

# THE WEEKLY EXPONENT.

VOL. 3.

BOZEMAN, MONTANA,

FRIDAY, APRIL 26, 1912.

No. 311

## EDITOR BUYS INTEREST IN PAPER

CHAS. H. DRAPER, EDITOR OF WEEKLY EXPONENT NOW INTERESTED IN NEWSPAPER

## WILL ASSUME CONTROL SOON

Has had Experience as City Editor of Chronicle, Editor of Exponent, Associated Press Work and Corresponding for State Papers.

The Carbon County Journal, for last Friday announced editorially that Charles H. Draper had purchased an interest in that paper and would assume editorial charge June 15. This information was rather a surprise to the many friends of Mr. Draper who were not generally aware of his undertaking.

Mr. Draper has been in charge of the Weekly Exponent since its foundation. During this time he has also acted as local correspondent for a number of state newspapers. When the Daily Chronicle was established last November he was made city editor and is at present filling that position.

His course in college has been along lines that fit him especially well for this line of work. This together with his experience in other newspaper work will be invaluable.

The field in which Mr. Draper goes is not a new one for him as his home is near Red Lodge. All his summers have been spent there with the exception of last year, when he toured the state in the interests of the college.

## LOWER CLASS-MEN CELEBRATE

Join in Holding Informal Party at Elks Hall—Report Enjoyable Evening.

All enmity between the lower classes was buried Saturday at the Elks' hall, when the two classes engaged in the second annual inter-class party. Those who were present report that the event was a success in every way, except from the financial viewpoint.

The hall was decorated for the occasion in the class colors, with numerous class and college pennants on the walls of the hall. Music was furnished by Chisholm's four-piece orchestra. This was augmented later by the arrival of Will Tibbs, who played the violin, and Willard Atkins, '14, who added to the quality of the music with his slide trombone. Refreshments were served and after a program of about twenty dances the crowd broke up at 11:30. The chaperones were Prof. and Mrs. F. C. Snow, and Prof. and Mrs. G. L. Sullivan. The following joint committee, appointed from the two classes, was responsible for the good time: Misses Georgia Cullum, Clara Flanders, Leah Hartman, and George Roosevelt, Tom Herrin and Alonzo Truitt.

## FACULTY AND STUDENTS LECTURE TO WOMAN'S CLUB.

Last Monday afternoon, the Home Economics section of the Women's club, met in the Home Science rooms of the college. The members were entertained with demonstration lectures upon the subject of meats. Miss Hess gave the first lecture, taking for her topic "A Precise Method of Roasting Beef." This lecture was accompanied by a demonstration in which a piece of meat was roasted with the oven at a constant temperature, which fact made it necessary to watch the meat closely. In this, some of the first and second year students in home science assisted Miss Hess.

The second lecture of the afternoon was given by Prof. Spaulding, of the biology staff, who spoke on "The structure of meat," making his lecture

doubly interesting by the use of a stereopticon and shades.

In closing the program, four of the Sophomore girls in home science, gave short lecture demonstration on different topics. Those who spoke, with their subjects, are as follows:

Madge Switzer—Meat for invalids.  
Mildred Eckles—The way meat work is taught here.  
Pearl Heighton—Meat extractives.  
Georgia Cullum—Cheaper cuts of meat.

The members expressed themselves as being very much pleased with the lectures and demonstrations which will help to solve many problems of the kitchen.

The faculty at the Michigan Agricultural College is planning a new course in the division of arts and science, to fit men for positions of administration and industrial teachers.

## M. S. C. WILL HAVE BASEBALL TEAM

At Meeting Held Yesterday George Gosman of Freshmen. Elected Team Captain.

Baseball men at the college held an enthusiastic meeting Wednesday noon in Professor Tallman's room at which time the principal business was the election of captain for the college nine. The unanimous choice for this position was George Gosman of Dillon. The new captain has been one of the most enthusiastic fans at the college and has been present on the college baseball grounds with great regularity. Mr. Gosman also played guard on the basketball team and has shown himself to be a good all around athlete.

About twenty persons were present at the meeting which was called to order by John Taylor. Short talks were made by Mr. Taylor and Captain Gosman. Both urged every man to get out for track and to put all their effort into turning out a winning track team. The second interest of the men should then be baseball. This was the unanimous feeling of the men present. They do not intend to do anything which would injure the chances of the track team at Missoula.

Plans for baseball were also announced. Bill Hartman, basketball referee and Mr. Reynolds, a member of the town baseball team, have promised to coach the men. Prof. I. T. Gilruth and Coach Dockstader will also assist as soon as the track meet at Missoula takes place. It is also planned to have several games with the town team, the first of which will probably be played tomorrow as a practice game on the college diamond. The regular class games will be played. The principal one will be between the lower classes about which event a great deal of interest has settled.

All present are enthusiastic over the prospects of securing games with the university after the track meet. A number of men have been out whenever the weather would permit and plenty of good material is available for a strong nine to represent Montana State. From the enthusiasm that has been displayed it may also be said that it will require work for any man to secure a place on the regular team for the interest has been exceptionally keen in this sport this spring.

