critics to be one of the most pleasing and representative of the many modern American college plays.

The piece has been cast with admirable judgment by Mrs. Herrick and comprises some of the best talent within the college enrollment. Court J. Sheriff will be seen as "Billy Bolton," the star halfback, and Miss Edna Hagerman plays the title role as "Jane Witherspoon," the college widow. Both Miss Hagerman and Mr. Sheriff will be well remembered as members of the cast of "The College Cocktail," a successful piece recently staged by the State College band. Others of the cast follow: Peter Witherspoon, Horace Davis; Hiram Bolton, Kyle Jones; Matty McGowan, John McGraw; Hon. Elam Hicks, Jimmy Annin; Bub Hicks, George Cook; Jack Larabee, Noble Donaldson; Copernicus Talbot, Walter Wilson; Silent Murphy, Edward Hodgskiss; Stub Talmage, Wallace Fisher; Tom Pearson, Harold Wolpert; Daniel Tibbits, Samuel Pound; Ollie Mitchell, Jack Taylor; Dick McAllister, Freeman Daley; Jimsey Hopper, Clyde Stieb; Bessie Tanier, Irene Carr; Flora Wiggins, Margaret Edwards; Mrs. Primsey Dalzelle, Grace Clark; Bertha Tyson, Irene Piedalue; Luella Chubs, Rhoda Dawes; Sallie Cameron, Ruth Stanton; Josephine Barclay, Buelah Caldwell; Cora Jings, Laura Piedalue; Ruth Aiken, Margaret Bole. In addition to these there will be a number of heavy thinking parts, including the football team and various other college characters.

The Junior play will have the advantage of the services of an excellent business management, as well as

(Continued on page 2)

E. A. DOCKSTADER WILL BE ASSISTANT COACH NEXT YEAR

BOOSTERS CLUB IN MEETING FAVOR J. H. MCINTOSH'S RECOMMENDATION CONCERNING THE NEW MAN. PLANS FOR THE ANNUAL LABOR DAY WORK ARE MADE

An enthusiastic Booster meeting was held last Monday, at which several important subjects were brought up and discussed. The first subject taken up was that concerning the preparations for the college "Labor Day." Last year the Boosters began work on the football field. All of the students helped and the results were so encouraging that the day was set aside as a holiday from regular college work so that each year the boys could do something to improve the college grounds. The plot inside the track is to be seeded this spring, but it is almost level and slightly low in some places so the water stands on it. This necessitates drainage of the plot. By a motion it was decided to appoint a committee to consult with Prof. Kneale and make some preparations for the work. The committee consists of W. B. Vestal, Jr., E. A. Chambers and Harold Wolpert. This business being disposed of Coach J. H. McIntosh explained to the society that the selection of a new coach had been largely left to the Boosters and himself. He then read several letters from and recommendations of a Colgate man, E. A. Dockstader, who seemed to be an excellent man for the position. Several other applications were also mentioned, most important among them being that of Coach Rowe, of the Butte high school, and Coach H. I. Dean, of Wyoming university.

Some time back in the winter the Boosters recommended that Mr. McIntosh be retained as athletic director in addition to the securing of a new coach, and at Friday's meeting the director stated he has considered this proposition and will remain to have general supervision of athletics, provided the new arrangement meets with the approval of the board.

After mentioning the possible coaches generally and calling attention to Mr. Dockstader's recommendations, Mr. McIntosh begged the opportunity to voice his thorough approval of the above for coach, and gave his

reasons. Inasmuch as there can be no delay in securing this splendid all-round athlete from Colgate, the Boosters voted to unanimously endorse an invitation to the latter to serve here next fall. President Hamilton intimated that he would be guided by the decision of the club, which represents the male student body effectually. In consequence there is little doubt but that Mr. Dockstader will be in charge of the foot ball squad.

That Mr. Dockstader has had ample experience to fit him for the position of coach is evidenced by the fact that he has played at half back, end and more lately center in football and under the best coaches of the east. In fact, football is his specialty. In basketball he was a member of his college team three years and last year was captain. In track he is a member of the Colgate team and has been manager of both the varsity team and of a big interscholastic meet held annually at Colgate. He is also said to be a good base ball man, though the State College does not place so much stress on this department.

Mr. Dockstader comes highly endorsed by the president of Colgate, by former M. A. C. Coach Leonard, by the Colgate Athletic director and by others in the east in a position to know. It was stated at the Boosters' meeting by Athletic Director McIntosh that out of all the correspondence he has had with different prospective coaches, Mr. Dockstader's application and endorsements have the best ring.

The action of the Boosters is not in the slightest hostile to Mr. McIntosh, who is a general favorite at the college. It was rather in concurrence with the physical director's wish to loosen up his hold on some of the actual team coaching. In speaking to the club Mr. McIntosh said, "A new broom sweeps clean, and I want to see some new blood in the coaching staff so that we can have every reasonable chance for a championship team."

