CLINTON LAMME, '00, Preparatory.....		Academy
FRANK SPRAGG, '02, Agriculture.....		Experiment Station
MARGARET FERRIS, Special.....		Art, Societies and Entertainments

SUBSCRIPTION:

Fifty Cents per Annum, in Advance.

This is the fourth year of the EXPONENT's existence, and the present staff takes up the work where it was left by their predecessors, hoping that they may be able to carry the paper on to a higher plane, and make it second to none of the college papers of the west.

Patronize our advertisers. They are all first-class dealers and public-spirited men, who appreciate the college trade. If the faculty and students will work together in this matter, and patronize only those who advertise in the EXPONENT, it will be doing much towards the promotion of college spirit, and will place the EXPONENT on a much sounder financial basis.

It has frequently been said, and is sadly true, that this institution lacks in college spirit. This is not the best state of affairs for the institution, and while heretofore it may have been excused on the ground that this was a new institution and that college spirit would develop with the growth of the college, this excuse can be accepted no longer. The college is now in the seventh year of its existence, last year had a higher enrollment than any of the other higher educational institutions in Montana, and we think that the students should take a more active interest in the different factors of college life. What is a college without literary societies, a college paper and an athletic association? It is these that make a large portion of the sum total of the pleasure and profit of a college experience. Then why not

step in and help support them? If each student would do his DUTY in this matter, the literary societies, the college paper and the athletic association would be in a flourishing condition instead of struggling along in a bare existence, as every now and then they are compelled to. We believe that the fault lies with the students and that they can remedy conditions if they will.

The organization of an oratorical association by the various colleges of Montana has been for some time a matter of discussion. In view of this probability our college oratorical contest will occur this year during the winter term. If a state contest is held in the spring this college must be well represented. Every student who has any interest or ability along this line should decide at once to enter the preliminary contest and act accordingly.

The large number of applications for membership in the Arena shows conclusively that this society is regarded as an important institution of our college. Not only are the new students joining, but students who have been in the college for years, are awakening to the fact that they need more training in the different lines of public speaking, and that the Arena is the place to get this training. A good literary society is one of the best advertisements of a college, and let us hope that the officers and members of the Arena, knowing the responsibility that they hold in maintaining a rightly conducted literary society, will always strive to keep the Arena up to its present high standard.

Student Life.

Doubtless every energetic and ambitious student has entered college with a strong resolution to overcome all difficulties before him. In his mind's eye, he sees the lessons conquered by his power of concentration. He registers, tries to pursue more branches than his class officer deems wise, and thinks what a snap he will have with the six or seven studies he is to manage.

After perhaps a week, a true realization of what college lessons are, breaks upon him. First of all, he begins to study his German. There are the declensions of two forms of adjectives, sixteen German sentences to translate, sixteen English sentences to put into German, and a conjugation of weak verbs. As he surveys this new branch, the wise precaution of his instructor comes to mind, "Do not spend more than half an hour at a time on German, or any other language, for that matter." Through the confusion of noise—for there are some in the house who have not even attained the age for study—he worries along until his head begins to turn with those peculiar shaped letters. He must go out into the open air and let his mind clear up, while he rehearses the conjugation. Now, to his surprise, he has consumed an hour and a half.

But he must have a theme for the morrow. Ah! It is no easy matter to choose a suitable subject upon which he can write intelligently. After about thirty minutes a subject presents itself to him, and in an hour he has written it for the first time. His heavy eyelids will now stay open no longer for it is half past ten o'clock. If he is a Sunday-school boy and strength of will predominates, a

chapter of the Bible and prayer precede his slumbers. If not, he hurriedly climbs into bed with no thought of a higher plane than student life.

At six-thirty, he arises with a start, as the thought of unfinished lessons flashes across his mind. Hurredly he eats his breakfast. Another hour is spent on German, yet he feels dissatisfied with its preparation. However, Physics, Botany, and Literature claim a portion of his time. He looks over Physics and dashes away to school for the eight-forty period. After recitation, perhaps, there remain a couple of periods to read on Literature, but for some reason he cannot gather the information, suitable to his liking and judgment, so at the expiration of an hour he has no notes. The rest of the morning is occupied in recitation. Laboratory work keeps him busy during the afternoon until four-fifteen.

Now a new pressure is brought to bear upon him. If he be of the self-supporting class, there are duties for him to perform until six o'clock. But here he is attacked by the football captain, a score of other enthusiasts, the professor of athletics, "to be sure and come out and play." He tries to explain that he has no time, but many think he is timid or has no college spirit.