CHAS. H. DRAPER, '12 Who has purchased an interest in the Carbon County Journal

## PRIMARY ELECTION FOR PRESIDENT OF SENATE IS TODAY

TWO MEMBERS OF JUNIOR CLASS WHO RECEIVE HIGHEST VOTE WILL RUN IN ELECTION NEXT FRIDAY FOR LEADER OF STUDENT SENATE FOR THE FOLLOWING YEAR

## REPRESENTATIVES FROM CLASSES WILL BE CHOSEN LATER

Must be Elected by Week Following the election of President—Seniors have Four Senators, Juniors Three and Sophomores Two—Freshman Senator Will be Elected Next Fall.—All College Students are Urged to Vote.

Be sure to vote. This is the warning given all students today. The primaries for the election of the president of the Student Senate are being held and the two members of the junior class who poll the largest number of votes will enter the finals for the race next Friday. Ballots may be cast at any time from 9:00 a. m. till 4 p. m. and it is the duty of every student who is registered in the regular college courses to be on hand to state a preference. Ballot boxes will be placed in the main hall of the main building. All members of the present junior class who are looked on as prospective members of the senior class next year are eligible for the position. The several classes are expected to elect members of their classes to serve as their representative senators before next Friday.

The seniors are entitled to four members of the senate and one of this

number is chosen as vice-president of the organization as soon as it holds its first meeting. The juniors of next year, or the present sophomore class are entitled to three representatives and the sophomores of next year are to have a representation of two in the Senate. It is important, if the Senate is to do its best work that the members who compose it are students who are interested in every form of student activity, are persons who are willing to get in and act in the best interests of the college as they see them, despite all thought of personal condemnation. It has been illustrated several times this year that the Senate in its action cannot suit everybody and this must ever be so. The best that can be done is to select men or women for it, who have shown and who can be expected to show a great interest in the welfare of the college.

## LOYAL BOOSTERS HELP COLLEGE TRACK MEN.

Good work has been done recently by several members of the student body, those who are of the better Boosters. Among these are Hilmer Dahl, Roy Clark, Glenn Luther and Ernest Border, who have been assisting at the drill hall in rubbing down the track men. Too much credit cannot be given for this form of work and self-sacrifice on the part of these men.

Edward Hodgskiss, Ralph Brabrook, Robert Kelley, Bryan Davis, Hilmer Dahl and Tom Hillis also showed loyalty to the college that will go a long way toward turning out a winning team. The occasion was last Saturday, when there was a foot of snow on the ground, and these men turned out in the morning and afternoon to help Coach Dockstader clear off the jumping pits and a part of the track so that the track men would not lose this day's practice for the dual meet. It might be mentioned also that a number of other students had been asked to help on this work but failed to appear.

## EXTEMPORANEOUS CONTEST WILL BE HELD MONDAY

Triouts for the state extemporaneous contest will be held at the College assembly hall Monday afternoon. It is not known to a certainty that the state extemporaneous contest will be held this year, as all the arrangements for it are not yet completed and several of those to participate have not yet accepted the proposed plan. The extemporaneous speaker would take the place of the alternate who has been sent to the contest in the past. The state oratorical will be held next Friday, May 3, at Helena, so that it is necessary to hold the local extemporaneous contest at once. A number of persons have signified their intention of entering this event. It will be open to all who desire to hear it, although no effort will be made to make it public as the number that have turned out before has been good and Prof. Gilruth does not want to force the interest in speaking contests to the breaking point. Judges have not yet been selected. They will probably be picked from the audience.

## MUTT AND JEFF MEET PLANNED TODAY

WILL BE HELD ON TRACK THIS AFTERNOON IF WEATHER WILL PERMIT AND TRACK DRIES OUT—MEN ARE IN GOOD CONDITION AND ANXIOUS FOR A CONTEST.

If the weather permitting, the students will be given an opportunity to witness a real track meet this afternoon on the local field. This is not the interclass meet, but a sort of a preliminary between two picked teams known as the "Mutts" and "Jeffs".

It is the intention of the coaches to have every man that has been out one or more times take part in the meet. In dividing the men into the two squads, the ability of those trying out the same events has been taken into account and the two teams have been made of as nearly equal strength as possible. Due to this equalization of the men entered, a close and interesting meet will undoubtedly take place.

This little try out will give the students the first opportunity to see the track men in action. Neither side will have a decided advantage over the other and in some of the events the winner will be pushed to the utmost. Plenty of excitement and chances to root will be offered to those who attend.

The showing of the candidates at this time will go a long way in their

selection for the first team to represent the college in the dual meet with the university. The final selections will, however, not be made until after the interclass meet which will be held on Friday, May 3.

The track candidates who will take part in this meet have been working diligently for the past week under the direction of Coach Dockstader and Prof. Gilruth. While the weather has been miserable to train in, everyone has done his best and will give a good account of himself on the field this afternoon.

