Always active for the College, and oldest in
point of service,
this volume of the Montanan
is dedicated to
Professor William Merriam Cobleigh.

Foreword and Greeting

IN PRESENTING this, the eighth volume of the Montanan, the staff is keenly aware of the many imperfections that are to be found between the covers. No attempt to issue a literary masterpiece has been made, the idea in mind at all times being to give a correct pictorial history of the events of the college year 1913-1914, along with some of the lighter events that together with the work of the year combine to make college life what it is. In spite of all that can be said and done, this is all that any college annual can hope to do, and if, here and there, little touches have been added that relieve the sameness of college annuals, the staff has done all that it hoped to do.

BOOK I

COLLEGE
AND
FACULTY

Eight

Historical

First Morrill act of Congress, July 2, 1862, authorizes agricultural and mechanical colleges and makes land grants for their partial endowment.

Second Morrill act of Congress, August 30, 1890, makes annual appropriation from treasury of the United States for further support of these institutions.

Act of Montana Legislature, approved February 16, 1893, accepts these grants of land and money.

Work of organization started in 1893 by Luther Foster.

Montana State College of Agriculture and Mechanic Arts opened September, 1893. A. M. Ryon, president, and faculty of seven members.

James Reid elected president in 1894. Faculty then composed of thirteen members.

Cornerstone of College Hall laid 1896.

First commencement in June, 1897. Senior class of four members.

College moves to present location on hill from old Academy building in the spring and summer of 1898.

James M. Hamilton elected president, 1904.

Montana State Board of Education

Ex-Officio.

Governor S. V. Stewart, Chairman.....Helena
 Atty. Gen. D. M. Kelly.....Helena
 State Supt. H. A. Davee, Secretary.....Helena

By Appointment.

Charles H. Hall.....Missoula
 J. Bruce Kremer.....Butte
 (Term expires February, 1914.)

O. W. McConnell.....Helena
 Ward H. Nye.....Billings
 (Term expires February, 1915.)

Walter S. Hartman.....Bozeman
 S. D. Largent.....Great Falls
 (Term expires February, 1916.)

Joseph C. Smith.....Dillon
 John Dietrich.....Helena
 (Term expires February, 1917.)

H. H. Swain, Clerk of Board.....Helena

EXECUTIVE BOARD.

President James M. Hamilton (ex-officio), Chairman.....Bozeman
 By Appointment.

W. S. Davidson.....Bozeman
 (Term expires April, 1917.)

J. H. Baker.....Bozeman

Faculty

JAMES M. HAMILTON, M. S.

*President Montana State College,
Professor of Psychology and Economics.*

B. S., Union Christian College, 1887; Superintendent City Schools, Missoula, Montana, 1889-1901; Graduate Student Harvard, 1898; Member State Text Book Commission, 1902; Professor of Psychology and History, University of Montana, 1901-1904; President Montana State College since 1904; Member American Agricultural College Presidents and Experiment Station Directors' Association; National Education Association; American Association for the Promotion of Engineering Education; American Association for the Advance of Political and Social Science.

ARTHUR WILLIAM RICHTER, M. M. E.

Dean of College of Engineering.

B. M. E., University of Wisconsin, 1889; M. E., University of Wisconsin, 1891; M. M. E., Cornell University, 1899; Instructor in Engineering, University of Wisconsin, 1891-93; Assistant Professor of Experimental Engineering, University of Wisconsin, 1893-95; Professor of Experimental Engineering, 1901-09; Professor of Engineering, University of Montana, 1909-13; Dean of Engineering, Montana State College, since 1913; Consulting Engineer, Wisconsin State Board of Control; Member Montana Society of Engineers; American Gas Institute; American Society of Mechanical Engineers; Sigma Xi; Tau Beta Pi.

FREDERICK B. LINFIELD, B. S. A.

*Dean of College of Agriculture,
Director of Montana Agricultural Experiment Station.*

B. S. A., Toronto University, 1891; Assistant Instructor, Ontario Agricultural College, 1892-93; Professor of Animal Industry and Dairying, Utah Agricultural College, 1893-02; Professor of Agriculture, Montana State College, 1902-08; Director Montana Agricultural Experiment Station, since 1904; Dean of Agriculture, since 1913.