Again he is in his room, but a new phase of life confronts him. It is Wednesday. As he reflects on the Sunday sermon of the preceding week, and the advice of friends, the duty of going to prayer meeting presents itself. A struggle between conscience and selfish interest contends for the mastery. The balances are about to lower for selfish interest but there comes to his mind—"Seek ye first the kingdom of God and his righteousness and all other things

shall be added unto you." He attends the meeting, and the following day he feels very downcast and irresolute. But after some experience he learns not to worry, but to trust.

Friday soon rolls around with its claims of society. Again there is a struggle for mastery. Of course, Saturday and evening is taken up with outside duties and the Arena. Now he must study Friday evening or Monday morning. Invariably it is Monday morning, and a blue Monday it is.

Yet he should not be discouraged, for if he observes the principles put forth in assembly, there is some satisfaction. Thus the routine goes from year to year until he gains his degree, though he is not the most brilliant in the class. In after life he will realize the good obtained by the pressure of so many different elements in school life; how the effect of long lessons, the claims of society, the demand for athletics, the outside cares and duties, all tend to crystalize within him a strong character which insures true success.

We Are Glad To See:

Prof. Brewer back again after a year at Harvard.

The largest Freshman class in the history of the college.

The new professor of biology.

Prof. Cobleigh back from Columbia University.

The improved street car service.

The new professor of irrigation engineering.

And a carload of first preps.

WE MISS:

Old Caldwell and Williams.

The old board walk.

The familiar face of Dr. Wilcox.

Our former editor-in-chief.

Many of last year's third prep graduates.

In a Social Way.

On Thursday afternoon, September 28, the members of the synod of the Presbyterian church, and the ladies of the synodical society, visited the college. They were first received by Miss Harkins and the young ladies of her classes in the domestic science rooms, and served with Russian tea and peanut wafers. The visitors were then shown over the different departments of the college, and many spoke of the fine views of the city and the mountains, attainable from the college buildings.

* * *

A reception was given by the faculty to the college students on Friday evening, October 6. It was held in the library and the students highly appreciated the privilege of being allowed to talk to their heart's content without being reproved for breaking rules. The room was appropriately decorated in the college colors. Shrub and marguerites were served in a corner, which was very prettily trimmed with the leaves and berries of the mountain-ash. A novel means was provided by which the old and new students met each other, and the hours passed only too quickly. The students are all agreed that they spent a most enjoyable evening and feel much better acquainted with each other.

* * *

The Montana Society of Natural Sciences met in the Bozeman Hotel parlors, Thursday evening, October 5. The officers for the ensuing year were elected and two very interesting papers were read, one by Dr. Traphagen on "Petrifaction," and the other by Prof. Cobleigh on "Liquified Air."

* * *

Mrs. Marshall entertained the faculty in the parlors of the Bozeman Ho-

tel, Tuesday evening, October 10. Prof. Currier arranged a musical program which consisted of instrumental music by Mrs. Brewer, and singing by Mrs. Lester Willson, Miss Cooley and Prof. Currier.

Art.

The Freshman art class is larger this year than it has ever been before, and is reported to be doing excellent work. The first few weeks were spent in drawing from plant forms as a preparation for botanical work. As the flowers are gone now, the class has been put to work on the type-forms, the cube, cone, prism, etc. Perspective work also has been started and many are the sighs heaved over the drawing of roofs and floors, and lines that won't vanish. Some of the students have been in the business department drawing the desks.

Five or six of the more advanced students are working in water colors, and have painted some very pretty and most lifelike sweet peas and pansies. The life class has commenced work again, but strange to say, the students of the other departments do not seem to appreciate having their likeness (?) committed to black and white; perhaps their vanity can not withstand the shock.

Mrs. Marshall gives a weekly lecture upon Egyptian Art.

Notes on the Fall Fashions.

The prevailing colors of the past season will mostly be changed. The pines, however, will continue to wear dark green and for sage brush, pale green will still be the thing.

The poplars will wear pale yellow with green.

In general, yellow will be the fashionable color of the season.

A stunning costume worn by the mountain ash is dark green with a dash of scarlet.

A light yellowish brown is considered the most becoming thing for the box alder.

The fashionable birch trees are wearing white trimmed with pale yellow.

All the grain fields wear yellow in varying tints.

For lawns, green is giving way to brown.