It is hoped that everyone who possibly can will be on the bleachers at four o'clock this afternoon to cheer and root for the men on the track. The least that any student body can do to show their appreciation of the work the team is doing, is to attend these contests and show some interest in the men who will represent the school in the intercollegiate meet.

M. S. C. is going to have a winning team this year and the nucleus of that team will be picked this afternoon.

## ATHLETIC EXECUTIVE COMMITTEE DISCUSSES SWEATERS.

A short meeting of the Athletic Executive Committee was held Friday during the student assembly period. The principal business brought up was a discussion of the sweaters which should be given to those who win their letters. It is expected that those who win letters will be awarded a sweater with the first letter received in each branch of athletics. Owing to the new plan of selling students season tickets it is thought that the association will also be able to furnish these sweaters. After a discussion of the question it was decided to appoint a committee to investigate the awarding of sweaters and report at the next meeting. The committee consists of Jack Taylor, ex-officio, W. B. Vestal and John Wharton.

## SCHERMERHORN AT WORK ON CAMPUS

TREES AND SHRUBBERY ARE BEING SET OUT—PLAN NEW HEDGE AROUND DORM.

In spite of the fact that the college campus is the most beautiful in the state, improvements are still being made in the arrangements of the shrubbery. During the past week men have been busily engaged in setting out trees around the dormitory and on the eastern part of the campus. A screen of trees will be planted in the rear of the dormitory to conceal the street car track from the view of the campus. A row of trees and shrubbery is also to be placed on the east end of the campus along the fence by the street car track. Shrubby is being planted at the west end of Hamilton hall which is to serve as a screen for the driveway for delivery wagons and such vehicles.

A back yard will be separated off at the rear of the hall for a clothes yard. Trees are being placed along the driveway from the hall to the main driveway, clumps of shrubbery being placed at the junction with this driveway. Professor L. G. Schermerhorn is in charge of the work. When the proposed cement walks are in place the college campus will not be excelled by any in the northwest.

## PREP TRACK MEET WILL BE HELD ON MAY 10

"Prep Argoes" was the name decided upon by the boys' booster organization last Friday morning. In the near future the members of this department will enjoy a picnic to Bridger canyon, under the auspices of this society. The annual inter-class track meet was arranged for and the members laid the foundation of a campaign for new students by appointing a committee to draw up a permanent mailing list of persons who have graduated from grammar schools but have not completed their secondary course or are not attending high school now. This list will be on file at the principal's desk and bulletins and letters will be sent to those students with the hope of inducing them to return to school. Wm. Monson is chairman of the committee and will be glad to hear of any such persons.

It was decided that the annual track meet of the preparatory students will be held on Friday afternoon, May 10, if the weather is suitable. The winning class will hold the championship banner for the following year, and the contestant who secures the most points will be presented with a bronze medal, given by the society.

## ENGINEERS WILL DELIVER JOURNAL

PRINTING IS NOW BEING COMPLETED—WILL BE DELIVERED NEXT WEEK.

## WOLPERT IS EDITOR OF BOOK

Is Full of Articles by Alumni of College and Members of Faculty—is Second Journal to be Sent Out by Civils.

Next week the second annual Civil Engineering Journal will be ready for distribution. The publication this year has been in charge of Harold E. Wolpert as editor-in-chief and Wm. Chapman as business manager. Both positions have been competently filled by these men and the Journal itself will bear witness to the careful and painstaking work bestowed upon it.

The books will contain about eighty pages of material along engineering lines, written by members of the faculty and alumni of the civil engineering department of the college. About four hundred copies will be printed and it is expected that about one-half of this number will be taken by students. The remainder will be distributed among those following the engineering profession throughout the state.

As has already been stated, the first publication of the Journal appeared a year ago. Due to its successful reception by the students and profession it was decided by the Civil Engineering society of the college to again put out a journal.

## FOOTBALL MEN ARE HONORED

Banquet Given Boys By President Hamilton and Coach E. A. Dockstader.

Last Friday evening in the home science rooms of the college the football men were entertained at a dinner, given in their honor by President I. M. Hamilton and Coach E. A. Dockstader.

The dinner, which was a sumptuous one as shown by the menu, which follows, was prepared by the home science girls; the same young ladies served the dinner.

Seventeen men, besides President Hamilton, the coach and manager of the team and J. H. McIntosh, ex-coach of the college athletics, were in attendance, and the time was spent very enjoyably until 8:30 o'clock when the gathering broke up.

Toasts were in order after the "feed", and after President Hamilton, the toastmaster of the evening, had proposed the toast, "The Team," others responded to toasts as follows: "Spring Practice"—Coach E. A. Dockstader.

"Past Football Teams"—Ex-Coach J. H. McIntosh.

"Being a Jinx."—Manager W. B. Vestal, Jr.

"Summer Practice."—J. Edward ("Bing") Hodgskiss.

Others who spoke were Messrs. Taylor, Donaldson and Wolpert, the senior members of the team.

This custom of giving a dinner to the football team has become an annual affair; its purpose is to further an interest in football early in the year; so far it has served this purpose admirably.