TREATMENT OF HIGH SCHOOL TEAMS APPRECIATED

PRESS ACCOUNTS SHOW THAT THE VISITORS TO THE BIG BASKETBALL TOURNAMENT WERE WELL PLEASED WITH THEIR TREATMENT AT HANDS OF COLLEGE MEMBERS

Now that the interscholastic basketball tournament, with its pleasure yielding but strenuous hours, is past, the faculty and students who worked to the limit of endurance in order to make it the success which it was, will be gratified to see the amiable response which is voiced in the papers throughout the entire state. A Dillon paper says:

Were Royally Entertained.

The Beaverhead county high school delegation returned Sunday from Bozeman, where they took part in the first inter-scholastic basket ball tournament, which was held last week under the management of the Montana Agricultural College.

They were accompanied by Paul Stahl and Hardaman Duff, who acted as officials for the home team.

The boys did not return home with any medals but nevertheless had a royal good time and enjoyed themselves immensely.

The Beaverhead boys are high in their praise of the hospitality of the Bozemanites, and especially the faculty and students of the Agricultural College. They had a fine time and say the winter basket ball tournament is one of the greatest events in the history of Montana's high schools. It is hoped that the tournament will become an institution such as the athletic meet, which is held every spring in Missoula.

The Philipsburg Mall of March 10 is quoted:

"The basketball boys returned home Monday from Bozeman, where they gave a very creditable account of themselves, defeating Butte and Fergus county, two of the best teams in the state. The boys report a very pleasant trip and most delightful time in Bozeman."

Prof. Baade, athletic instructor of the Sweetgrass county high school, is quoted in the Big Timber Pioneer of March 10 as follows:

"We were entertained by the college in a way that cannot be excelled by any institution. Here are some of the courtesies extended us: Railroad fare, free street car service, free board and lodgings, and a committee to show us all we might want to see and find out about the college. One of our boys on our return said, 'It's wonderful how easy it is to do these things that before seemed so mysterious.'"

"I am certain that each one of the company was greatly benefitted by the trip and we are looking forward to next year's visit with joy, and expect to make a better showing in the contests at that time. We, with all the other high schools, join in thanking the college and the citizens of Bozeman for their splendid entertainment."

The Kalispell Journal of March 6th writes:

"The high school boys and the coach who went to the tournament at Bozeman last week, were back at school this morning, full and running over with reports of experiences of their trip. Mr. Smith recounted their adventures before the school, saying they received the best treatment at Bozeman of any high school meet or entertainment that representatives of this school have yet attended. The meet was attended by sixteen schools from all over the state, so that Flathead has established its position in the best class of the state, by getting third place in basket ball, and third, with honorable mention, in the speaking contest."

The Livingston Post of March 6 in part writes:

"The local boys report a splendid meeting and that the city of Bozeman proved a royal host."

The Missoulian writes: "The Missoula high school delegation to the state basket ball tournament in Bozeman, returned yesterday, delighted with the experience and enthusiastic in praise of the entertainment given by the state agricultural college, under whose management the meet was held. 'We were treated splendidly,' said one of the boys last night. 'There was nothing too good for us and there was nothing that could be done to make us happy that was not done freely and hospitably. The Bozeman people were just as kind as the college folks. It made no difference where we went, there was a welcome for us, and we had all there was to be had. I never had a better time in my life, and I think all the rest of the boys had just as good a time as I did. The games were good, especially the final between Billings and Anaconda. Anaconda made a great showing and the crowd was disappointed when Billings, with a fast finish, took the victory away from the Copper City boys. We have to learn a good deal about the game, but we'll make a better showing next time.'"

Uses For His Subject an Account of His Travels.

REV. LEWTAS VISITS ASSEMBLY

Uses For His Subject an Account of His Travels.

Rev. John Lewtas, who is conducting evangelistic services at the Methodist church, spoke in assembly last Friday morning. He has traveled 145,000 miles altogether, spending 51 weeks on his last trip, part of which he told the students about. He started from near Seattle, going east over the Rocky mountains. After speaking of the grandeur of these mountains, he told of reaching the great divide, where the channel was divided, one stream going east and the other west. He went on through Canada over the Canadian Pacific, reaching Ottawa, where the laws are made and enforced; Niagara Falls, one of the seven wonders of the world, in which one man sees the sublime and another sees nothing; on to the grand old city of Quebec, where people live in the past, sneaking old, old French. On the plains of Abraham is a shaft, one side commemorating Wolfe and the other side commemorating Montcalm.

After a rather stormy trip across the Atlantic, Rev. Lewtas reached England, the land of poetry and song, of history, of palaces and castles. The only part of England he told about was London, which has a population equal to that of North Dakota, Idaho, Oregon, California and Montana, and in which there is more to be seen than in a half a dozen other cities of Europe. It is the best of great opportunities for graft, and yet no graft. He spoke of Hampton Court, the peace offering from Cardinal Wolsey to King Henry the Eighth; of St. Paul's cathedral with its perfect acoustics and choir of three hundred; and finally of Westminster Abbey, where all the notable men of England are buried. Among these Englishmen is a bust to an American, the greatest honor the English could bestow, and this man is Henry Wadsworth Longfellow. Mr. Lewtas closed by quoting Tennyson's "Crossing the Bar."

