# THE WEEKLY EXPONENT

VOLUME VI. THE WEEKLY EXPONENT, FRIDAY, SEPTEMBER 25, 1914. Number 3.

## Y.M.C.A. HOLDS FIRST MEETING

College Y. M. C. A. Meets and Elects A. Paul Thompson, President. Plans For Year Discussed.

The Y. M. C. A. held the first session of the present school year last Tuesday evening. It was strictly a business meeting to line up the work for the coming year. Mr. A. Paul Thompson of the senior class was unanimously elected to fill the office of president, left vacant by the failure of "Bill" Maddox to return to college this fall.

Mr. Joe Miller addressed the members, urging upon them the importance of the association work. "The college needs the Y. M. C. A.," he said, "and the town needs it too." He went on to say that when the Bozeman people were campaigning for a Y. M. building they called upon the college fellows to help and they subscribed $1,500.

Work has begun on the building and soon the downtown organization will be looking to the college for leaders, and assistance in their work. There should be a free Y. M. C. A. employment bureau, similar to those that other colleges have.

He continued by saying that the loss of the president, "Bill" Maddox acted as a temporary set-back but if the members get in and work much can be accomplished. Nothing worth while was ever accomplished that was not done in the face of opposition and criticism. The Y. M. C. A. should be the biggest thing in the college and must be established on a firm basis this year. The faculty is willing to help in the work and there are men in the town who would gladly give their time.

Mr. Thompson, the new president, took the chair and thanked the members for the honor conferred on him. He went on to say that the assistance and cooperation of every member was necessary in promoting the work of the association. In speaking of the plans for the coming year Mr. Thompson stated that several joint meetings with the Y. W. C. A. were being arranged. Prof. Bishop of the music department has been secured to give a demonstration of the different kinds of music and their application to religion.

Mr. Thompson especially urged the new students at the college to attend and he felt that the Y. M. C. A. would be of benefit to them.

The standing committtees will be appointed during the week. The time of the meetings was set for 7:30 on Tuesday evening, every two weeks. The next meeting will be on October 6.

## FIRST SESSION OF TRAVEL CLUB

Sherman L. Divine Gives Interesting Address to Newly-Organized Travel Club Last Saturday

The Travel club of the college which was organized under the auspices of the Y. M. C. A. and Y. W. C. A. held its first meeting last Saturday evening at seven o'clock in the Chemistry lecture room. Rev. Sherman L. Divine of the Presbyterian church was will address the club at its session gave an instructive talk, sketching briefly the outline that he would pursue and also emphasizing the reasons for travel. The meeting was much enjoyed by those fortunate enough to be present and it is expected that the membership will rapidly increase.

Mr. Divine opened his talk by saying that one could easily have his views satisfied in every country on the globe, provided he knew the English language. He mentioned the interesting fact that while the inscription on one side of the new coins of the Chinese republic was in Chinese, the obverse was the same inscription in English.

He spoke of Jules Verne's book "And the World in Eighty Days." He said that what had been a dream but a few years ago was now an es-

(Continued on Page Four)

## FROSH BATHE

Two of Frosh Who Refuse to Don Green Head-gear Are Given Free Bath in Frog Pond By the Sophomores.

During the week two Freshmen were given free baths in the froggery by members of the sophomore class for failure to observe one of the old college customs, that of requiring all Frosh to wear green caps.

The first offender was discovered Monday morning in the biology buildinb by a delegation of sophomores and after a short tussle was taken from his fellow classmen and started on his way to the pond. There he was given a moment to divest himself of any unnecessary impedimentia and was tenderly but thoroughly cleansed of all disrespect for the traditions of Montana state.

The second ducking which took place on Wednesday was of a more strenuous nature and threatened for a while to end in a general class fight. The offender was of a more pugilistic temperament than his predecessor of Monday and received more assistance from the "wearers of the green." The battle which lasted for several minutes took place on the campus at the side of the chemistry building and was witnessed by many upperclassmen. Several minor injuries were sustained by the combatants on both sides before the capture was effected by the sophs. At the froggery the affair threatened to assume the proportions of a miniature war but after several minutes skirmish the ceremony went off without any more bloodshed. One "course in hydraulics" was found insufficient to complete the captive's education and he was induced to register for another.

Wednesday noon President Hamilton decided that the "course in hydraulics" was too advanced for the Frosh and did away with it by ordering the froggery drained.

### WOMAN'S ASSEMBLY MEETS

The second woman's assembly met Tuesday afternoon at the usual hour in the assembly hall.

After the opening music, Mrs. Herrick made a short talk on matters of special interest to college girls. Mrs. Herrick spoke of frienships, cliques, and chaperones, in a most helpful and inspirational way.

In keeping with the desire to make the assemblies of practical use to college women, Mrs. Tretsven gave a demonstration in correct bed making. After this interesting lecture, Mrs. Herrick called for volunteers to repeat the process. Miss Reddell and Miss Leisell responded and repeated Mrs. Tretsven's demonstration very efficiently.

Mrs. Herrick closed the assembly with a short, entertaining reading, "A Toast to Merriment."

According to the present plans Miss Augusta Evans, the new extension worker will talk at the next assembly. The seating arrangements will be completed by that time.

## ATHLETES ARE GIVEN SWEATERS

Kenck, Gatton, Jolly, Steel, Heageny and Ingram Are Given Sweaters For Prowess In Track

Sweaters for the men who won their letters in track the last season have come and have been presented. The sweaters are gray with a gold letter M shaded with blue, and have pony collars. The service stripes, indicating the number of years the owner has been out for this branch of athletics, are also of gold and blue.

The men who received this honor are: Max Kenck, Bill Heageney, Cyrus Gatton, David Steel, Craig Ingram, and Lewis Jolly. Max Kenck, who for three years has won the high hurdles for Montana State, has three service stripes. Heageney has one. The rest of the sweaters are plain. The service stripes for these will be added next fall.

These sweaters have been earned by these men and are only a slight token of the respect felt for them by the college students. About $200 a year is spent for this purpose, part of which is made up by the Boosters and the rest by the athletic association. A member of the athletic council when seen by a representative of the Exponent, said: "In order that the football, track, and basketball

(Continued on Page Four)

## COLLEGE SENDS LARGE STOCK EXHIBIT TO FAIR

The Montana Experiment station has taken a number of the college stock over to Helena as a part of the college exhibit. Part of the animals are purely show stock while the rest are taken to demonstrate some experiments the college station has been carrying on.