UNA B. HERRICK.

Dean of Women.

Missouri Wesleyan College; Chicago Conservatory; Kelso School of Musical and Dramatic Art; Sargent School, Cambridge, Mass.; Instructor in Gymnasium and Vocal Expression, Trinity University, Texas; Private Studio, Carnegie Hall, New York City; Instructor in Physical Education of Women and Public Speaking, North Dakota State Normal School, 1905-11; Dean of Women, Montana State College, since 1911.

Faculty—Continued

WILLIAM FISKE BREWER, A. M.

Professor of English.

A. B., Iowa College, 1891; A. M., Iowa College, 1897; A. M., Harvard University, 1899; Teacher, Iowa College Academy, 1891-92; Fellow in Latin, University of Chicago, 1892-93; Teacher, Lake Forest Academy, 1894-96; Graduate Student, Harvard University, 1898-99; Professor of English, Montana State College, since 1896; Phi Beta Kappa.

LILLA AGNES HARKINS, M. S.

*Head of Home Economics Department,
Professor of Home Economics.*

B. S., South Dakota Agricultural College, 1890; M. S., South Dakota Agricultural College, 1898; Head of Domestic Science Department, South Dakota Agricultural College, 1890-96; Head of Domestic Science Department, Louisiana State College, 1896-97; Professor of Home Economics, Montana State College, since 1897; Member of the Council of American Home Economics Association.

ROBERT ALLAN COOLEY, B. S.

*Head of the Biology Department,
Professor of Zoology and Entomology.*

B. S., Massachusetts Agricultural College, 1895; Assistant Entomologist, Massachusetts Agricultural College, 1895-99; Professor of Zoology, Montana State College, since 1899; State Entomologist, since 1902; Fellow A. A. A. S.; Member of American Association of Economic Entomologists; Member of Entomological Society of America.

WILLIAM DUANE TALLMAN, B. S.

*Head of Mathematics Department,
Professor of Mathematics.*

B. S., University of Wisconsin, 1896; Instructor in Mathematics, Madison High School, 1897; Fellow in Mathematics, University of Wisconsin, 1898-99; Instructor and Graduate Student in Mathematics, University of Wisconsin, 1899-01; Professor of Mathematics, Montana State College, since 1901; Member American Mathematics Society; Member of the Mathematical Circle of Palermo; Fellow A. A. A. S.

WILLIAM MERRIAM COBLEIGH, A. M.

*Head of Chemistry Department,
Professor of Chemistry.*

E. M., College of Montana, 1894; A. M., Columbia University, 1899; Chemist, Anaconda Mining Company, 1892-93; Assistant Chemist, Montana Experiment Station, 1894-99; Assistant in Chemistry and Physics, Montana State College, 1894-96; Instructor, 1896-99; Professor of Physics, 1901-07; Professor of Chemistry, since 1907; Fellow A. A. A. S.; Member, American Chemical Society; State Chemist.

Faculty—Continued

JOSEPH AUKEN THALER, E. E.

*Head of the Electrical Engineering Department,
Professor of Electrical Engineering.*

E. E., University of Minnesota, 1900; Instructor in Mathematics, University of Minnesota, 1901; Assistant Professor of Mechanical Engineering, Montana State College, 1901-02; Instructor in Mechanics, Purdue University, 1902-03; Professor of Electrical Engineering, Montana State College, since 1903; Fellow, the American Institute of Electrical Engineers; Society for the Promotion of Engineering Education; Montana Society of Engineers; Sigma Xi.

ALFRED ATKINSON, M. S.

*Head of Agronomy Department,
Professor of Agronomy.*

B. S. A., Iowa State College, 1904; Assistant Professor of Agronomy, Montana State College, 1904-06; Professor of Agronomy, since 1906; M. S., Cornell University, 1912; Member, A. A. A. S.; American Society of Agronomy; American Breeders' Association; Vice-President, International Dry Farming Congress; Sigma Xi.

PAUL N. FLINT, M. S.