"I am certain that each one of the company was greatly benefitted by the trip and we are looking forward to next year's visit with joy, and expect to make a better showing in the contests at that time. We, with all the other high schools, join in thanking the college and the citizens of Bozeman for their splendid entertainment."

HAVE GOOD JOBS

WRIGHT GRAY, GILBERT HANSEN, AND CHARLES SOPER LOCATED IN BRAZIL

SALARY IS \$200 PER MONTH

Are To Have Charge Of The Different Departments Of Work Under Brazil Minister Of Agriculture.

About six weeks ago Wright Gray, Charles Soper and Gilbert Hansen started to seek their fortunes in the Argentine of South America. Just what they were to do was a matter which was as unknown to them as to the remainder of their friends at the college. However, Dame Fortune smiled on the trio in a generous fashion, and as a result the fellows are located in Brazil, working for the minister of agriculture in his experiment station departments. A recent letter from one of the triumvirate tells of the work in which they are engaged. Their salary is the most striking feature of the work, each boy getting \$200 a month. Mr. Soper is more interested in the animal husbandry department; Wright Gray has special work along the dairy business; while Gilbert Hansen has been assigned duties with the agronomy section. Their work starts April 1, and the past few days have been busy ones for their parents here, who have been gathering bulletins, text books, notes and other material which may help the agriculturalists in getting the proper start on their new work.

The boys write that South America is an excellent country and they are jubilant over their positions. They report an excellent voyage and with the exception of a few miserable hours at first, had a very pleasant tour. The following letter from one of the three shows that their thoughts were mostly of the pleasant type (This letter was written before their positions had been given them):

S. S. Verdi,
At the Equator,
Jan. 31, 1911.

I suppose everything is O. K. in Bozeman, but I would not be surprised to know that it was some cold there. After the first day out of New York it has been warm enough to go without our coats, although it is never hot even here at the line.

We hit a storm about the second day out and the boat rocked considerably, but since then it has been smooth sailing. I have not been seasick at all and have not missed a meal. Wright and Charlie were down and out for about 24 hours and were not eating anything for a couple of days, but they are all right now. There was only one other passenger on board beside myself who got through all right. We are having an easy time of it—a little too easy, I think.

We are having good luck, I think. We have become acquainted with Mr. Jos. E. Wing, the editor of the Breeders' Gazette, who is going to South America to see if the Argentine is a serious competitor of the U. S. A. in the sheep and cattle business, for the government, of course. He introduced us to a Mr. Gates, who I understand is a big cattle man down in Colorado and Mexico. Mr. Gates is also going down to look up conditions there. We have also met a Mr. Wells, a bank president from Kansas City. When we get to Rio these men are going to introduce us to the president of the Brazilian Railway. This company owns about six million acres of land and might want some land examining done.

We are going to stop in for two days to take on cargo. We tried to get our tickets fixed so that we could stop over, but could not, so I guess we'll go on through.

Spanish is occupying a great deal of our time. There are several on board who speak it and we are using them in good style. There's an old padre from Peru among the passengers, who reads to us occasionally. Mr. Wing is studying with us. We find it very interesting and can ask a number of questions without any trouble. It is a "cinch" if you go a little right. There is a professor from Syracuse, N. Y., a Dr. Van Dyke who is teaching us. We have a day

(Continued on 4th page)

THE WEEKLY EXPONENT

Established Jan. 1, 1910.

Outgrowth of Monthly Exponent, established Jan. 1, 1895.

Published every Friday of the College Year by an editorial staff chosen from the students of the Montana State College of Agriculture and Mechanic Arts.

Bozeman, Montana.

STAFF.

Chas. H. Draper, '12... Editor-in-Chief
James T. Annin, '11... Associate Editor
E. A. Chambers, '13... Managing Editor
Chas. L. Hansen, '12... Business Mgr.
George Morgan, '12... Ass't. Bus. Mgr.
Wm. Chapman, '12... Circulation Mgr.
Rhoda Dawes, '13... Northwest Editor
Frieda M. Bull, '07... Alumni Reporter
General Reporters: Myrtle Alderson, '13; Selmar Solberg, '14; Irene Pedalue, '11, Horace Davis, '14.

Subscription rate—Two Dollars per year, five cents per copy. Advertising rates made known on application.

Entered as second class mail matter, at Bozeman, Montana, under Act of Congress of March 3, 1879.

The Exponent is written, edited and managed entirely by students. No financial remuneration is connected with positions on the staff. It is printed for the students, faculty and alumni and contains all the news of its field.

TITLES STILL IN DEMAND.

Some time ago there was suggested through these columns the adoption of appropriate titles and names for the different structures on the campus, as well as for the athletic field. As yet there has been nothing done, so far as can be learned, to accomplish this object. It appears to the writer that some good titles must have occurred to different members of the student body or faculty.