## PHILLIPS-FOWLER.

On last Sunday afternoon Miss Mary Alice Fowler, daughter of Mr. and Mrs. W. H. Fowler, of Bozeman, and Leslie R. Phillips, of Helena, were united in marriage at the home of the bride's parents, Rev. J. E. Parker officiating. Miss Anna Uhl of Livingston was bridesmaid, and Mr. Wray Andrew of Helena, acted as best man. Mr. Phillips was a student at M. S. C. several years ago. The best wishes of many college friends go with the young people to Helena, where they will make their home.

L. G. SCHERMERHORN

In charge of improvements to the college grounds.

### The Weekly Exponent.

Established Jan. 1, 1910  
Outgrowth of Monthly Exponent, established Jan. 1, 1895

Published every Friday of the College year by an editorial staff chosen from the students of the Montana State College of Agriculture and Mechanic Arts.  
Bozeman, Montana

Subscription rate—Two Dollars per year, five cents per copy. Advertising rates made known on application.  
Entered as second class matter at Bozeman, Montana, under Act of Congress of March 3, 1879.

The Weekly Exponent is strictly a student enterprise. Its chief purpose is to present to its readers each week an accurate and complete record of the developments in college affairs during that period and it is intended that its influence shall be exerted for the upbuilding of M. S. C. The paper is the result of voluntary effort put forth by the students who compose the staff.

#### CALENDAR

Friday, April 26—Graduating recital of Miss Georgia Hollier. Assembly hall, 8.15.  
Thursday, May 2—Concert by Glee Club, Assembly hall, 8:00 p. m.  
Friday, May 3—Adrian M. Newens, Civic League. Opera House, 8:30.  
Friday, May 3—Interclass Track Meet Montana State.  
Friday, May 3—Intercollegiate Oratorical Contest at Helena.  
Saturday, May 4—Trip to Morrison Cave.  
Wednesday, May 8—Dual Track Meet at Missoula.  
Monday, May 13—Electric show and Boosters' dance at drill hall.

#### Elect the Best Men Possible for the Senate.

During the week following the election of the president of the Senate the classes will be expected to hold meetings and select their representatives to this body, which is supposed to represent, more nearly than any other student organization, the interests of the students of Montana State College.

The primaries for the election are being held today, and next Friday the final election for president will be held. It should hardly be necessary to urge upon the student body the necessity of securing the best man that the college affords for this position. A great responsibility rests with the students in the selection of this man, for if he has not the necessary push and executive ability for the performance of the duties connected with the office, the students can not but expect to fare badly. Therefore every man should use his best judgment in casting his ballot in order that the Senate may continue as an organization acting for the good of the student body and the college in general. This can only be attained by having a strong man and a leader at the head of the organization.

And no less a responsibility rests with the classes who are to select representatives to the organization in the week following the election of president. Unless leaders in the class, the best men that can be found, are chosen to make up the Senate, it is doomed to failure and the interests of the college and the student body cannot be rightly cared for. It is thus up to each class to see that only those who have been active in the interests of the college be chosen for the body and it should also be seen that persons who are willing to take a stand, and to hold it, are chosen for senators. The Senate cannot please everybody all the time. This has been demonstrated this year, although it has always acted as it thought was in the best interests of the institution. To do this at the risk of receiving the condemnation of a part of the student body requires moral courage in no small degree, and if such men are not selected, the Senate will also be doomed to a failure. Thus the students may see what the responsibility is when they are called on to elect their representatives and they should act accordingly. Choose only the best and the strongest men that are in the class, men who can be relied on to push every forward move and balk every one that tends the other way.

#### Success to Him.

In another part of this issue appears an announcement to the effect that Chas. H. Draper, the present editor in chief of this paper, has purchased an interest in the Carbon County Journal and will assume editorial control as soon as commencement is over. Mr. Draper has been one of the leaders in every movement for the betterment of the college during the years that he has been a student here and it will be with no little regret that the student body will see him move to his new field of work.

The work is not new to Mr. Draper, however, and for this reason the writer of this article can say that the present editor will achieve success of a high order in his new venture. Mr. Draper was the real founder of the Weekly Exponent. Before that time a monthly had been published. However, when the weekly was founded the first part of the year, 1910, Mr. Draper's name appeared on the staff as managing editor. Owing to the fact that the editor was a girl and the many duties around the shop required the services of a man it fell to the lot of Mr. Draper to care for the greater part of the work to see that the Exponents reached the readers of the paper each week. That he did this well goes without saying.

After the second edition of the paper an enlargement was made and later a second enlargement was made in the fall of 1910. Thus Mr. Draper pushed the standards of the paper to a place to which the paper can be classed among the very best college weeklies that are published and to a point where the writer can say with truth that the standards require work that they may be maintained. Besides the Exponent Mr. Draper has been the city editor of the Daily Chronicle since its foundation last fall and he has also reported for the state papers and the Associated Press. In each case he has shown ability as a newspaper man.

Along with his work as editor of the Exponent last year Mr. Draper was the editor of the Montanan, the many duties which are attached to this position never being too great for him. Mr. Draper has also been engaged in the work of the Boosters. He was one of the leaders in perfecting that organization and acted as their representative on the Better Farming Special last spring as well as their representative on a tour of the state last summer.