*Head of Animal Industry Department,
Professor of Animal Industry.*

B. S., Michigan Agricultural College, 1904; M. S., University of Illinois, 1906; Animal Husbandman, Georgia Experiment Station, 1906-10; Professor of Animal Husbandry, University of Arkansas, 1910-11; Assistant Professor of Animal Husbandry, Kansas State Agricultural College, 1911-12; Head of Animal Industry Department, Montana State College, since 1913; Member, American Society of Animal Nutrition; American Breeders' Association.

CHARLES S. DEARBORN, B. S.

*Head of the Mechanical Engineering Department,
Professor of Mechanical Engineering.*

B. S., Kansas State Agricultural College, 1904; Graduate Student, Kansas State Agricultural College, 1904-05; Assistant in Mechanical Engineering, Kansas State Agricultural College, 1904-05; Assistant Professor of Mechanical Engineering, Montana State College, 1905-09; Professor of Mechanical Engineering, Montana State College, since 1909; Member, Society for the Promotion of Engineering Education; Montana Society of Engineers.

DEANE B. SWINGLE, M. S.

Professor of Botany and Bacteriology.

B. S., Kansas State Agricultural College, 1900; M. S., University of Wisconsin, 1901; U. S. Department of Agriculture, 1901-06; Montana State College, since 1906; Fellow, A. A. A. S.; Member of the American Phytopathological Society.

Faculty—Continued

ROBERT DAVIS KNEALE, C. E.

*Head of the Civil Engineering Department,
Professor of Civil Engineering.*

B. S., Purdue University, 1906; C. E., Purdue University, 1908; Instructor in Purdue University, 1906-07; Assistant Professor of Civil Engineering, 1907-08; Professor of Civil Engineering, since 1908; Chairman, State Highway Commission; Member, American Society for the Promotion of Engineering Education; Montana Society of Engineers; Indiana Society of Engineers; National Cement Association.

ORVILLE BLAINE WHIPPLE, B. S.

*Head of Horticultural Department,
Professor of Horticulture.*

B. S., Kansas State Agricultural College, 1904; Graduate Student, Massachusetts Agricultural College, 1905; Instructor in Horticulture, Colorado Agricultural College, 1905-06; Field Horticulturist for Colorado Experiment Station, 1906-09; Professor of Horticulture, Montana State College, since 1909.

HOWARD WELCH, D. V. M.

Professor of Veterinary Science.

A. B., University of Missouri, 1903; B. S. A., University of Missouri, 1906; D. V. M., Cornell University, 1909; Instructor of Histology, Cornell University, 1906-07; Assistant in Physiology, Cornell University, 1908-09; Private Practice, Bozeman, Montana, 1909-13; Professor of Veterinary Science, Montana State College, since 1913; President, Montana State Veterinary Association; Vice-President, State Board of Veterinary Examiners.

FRANK W. HAM, M. S.

*Head of Physics Department,
Professor of Physics.*

B. S., Montana State College, 1903; M. S., Montana State College, 1905; Graduate Student, University of Chicago, summers of 1908-11; Assistant in Chemistry, Montana Experiment Station, 1905-06; Instructor in Chemistry, Montana State College, 1906-09; Assistant Professor of Physics, 1909-11; Professor of Physics, since 1911; Associate Member, American Physical Society.

MILO HERRICK SPAULDING, A. M.

Assistant Professor of Zoology.

A. B., Leland Stanford University, 1903; A. M., Leland Stanford University, 1906; Assistant in Zoology, Stanford University, 1901-02; Special Field Assistant, Bureau of Fisheries, Alaska Salmon Commission, 1903; Assistant Naturalist, Bureau of Fisheries, Steamer "Albatross," 1904; Graduate Student and Assistant in Zoology, Leland Stanford University, 1903-06; Resident Zoologist, Gulf Biologic Station, Louisiana, 1906-08; Assistant Professor of Zoology and Physiology, Montana State College, since 1908; Sigma Xi.

Faculty—Continued

HELEN RICHARDS BREWER, A. B.

Assistant Professor of History and Latin.