To call them merely Chemistry building, Shops, Aggie building, or similar titles conveys to the average ear an impression of mediocrity or of unimportance quite out of keeping with the true conditions.

As stated above, The Exponent would be glad to give space to communications on the subject, and would like better still to see something done to formally christen the structures. In the matter of the Athletic Field in particular is some name necessary. To refer to that splendid improvement by the above title conveys nothing. Give it a good ringing name and it would be doubly attractive to the ear and would favorably predispose a stranger upon his hearing it.

Here is hoping that some individual or organization will take the matter up in order to arrange suitable titles for our magnificent and less so structures.

A GOOD CUSTOM TO

BE MAINTAINED

Labor Day. Kindly accent labor if you please, and then put emphasis on day, for it certainly means labor and it certainly means a big day.

According to the well considered action of the boosters, and following out the resolutions of the laborers last year, the event which accomplished so much in actual results and so much more in promoting the feeling of fellowship and pride in the institution among the students last year will be repeated in much the same style.

Those who blistered their hands and wore callouses on the shovel handles last year and who later partook of the delightfully informal and enjoyable feed at the hands of the Boosters immediately after that event, will not willingly miss the repetition of the joys connected therewith.

It is a good custom and should be maintained. The action of the students taking up the matter at this time is commendable and the spirit already shown bespeaks a successful occasion this year.

TRACK WORK WELL STARTED.

The coaches and track candidates continue to maintain an optimistic attitude concerning the prospects in that line of sport this year. While not boasting or offering any predictions as yet, they seem confident that the team will be stronger than last year, and that is reassuring in itself, inasmuch as we lost one of the star performers in the speed events from last year's squad.

Practice is going on every evening, though the general student body appears to know little or nothing about it. Coaches McIntosh and Al Dier are working hard with the men each evening on the new college track and are having surprises sprung on them right

along.

In conclusion, let it be said for the benefit of those who do not run, jump, skip or throw things that they can find no better way of ending the day on the hill than by watching the training and rendering thus their moral support to those who have a hard fight to make for the glory of college this spring.

NICE THINGS ARE SAID.

Thinking that such items might be interesting to our readers, The Exponent this week presents clippings from different newspapers with respect to the big tournament which created such a widespread interest and also from college papers from all parts of the country with respect to The Exponent.

That such expressions as those reproduced here are gratifying to the staff goes without saying. Space in neither case would permit the use of all the complimentary sayings which appeared, and only the most typical have been given here. The Exponent wishes to thank its contemporaries for their friendly commendation, and the College in general feels grateful for the equally complimentary statements respecting the tournament.

With no funds or prospective games, the baseball team seems to be a mythical affair this year again, as was the case last spring. It is unfortunate that none of the other state institutions find time or money to indulge in this kind of pastime. Especially is this bad, inasmuch as for three years the college has had material for the best team in the state, as well as the best team the college ever turned out. However, class teams can be organized, and games arranged which will add somewhat to the excitement of the student body or a revised method of "one old cat" could be worked out, whereby the glove artists could get practice and exercise. "But," as we have heard before, "If others won't play, we can't."

And now as the beautiful spring weather is here with its song birds, green grass and other poetic features, the desire to get out in running uniform comes to nearly every student at the college. This reminds us that there is the best tennis court in the state about a hundred yards from the college main hall. There are also four classes in the regular course, also a preparatory department which should get out some mighty good tennis teams. There are both boys and girls in each department, so two class teams from each section is possible. How about a big tennis tournament for the interclass title at the college?

With the reaction from the strenuous times of the tournament and the coming of spring occurring at the same time it is little wonder that class rooms seem deserted at times.

AS OTHERS SEE US.

A recent issue of The Weekly Exponent from the Montana State College is an anniversary number in celebration of the first birthday of the paper. It is an excellent number of ten pages, newspaper size, and contains many pictures of buildings and people which make it quite live and interesting. They announce the opening of a new dormitory for women, the fulfillment of a great need.—The Holgad.

The Exponent appreciates a good publication when it sees one.—Weekly Willamette Collegian.

"Stag" parties are commonly heard of, but it has remained for The Exponent, Montana Agricultural College, to write up a "Doe" social.—Ottawa Campus.

The Weekly Exponent is by far the best college paper that has reached our table.—Maroon and White.

The Anniversary edition of The Weekly Exponent is unusually good, the cuts being numerous.—The Senior.

The Weekly Exponent, Bozeman, Mont.—We are delighted with The Exponent. We tried all last year to get it and it has at last arrived.—The Megaphone.

It is with pleasure that we look forward to the coming of the weekly from Montana State college.—The Mirror.

The Exponent—We wish you success on your second venture, and hope that you will be liberally supported. A few stories and you will be tip-top.—Weekly Collegian.

A recent number of The Weekly Exponent, the student publication of the Montana Agricultural college, is one of the finest papers we have received in our exchanges this college year. It is a ten-page special anniversary number, also containing a

literary supplement.—Industrial Collegian.

The Exponent's editorial "Get Together and Lift" sounds the right note for the success of student body enterprises.—Blue and White.