At different times Mr. Draper has been active as a member of the Stag organization, the Arena and the Y. M. C. A. Every forward movement among the students at the college has found Mr. Draper behind it and we bespeak for him every success in the venture which he has undertaken.

#### Prepare for Labor Day.

It may be well at this time to call the attention of the student body to the fact that there is a labor day coming soon. This is a custom inaugurated by the "Boosters" three years ago and will probably be carried out again this year. A number of improvements to the campus have been made and the work done will prove of lasting benefit to the college. The college calendar has set the day which they call "Campus Day", for May 4, or just a week from tomorrow. No plans have been made so far to the knowledge of the writer and thus it may readily be seen that it is necessary to get in and push matters with all the force that there is in the Boosters' club or in the entire student body of the college. Every man must help but first it may be suggested that some plans be formulated or that a committee be appointed to have charge of the day. The first year the athletic field was started. It is now a most valuable part of the campus. Last year the principal work was the building of the second cement tennis court. This was also appreciated as may be seen any warm afternoon or even as early as 5:30 in the morning. This year as much more good can be done. It is up to the students to do it and to begin their plans at once. The custom cannot be dropped. It is too valuable for that.

The first regular meeting of the local grange since its inception occurred last Friday evening in the sewing room in Agricultural hall.

### REMINGTON EXPERT IN ASSEMBLY WEDNESDAY

Parker C. Woodson Gives Demonstration of Speed Typewriting at College Wednesday.

Perhaps the fastest manipulation of the typewriter that was ever witnessed by the students of the college, was the demonstration given Wednesday morning in the assembly room by Parker C. Woodson of New York. For an hour Mr. Woodson gave tests under different conditions each one striving better to illustrate the marvelous speed and accuracy which he has attained.

To show that one does not have to be familiar with what he is writing, to attain accuracy and speed, Mr. Woodson wrote seventy-five words per minute without a mistake from a French composition. The test was followed by one to illustrate that fingering becomes as mechanical as walking with practice. While writing Mr. Woodson added a column of figures, attaining one hundred twelve words per minute, and he carried on a conversation with the audience while writing one hundred nineteen words during one revolution of the second hand. As a final test a speed of 247 words a minute was attained by the remarkable young operator, while writing a special "speed sentence."

Mr. Woodson is accompanied by Raymond B. Kelley, manager of the school interests for the Remington company for the United States and Canada. L. E. Young, traveling representative with headquarters in Butte was also in the city as a member of the party.

A Remington No. 10 visible machine is used in all these demonstrations and the young man is traveling under the auspices of the Remington company.

### GLEE CLUB WILL GIVE CONCERT ON THURSDAY

It has been announced by Prof. U. H. Bishop, of the School of Music, that there will be a concert given by the Glee Club at the college assembly hall, Thursday evening, May 2, at 8:00 o'clock. The Glee Club will be assisted by other members of the School of Music. As outlined by Prof. Bishop the program will be almost entirely vocal and will consist of a number of standard and college songs, and should prove of great interest to the college people. The Glee Club has been practicing hard to perfect this program, which will in all probability be the last one to be given this spring. This organization has reached a high state of perfection and is composed of twelve voices, picked by competition for places from the members of the student body. The members of the organization are Alonzo Truitt, Roy Spain, Guy Millegan, Max Kenck, Will Shovel, and Joe Morgan, tenors; and Wallace Fisher, Lawrence Wylie, Geo. Morgan, Freeman Daley, Hamilton Steel and Geo. Roosevelt, baritones and basses. The following persons will assist in the concert as vocalists: Misses Vie Vallean, Vera Anderson and Flora Hartman, and Miss Ruth Stanton will act as accompanist. It is also probable that there will be one or more piano selections. The persons on the program have been heard at the college before so it is probable that there will be a large crowd attending this event.

Mrs. B. T. Stanton visited her daughter, Ruth, the last part of last week. She returned to Helena Saturday.

E. J. S. Moore, '01, has returned to his ranch south of Bozeman. Mr. Moore spent the winter in Walla Walla, Wash.

Helen Fisher, '10, who has been visiting friends and relatives in the east for the past seven months, returned to Bozeman Sunday.

David Higbie made a short trip to Big Timber Wednesday in the interests of the employment bureau. He returned for classes Thursday.

Mr. and Mrs. W. E. Harmon spent a few days last week with their daughters, Ella and Florence, at Hamilton Hall. They returned to Helena Sunday.

The business men who were attending the retail merchants meeting in this city this week made a tour of inspection of the college and campus Tuesday. Pres. Hamilton acted in the capacity of guide.

Tonight Miss Georgia Hollier will give her graduating recital in the college assembly hall, at 8:00 o'clock. A musical treat is expected by the many friends of Miss Hollier. Mr. Wallace Fisher will assist as vocalist.

Prof. J. R. Parker, of the department of entomology, returned Sunday from the Bitter Root, where he had gone to attend to the spraying of some orchards. The work had to be postponed on account of the inclement weather.