No becoming fall styles have yet appeared for the weeds.

The mountains have appeared in a number of charming costumes. For stormy weather a fluffy gray is the prevailing fashion. For late afternoon entertainments a delicate purple or violet is *a la mode*. There are, however, already indications that white will be very fashionable later in the season.

Literary Societies.

The Cliolian Literary Society held its first meeting on Monday afternoon, September 18. It was decided to send written invitations to all the young ladies of the college, requesting them to join the society, and, consequently, at the next meeting, Sept. 25, many of the new students were present and became members. The following interesting programme was rendered:

Devotional Exercise....Edna Maynard
Music.....Beatrice Freeman
Review of "David Harum".....

.....Margaret Ferris
Recitation.....Beatrice Freeman
Two minutes' speeches—"Vacation

Experiences".....All members.

At the meeting held on October 9, a number of young ladies united with

the society, so that the enrollment is rapidly increasing.

Although the assembly room was very cold, the following was carried out:

Music.....Carrie Gardner
Recitation.....Ellen Gottschalck

Debate—Resolved; "That great cities are considered in themselves, and in their influence, a greater evil than good."

Affirmative— Negative—
Beatrice Freeman, Mary Monforton,
Margaret Ferris. Annie Arnold.

The society has begun well after its year's rest and intends to make up for lost time.

* * *

The Arena now has a membership of over thirty, and are initiating members every meeting. At each meeting a program is carried out, consisting of a debate and several extemporaneous or short prepared speeches, as well as many other interesting features, such as declamations, singing, etc.

The officers of the society for this term are:

President—Ed. Burke.

Vice president—W. A. Flaharty.

Secretary—Stanley Koch.

Sergeant-at-Arms—H. C. Thompson.

Critics—J. D. Llewellyn and W. W. Jones.

The society now has an iron clad rule regarding attendance, by which a member who fails to appear when placed upon program, or absents himself from two consecutive meetings, forfeits his rights in the society unless he can present a satisfactory excuse, which must be accepted by a two-thirds vote of the members present.

The meetings of the Arena are open this term, and visitors are always welcome.

Alumni.

Robert Chisholm is with his folks in Chicago.

Will Knadler is at home this year on the ranch.

T. E. Swift is deputy treasurer of Broadwater county.

Miss Minnie Harvey is teaching school near Townsend.

S. W. Wynne is with a government survey in Madison county.

David F. Williams is rustivating on the ranch near Radersburg.

N. W. Miller, a valuable football boy, will not return this year.

We are sorry to say that Bertha and Altha Jeffers are not in school.

Halsey Van Doren is railway postal clerk, running between Butte and Logan.

C. M. Barbee went with Will Simons to Kansas City to study medicine.

Ralph Boyles and Horace Martin are in the employ of Benepe, Owenhouse & Co.

Miss Vina Cowan, who is teaching on Deep Creek, expects to re-enter college soon.

Claude Henderson will enter college soon, much to the satisfaction of his many friends.

Anyone wishing to see Will Brandenburg will find his smiling face behind the counter in the Golden Rule Store.

Austin McMahon is at present on his way to Pennsylvania in charge of a shipment of horses.

George Hossfeld, one of last year's base ball players is on his father's ranch near Radersburg.

Edna Cummings, another business department student, is keeping books for the Willson Company.

Fred Willson and Reno Sales spent their vacation in Bozeman and returned to Columbia this fall.

Emma Morgan, a student of the business department, has a position in the recorder's office of Bozeman.

Alexander Wemyss is now secretary and manager of the wholesale grocery house of Dire, Foristell & Wemyss.

Will Simons, a well known college student, has gone to Kansas City where he intends to study medicine.

Owing to a serious illness, Miss Gerty More is unable to attend college, a fact most deeply regretted by her many friends.

Tom Caldwell, who was graduated last year, now holds the position of assayer for Henry Elling at the Easton mine.

Evan B. Davis has sold his photographing supplies and will soon start for Chicago soon to attend a school of photography.

A letter was recently received by the president from Peter Sieh, another old college student. At present he is on a ranch at Stony Mt. Northwest Territory, but expects to return to college soon.

Ernest Edsall, the ex-editor-in-chief of the EXPONENT, is in Butte, where he holds a high position in the First National Bank.

The last we heard of Louis Bender he was headed for Golden, Colo., to attend a school of mines. Our best wishes go with him.

Frank Sloan, who was a sophomore last year, in the mechanical engineering department is now employed on the Trail creek mines.