Two dairy cows of the Holstein breed were taken to point out the difference in type. One is an extremely fine type while the other is rather poor. Of the beef variety a large number of animals were taken of both the Shorthorns and Herefords.

In addition to the cattle, 25 head of hogs were taken, 16 of this number were from the experimental plots and were taken solely for the purpose of outlining clearly some of the experiments the college has been carrying on during the past season. The purpose of these experiments was to determine the exact cost necessary to raise a pig from birth till it becomes the best marketable age. The rest of the hogs were fine show animals of the Berkshire, Poland China and Duroc Jersey breeds.

## ENROLLMENT IS BEST YET

Number of Students Registered Is By Far the Largest in the History Of the Institution.

The complete figures on the registration have been compiled by Registrar R. O. Wilson. They show a very encouraging increase over those of last year. The senior class has gained two members and now has an enrollment of 38. The junior class has lost five members and now numbers 31.

The most remarkable enrollment is that of the sophomores, who have lost only 30% of their number of last year and have returned this semester with a toal number of 68. This is a very unusual showing as in most colleges less than 50% of the freshman class return the following year.

The freshman class has reached a total of 106, or three more than last year's record breaking class.

The complete figures of registration to date follow:

| | |
|---|---|
| Post graduates | 2 |
| Seniors | 38 |
| Juniors | 31 |
| Sophomore | 68 |
| Freshman | 106 |
| 4-year Mechanic Arts | 32 |
| 2-year Mechanic Arts | 5 |
| 4-year Secondary Home Science | 10 |
| 2-year Home Science | 13 |
| Irregular | 7 |

## FORMER ATHLETIC COACH WILL BE MARRIED SOON

Invitations have been received in the city from Mrs. Alice B. Adams of Madison, Wisconsin, inviting friends to attend the wedding of Miss Bess Eleanor Adams to Mr. Ambrose Dockstader. The ceremony will take place at the home of the bride's brother, who is the mayor of Beloit, Wisconsin. Both are well known in Bozeman and Montana.

Miss Adams was the teacher in English at the Gallatin County high school for several years and coached the three consecutive winning debate teams of that school. Mr. Dockstader was for two years the college athletic coach and in that capacity made many friends not only among the college faculty and student body but he had a large acquaintance in the state and in Utah.

Mr. and Mrs. Dockstader will make their home in Elmyra, New York, where the groom's father is a prominent architect and has a large business. Mr. Dockstader will become a partner in his father's firm The many friends of the young couple wish them much happiness.

## MARSH TALKS

Dr. C. Dwight Marsh of the Bureau of Plan Industry Gives Interesting Lecture On Poisonous Plants Of Montana In Assembly.

At a special assembly last Friday, Dr. C. Dwight Marsh of the bureau of plant industry of the United States department of agriculture, addressed the student body on the subject "The Poisonous Plants of Montana." Dr. Marsh is at the present time conducting experiments along this line in the state.

The assembly was called to order by President Hamilton, who mentioned, among other things, the faculty reception to occur that evening in the home science rooms. He then introduced Dr. Marsh.

Dr. Marsh opened his talk by saying that the infectious diseases in Montana were scarce, but that at certain times of the year, the ravages of the poisonous plants amounted to considerable.

He went on to say that little is popularly known regarding which are the poisonous ones. A large amount of these may be given an animal before there is any apparent effect. He gave as an example the fact that four or five hundred pounds of some plants are necessary before death results.

The literature regarding this important subject is scarce, the work of Professor's Wilcox and Chestnut formerly members of the college faculty being the best. There are five poisonous species in Montana, these being the Lupines or Lupines, the Larkspur or Delphenium, the loco or Oxytropis, the parsnip or water hemlock or Cicuta and the death camas or Zigadenus.

He spoke of the different plants but said that the losses from loco were by far the greatest. He also said that the work of the department with which he was connected was not only scientific but also economic.

The first plant treated was the wild Parsnip, (poison hemlock). This plant grows mostly along the irrigation ditches and is probably the most fatal of any of the poisonous plants which grow in this state. The leaves and tops of these plants are non-poisonous but the roots are, a comparatively small amount of them proving fatal.

The second one treated was the death camas, this is a small plant which has a greenish-yellow flower, and grows from a bulb resembling an onion. It grows early in the spring and dies in early July. This plant is detrimental to sheep and to it all spring losses are mostly due. For this poison there is no remedy.

The next plant treated was the Lupin. This plant blooms in the summer but is most dangerous in the fall and to it the greater amount of the fall losses are due. For this poison there is no practical remedy although strychnine is used in some cases.

Larkspur, the next one treated This plant is very abundant on the higher

(Continued on Page Four)

## DEBATE PLANS ARE DISCUSSED

College Debate Council Meets and Makes Plans For Coming Season Emblems For Debaters

The debate council held its first meeting last Tuesday noon for the purpose of getting the plans for forensic affairs for the coming year under way immediately.

The first matter which was discussed was the annual Fresnman-Sophomore debate. Mr. Gilruth, the coach made a few remarks urging the members to get to work early this year. He said that it would be well for each one when ever they had any spare time to think up a number of debate subjects that would be suitable for the inter-class contest. He also urged that the members familiarize themselves with the questions and be able to discuss them at a meeting later in the week.

The matter of awarding emblems to the college debaters was next discussed. It was the concensus of opinion that it was unfair for the college debater to receive no emblematic recognition for the work he does while the athletes all receive "M" sweaters for the service they perform. The work of the debater was considered to be fully as hard and helps the college reputation as much as any other form of inter-collegiate activities.

It was pointed out that at present there is no fund from which these emblems due to the debaters could come, while those of the athletes comes from the money obtained from the sale of the athletic tickets.

A committee consisting of Lyndall Davidson, Miss Mollie Allen and Alfred Eberle was appointed to discover some plans whereby the activities of the council could be financed.

Election of officers was postponed till some time in the near future when more of the members would be present.

After deciding to hold another session Thursday at 3:30 o'clock the meeting was adjourned.

At the meeting yesterday a number of debate topics were brought up by the members and discussed. Another meeting will be held in the near future.