The Weekly Exponent is a newsy paper from the Montana Agricultural college.—The Roundup.

Exponent, Bozeman, Mont.—By far the best weekly paper we have received. We envy you for your use of so many cuts. That together with your numerous departments makes you very neat.

C. H. Disbrow, who was a student in the pharmacy department last semester, has a position with a drug firm at Polson, Mont.

CONCERNING THE ORATORICAL CONTEST.

Attention is again called to the oratorical contest which will take place probably April 21. Several students have signified their intention of entering the contest, among them being Miss Rhoda Dawes, Miss Myrtle Alderson, Mr. Joe Morgan, Kyle Jones, J. E. Hodgkiss, George Cook and William Winter.

This contest affords excellent training both in oratorical composition and in public speaking. There should be no misunderstanding as to the final purpose of this and other similar contests—namely, training for greater efficiency in written and oral expression. There is a good prize offered and the desire to win is always a laudable one, but the belief that any one person is sure to win should not keep others from entering the contest. Such an attitude does not show the best kind of spirit, and any growth or continuance of that attitude in college activities will bring disastrous results when our teams meet with visiting teams which have been developed under a system of strong, healthy competition.

A list of subjects has been posted in the library and consultation on any of these subjects or on a subject of a student's own choice will be welcomed by the instructor of public speaking. Those entering the contest will be glad to know that Mrs. U. B. Herrick has expressed her willingness to drill the speakers on delivery. Let everyone who has an ounce of ability in oratorical lines come out and help push the winner to the limit. Only in this way can we win the state contest in May.

E. A. DUDDY.

COLLEGE WIDOW, BY JUNIORS

(Continued from 1st page.)

the invaluable services of Mrs. Herrick in training the participants. The staff of management is as follows: Business manager, Chas. Hansen; advertising manager, Noble Donaldson; property manager, Will Shovel; stage manager, Mrs. Una B. Herrick. This staff will meet at Hamilton Hall next Wednesday, when further arrangements will be completed.

The exact date for the presentation of the play has not yet been decided upon, but it is known that this will be some time near the middle of May. The members of the junior class and those assisting them are very enthusiastic over this new undertaking and its success is practically assured.

CLUB HAS INTERESTING PROGRAM.

At the regular Agricultural club meeting, held Wednesday noon, the treasurer, James Bell, reported that the club was a little in arrears because of the expense incurred during the tournament, so it was voted to assess each member 25 cents to make up the deficit.

The following program was then given: Paul Entorf read a short discussion of the effect of the Canadian reciprocity treaty upon the American farmer. Roy Clarke presented the latest agricultural news items of the state. The meeting closed with a short discussion led by George Cook of the important agricultural bills of the last state legislature.

Your 1911 Photo Collection

Take photographs of things of personal interest which happened during the year, views taken on drives, outings, excursions, vacations, etc. Then mount them in a small photograph album, print 1911 on the cover and you have a most interesting photographic history of yourself for the year.

You need very little money and skill in these days of "easy photography."

Kodaks and all the accessories are here.

College Notes

Miss M. A. Cantwell, Miss H. R. Brewer and Miss F. Ballinger will entertain the Faculty club in the home science departments this evening.

Louis L. Howard, organizer and director of the college band, has been confined to his room for the last two days with a rather severe attack of the grip.

The band tour fund was aided considerably when at Belgrade last Saturday evening a check was given them by O. D. Fisher, an uncle of Wallace Fisher, for \$50.

Rev. Lewtas spoke to the members of the Y. M. C. A. Tuesday noon and the gist of his subject was "Be Courageous." He presented his talk in a very interesting and forcible manner.

Mr. B. L. Stanton of Helena, spent the latter part of last week in Bozeman on business. Mr. Stanton visited at Hamilton Hall Sunday with his daughter, Ruth, and was her guest at dinner.

We wish to thank those members of the faculty and student body of the Montana State college who so kindly assisted us in our great sorrow at the loss of our beloved son and brother, Walter A. Smith.

Mrs. E. B. Kenniston and family.

The class in farm mechanics, which is being taught for the first time this year by H. M. Bonebright, spent the whole of Wednesday afternoon in setting up the machinery on the machinery display car, which will be one of the nine on the better farming special.

President J. M. Hamilton was in Missoula last Friday, where he acted as a pall bearer at the funeral of Dr. Oscar J. Craig, former president of the State university. President Craig was the first president of the institution, starting in 1895, and by constant work got the present beautiful campus with its fine buildings established. In 1908 he resigned on account of ill health, and since that time has been for the greater part in California, where he died. The students and members of the faculty are sincerely sorry that the university has lost such a staunch friend, and the nation such an able educator.

Look Around for the Shoe

you like best, ladies, and you will be sure to find it in the models we are now offering.

They are modeled on the newest lasts, giving perfect freedom to the muscles of the feet while preserving a most shapely exterior.

And they are made of the choicest selected leathers, thus assuring both comfort and durability—which means positive economy.