N. C. Titus is at present occupied with the enlightenment of juvenile specimens of the genus homo, in a district school house near Miles City.

It grieves us to announce that Willie Street, of last year's third preparatory class, died during vacation. He is missed especially by the class that is now freshman.

In a recent number of Frank Leslie's magazine is a poem by Miss Sadie Shaw, formerly a college student of Bozeman. There is a rumor afloat that she has written a book and is trying to get it published. The EXPONENT gives its most hearty good will and hopes the venture will meet with the success it no doubt deserves.

The Freshman Class.

This year's Freshman class is composed of eighteen members. Among these Messrs. Brown, Lamme, Stevenson, Railey, G. T. Morris, Sloan, and Misses Quaw and Lewis, graduated last spring from the Bozeman high school. Messrs. Davidson, Koch, Tavenner, C. D. Flaherty, and Miss Davidson were preparatory department graduates last year. W. B. Morris and W. A. Flaherty were pre-

paratory specials last year, while Kinney and Maxwell were third preps, but left school before the year was over, and consequently could not graduate. H. G. Gardiner comes to us from the Ontario Agricultural College, at Guelph, Ont.

The mechanical engineering course seems to be the favorite this year with the class, as all the members are taking it except Lamme, Maxwell, Stevenson, Messrs. Quaw, Lewis and Davidson, who are taking the general science course, and Gardiner, who has entered the agricultural department.

Athletics.

At a recent meeting of the Athletic Association a new constitution was presented, by the committee, and adopted by the association. The framing of a new constitution was found necessary from the fact that under the old one only male students could become members. As the aid of the young ladies, in this institution, is no small factor, their assistance, as well as that of the faculty, was sought by extending to them the right of membership.

The executive committee was changed from a committee of five to a committee of eight; of these five are to be students and three faculty members.

The following were elected to serve for the present year:

President—C. D. Flaherty.

Vice-president—Frank Willson.

Secretary—Miss Madge Hartman.

Treasurer—W. W. Schabarker.

Executive Committee—(student), Messrs. Collins, Cliffords, Adams, Misses Ferris and Gage, (faculty), Messrs. McCormick and Brewer and Miss Corbett.

The membership fee of the association is twenty-five cents a year.

Members who fail to pay this fee within two weeks after having been notified by the treasurer are liable to lose their membership. It is the desire of the association that all students should join them in their athletic work. We need your support.

* * *

A meeting of the young ladies of the Athletic association was held in the assembly room on Friday, Oct. 6. It was decided that basket ball and tennis were to be especially encouraged this season. Arrangements were made so that each young lady may meet her athletic instructor, Miss Corbett, at least twice a week. The ladies have use of the drill hall from 3:15 to 4:15 of each day. From 4:30 on, it will generally be occupied for football practice, unless the weather will permit playing outside.

* * *

Football is on the push. The boys have been practicing hard, since the school term commenced. Although it was hard to get enough players out at first, there soon was so many that it was found necessary to purchase a dozen new suits. Now two teams are in good working order. Capt. Koch of the second team is keeping his men at hard practice. Clifford Jeffers has been chosen captain of the first eleven. As a player we are all acquainted with him. In the short time the new coach has been with us, he has shown that he understands the game, and with the good material to back him we can reasonably expect some good work from our football eleven.

The line-up as at present arranged is as follows:

Center.....	J. Elliot
R. Guard.....	F. Ervine
L. Guard.....	H. Thompson
R. Tackle.....	R. Flaherty
L. Tackle.....	W. E. Collins

R. End.....	W. Flaherty
L. End	C. D. Flaherty
R. Half Back.....	W. Schabarker
L. Half Back.....	Capt. Jeffers
Full Back.....	J. Johnson
Quarter Back.....	C. Jeffers
Substitutes—	F. Willson, S. Koch, J. Davidson, W. Robinson, C. Parker.

The Weekly Assembly.

An assembly of all the students of the college is held every Wednesday morning, at ten o'clock.

These weekly assembly exercises, which consist of music, devotional exercises and an address, either by some member of the faculty or by some of the ministers or other professional men of our city, are very profitable and beneficial. On Sept. 20, the date of the first assembly, Pres. Reid addressed the students in his usual able manner. On Sept. 27, Prof. Brewer read an article entitled—"Can you carry a message to Garcia"—which was much enjoyed by all present.