Mr. Gilruth will go to Missoula the first Saturday in October where he will meet representatives from the Gonzaga university at Spokane and the college of Missoula for the purpose of deciding the question which will be discused in the Triangular league next spring.

## FACULTY HOLDS BIG RECEPTION

College Faculty Entertains New Students At Annual Reception in Home Science Rooms

The rooms of the home science department were the scene of the third annual reception given by the faculty of M. S. C. to the new students and to those who had returned for another year's work, Friday evening.

The affair was in no way formal, the purpose being to get really acquainted. After passing the receiving line, those introduced formed into line also in order that everyone meet everybody else. Soon after the line broke up, Mrs. Currier gave two delightful violin solos, accompanied by Miss Leah Hartman.

Professor Jackson gave some realistic imitations on his violin. One was an old favorite of President Hamilton starting his automobile and also the continuance of the little Hup down the street. Another was an imitation of a country church organ playing Nearer My God to Thee. This was done with a loose stringed bow used upside down, and the novelty made a hit with the audience. After the completion of the program light refreshments consisting of shrub and wafers were served in the dining rooms. Miss Bull and Mrs. Whitcomb presided at

(Continued on Page Four)

## ANNUAL TUG-OF-WAR TO TAKE PLACE OVER FROGGERY AT ONE O'CLOCK -- BOTH TEAMS ARE CONFIDENT OF VICTORY

BOTH TEAMS HAVE BEEN PRACTICING FOR THE CONTEST FOR THE PAST WEEK—STUDENT SENATE WILL HAVE CHARGE OF THE AFFAIR—ED NOBLE, CAPTAIN OF THE FOOTBALL TEAM WILL REFEREE—OVER SEVENTY MEN WILL TEST THE STRENGTH OF THE ROPE—PULL WILL UNDOUBTEDLY BE THE MOST STRENUOUS YET STAGED OVER THE POND.

At one o'clock today the big event in the inter-class controversy for supremacy will take place when the teams of the two lower classes will battle across the froggery in the annual tug-of-war. The affair will be in charge of the student senate and will be governed by the regular rules.

The custom of having the two lower classes hold a tug-of-war over the frog pond was originated in 1907 when the classes of 1910 and 1911 pulled for fifty minutes to a tie. In 1908 the event was overlooked for some reason. In 1909 however, the event again appeared and the '13s pulled last year's seniors through the pond. The third battle over the pond took place in 1911 and the '14s were again losers, this time at the hands of the present seniors. The '15s were again victorious in their sophomore year when they administered a bath to the present junior class in a pull lasting about three minutes. The second defeat of the '16s came last fall when present sophomores easily won out.

The tug-of-war this afternoon will undoubtedly be the hardest fought contest that has ever taken place over the froggery . The '17s have mustered over thirty men for the event. This is by far the largest team that has ever been organized by a sophomore class since the custom was started and a hard fight is expected.

That the two classes are in dead earnest over the pull is emphasized by the fact that both teams have been practicing faithfully all week. Monday afternoon the sophs went to the barns and spent half an hour pulling on the rope after which the frosh took a hand.

Manford Snow has been elected captain of the '17s and Raymond Kelly of the '18s. Ed Noble has been chosen as referee for the contest. The '17s will line up as follows: Captain Snow (132), Crittenden (155), Bullock (132), Havens (153), Decamp (159), Bunnell (142), Cook (145), Orvis (127), Whiteside (131), Ladenburg (141), Cooley (176), Saltz (153), Bennets (147), Fox (164), Strand (156), Jorghenson (141), Rapatz (141), Langohr (139), Scott (129), Manning (136), Monson (169), Jaeckel (151), Kneale (152), Thomas (166, Ingram (135), Cole (140), Undem (134), Jolly (165), Street (155), and Jackman, (149). The total weight of the '17s is over 4200 pounds.

The freshmen lineup had not been determined at the time of going to press, because of the inability of some of the sophomores, who were out of town, to weigh up.

The contest will be governed by the following rules:

All weighing shall be done in the presence of the captains of the two teams.

Each team shall place a class pennant at the end of the rope and these pennants shall become the property of the winners of the pull.

The rope shall be taken from the barns by a committee of eight persons, four from each class.

The rope shall be returned to the barn by a committee from the losing team within twenty-four hours after the pull.

No pits shall be dug by contestants.

Each contestant must remain in the position assigned him on the rope and must not let the rope slide through his hands.

An umpire will be selected to watch each side and see that these rules are observed.

## THE WEEKLY EXPONENT

Established January 1, 1910.
Outgrowth of Monthly Exponent,
Established January 1, 1895.

Published every Friday of the College year by an editorial staff chosen from the students of the Montana State College of Agriculture and Mechanic Arts, Bozeman, Montana.

STAFF

Editor-in-Chief...Robert T. Kelley, '15
Business Manager...C. F. Morgan, '15
Managing Editor.....
.....A. Paul Thompson, '15
Associate Editor...E. Lester Cole, '17
Circulation Manager.....

Athletic Reporter.....
.....R. Leslie Pettigrew, '15
General Reporter.Florence Wight, '16
General Reporter.....Roy Strand, '17

Subscription Rate—Two Dollars per year, five cents per copy. Advertising rates made known on application.

Entered as second class mail matter at Bozeman, Montana, under Act of Congress of March 3, 1879.

The Weekly Exponent is strictly a student enterprise. Its chief purpose is to present to its readers each week an accurate and complete record of the developments in college affairs during that period and it is intended that its influence shall be exerted for the upbuilding of M. S. C. The paper is the result of voluntary effort put forth by the students who compose the staff.

### CALENDAR.

Friday, September 25, Music recital.
Saturday, September 26, Freshman-Sophomore dance.
Friday, October 2, President's reception to faculty.

### College Activities.

With the students who are registering for the first time, it is generally some little problem for them to decide just what college activities to enter. Of course it is impossible for them to enter all; their studies claim too much of their time for such a course and so it is necessary to make a careful selection before taking any decided steps.

Every student in the school should join one of the five societies which relate to their special courses. These societies are the Civil Engineering club; the Electrical Engineering club; the Chemistry society; the Agricultural club and the Home Economics club. Each one of these societies plays an important part in the education and development of its members and a student is neglecting a valuable factor in his college course by not becoming an active member of one of these societies.

Following the department societies comes the Boosters for the men and the Boosterines for the women. Neither of the organizations require a great deal of a students time, and as both play an important part in the boosting and betterment of the college it is imperative that each college man and woman should belong to either of these organizations.