A. B., Iowa College, 1888; Assistant Principal and Principal of the High School, Sutton, Neb.; Instructor in Botany and English in Worthington, Minn.; Graduate Student, University of Nebraska, 1905-06; Assistant Professor of History and Latin, Montana State College, since 1898; Phi Beta Kappa.

FRANK C. SNOW, C. E.

Assistant Professor of Civil Engineering.

C. E., Ohio State University, 1906; United States Bureau of Rivers and Harbors, 1906-07; City Engineer, Findlay, Ohio, 1907-08; Engineer in Charge of Pavements, Elyria, Ohio, 1908-09; Instructor in Civil Engineering, Montana State College, 1909-10; Assistant Professor of Civil Engineering, since 1910.

ROY CARROLL JONES, B. S. A.

Assistant Professor of Animal Industry.

B. S. A., University of Vermont, 1908; Assistant in Animal Nutrition, Pennsylvania State College, 1908-10; Assistant Professor of Animal Industry, in charge of Dairy Manufactures, Montana State College, since 1910.

LANA A. BALDWIN.

*Head of Art Department,
Assistant Professor of Art.*

Woman's Art School, Cooper Union, New York City, 1904; Designer, C. G. Braxmar, Manufacturing Jeweler, New York City, 1905; Instructor in Art, Gallatin County High School, 1908-10; Assistant Professor of Art and Head of Art Department, Montana State College, since 1910.

FLORENCE BALLINGER.

Assistant Professor of Home Economics.

Attended the MacDonald School of Dressmaking; Montana State College; Stout Institute; University of Chicago; Teacher's College, Columbia University; Assistant Professor of Home Economics, Montana State College, since 1907.

Faculty—Continued

RUFUS A. BARNES, A. B.

Assistant Professor of Chemistry and Geology.

A. B., Wisconsin University, 1908; Graduate Student, University of Wisconsin, 1908-09; Instructor in Chemistry, Rose Polytechnic Institute, 1909-10; Assistant in Analytical Chemistry, University of Wisconsin, 1910; Instructor in Chemistry and Geology, Montana State College, 1910-12; Assistant Professor of Chemistry and Geology, since 1912; Member of the American Chemical Society; Alpha Chi Sigma.

CAROLINE MAY CEHRS, A. M.

Assistant Professor of German.

A. B., University of Denver, 1904; Graduate Student, University of Berlin, 1905-06; A. M., University of Denver, 1907; Professor of German, Mount Union College, Alliance, Ohio, 1907-11; Instructor in German, Montana State College, 1911-12; Assistant Professor of German, since 1912.

RALPH T. CHALLENGER, B. S.

Assistant Professor of Mechanical Engineering.

B. S., Kansas State Agricultural College, 1908; Instructor in Manual Training, Kansas State Industrial Reformatory, 1908-09; Instructor in Mechanical Engineering and Foreman of Wood Shops, Montana State College, 1909-13; Assistant Professor of Mechanical Engineering, since 1913.

LYMAN G. SCHERMERHORN, B. S.

Assistant Professor of Horticulture.

B. S., Massachusetts Agricultural College, 1910; Instructor in Horticulture, Montana State College, 1910-13; Assistant Professor of Horticulture, Montana State College, since 1913.

HARRY MILLIKEN JENNISON, M. A.

Assistant Professor of Botany and Bacteriology.

B. S., Massachusetts Agricultural College, 1908; Instructor in Botany, Massachusetts Agricultural College, 1908-10; Instructor in Botany, Wabash College, 1910-11; Graduate Student, Wabash College, 1910-11; M. A., Wabash College, 1911; Instructor in Botany and Bacteriology, Montana State College, since 1911; Member, A. A. A. S.; American Phytopathological Society; Assistant Professor of Botany and Bacteriology, since 1913.

Faculty—Continued

WILLIAM O. WHITCOMB, M. S.

Assistant Professor of Agronomy.

B. S. A., North Dakota Agricultural College, 1909; Bureau of Plant Industry, United States Department of Agriculture, 1909-11; Graduate Student, Cornell University, 1911-12; M. S., Cornell University, 1913; Instructor in Agronomy, Montana State College, 1913; Assistant Professor of Agronomy, Montana State College since 1913; Member, Alpha Zeta.