Fred Gordon, president of the present sophomore class, left last Wednesday afternoon for his ranch home near Sanders in the eastern part of the state. While there he will supervise the starting of the spring work on his ranch and attend to several other important business matters.

The Hub is being changed around considerably this week. The side door entrance has been abolished and from now on this space will be devoted to a show window, while the big front window has been turned into a door. The inside has been remodeled also, so that from now on this popular place in which so many of the college questions are discussed will be more homelike than ever. The management is contemplating putting in a smoking and reading room for the use of the college students.

At the last meeting of the civil engineering seminar, Harold Wolpert gave a very interesting talk on "Conservation of Natural Resources." After a brief outline of the present governmental policy regarding conservation, Mr. Wolpert attempted to show that the basic principle now used by the forestry department in saving the remaining timber lands was radically wrong. Other members of Seminar differed with him, however, and a lively discussion ensued. Prof. Kneale complimented the speaker on the way he handled his subject.

In many ways the band trip to Belgrade for the purpose of giving a dance last Saturday night was not the success that was possible or was expected, and a fraction over one dollar was all that the boys got for their trouble and their pains. The crowd was not very large, but at that crowded the small floor to the limit. Another unfortunate feature of the affair was that the sudden melting of the snow had completely flooded the fields and roads so that it was impossible for any one to get into the city from the west. What people did attend were very generous in thanking the band lads for their splendid music, and congratulating them on their ability.

The Electric club will hold its regular monthly meeting today at the student assembly period. The seniors of the club are on the program to present abstracts of engineering articles bearing upon electrical topics.

An announcement of a meeting of the Athletic executive committee for today has been given. The meeting will be held at 10:30 and is said to be for the purpose of awarding basketball emblems.

Wm. J. McCulley, for three years editor of the Republican-Courier, and during the past year machinist-operator at the same plant, where The Weekly Exponent is published, has resigned and taken over the lease on the old Gracey print shop from the firm of Breneman & McCulley. Mr. McCulley is well known all over the county and has the best wishes of a host of friends in his new venture.

The preliminary tryout for selecting a team to meet the Utah Agricultural college in debate early next month resulted in the choice by the judges of the following team: Horace Davis, William Winters, and Gilbert Griffith, alternate. There were four contestants for the honors and the choice was by no means self evident. The tryout was held last Friday afternoon at 4 o'clock in assembly hall.

Now that all the figures for the basketball tournament are in there appears to be a surplus of about \$10. There may be one or two small outstanding bills which will consume the greater part of this, but the fact that the tourney paid for itself is the gratifying feature of the affair. At the present time it is not definitely known whether the \$95 which was necessary to take the teams of Chouteau, Kalispell and Great Falls will be refunded or not, as the agent of the Great Northern, in spite of their promise of a fare and a third rate, refused to let the high school teams have the reduction on the return trip. The matter is being taken up with the authorities in St. Paul and it is thought that the matter can be settled in a satisfactory manner.

The Drug Store on the Corner.

Prof. W. M. Cobleigh will address the Home Economics club this morning on the "Food Law." The meeting will be held at the student assembly hour.

Miss Dora Beerstecher came up from Belgrade the first of the week to spend several days in Bozeman as the guest of Miss Lucile Quaw. While here she attended several social functions.

A. J. Williamson, the progressive salesman for the pharmaceutical house of Eli Lilly & Co., Indianapolis, while calling upon the drug trade in Bozeman last Monday, took time to visit the school of pharmacy and was favorably impressed with the equipment and the work being done. Mr. Williamson expressed the willingness to appear before the Pharmaceutical society at some future date and give a talk on manufacturing pharmacy. He was accompanied by Mr. C. McKenzie, drug clerk at the Bozeman Pharmacy.

The Choristers of Bozeman, composed largely of students from the College, and under the leadership of Prof. Earl B. Oliver, of the music department, is arranging for a very pleasant itinerary. On March 24th they will render three or four selections at the regular college assembly. Following this a concert has been scheduled for March 31st at Manhattan. During the month of April two more out of town concerts will in all probability be given, one April 17th or 18th at Livingston, and the other at Helena on the 14th. The program has not yet been definitely arranged but the organization has a first class repertoire and will have not the least trouble in rendering a most entertaining program.

Alumni and Ex-Students

Glenn Sloan, '10, returned to Polson Tuesday, after a few days' visit in Bozeman.

Ruth Flager, '10, of Red Lodge, has accepted the position of instructor in sewing in the Butte high school, and began her work the first of this week.

Ray Smith, ex-'13, spent several days in this city the latter part of last week. He departed for Portland last Monday, where he has an excellent position in a real estate office of that city.

Mrs. Maurice Lamme and little daughter of New York city, arrived in Bozeman last Wednesday morning for an extended visit with relatives and friends. Mr. Lamme, '03, who is an instructor in Columbia university, will join his family here in June.

Fred Taylor, a graduate of the school of agriculture last year, who has been spending the last two months with his parents in this city, returned last Wednesday to the Bitter Root valley, where he is a foreman on the experimental station fruit farm under the direction of the former head of the horticultural department, Roy W. Fisher.