At this point, however, a careful study of the societies should be made and only those which especially appeal to the student and for which he has the time should be considered. For those of a musical turn, the band or the orchestra will appeal. No one should try to enter both organizations as too much time is necessary for practice. The Dramatic club offers an opportunity for those who wish to acquire a dramatic training and who are willing to spend the time in preparation for the different plays held during the school year.

Two well organized glee clubs under the direction of Professor Bishop, are flourishing at Montana State, and those who have vocal ability should try for one of these clubs. Debating will claim the attention of a few more and for the first time an effort is being made to give some token of recognition to the persons who represent the college on the platform.

The Christian organizations are going forward with a new impetus and many of the new students will want to enjoy the benefits of these societies. Last but not least, it is hoped that some will try for positions on the Exponent staff.

Thus even from an enumeration of the different organizations and societies at the college it is evident that it is impossible for a student to become a member of all or even a large majority. So as a final warning, make a careful study of the different societies, keeping always in mind your qualifications and the amount of time you can spend and then become an active and useful member of one or possibly two more societies besides those mentioned at the beginning of the article.

---

Although winter is almost here, the freshmen are still keeping the campus green.

---

It is expected that General Sherman's definition of war will still hold good when the freshmen and sopohmores meet this afternoon.

---

Hunting season opens October 1. Reports indicate that grizzlies are plentiful and easy game this season.

---

Ten million men may be engaged in the European war, but it is doubtful if they can furnish as exciting an engagement as will be put on by twenty-two men on November 6.

---

Coach Bennion reports that tug-of-war candidates are more plentiful than material for the football squad.

---

Years may come and years may go but eight o'clocks go on forever.

---

Reports have it that Prof. Cobleigh still amuses the freshmen with his "bees in the boiler" stories.

---

Pig skins, mole skins and peeled skins are running a close race for supremacy on the gridiron these days.

## STUDENT SOCIETIES TO MEET AT ASSEMBLY HOUR

The meetings of the departmental societies and the Booster and Boosterine clubs will be held this morning at the regular 11:00 assembly hour. These meetings were supposed to be held two weeks ago, the first Friday of each month being the regular hour, but were postponed in order to give the time to College assembly.

The Boosters and Boosterines will hold their meetings at 11 o'clock. Both of these organizations will discuss plans relative to rooting at the athletic contests which will take place during the year and to arouse pep in the students. The Boosterines will also discuss plans relative to the banquet which will be given the football men, taking place probably at the end of the season. The Boosters will hold another meeting early in October for the purpose of electing officers.

The Civil and Mechanical Engineers and the Agricultural club will hold elections at this, their first regular meeting of the semester. The Electric and Home Science clubs had their elections last year, but will hold meetings to take care of some business that is to be brought before them at this time. These meetings will take take place at 11:30, immediately after the Boosters and Boosterines.

After the completion of these elections the organization of the Student Senate will be affected and committees appointed.

## FRESHMAN CLASS HOLDS TWO BUSINESS MEETINGS

FRESHMAN CLASS MEETING,
SEPT. 15, 1914, 3:30 P. M.

The freshman class leaders posted notice of a special meeting for last Thursday afternoon. Mr. Fiske of the seniors, temporary chairman of the freshman class, called the meting to order. Raymond Kelly, of Billings, was elected captain of the tug-of-war team, the members of which were left to his appointment. The next business taken up concerned the selection of class colors. Raymond Kelly, Arne Johnson of Butte, Harold Dixon of Gallatin, were appointed to act as a committee for the purpose of selecting color combinations which were to be voted on at the next meeting.

Luce was elected temporary secretary in order that the first meetings of the class would be recored in its minutes.

FRESHMAN CLASS MEETING,
SEPT. 21, 1914, 3:45 P. M.

The third meeting of the class of '18 was held last Monday afternoon. Its purpose was to get the men together in order that the tug-of-war team might be selected, and to vote on the class colors.

In the absence of Mr. Fiske, Mr. Davidson, president of the senate, presided at the meeting. Five combinations for the class colors were submitted by the special committee appointed for that purpose. Purple and orange received the plurality of votes. It was decided that the selection of men for the tug-of-war team be postponed until Wednesday, when the total weight of the opposing team would be known and a team could be selected accordingly.

A committee of five girls, consisting of the Misses Hewitt, McDonald, Langohr, Haller and Hodgskiss, was appointed to make a class pennant, which will be used for the contest on Friday. Luce was elected temporary treasurer, making his office that of temporary secretary-treasurer.

### CONCERT TONIGHT

The first concert of the season will be a piano recital by Prof. Paul P. McNeely tonight in the assembly hall at 8:15 o'clock. This is the first of a series of concerts to be given by the School of Music throughout the season of 1914-1915.

These will come at intervals through the fall and winter and considering the splendid talent should be greatly enjoyed by the people of Bozeman and college students. No admission will be charged. The program for onight is as follows: ,

Program.

Theme and Variations in A Major ..... Mozart
Prelude, Op. 40, No. 1.....Grieg
Gondoliera ..... Liszt
Concerto No. 2 in E Flat.....Liszt
Allegro Maestoso
Quasi Adagio
Allegretto Vivace
Allegro Marziale Animato
(Orchestra parts on second piano—Miss June Hartman, of the faculty)
Nocturne Op. 15, No. 2.....
Ballade in G Minor, Op. 23....Chopin
"Fledermaus" .....Strauss-Schuett
Song Without Words, No. 16 ..
.....Mendelssohn
Staccato—Etude in C. Op. 23...
..... Rubinstein

The street car will leave Main street at 7:45 and 8 o'clock and return after recital.

---

Mrs. Herrick, dean of women and Miss Harkins, head of the Home Science department were entertained at a trout dinner at the home of Mr. and Carl Gottschalk.

HALLMARK GOODS ARE HERE

Yesterday we received the first shipment of Silverware and Jewelry known as the HALLMARK Wares, which are the product of a company owned and controlled by the retail jewelers all over the country, and in which this store is a stockholder.

Through this organization, owing to its great purchasing power, we are enabled to offer you better goods and for less money.

Owing to the fact that this company has just recently gotten under way, only a limited amount of goods can be obtained this season.