When in need of Particular Printing, call on the Bozeman Printing Co., the "Know How" printers. Our motto is Quality not quantity. Come in and see our samples of programs, invitations, calling cards, and anything in the printing line.

The College catalog has been printed and is now in the hands of the binders. It will be ready for distribution the first part of next week. The printing was done at the office of the Chronicle Publishing Co. But few changes from last year's catalog appear in this issue.

F. B. Linfield, director of the College Experiment station, just returned the first of this week from a trip to Flathead and Lincoln counties. While away, he held a farmer's meeting at Polson, and arranged for starting a demonstration farm at Eureka, in Lincoln county.

A shipment of cuts for the Montanan arrived Saturday from Missoula. They had been sent to the staff of the Sentinel, the University's Annual, by mistake. The University men report that they are tied up in the same way as the College is and have not yet received their cuts.

Wm. Shovel, who has been studying vocal music at the College as a side issue to his agricultural course, assisted Miss Lela Maxwell and Florence Thorpe at an organ recital, which was given Tuesday evening at the Presbyterian church. His selections are reported to have been greatly enjoyed.

Harold E. Baker, '07, recently resigned his position as superintendent of the Butte Steam plant and sub-station, to accept a position as chief engineer with the Pacific Power & Light company. Mr. Baker left Butte last Friday for North Yakima, Wash., near which place the plant over which he has charge is located.

News arrived in Bozeman Saturday, stating that Miss Helen Wilson's father died the preceding afternoon at Helena. Mr. Wilson was well along in years. The many friends of Miss Wilson extend their sympathy together with that of the Exponent. It is not known when Miss Wilson will return to school.

Mrs. Gould took the class in household architecture through the newly completed bungalow on College street and Third avenue, at the last meeting of the class. After the inspection was completed the class was entertained by Mrs. Gould with a number of selections on the Victrola. An enjoyable as well as an interesting trip was reported.

On the April number for the Cement World there appears an article by Prof. F. C. Snow, of the civil engineering department, on the construction of curves in concrete walks. The article deals with different methods of determining even and graceful turns and offset curves in cement sidewalk construction. It is very interesting to those engaged in such work.

Mr. and Mrs. Bert Hinds visited the College Friday, renewing old acquaintances and noting the changes at Montana State since Mr. Hinds graduated in 1909. Mr. Hinds is employed by the Madison River Power Co. and is visiting Bozeman to do some special work. Saturday morning he showed the members of the Electric club through the local sub-station.

The Pan-Hellenic dance, given by the National fraternity men of the city, will occur tonight at Elk's hall. The list of those invited includes several fraternity men from Livingston, Belgrade, and other towns of the county, and several members of the faculty and student body of the college. It is expected that about forty couples will attend the dance.

Two men have been kept at work all the time when the weather would permit keeping the track in shape and improving it for the track men. It is possible that the Boosters' Club will find work here on their annual work day, which is to take place soon.

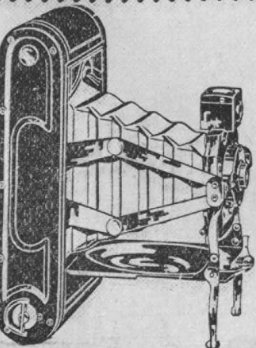

Prof. H. P. Bonebright and M. L. Wilson, assistant in dry farm work, will leave next week on a flax instruction trip through the eastern part of the state. Travelling by automobile, they will give plowing and soil preparation demonstrations, and instruction on seeding, growing, and harvesting flax. They will be gone all the month of May, and will visit from 15 to 20 places.

Fred Gordon and George Blinn, who are working day and night on the 1913 Montanan now days, made a short business trip to Butte Saturday. They returned Sunday after arranging several details with Miner print shop in regard to the printing of the Annual. The Miner made a very fair proposition to the staff in regard to printing the book, and this work will be rushed, in order not to delay the book more than possible.

In these days when the very limit of sartorial splendor seems to have been reached in stage costuming, it appears to be a little nervy to claim super-excellence for the dressing of a play, but if reports are to be believed that have come from those who have seen "The Newlyweds and Their Baby", something extraordinary fetching and bewitching in the way of stage garbmentry will be displayed here during its engagement in Bozeman tonight.

An experiment, to be taken up by the Experiment station, was approved this week by Dr. True, in the office of the director of experiment stations, U. S. Department of Agriculture. This project, which is taken up under the Adams fund, is entitled, "The relation of water lost to dry weight of crops." The experiment, as outlined by Prof. Atkinson, will be carried on on the College farm. Fourteen galvanized iron tanks, each 16x32x46 inches, will be used in growing a quantity of farm crops under complete water control.

Gov. Norris has appointed a committee to investigate and report on a system of equalizing the salaries of the faculty members in the state institutions. The plan provides for systematic promotion and increase in pay. The appointment of this committee was authorized at the regular meeting of the board last June. It will consist of W. E. Harmon, state superintendent; G. T. Paul, of Dillon; W. S. Hartman, of Bozeman; N. E. Leonard, of Butte, and Chas. H. Hall, of Missoula. The committee is now gathering statistics and will report their plans at the regular June meeting of the board.