WILLIAM R. PLEW, M. S.

Assistant Professor of Civil Engineering.

B. S., Rose Polytechnic Institute, 1907; M. S., 1910; Instructor in Civil Engineering, Rose Polytechnic Institute; Assistant City Engineer, Terre Haute, Ind.; Designing Engineer, Paris Bridge Co., Paris, Ill.; Instructor in Civil Engineering, University of Montana, 1910-11; Assistant Professor of Civil Engineering, University of Montana, 1911-13; Assistant Professor of Civil Engineering, Montana State College, since 1913.

HERBERT B. BONEBRIGHT, B. S. A.

Instructor in Agricultural Engineering.

B. S. A., Iowa State College, 1907; Instructor in Farm Mechanics, Colorado State College, 1908-09; in charge of the Farm Mechanics Department, 1909-10; Instructor in Agricultural Engineering, Montana State College, since 1910; Professor of Agricultural Engineering of the American Correspondence College of Agriculture.

FRIEDA M. BULL, M. S.

Instructor in Mathematics.

B. S., Montana State College, 1907; Graduate Student, Montana State College, 1908-09; M. S., Montana State College, 1909; Instructor in Mathematics, since 1910.

FLORENCE W. WALLIN, B. A.

Instructor in French.

A. B., University of Iowa, 1907; Graduate Student, University of Chicago, 1908; Student in Paris, 1910; Instructor in French and Spanish, Montana State College, since 1911.

Faculty—Continued

IRWIN T. GILRUTH, B. A.

Instructor in English.

B. A., Ohio Wesleyan University, 1910; Assistant in English, Ohio Wesleyan University, 1909-10; Instructor in English and Civics, College School of Chicago, 1910-11; Instructor in English, East Chicago High School, Chicago, Ill., 1911; Instructor in English, Montana State College, since 1911; Delta Sigma Rho.

THEDA M. JONES.

Instructor in Shorthand and Typewriting.

Attended Vermont State Normal School; Albany Business College; Teacher Albany Business College, 1906-08; Teacher, Mercer Academy, Mercer, Penn., 1908-11; Instructor in Shorthand and Typewriting, Montana State College, since 1911.

F. CLIFFORD MILLER, B. S.

Instructor in Mechanical Engineering.

B. S., James Milliken University, 1909; Graduate Student, University of Illinois, 1910; Instructor in Shop Work, James Millikin University, 1910-12; Instructor in Mechanical Engineering, Montana State College, since 1912.

ADA ELEANOR HUNT, A. B.

Instructor in Home Economics.

A. B., University of Illinois, 1912; Dietician, Battle Creek Sanitarium, 1912-13; Instructor in Home Economics, Montana State College, since 1913; Sigma Xi.

MARIAN FRANCIS BROWN, A. M.

Instructor in English.

A. B., Radcliffe College, 1909; Boston Normal School, 1910; Assistant in Miss Spaulding's School, Newburyport, Mass., 1910-12; A. M., Columbia University, 1913; Instructor in English, Montana State College, since 1913.

Faculty—Continued

PAUL PIERRE McNEELY, A. B.

*Director of School of Music,
Teacher of Piano and Musical Theory.*

Mus. B., Washburn College, 1907; A. B., University of Kansas, 1909; Teacher of Piano, Topeka, Kans., 1909-10; Instructor of Piano and Musical Theory, Montana State College, since 1910; Director of School of Music, since 1911.

DRURY L. WEATHERHEAD, M. S.

Instructor in Chemistry and Analyst to State Board of Health.

B. S., University of Illinois, 1908; M. S., University of Illinois, 1909; United States Food and Drug Laboratory, New York, 1910-12; Instructor in Chemistry, Montana State College, since 1912; Sigma Xi; Phi Lambda Epsilon.

CARL A. GOTTSCHALCK, M. S.

Assistant in Chemistry.

B. S., Montana State College, 1909; M. S., Montana State College, 1910; Chemist for Washoe Copper Co., Storrs, Mont., 1909; Assistant in Chemistry, Montana State College, since 1909; Member, American Chemical Society.