To those who are desirous of obtaining the best values for the least amount of money expended, it would be well to have some of these goods set aside for holiday and other gift purposes.

## ANNOUNCEMENT PARTY FOR MISS KINNEY GIVEN

Miss Mildred Livingston entertained at a pretty luncheon at the Livingston home in the Blackmore, Friday afternoon at 1:30 in honor of Miss Harriet Kinney, fifteen of Miss Kinney's intimate friends being the guests. Pink and blue was the color scheme of the decorations and the menu. The center piece was an artistic lace basket containing a graceful bouquet of dainty pink sweet peas, a huge bow of blue ribbon adorning the basket. Dainty bon bon baskets were trimmed with pink and blue. At the end of a string of blue ribbon was a place card for each guest, containing the unique announcement of the approaching marriage of Miss Kinney and Dr. Howard Welsh of this city, the wedding to take place November 25. An excellent five course luncheon was served, and the rest of the afternoon was spent socially and with needle work.

Miss Kinney attended college for a time and for the last few years has acted as Registrar Wilson's secretary. She is one of Bozeman's highly esteemed young ladies. She has grown to womanhood in Bozeman and has a host of friends in and near the city.

Dr. Welsh is a member of the college faculty and is also engaged in the practice of his profession in the city. He is at present president of the state board of veterinarians, this showing that he stands high in his profession in Montana. During the few years of his residence in Bozeman he has won the respect of all who know him. He and Miss Kinney are receiving hearty congratulations on the approaching event.

### STOCK JUDGING CONTEST.

Beginning Tuesday of this week, a stock judging contest has been held at the state fair. The contest was open to all students in the college of agriculture. Many students have left for Helena to try for the liberal prizes.

The student making the highest score in the three half day's judging will receive a gold medal watch-fob and also ....5.00. The second best will receive $10.00, the third $7.50, and the fourth, $2.50.

The contes is very important in that it is preliminary to the selection of a stock judging team to represent Montana at Chicago.

### HANDICRAFT CLUB ELECTS OFFICERS FOR THIS YEAR

The Handicraft club held a business meeting Monday afternoon at 4 o'clock to elect officers for the coming year. Alberta Borthwick was appointed by the president as temporary secretary and took the minutes Mildred Stewart of the sophomore class was elected to serve as president. Miss Emma Taylor of the senior class was unanimously elected vice president. Marguerite Kirk '17, was elected secretary and Ida Truman '17, treasurer. It was moved and seconded that at the next meeting of the club held this Saturday each member could have the privilege of inviting one guest. The fourth in the new Applied Arts course will be special guests of honor.

## College Notes

Mortimer J. Lott of the senior class is a visitor in Helena this week.

—⁂—

Ed Ronne of the sophomore class is visiting the fair in Helena this week.

—⁂—

Wm. O'Connor of the junior class was a visitor at the State fair the past week.

—⁂—

Jack Milburn left this morning for Three Forks where he will visit for a short time.

—⁂—

The college band is planning to give a masquerade ball in the drill hall in the near future.

—⁂—

Margaret Kaizer of Wilsall has returned to take up her work in the second year short course.

—⁂—

Miss Gwen Mills, accompanied by Miss Mae Myers left this morning for Helena to attend the State fair.

—⁂—

Professor Snow of the Civil Engineering department spent a few days at the state fair at Helena the past week.

—⁂—

Roy E. Malsor of the senior class is spending the week in Helena where he has charge of the college engineering exhibit at the fair.

—⁂—

Miss Gwen Mills spent last week end in Helena visiting her parents and attending the wedding of one of her high school girl friends.

—⁂—

Last Saturday nine of the faculty women went about ten miles up Bridger canyon on a picnic. All report a very lively and pleasant time.

—⁂—

T. W. Merigold, of Kalispell, father of Miss Merigold of the sophomore class arrived in town last Saturday and spend Sunday with his daughter.

—⁂—

John V. Potter of the senior electricals left last Wednesday morning for Helena where he spent a few days at the fair. He is expected home the early part of next week.

—⁂—

Taylor Lescher, '16 and M. T. Kneale, '17 were employed at Helena the early part of the past week in wiring some of the recently constructed buildings at the state fair grounds.

—⁂—

Howard Seamans has charge of the entomological exhibit at the state fair this week. This display shows the various stages in the development of the house fly and also the harm resulting from the insect.

—⁂—

A dance will be held tomorrow evening in the College drill hall as a jollification after the strenuous tussels of the Sophomores and the Freshmen the past few weeks and this afternoon.

—⁂—

Irene Abrahamson of Red Lodge who was compelled to leave school last year on account of illness has returned to take up her work and has enrolled as a freshman in the Home Science department.

—⁂—

John Fiske of the Senior class left last Saturday for Helena, spending the week end at his home, and also viewing the exhibits at the fair Monday. He returned to Bozeman Tuesday morning.

—⁂—

Wm. Fluhr of the Sophomore class journeyed to Helena early in the week where he was employed by the street car company as motorman on one of the cars during the rush occasioned by the state fair.

—⁂—

The assignment of seats for the assembly has been completed and the seat numbers posted. The assembly will be conducted in the same manner as a regular class this year and all absences will be reported.

—⁂—

A. H. Goddard, agriculturist in charge of farm management demonstrations, of the U. S. department of agriculture, is making a trip throughout the northwest and will be in Bozeman Monday, September 28. H. B. Cannon, who is to take up work in the Extension department, will be in Bozeman at the same time; and plans for his work will be discussed and a field for the work selected.

Prof. Whitlock, head of the grain laboratory at the college who has been making a tour of the state inspecting mills will be in Helena during the fair to attend a meeting of the State Seed Growers association which will be held during this week.

—⁂—

Miss Dora Beerstecher of Belgrade, sister of Ada Beerstecher of the sophomore class spent last Sunday at Hamilton hall. She also attended the announcement party given in honor of Miss Harriet Kinney.

—⁂—

The sophomore class has posted a notice on the bulletin board challenging the Freshmen to a football game to be played at the convenience of the two classes at some time in the near future. The Freshman class has not given its answer.

—⁂—

The Y. W. C. A. cabinet held a business meeting Monday noon at 12:10. The meeting was chiefly to appoint committees and get work for the year in smooth running order. Some interesting meetings were planned and discussed.