Friday of the same week, President Stubbs of the Nevada State University delivered a very eloquent address, in which he brought out some of the features of colleges in the west and compared them with eastern universities.

At the same assembly, Prof. Buffon of the Wyoming State University—the "hayseed," as he designated himself—gave a brief but witty talk on Agriculture.

The last two assemblies have been addressed by Rev. McHargue of the Christian church and Rev. Rector of the M. E. Church, South. Both of these worthy gentlemen are excellent speakers and their discourses were highly appreciated both by the faculty and students.

LOCALS.

“How'd you like to be a freshman?”

Geo. Kuphal has joined his college friends once more.

Young ladies, notice the ad. of The Bazaar in this issue.

Miss Annie Arnold is taking a course in stenography.

Prof. Cooley's department is being furnished with new desks.

Students, get your photos taken at the Elite Studio.

A number of new houses are going up near the college. Have you noticed them?

The work of laying the city water mains to the college is at last completed.

H. C. Patterson, who was a freshman in 1897-8, is taking the business course.

The facilities for heating the laboratory building have been greatly increased.

The Misses Blanche and Anabel Flowers are taking a shorthand and type-writing course.

This month's EXPONENT is unavoidably late, but hereafter we can promise our readers that we will be on time.

About four dozen freshmen cornered a prep. in a cloak room, a few days ago and didn't have sufficient numbers to overpower—so the preps. say.

Have you noticed the new rhetoric box “hanging on the wall?”

It's odd how hard the boys work in mechanical drawing at 8:40.

You will be pleased if you have your photo taken at the Elite.

Kirk Smith, of the Livingston high school, has entered the third preparatory class.

Burle Jones, of last year's preparatory graduating class, is registered as a special this year.

Frank Tavenner rode over from his home in the Judith basin, at the beginning of the term.

William Robinson, who last year took a short course in agriculture, is now a member of the third preparatory class.

Miss Pearl Dickson is at present teaching the Riverside school. She writes that she has met with success in her work.

Miss Madge Hartman, who graduated from the Bozeman high school, as the valedictorium of the class of '99, has taken up a special work in the college.

Lowell R. King, who last year graduated from the academic department of the Montana Wesleyan University, has taken up special work in the college.

Anyone of a musical turn of mind, wishing to hear the variations of the familiar whistlers, is asked to visit the college shops while the students are at work.

Wynne Sparr has gone to Chicago, where he intends to become a dentist.

The number of students taking shop work is larger than ever before.

Clinton Lamme, formerly of the Bozeman high school, has entered the third preparatory class.

President Ried and Dr. Traphagen left for Butte on the 20th, intending to remain several days.

W. J. Adams, formerly a student of Notre Dame university, has entered the preparatory course.

W. D. Provinse, the president of last year's third preparatory class, is taking a business course.

Clifford Jeffers, who last year was a general science sophomore, has changed this course and is now studying business.

The freshman is larger than ever before, and judging from their own account are very much brighter than previous classes.

Herman Waters is recovering from a serious attack of typhoid fever, and will not enter college till the opening of the winter term.

Several improvements have been added to the library. The past numbers of current magazines have been bound and some new books have been added.

Exclusive Shoe Store!! Sells good shoes. They cost no more than ordinary shoes. Rubbers and overshoes. Gives every baby a pair of shoes. Shoes repaired while you wait.

J. H. Harris, the shoe man,

Frank Spragg is now student assistant in chemistry, and has charge of the freshman laboratory work.

Students, remember that the advertisers make it possible for you to read the Exponent. Patronize them.

W. E. Parkins, one of last year's business department graduates, is now taking a past graduate course in book-keeping.

Have you noticed the improvement in the college grounds? The hill has been graded and preparations for a lawn are being made.

Students seem to be a little backward about riding on the street car, probably owing to the number of the faculty who patronize it.

Three college boys, Frank Sprague, Ellie More and Ellers Koch, spent a most profitable summer in Oregon, where they represented the College Forestry Department.

The street car was off the track one day last week, thereby making the teachers late. This fact was highly appreciated by all the students, especially the freshmen.

The chemical laboratory is crowded with students. Physics, mineralogy, geology, and chemistry classes are well filled and extra desks were found necessary in the freshman laboratory.

On Tuesday, the 10th of October the Minnesota volunteers passed through Bozeman. In order to show respect to the soldiers, the band met them at the station and were attractive enough to cause one man to be left behind.

On account of the raising of the standard in the business department the attendance has visibly decreased.