JOHN H. HOLST.

Principal of School of Agriculture.

Hooper Institute, Clarksburg, Mo.; Principal of Hooper Institute, 1890-1900; Principal of School of Agriculture, since 1913.

GENEVIEVE LANE.

Assistant in Art.

Graduate, Cooper Union, New York City; Instructor in Art School for two years; Illustrator of Short Stories, for the Macmillan Co., 1911; Assistant in Art, Montana State College, since 1911.

Faculty—Concluded

FREDERICK W. KATELEY.

Instructor in Mechanical Engineering.

In charge of Foundry and Forge Work.

WILLIAM THOMAS HAINES, B. S.

Instructor in Electrical Engineering and Physics.

B. S., Montana State College, 1911; Instructor in Electrical Engineering, since 1911.

FRED O. JACKSON.

Instructor in Violin and Leader of Orchestra.

National Conservatory of Music, New York City, 1892-97; played in the Symphony Orchestra under Anton Dvorak, 1893-97; Symphony Orchestra, Hartford, Conn., 1904-06; Instructor in Violin and Orchestra Leader, Montana State College, since 1912.

U. HOLMES BISHOP, B. Mus.

Instructor in Voice.

B. Mus., New England Conservatory of Music, Boston, Mass., 1910; Assistant Instructor in Voice, New England Conservatory of Music, 1909-10; Instructor in Voice and Director of Glee Clubs, Montana State College, since 1911.

JUNE HARTMAN, B. S.

Assistant Piano Teacher.

B. S., Montana State College, 1910; Graduate, School of Music, 1910; Teacher of Piano, Redfield, S. D., 1910-11; Teacher, Labarthe Piano School, Chicago, Ill., 1911-13; Assistant Teacher of Piano, Montana State College, since 1913.

MRS. MARY K. WINTER.

Librarian.

GEORGE R. CALLAWAY.

Secretary.

R. O. WILSON.

Registrar.

Montana Experiment Station

STATION STAFF

F. B. LINFIELD, B. S. A., Director.
R. A. COOLEY, B. S., Entomologist.
ALFRED ATKINSON, M. S., Agronomist.
PAUL N. FLINT, B. S. A., Animal Industry.
EDMUND BURKE, B. S., Chemist.
DEANE B. SWINGLE, M. S., Botanist and Bacteriologist.
O. B. WHIPPLE, B. S., Horticulturist.
HOWARD WELCH, D. V. M., Veterinarian.
J. B. NELSON, Superintendent Dry Farm Work.
REUBEN M. PINCKNEY, A. M., Assistant Chemist.
L. F. GIESEKER, B. S., Assistant Agronomist.
W. F. SCHOPPE, B. S., Assistant Poultryman.
H. E. MORRIS, B. S., Assistant Botanist.
J. R. PARKER, B. S., Assistant Entomologist.
LYMAN G. SCHERMERHORN, B. S., Assistant Horticulturist.
R. F. MILLER, M. S. A., Assistant in Animal Industry.
H. B. BONEBRIGHT, B. S., Asst. in Agricultural Engineering.
M. L. WILSON, B. S., Assistant in Dry Farming Investigation.
*G. E. SMITH, Assistant Chemist.
E. L. CURRIER, B. S., Head of Farm Management.
E. H. RILEY, D. V. M., Veterinarian to Stallion Registration Board.

* On leave of absence.

State Food and Water Laboratory

W. M. COBLEIGH, Director and Chemist.

D. L. WEATHERHEAD, Analyst.

D. B. SWINGLE, Bacteriologist.

C. A. GOTTSCHALCK, Assistant Bacteriologist and Chemist.

State Grain Laboratory

ALFRED ATKINSON, in charge.

B. L. WHITLOCK, Superintendent.

A. E. SEAMANS, Assistant.

CLASSES

Senior Class

OFFICERS

SELMER H. SOLBERG.....	President
LEWIS L. HILL.....	Vice-President
RAUSIE ROECHER.....	Secretary
MILDRED A. ECKELS.....	Treasurer

Colors: Silver, Gray and Green.

Motto: "Yo Heave."