—⁂—

Joseph D. Morgan '12, arrived in Bozeman last Sunday after a summer spent in the employ of the Experiment station near Billings. He will be employed by the experiment station on work connected with that department in Bozeman and vicinity during the winter.

—⁂—

Miss Baldwin and Miss Lane of the art department were ill on Tuesday, necessitating the dismissal of some of the classes. Miss Hazel Coffey and Miss Kennard, both of the senior class took charge of some of the art work during the absence of the two instructors.

—⁂—

F. W. Schumacher who graduated last year from the Agronomy department has taken up some work in the experiment station. He is at present out on a farm survey gathering data for a pamphlet to be published some time in the future on the Agricultural Survey of Gallatin county.

—⁂—

The S. S. S. club, which was organized last year and whose membership comprises the senior girls taking home science met last Saturday afternoon at the home of Miss Leah Hartman. The afternoon was spent in sewing. Delicious refreshments were served shortly after five o'clock. This was the first meeting of the club this year and it proved to be a very enjoyable affair.

—⁂—

A large number of the members of the faculty have spent a short time at the State Fair in Helena the past week. Among the number are President Hamilton. Dean Richter of the College of Engineering, Dean Linfield, of the College of Agriculture Professors F. S. Cooley, Professor O. B. Whipple, Professor R. A. Cooley, Professor Flint, Professor Atkinson, Professor Schoppe, Dr. Hartman, Dr. Welch. Oscar Tretsven, Miss Jensen and Miss Evans.

### EMPLOYMENT BUREAU.

A college employment bureau has been organized for the benefit of students who desire work and the office formerly occupied by the registrar has been set aside for its use. Ed Noble who has been appointed to take charge, has been canvassing the town for jobs and has met with a hearty response. All college students who wish to find work should communicate with Ed Noble as soon as possible. His office hours until further notice will be: Monday 3-4, Tuesday, 3-4, Wednesday 11-12, Thursday 3-4, Friday, 3-4, and Saturday 9-10.

## Alumni And Ex-Students

Ruth Hinman '12 is taking charge of the college library temporarily until the regular librarian arrives.

—⁂—

Margaret Edwards '12 has recovered from her recent illness and has gone to Jackson, Florida, where she will take up work as instructor in cooking in the Y. W. C. A. and will also act as dietician in the Jackson hospital.

—⁂—

Word has been received from Old Umtali, Rhodesia, Africa, that Miss Grace Clark '11 has recovered from her illness caused by a sunstroke and is about her work again. Miss Clark is engaged in missionary work there and has gained an enviable reputation.

—⁂—

The executive committee of the alumni association met Wednesday, September 16, and organized for the year's work. Professor Ham '03 was elected chairman. The other members of the committee are Frieda Bull, '07, Grace Kirk '11, June Hartman '10, and Will Haines '11. Miss Hartman is corresponding secretary and Will Haines secretarytreasurer. The first work that will be done by the committee is to revise the mailing list and send letters and statements to all members of the association.

### ORCHESTRA ELECTS OFFICERS.

The college orchestra met last Tuesday afternoon in Miss Bull's room, for regular rehearsal and election of officers. The offices were filled with the same men as last year with the one exception of that of secretary-treasurer. The president for the coming year is Ed. Jacobs of the junior class; Otto Batch will serve as vice president; Ray Jones, '15, will act as secretary-treasurer. The manager is Professor R. A. Barnes, and Professor Spalding is librarian.

Professor F. O. Jackson of the school of music faculty will direct the orchestra. This is the latest of the musical organizations on the hill, having been organized two years ago under the leadership of the present director. It has furnished the music for many of the college dances and has made an enviable reputation.

The orchestra will be larger than last year or the year before. It is expected the membership will be between twenty and twenty-five. For a while it was feared that the number of first violins would be hardly sufficient but a number have lately put in application for membership and a shortage is no longer feared.

### Y. W. C .A. MEETS.

The Y. W. C. A. held their regular meeting yesterday afternoon at one o'clock in the assembly hall. The session partook of the nature of a Boosterine meeting, college songs being sung under the direction of Professor U. Holmes Bishop of the School of Music Faculty. Laboratories did not begin till 1:30 so as to give all of the young women students an opportunity to attend the meeting.

### IS THE TAXPAYER LIABLE?

From time to time there has appeared in the state press editorials and news items stating that the taxpayer is liable for an enormous fund providing the proposed Compensation bill passes at the polls.

The contention is made that the passage of the bill makes Montana an accident association and that the state will be held liable to injured employes, or their dependents in case of death, whenever the business in which they were injured ceased to operate.

"When the mines are worked out, who will pay the tax? The farmers and stockgrowers are the men who will be obliged to pay the tax. When the mines pinch out and the mining companies are gone, the farmers of Montana will be left holding the sack."—Northwestern Stockman and Farmer, Sept. 12, 1914.

If this was the case the bill ought to be defeated. There is no question about that. The only question is whether the assertion is true.

Sec. 5, Sub.-sec. (e) of the proposed act is as follows:

"For every case of accident or injury, resulting in death, instantaneously or otherwise, or permanent disability it shall be the duty of the department to forthwith notify the state treasurer, and he shall set apart out of the accident fund a sum of money for the case, to be known as the estimated lump value of the monthly payments provided for it, to be calculated upon the theory that a monthly payment of Thirty Dollars ($30) to a person thirty years of age, is equal to a lump sum payment, according to the expectancy of life as fixed by the American Mortality Table, or Six Thousand Dollars ($6000), but the total in no case to exceed the sum of Six Thousand Dollars ($6000) The state treasurer shall invest said sum at interest in the class of securities provided by law for the investment of the permanent school fund, and out of the same and its earnings, shall be paid the monthly installments, and any lump sum payment then or thereafter arranged for the case . Any deficiency shall be made good out of, and any balance or over-plus shall revert to the accident fund. The state treasurer shall keep accurate account of all such segregations of the accident fund, and may borrow from the main fund to meet monthly payments pending conversion into cash of any security, and in such case shall repay such temoprary loan out of the cash realized from the security."

This plainly states the case, for when a miner (or any other employe) is injured or killed "the department shall forthwith notify the state treasurer, and he shall set apart out of the accident fund (of the class in which the employe was injured), a sum of money for the case, to be known as the estimated lump value of the monthly payments."