Richard M. Flaherty, a brother of Charley and Will, has entered the preparatory course, and makes a valuable man for the football team.

W. D. Provinse has been excavating around his new home. Never mind, Will, you are not the only college man who has to get down and dig.

The turkey has one less thing to be thankful for this year. He is minus his tail, for the college boys have adopted a new fashion and now "have a feather in their cap."

The domestic science work is in running order. Lunches will be served after Nov. 1. Orders are now being filled for refreshments for parties. The refreshments for the late reception were furnished by the domestic science department.

Heard at the Arena during a spirited debate:

Aff. Speaker—"Every school-boy is familiar with the stirring oration delivered by Mark Antony over the dead body of Patrick Hen"—and the applause was so great that the rest of the sentence was completely drowned.

Prof. Robert Shaw has just returned from judging the live stock and butter and cheese at the Spokane Industrial Exhibition, in which the states of Idaho, Washington, Oregon, Mantana, and British Columbia participated. While there he distributed over three thousand dollars in purses without a murmur from anyone, as he was always able to give the reason for making each decision,

Foley Waters, one of the Bozeman high school graduates, is now pursuing a special course in the college.

It is expected that a football game, between the Butte business college eleven and our team, will be played here in about two weeks.

Miss Calvin is now in Leipsic where she is pursuing her musical studies. She writes that she practices six hours a day, a fact which ought to stimulate her scholars to harder work.

The enrollment this year amounts to about 170, besides the scholars who are taking music only. Of this number there are about 50 taking college work, the remainder being in preparatory department or taking special course.

Good Things for The Boys.

Sweaters.

A large collection to choose from—probably the largest here.

Navy blue and maroon wool Sweaters, **\$1.00**
Black, tan and green heavier wool Sweaters, **\$1.50**

Heavy wool Sweaters in stripes, **\$2.00**
Black or dark grey worsted Sweaters, **\$2.25**
Blue, black or scarlet heavy worsted Sweaters, **\$3.00**

Blue or dark green extra heavy wool Sweaters lace neck, **\$3.00**

Navy blue lace neck Jerseys, **\$3.00**
Extra heavy worsted Sweaters in silver grey, gold brown, dark brown or black, **\$3.50**
The best worsted Sweater made in black and dark grey, **\$4.00**

Heavy worsted, silk striped Sweaters, **\$4.50**
Sweaters made to order in any of these kinds in College Colors or any other combination of colors desired.

We are sole agents for "Stein-Block" suits, overcoats and trousers, which cost a little more than the ordinary, but are better than the tailors can make and at half their prices.

THE WILLSON CO.

OUR TRADE ON THE GOLDEN RULE FINE SHOES

For ladies is growing every day. They are the best made, best fitting and most stylish line of shoes on the market.

IN MEN'S DRESS SHOES We can give you everything that's new in Vici Kids, Box Calf, Kangaroo Calf and genuine Kangaroo in black and tan. All newest lasts. Every shoe bears our stamp and is fully guaranteed by us.

THE MONTANA COLLEGE OF Agriculture and Mechanic Arts.

☆☆☆☆☆☆

THE site chosen for the College buildings and campus is one of the most beautiful that could be imagined, being a beautiful elevation southwest of the city of Bozeman.

FACULTY.

The Faculty, twenty in number, and nearly all from the leading Colleges and Universities of the east, make one of the strongest corps of instructors in the west.

● ● GENERAL STATEMENT. ● ●

The Montana State College of Agriculture and Mechanic Arts is the state school of Applied Science. The purpose is to give to the young men and women of Montana an opportunity to acquire a good college education in Mathematics, Literature, Science and Art. Being a State institution, instruction is free to all residents of Montana of suitable age and requirements. A small fee is charged to cover incidentals and laboratory fees sufficient to cover the cost of material.

The following courses have been established, and the schedules of these courses with full description may be found in the catalogue.

I. Course in General Science.

II. Course in Agriculture.

III. Course in Chemistry.

IV. Course in Home Science and Art.

V. Course in Mechanical Engineering.

VI. Course in Electrical Engineering.

VII. Course in Biology.

VIII. Course in Preparatory Department.

IX. Course in Music.

X. Course in Book-keeping.

XI. Course in Stenography and Typewriting.

Students may obtain room and board at from three to four dollars per week, and may board themselves for much less.

Two literary societies are conducted under the auspices of the College.

For further information or catalogue, address,

JAMES REID, President, Bozeman, Mont.