SELMER H. SOLBERG, Big Timber, Montana.
Electrical Engineering.

Sweet Grass County High School, '09. Reporter on Exponent (1); Alternate on Utah Debate (1); Wesleyan Debate (1); Debating Council (2, 3 and 4); Interclass debate (1); Managing and Associate Editor of Exponent (2); Student Senate (2); Secretary of Electric Club (2); Montanan Staff (3); Editor-in-Chief of Exponent (3 and 4); Vice-President of Stags (3); President of Class (4); Vice-President of Student Senate (4); Bouffons, Electric Club, Triangle X.

LEWIS L. HILL, Livingston, Montana.
Civil Engineering.

Park County High School, '09. Basketball Manager (3); Cross Country (3); Montanan Staff (3); Student Senate (3); Vice-President of Class (4); Bouffons; C. E. Society; Boosters; Stags; Triangle X.

THOMAS BUCKLEY, Manhattan, Montana.
Civil Engineering.

Gallatin County High School, '08. C. E. Society;
Boosters; Stags.

GEORGIA M. CULLUM, Helena, Montana.
Home Economics.

Preparatory Department of Montana State Normal
College, '09. Secretary of Class (1); Girl's Basket-
ball (1 and 2); Jack-O-Lanterns (2, 3 and 4);
Secretary-Treasurer of Home Economics Club (2);
Y. W. C. A. Treasurer (2); Secretary of Athletic
Association (3 and 4); Orchestra (3 and 4);
Glee Club (3 and 4); Y. W. C. A. Cabinet (3);
Home Economics Club; Does.

FREDERICK L. DISSLY, Sugar Creek, Ohio.
Agriculture.

Y. M. C. A. Cabinet (2); Student Senate (3).

INEZ EVERETT, Big Timber Montana.
Home Economics.

Sweet Grass County High School, '10. Exponent (2); Glee Club (3 and 4); Does; Home Economics Club; T 15 T Club.

WILLIAM L. HODGSKISS, Choteau, Montana.
Agriculture.

Teton County High School, '10. Football (2, 3 and 4); Treasurer of Agricultural Club (3); Agricultural Club; "M" Club; Boosters; Stags.

MILDRED A. ECKELS, Forsyth, Montana.
Home Economics.

Forsyth High School, '09. Exponent (1); Wesleyan Debate (1); Interclass Debate (1); Debating Council (2, 3 and 4); Exponent (2); Montanan Staff (3); Assistant Librarian (1, 2, 3 and 4); Home Economics Club; Does.

CHARLES L. HANSEN, Bozeman, Montana.
Agriculture.

Beaverhead County High School, '04. President of Class (1911); Secretary of Stags (1911); President of Bouffons (1912); President of Stags (1912); Secretary-Treasurer of Bouffons (1913); Stock Judging Team (1911); Bouffons; Stags; Boosters.

CLARA FLANDERS, Bozeman, Montana.
Home Economics.

Gallatin County High School, '10. Simmons College (1); Secretary of Class (2); Girls' Basketball (2); Secretary of Does (2); Secretary of Class (3); Montanan Staff (3); Student Senate (3); Secretary-Treasurer of Does (3); President of Home Economics Club (4); Student Senate (4); Keseke Club; Does; Home Economics Club.

MAX W. KENCK, Butte, Montana.
Electrical Engineering.

Butte High School, '08. University of Wisconsin (1); Treasurer of Class (2); Glee Club (2, 3 and 4); Jack-O-Lanterns (2, 3 and 4); Treasurer of Class (3); Vice-President of Electric Club (3); Track (2, 3 and 4); President of Electric Club (4); Librarian of Glee Club (4); "M" Club; Boosters; Stags.

JAMES A. KIEFER, Bozeman, Montana.
Mathematics—Physics.

Gallatin County High School, '10. Interclass
Basketball (3 and 4); Boosters; Stags.

PEARL HEIGHTON, Choteau, Montana.
Home Economics.

Teton County High School, '10. Girl's Basketball
(1 and 2); Y. W. C. A. Cabinet (2); Yell Leader
of Boosterines (4); Glee Club (3 and 4); Home
Economics Club; Boosterines; Does.