The attendants at the agricultural short course at Wisconsin entertained their friends at an informal dancing party, styled the "shorthorn prom."

The Indiana University was presented with a \$200,000 gift recently. \$30,000 of this money will be used for research work.

HAVE STRONG TEAM

TRACK SEASON ADVANCING WITH AMAZING PROGRESS. THE COACHES ENTHUSIASTIC.

NEW MATERIAL LOOKS GOOD

Several of the Freshmen and First Year Men in Different Departments are Prepared to Aid.

"The track team will be fifty per cent stronger than last year, and if we can't clean up the triangular this spring, a lot of strange things have got to happen between now and the time of the meet." Such is the quotation of Alfred Dier who is busy assisting Coach J. H. McIntosh with the coaching of the track candidates. The athletic director is also of a most optimistic frame of mind concerning the prospects and says, "If the new material which we have shows the form which it promises to, we will have the best track team that ever represented the college, when we meet our rivals the varsity this spring."

For the past few weeks the members who aspire to do great work on the cinders this spring have been busy getting into shape in the drill hall or on the walks around the campus where they jog every night, but the snow has been melted so that the track can now be used and the real work will start in deadly earnest. Last night for the first time the distance men went around the quarter stretch twice. The high jumpers were also out near the chemistry building, while the weight men were busy tossing the shot around on the ground near the street car track. Next the sprinters will be trying out their form on the hundred yard stretch, while the hurdles will also be placed. The pits for the jumps and pole vaults will be prepared and the discus and hammer tossers will be fixed out with material and ground on which to practice.

This is the earliest that the track candidates ever reported for practice at the college and the fact that about forty different fellows have been out more or less regularly shows that there is a great deal of interest being taken in the work. Some of the departments are not as strong as last year, while in other events the team has been strengthened to a marked extent. There is no one at the school who can take the place of Pool in the

Young Men's Spring Shoes

Not only a window full of attractive samples, but enough stock on our shelves to fit almost any foot.

ATHLETIC COMMITTEE MEETS

DISCUSS ONE YEAR ELIGIBILITY RULE. MATTERS OF BASE BALL AND TENNIS.

At noon Wednesday there was a special meeting of the athletic committee of the College. The chief purpose of the meeting was to decide whether the invitation from the University for a track meet this spring should be accepted or no. Due to the very unsportsmanlike action of the school across the mountains, with regard to the basket ball season just past, and because this College finds itself somewhat in the same position with respect to a track team as was the Varsity with regard to basket ball, namely with little prospects of putting out a winning team, there has been considerable feeling among the student body here against a track meet this spring. The matter was a subject for considerable discussion in the committee, but it was the consensus of opinion that the former policy of this college should be rigidly followed. The Montana State College has never failed to compete in any form of athletics whatsoever because of not having been able to turn out an assuredly winning team. As a consequence it has been able to accept victory and defeat with equal grace. It was the unanimous opinion of the committee that this policy should be rigidly followed out and accordingly they voted to accept the invitation above referred to.

There was also some discussion as to the advisability of establishing a one year residence rule in this state. As a principle this rule is favored here. Not having sought to strengthen the respective teams by the importation of well known stars from outside points it was deemed that this college is in a position to endorse such a rule. On the other hand, however, viewing the present size of the higher institutions of learning in the state, the question arose as to the practicability of the rule at this time. The committee finally compromised by endorsing a vote of the general student athletic association on the proposition of establishing a one semester rule. It is rather doubtful if such a rule would meet with the approval of the students and even if it should it is believed that the intercollegiate committee would give it little countenance. The action was taken rather to bring the matter up for discussion than for any other purpose.

Base ball and tennis received the attention of the meeting, but inasmuch as the funds at the disposal of the association have been entirely apportioned for this year it was impossible to do much in favor of either of these branches of sport. Some little money will be supplied from the emergency fund to assist the base ball fans at the college toward arranging for a series of interclass games. This concluded the business at hand and the meeting closed.

BAND TOUR ARRANGED.

With the intention of making the annual tour of the state about the middle of next month, the itinerary of the College Regimental band was fixed this week. There will be six towns included in the trip this year. The boys will leave on April 17 for Butte, where they will give their first concert. From there they will proceed to Dillon, where they will play Tuesday evening. The third stop will be Anaconda, and from here the musicians will go north to Great Falls, where they will play Thursday night. The Capital city will next be visited, and the tour will be completed Saturday night, April 22, at Townsend.

While not as long as some which they have made, nevertheless this journey gives the boys a good time and a week's vacation. The finances for the tour are not yet assured, as the dances and play were not as successful as was expected in raising funds. There is still a shortage of about \$150, but this will be raised by a few dances after the tour is completed. The expense for the tour is \$650.

The boys are to have a private car, which will accommodate the twenty-two musicians for their sleeping compartments. Accompanying the regular band there will be Eugene Quaw, pianist, and Prof. A. H. Currier, of the modern language department, who will render several baritone solos at each concert. The band boys have been practicing faithfully for the past few weeks, and are now prepared to give the best concert program since the founding of this musical organization.