G. B. Conway, state accountant, visited the college this week to audit the books at the institution.

This afternoon at 3:30 the Y. W. C. A. girls will entertain the senior G. C. H. S. girls at the home science rooms. The girls will bring their fancy work, there will be music, a few games, and refreshments will be served.

Saturday forenoon the Electric Club was conducted through the sub-station north of the agricultural building. The trip proved to be very interesting and instructive, especially to the seniors who were instructed to make sketches of different apparatus.

The bulletin board was the center of attraction yesterday as the names of those who are favored with a request to call on the president were posted. President Hamilton stated, however, that the showing of most of the students was well up to the average at this time of the year, probably because of the backwardness of the weather.

Frank McGuire, a member of the junior class, will leave for his ranch home tomorrow to begin the spring work. Mr. McGuire has secured leave of absence from last Monday, but has remained in the city making the finishing touches to his work before his departure. Mr. McGuire has many friends on the hill who regret to see his departure from the college.

The two sets of plans which have been submitted for the enlargement of the college drill hall have been placed in the hands of the coach and the faculty athletic committee for their consideration. A report of the plans is expected soon and as soon as possible the work of making the necessary enlargements will be pushed and completed before the meeting of the high schools at the college next spring.

Following a custom that has been in vogue for a number of years, the city council has challenged the college faculty to a baseball game, the proceeds to go to some worthy cause. Last year no game was held owing to the inclement weather, but the year before the proceeds were used on the athletic field and the year before that a neat sum was raised for the city park.

Miss Edna Hagerman led the Y. W. C. A. meeting last Monday and gave a very interesting and instructive talk on the "Purpose of Education," emphasizing the fact that education means more than mere book knowledge. She confined the subject to college education and read statements from many alumni showing that they considered the influence of the college professor the broader views of life received, friendships formed, and the general education gained as a foundation for life work as the most important values received from a college education.

## SPRING FEVER

TRACK, BASEBALL AND TENNIS.

Tuesday was the first warm day this week. Owing to the good weather the track men were given the best work out of the present season. The men were sent against the watch in nearly every event, and while the time was slow the men finished strong which is more desirable at this time of the year than speed.

One thing noticeable about this year's aggregation is the strict training rules which they have kept. The coach's instructions have been followed closely by nearly every member of the squad. This spirit will aid materially in producing a winning team for M. S. C. this year.

The meet to be held this afternoon should give a good line on the ability of the different candidates. Many of the men will appear for the first time under the blue and gold, and dark horses among the contenders will be watched for by the student body.

Both teams are out to win, and the champions will not have a walkaway from their rivals. On paper neither team appears to have an advantage, the final scores alone will tell the winner.

The losers of the meet are to set up the treats after the clash at Misoula. This is an added inducement for everyone to extend himself to win.

Candidates are now out for places on the team. This is the largest track squad that ever competed for a track team at M. S. C. Surely out of this number one of the best teams that ever represented the college can be picked.

At last definite steps were taken to organize a baseball team at the college. Wednesday noon about twenty enthusiasts held a meeting and decided that M. S. C. should be represented on the diamond.

## Our New Cabinet For Mens Hats & Caps

is not only a very handsome piece of furniture and a great labor saver for us but will be of great assistance to our customers in making their selections.

It will obviate a labored description the hat seen in our window or worn by a passerby.

Every block and every color and shade can be seen and there is no danger that the one not shown would have pleased better.

We did not realize what a big line we had until they were all in sight. The prices range from 75c to \$5.00.

The Willson Co.

Heretofore it was doubtful if track and baseball would both flourish at the college without one hindering the other. However, at Wednesday's meeting only one track man was present. This clearly indicates that a baseball team will not interfere with work on the track.

George Gosman was unanimously elected captain of the aggregation. It is doubtful if a better selection could have been made. Mr. Gosman has played on several teams in Dillon and is a valuable man, both in the field and at the plate.

William Hartman, a former diamond star at the college will coach the team. After the track meet, it is probable that Prof. Gilruth, who has also played on a college team, will assist in teaching the men the fine points of the game.

A schedule of games will immediately be arranged. Two games will be played with the university, while several independent teams of the state will also be played.

How good a team the college will be able to put in the field cannot be determined at this time. Judging from the material available and the experience that some of the men have already had, a creditable showing can be made against any other college team in the state.

The preliminaries in the double tennis tournament will be played this week. Tennis has created a wide interest among the students this spring and it is safe to say that a large audience will be present when the tournament games are started.

## STATE ACCOUNTANT AD- DRESSES ASSEMBLY

G. B. Conway Speaks to Special Assembly, on Accounting Tuesday Morning.

A special assembly was called Tuesday forenoon for the purpose of hearing the state accountant, G. E. Conway, who gave an address on the importance of close accounts in business.

Mr. Conway began his address by giving a brief history of business and its dependence on keeping strict accounts. Accountancy, according to Mr. Conway, is the science of keeping a record of wealth. From the beginning of trade in the form of direct exchange of articles, successful business depended upon some system of accountancy.