In other words every accident is paid for just as soon as the department is notified. This money is invested in securities, and if the present Farm Loan bill is passed the money thus set aside will be loaned to farmers at six per cent., and from this interest and principal will be paid compensation provided for by the bill. —Adv.

A motto used in the domestic science room in the Logan high school is: "We can live without friends, and live without books, but show me the man who can live without cooks."

The museum of the University of Pennsylvania has a 12-ton sphinx and an iron lion for its collection of Egyptian relics.

### BOOSTERINES HOLD BRIEF BUSINESS MEETING

The Boosterines held a meeting this week and decided to abolish the singing of songs at football games this fall as the singing in the past has not been a decided success. The society this year will devote themselves to BOOSTING, though, in all the words signify. The year's work has not been definitely planned out but the organization will carry college and class pennants at all athletic games this year, wear arm bands and assist the boys in the rooting. Some time in the future the Boosterines intend to give a banquet to the football team.

The Willson Co

## FORMER STUDENT TELLS OF TRIP TO ENGLAND

Edwin A. Willson, a former student at the college and son of Mr. and Mrs. George H. Willson of this city, passed through Gallatin county a few days ago on his way to Spokane, Washington, where he went to look after some farm demonstration work for the Northern Pacific railroad. From there he goes back to New York city to attend to the western shipment of the stock now in quarantine that he and Professor Thomas Shaw recently purchased in England for J. J. Hill.

While in Mandan, North Dakota, last week, Mr. Wilson was interviewed by a newspaper reporter and gave a very interesting account of his recent trip to England with Professor Shaw. He went on the say that they were quite fortunate as they would not have been able to bring the cattle home if they had been two days later leaving England. They were in England about two months, and secured some of the best stock in England, which means in Europe, purchasing in all 78 head of prize stock.

In telling of the trip to the Mandan Daily Pioneer, Mr. Willson said. "We bought the cattle in various parts of England. Included in the bunch are 12 South Devon cows and one bull this breed is the largest known. The bull, two years and four months old weighs over a ton, and it was acknowledged to be the best specimen in England. Six of the cows have records of over 11,000 pounds of milk a year, and not one has a record less than 10,000 pounds.

"We secured about 50 Shorthorn bulls and cows, and five Suffolk horses. Three of the Shorthorn bulls and cows can not be duplicated anywhere. They are what is known as dual purpose stock, suitable for both beef and dairy use. Plans are being made to exhibit the best of the stock at the International Stock show at Chicago, December 1."

In referring to their luck in being able to ship the stock, Mr. Willson says: "The English government had issued an order prohibiting any stock from being imported. We had to go from one official to another, finally carrying the matter to the privy council. We finally secured a permit to ship the stock. Two days after we had loaded it on the Atlantic transport Minnetonka foot and mouth disease broke out in England, and the United States issued an embargo order, preventing any importation of stock.

"Had we been a little later in getting out of port we would not have been able to get the cattle over for at least three months. The horses were shipped from New York to the Hill farm near St. Paul. The cattle will be kept in quarantine for 30 days at New York, where they are in the care of seven herdsmen brought over from England. If no infection is shown at the end of 30 days, the cattle will be shipped to Mr. Hill's farm.

### JACK O'LANTERN CLUB PLANS PLAYS

The Jack O'Lantern Dramatic club of the college held its regular meeting last Thursday evening and discussed plans for the coming year. Mr. Jones, the president of the organization, gave as his opinion that the club should give three assembly plays this year in addition to the entertainment that the club will give with the college orchestra in the opera house next spring.

Mrs. Herrick, director of the club, then told of some of the shorter plays that she thought would be suitable for assemblies. She then gave in brief the story of "Daddy Long Legs," the one in which Ruth Chatterton has starred and which is the great theatrical hit of the year in the larger eastern cities. It is possible that this play is the one that will be given in the opera house.

Selmer H. Solberg '14, former editor in chief of the Exponent visited friends in the city last Sunday

## FOOTBALL

There yet seems to be a lack of material on the gridiron. A few more huskies are needed to line up against the regulars and help them out

—⁂—

Yesterday Gallatin high lined up against the blue and gold but they were no match for the latter who had things their own way during the few minutes of actual schimmage.

—⁂—

But the high school has a husky little eleven at that and their strength will doubtless be felt before the scholastic season is over.

—⁂—

These scrimmages between the two teams are the best kind of practice, for both crews. The college team pulled off the new plays without a hitch and the pep exhibited in this contest is certainly indicative of a team of scrappers.

—⁂—

The back field on this year's team although considerably lighter than that of previous teams, promises to be the best the college has ever had. The line still holds out a few weak places but new men are being placed on these jobs as they merit them and no fear of a weakness from this quarter may be experienced by the date of the first game.

—⁂—

Gatton and Covert are out for the jobs at half. This pair weighs in at about one fifty-five but both men are scrappers whose reputations are first class and they will become the best halves in the state before the season is over

—⁂—

Three men are trying for a berth at quarter. Grimes, Todd and Romme, form a trio which will furnish all the headwork necessary for a championship team.

—⁂—

Chief Carr and "Ruby" are hitting the line from the full position. Either of these men in the line-up will complete a list of as good back field men as ever wore the blue and gold.

Cap. Noble's aspirations are for one of the jobs on the line, and he is not particular where he plays. But the people on the hill may feel assured that whatever position Ed takes care of will be filled by a man who fights to the last ditch.

—⁂—

Punk Taylor fills up another hole in the line. If there is anything the old "Darby" likes it is a good scrappy football game and Punk is proud of the fact that he never came off second best with any man yet.

—⁂—

Another player whose former performances guarantee a scrapper is Osenbrug. Mike comes from that fighting town of Butte—'nuf sed.

—⁂—

Rice, Wilcomb, Milburn, and Johnson are a few more of the old men trying for the line. All of them have beef and pep if not the experience to make it interesting for any lineup they may face.

—⁂—

Truitt has been out of the game for a few days on account of a slight injury. However Tubbs will be back in a day or so to hover over the ball at his usual place at center.

—⁂—

Christenson and W. Gatton are also out for line positions. Christenson is the new sophomore from Washington where he has played before. Gatton was a star on Gallatin's last year's team.

—⁂—

A little personal canvassing on the hill would help the squad wonderfully. There are plenty of big husky men on the hill, especially in the freshman class. A little talk and persuasion on the part of the older students might possibly bring out a star. Remember M. S. C. wants a team next year, too.