Columbia, which does not have an agricultural department, is offering a series of lectures on economic agriculture, given by experts in that science.

HAVE GOOD JOBS

(Continued from 1st page)

with him for 2 p. m.—it is now 12:05 p. m. and about time for lunch. We eat about eight or ten times a day here. It is a British ship, you know. The other day we went down into the engine room. I think it must have been about a hundred degrees down there, for it was sure hot. We went all along the row of boilers and snoveled some coal for a few minutes and then we "beat it", for it was just a little too hot for us. They have all Spanish firemen and they work four hours to a shift. They seem to stand the heat better than the northern people.

The propeller on the boat is 22 feet across and the shaft is 18 inches thick.

We are just getting down to where it is hot. Tomorrow at noon the sun will be straight above us. That will be at Bahia, or San Salvador. Today at noon we will have 314 miles to Bahia.

Feb. 2.—The mail goes north tomorrow. We are making about 300 miles per day on an average, and I guess that we will get there some day. We see ships every once in a while now, some of them are coasters and some are off for Europe.

Flying fish are everywhere and sometimes you see a tarpon or a porpoise. As yet we have not seen a shark or a whale, but hope to see them any day now as we get further south.

We have a doldrum or a tropical rain about every six or seven hours and they sure feel good. I am going to sleep on deck tonight, it may be cooler.

I understand from what parties say who are well acquainted with the country here that there is any amount of first-class timber land in Southern Brazil that can be had almost for the asking, and I don't know but what we will be doing a little bit of the asking if things look good. There seems to be a good opening for a chicken farm at Buenos Ayres but that can wait for a while. When one gets talking to people who have been all over the country and know something of the place, you find out some things that you never knew existed. As far as we can tell from here, it is a first-class country if you don't hurry through too fast.

Today we saw about five or six different kinds of fish in great schools, some of them about 12 or 14 feet long. They were alongside of the vessel for about two hours. Some of them kept jumping out of the water about 50 yards or so at a jump.

There is an old woman on board who gets sick every time the boat rolls, and every once in a while she tells us that she is going to die soon.

The fruit region is reached, and you can bet I will lay in a supply when we reach Bahia, where we will stop about six hours to get sand to scrub decks. Regards to all from Wright and Sop. Will write from Rio. Tell the bunch hello Gil.

It is with pleasure that this news of the success of the college students was passed around among the members of the student body, among whom the travellers had many true and staunch friends. It is merely another case of the college man—especially of this institution—making good, and the entire student body wishes to congratulate these three former members of the class of 1910.

WILL ESTABLISH ANOTHER SUBSTATION.

Wednesday afternoon F. B. Linfield, director of the college experiment station, and Prof. Alfred Atkinson, head of the agronomy department, started for the Flathead country in the northwestern part of the state, where they will establish an experimental farm on the Indian reservation. This section of land, which was recently thrown open for agricultural purposes, was immediately settled up by a number of farmers, many of whom are not at all familiar with the conditions existing in Montana. The purpose of this new substation will be to experiment with various plants in such a manner that it can be determined which crops do best on this kind of soil, and which are the best yielders under the climatic conditions of the reservation.

The site for the farm has not been selected as yet, but it will be near Polson or Ronan. With the fruit farms and substations both on irrigated and dry lands, there are about 15 substations in this state, which are proving to be very beneficial in raising the standards of the Montana agricultural industry.

Vanderbilt University has received an additional gift of \$15,000 from William K. Vanderbilt.

The Co-operation society at Harvard sold last year to the value of \$365,000, and paid a dividend of 9 per cent on all purchases made by members. Yale, Princeton, Cornell and California also have co-operative stores in operation.

MONTANAN DUMMY ARRANGED TWO POPULAR ILLUSTRATED LECTURES

John Taylor, the Business Manager, Leaves for Great Falls With First Copy.

The first large installment of copy for the 1912 Montanan went to the publishers at Great Falls yesterday morning. At the same time the third installment of copy went to the engravers and will be ready in about two weeks for inserting into the "dummy."

John C. Taylor, business manager of the publication, went to Great Falls in care of the copy, and will stop in Helena to pick up a few more pages of advertisements. Mr. Taylor will probably not return before Monday. In the meantime the work on the remaining pages of the book proceeds, and it is hoped that the last of the copy will reach the publishers by the 10th of April.

Should this be accomplished, it will be the earliest completion of the Annual that has ever been seen since its inception at this college. The members of the staff are reticent as to the contents this year, and little additional information has as yet been secured. The book will consist of 248 pages and will be printed on an extra heavy and especially finished grade of enameled paper. Everything possible has been done here toward an early delivery of the publication, and it appears now to be up to the engravers and publishers.

When asked to name an approximate date for the delivery of the books, one of the staff said that they still hope to make it by May 10. Financial prospects are fair, and with a reasonable fulfillment there should be little if any deficiency.