There have been unearthed in the ruins of some of the ancient cities business offices very similar to those of today. In these offices inscriptions have been found that indicate busi-

## Echoes Ringing Down the Grooves of Time

### COLLEGE CAMPUS WAS ONCE AN OATFIELD.

With the approach of spring comes the annual tree-planting and the cleaning of the campus. Even before the trees are in leaf and before the grass has fairly started the campus looks beautiful, with its curving walks and roads and trim patches of shrubbery dotting the smooth lawn here and there. Indeed the students of Montana State have a right to be proud of their campus for it may rightly claim a place among the most beautiful in the northwest and this is especially true when the age of the institution is taken into consideration.

The faculty and students first moved up to the present location on the hill in the spring of 1898. Part of the experiment station and the engineering department had moved up during the winter term. The eastern boundary of the campus was at this time at the row of trees which may be seen now between the main building and Hamilton Hall. The hill was in its natural state; no grading or planting had been done although it is possible that a part of the sage brush had been removed. That year grading was commenced and the slope of the hill was evened off. Next oats were planted and for the first years of the college's existence on the hill the students had an oatfield to travel through on their way to classes. Soon, however, there was a desire on the part of the faculty to improve the appearance of the campus and the result was that grass seed was planted. However, it was impossible to keep the grass cut and the result was that it was allowed to grow long and in the fall of the year it was cut for hay with the large hay mower. Thus it is doubtful if the planting of grass on the campus during the first years added greatly to the appearance of the place. The next move for the better was when they began to keep the grass down by means of the large mower, which was run at regular intervals throughout the summer and fall, and although the grass still had a ragged appearance the improvement was marked. The campus is now kept in shape by means of a grass mower and the improvement is such as to make the students point with admiration to the stretches of closely

ness methods which conform almost exactly with modern methods. For instance, a promissory note in the form of a clay tablet was found, which contained all the information necessary in a promissory note of today except the words "value received."

Other inscriptions indicate that accountants were employed to keep count of revenues. These facts go to prove that the ancients recognized the necessity of keeping accounts of business matters.

Efficiency in any branch of modern business depends directly upon an efficient system of accountancy. By such a system a business man is enabled to tell at any time exactly where he stands financially. A large number of the business failures are due to ignorance, to a lack of information as to business relations.

President Hamilton followed the address by a short talk, encouraging students to begin a system of accountancy while in college. He also called for detailed accounts of the students in order that they might be used as a basis for giving information on the cost of attending Montana State.

cut lawn which surround the college buildings.

It may also be mentioned that the first attempt to keep the lawns of the college campus in presentable shape was made by President Hamilton and most of the other work of beautifying the college campus belongs to the present head of the institution. In this, however, he was greatly aided by R. W. Fisher, who was the station horticulturist from the year 1900 to 1908. Mr. Fisher was directly in charge of the work of improving the campus during these years. In 1908 he accepted a position with a large real estate company in the Bitter Root country. However, his memory will remain at the college for in almost every shrub the students may see a monument to the man.

The first tree planting was done about 1902, under the direction of Mr. Fisher. The work was commenced by the two college literary societies, "The Arena" for boys and the "Clio-Lian," the girls' society. Each class also planted a class tree on Arbor Day. The first trees that were planted were those which are now along the north campus fence. Following this trees were planted all around the campus. Mr. Fisher then pushed the work and made definite plans for the beautification of the college grounds. This resulted in the planting in the next few years of the many patches of shrubbery which now dot the campus as well as the planting of more trees and the laying out of flower beds here and there. The beauty of all this work can not at this time of the year be as fully appreciated as it will be a little later in the spring and again next fall when the students return to work. At that time the trees will be at their best, the flowers will be in bloom and the whole place will be suggestive of life and the beauties of nature.

One of the last pieces of work attributed to Mr. Fisher before he departed, was the laying out of the walk and road which leave the campus at the northeast corner. Up to this time there had been no road in front of the main hall, the only one being that which enters at the agricultural building and leaves at the eastern end of the campus behind Hamilton hall. Up to this time the only walk leading to the main hall was the one entering at the north campus fence. Originally this walk consisted of two planks laid side by side. Next the space between them was filled with ashes to make the path suitable for bicycle travel.

Next a path was made of gravel and the tar roofs which had been taken from the old drill hall and the chemistry building. After this a board walk, such as the present one, was laid. This summer cement walks will be laid and these should add materially to the beauty of the college grounds. In the early days of the college, but one route could be taken to reach the college. That was past the city park on West Story street and then up Ninth avenue. Those who wanted to reach the college by any except this roundabout way were compelled to wear rubber boots to wade through the knee-deep mud.

While it may appear to some that the work of beautifying the campus was delayed to a great extent, this was due principally to the lack of water. The college had to secure a water right and irrigate the grounds by a system of ditches as the city water was not then available. However, the campus may be pointed to with pride and with the improvements which are planned for this spring and summer the place will be even more beautiful.