—⁂—

By the way, time is about ripe for a good, healthy, rousing football rally. Let the students know there is a team on the hill.

## FACULTY HOLDS RECEPTION

(Continued from Page One)

the punch bowls. The college orchestra furnished music during the evening.

After ten o'clock the party retired to the drill hall and dancing was in order until twelve. The crowd present voted a most enjoyable evening and certainly one of the most successful faculty receptions.

Those in the receiving line were as follows: President Hamilton, Dean and Mrs. Linfield, Prof. and Mrs. R. A. Cooley, Prof. and Mrs. Cobleigh, and Prof. and Mrs. Thaler and Dean Richter and Mrs. Richter. The faculty members were assisted by a committe of students composed of Miss Irma Lessel, Miss Nina Armstrong, Howard Seamans, and William Fluhr.

## ATHLETES ARE GIVEN SWEATERS

(Continued from Page One)

men receive what is due them, the athletic committee depends on a good sale of season tickets this fall. It is the custom elsewhere for members of the different athletic teams to be awarded sweaters thus being shown that the student body appreciate their effort and the commitee feels that the students are going to do their part."

## MARSH TALKS

(Continued from Page One)

cattle ranges. It has two main species, the tall and the low larkspur. The low larkspur is from six inches to one foot in height and grows at comparatively low elevations. It blooms in the spring and dies in the early summer. The low larkspur is dangerous during all its life. The tall larkspur grows in the gulleys and at a high elevation. It is from three to eight feet in height. It bloms all season from July until September or until broken down by the early snows. It is dangerous in the spring and after a rainfall. A peculiarity about this plant is that in the fall the leaves are not poisonous while the seeds are. Larkspur does not poison sheep but will fatten them.

The last plant discussed was the loco. This plant grows in abundant quantities in this state and from it the greatest losses are incurred. This plant acts in from on to three months and a large amount is necessary to produce effect. Dr. Marsh also stated that the losses from loco in Colorado in one year amounted to over $1,000,000.

In conclusion he said that if there was a remedy for stock or sheep poisoning that it must be practical and easily applied because if it were not it would not be used by the sheep herder or the cowboy. He also stated that no animal if left to itself would eat poisonous plants but that when driven by hunger it would.

Dr. Marsh also said it was better to drift cattle over an area which contained poisonous plants, not to drive them.

At the conculsion of his main talk slides illustrating his remarks were thrown upon the screen and he gave brief explanations of each.

These slides comprised pictures of the various poisonous plants in Montana, cross sections of them, and also showed the effect of the plants on various animals. By a succession of pictures, a good idea of the various stages in the process of poisoning was conveyed to the audience.

Several pictures of the aconite were thrown upon the screen. This plant is often confused with the larkspur, but unlike that it does not effect cattle. Maps showing the distribution of the white and the purple loco were also displayed. He described some of the experiments that had been performed and the success that had attended some of their attempts at cure.

The lecture proved to be interesting to all the students and in addition was very instructive. It is the hope of the student body that Dr. Marsh may be heard again at some future time.

## FIRST SESSION OF TRAVEL CLUB

(Continued from Page One)

tablished reality. The book would be much more interesting after a trip around the globe or even after listening to travel lecturers.

Mr. Divine spoke of the different routes to Asia and advised the traveler to go by way of Hawaii, stopping over for a few days in those most interesting islands.

He told of his experiences in travelling from Tokio to Yokohama. He bought a first class ticket and after riding for some time discovered that the Japanese who were in the same carriage were traveling on second class tickets there being no first class compartment on that train. It was then that to him was made evident the truth of the saying that "Nobody but fools, Americans, and princes ride first class".

It is the custom in Japan to take up the tickets upon leaving the train. On all continnental and Oriental rains, there are four classes of carriages. The first class compartment has room for six and the seats are upholstered with red velvet, the second class provides accomodations for eight and the seats are of gray velvet. The third has room for ten to twelve passengers ,and the upholstering resembles that of the tourist cars in his country. The seats in the fourth class compartments are boards and the passenger limit is the capacity limit. Many American professors travel fourth class in order to get the point of view of the natives of the country.

Rev. Divine spoke of the record breaking trip of John Henry Mears of Cincinnatti around the globe in thirty-five days and nine hours. On his return trip he passed through Bozeman on the North Coast Limited this being the most direct route.

If one has a two months' vacation and eight hundred dollars a very pleasant journey around the globe may be made. Ten days may be spent in getting one's affairs ready, then in addition to the time consumed in travelling two days may be spent in Paris, two days in London, two in Berlin, two in St. Petersburg, and six days in Japan in addition to several hours or a day in places of lesser interest.

Many people have the idea that twenty-five dollars a day is necessary to pay expenses, but ten dollars a day is sufficient and five dollars is all that is necessar in some cases.

In the majority of the foreign countries, the breakfasts served are very poor, consisting usually of coffee and rolls and possibly a little marmalade. Five meals a day are served in the tourist hotels in the far east.

Mr. Divine went on to say that before the present European war a ticket could be purchased from the North German Lloyd, good for two years time for $614.50, including ocean travel and meals on the steamer, and travel by rail but not including sleeper accomodations nor hotel bills. He said that the expense of the better native inns was not nearly so great as at the tourist hotels.

He advised anyone who contemplated a foreign journey to sail from the west for the Orient for the European countries are disappointing. The European countries are Anglicized and Americanized to such an extent that to the American the picture galleries are by far the most interesting.

Mr. Divine then explained the "why" of travel. In the first place travelling broadens one, giving them a world look. It also kindles within one a sympathetic standing. He spoke particularly of the grace, culture, and courtesy of Japanese in connection with this. In the third place it gives one an understanding of the view point of each nation. He gave as an example the poor policy of President Wilson in regard to the Philippines in comparison with that of Taft who was intimately acquainted with conditions in the island.

In the fourth place it would increase the pleasure and fascination of reading.

Mr. Divine continued by saying that he made the first half of his world trip with a group of five hundred people from different walks of life. Few had little ideas as to what there was to see and therefore did not get the most of their journey. It is the delight of the guides to impose upon the credulity of these travelers.

Mr. Divine's lecture tomorrow evening will be on Hawaii. Pictures will be shown in connection with his talk. A cordial invitation is extended to all college students to be present.

## Can full of Satisfaction