FORD B. LEINARD, Bryan, Ohio.
Agriculture.

Preparatory Department, M. S. C., '09. Y. M. C.
A. (1, 2 and 3); Boosters; Agricultural Club.

CLAUDE A. MARTIN, Stockett, Montana.
Civil Engineering.

Preparatory Department of M. S. C., '09. Band (1, 2, 3, 4 and 5); Secretary-Treasurer of C. E. Society (3); Engineer's Book Store (4 and 5); Stags; Y. M. C. A. Boosters.

ELLA M. HARMON, Bozeman, Montana.
Home Economics.

San Diego High School, '10. Vice-President of Home Economics Club (1); Y. W. C. A. Cabinet (1); Girl's Basketball (2); Jack-O-Lanterns (2 and 3); President of Home Economics Club (2); Y. W. C. A. Cabinet (2); Vice-President of Home Economics Club (3); President of Y. W. C. A. (3); Student Senate (4); Home Economics; Does.

HOMER D. MILLEGAN, Millegan, Montana.

Junior Class

OFFICERS

JOHN M. FISKE.....President
 R. LESLIE PETTIGREW.....Vice-President
 KATHLEEN WILSON.....Secretary-Treasurer

Colors: Maroon and Gray.

Motto: "Go get 'em."

JOHN M. FISKE.—The worst abused man in the junior class. Not to speak of being class president, he has to collect the money for the Montanan, sleep once in a while, sell slide rules and wonder when he is going to get his auto fixed up. John will go out in society once in a while, but is absolutely opposed to making a steady thing of it.

R. LESLIE PETTIGREW.—Pettijohn is the man that hands out the dope on college athletics, knows more about the condition of college teams than the coaches themselves, and incidentally finds time to get about sixteen credits of A grades each semester. Talks affectionately about "my wife. He—" and spreads his smile all over the campus.

TRACY ABELL.—Tracy's ambitions run chiefly to horticulture and spiritual things, a trait which is sadly lacking in most of the juniors. In between his work in the greenhouse and his Young People's meetings, he puts some study. Once put some valerianate in the drill hall but has almost outlived that adventure.

OTTO BATCH.—Runs heavy to music and literature, but could not and would not be classed as a highbrow for anything. Otto is an artist on the clarinet and when it comes to explaining why a book that was ordered a month ago has not as yet arrived, is the most plausible explainer on the hill. Otto once went fussing, but that was long ago.

ERNEST BORDER.—"Shanks" has been more than busy this year, running one of the chief banking establishments of the city and fixing up rallies before the football games. He can play any game that was ever heard of for a billiard table and in spite of the late hours that he keeps, manages to get along without any trouble from the roundups.

ALONZO DAVID BURKETT.—Spends his time at the club rooms wondering why his studies interfere with his card and pool playing. Alonzo acquired the ability to use smokeless tobacco last summer and delights in showing his prowess at its consumption. Is a shark in chemistry and can explain anything from the color of water to why lead is heavy.

HAZEL COFFEY.—A demure young lady with unbounded ability at anything. Plays in the orchestra, draws for the Montanan, and never even looks at a boy. One of the few that takes her course seriously, but in spite of that will be game for anything. Is an ardent Boosterine and even takes that seriously.

HILMER L. DAHL.—“Fat” answered an advertisement for a serviceable roommate last fall and has been in service ever since. Is so good natured that he will like his Montanan write-up, which is good nature personified. Enjoys the distinction of being the only mechanical engineer in the two upper classes. Puts in his spare time on the band.

LYNDALL P. DAVIDSON.—Lyndall entered Montana State after a scintillating career in the high school and his brilliancy has only increased during the past three years. He is actively engaged in a number of student activities and as editor of the 1915 Montanan, has made an enviable record. It is said that he can be found at the Dormitory occasionally, but aside from this indication of "mental weakness" he is perfectly normal.

VIOLA FOWLER.—"Vi" dropped back from the '14's and their loss was the juniors' gain. But do not get the idea that because Vi dropped back she had to. Not at all; she gets grades that make the average junior drop his head in shame, or perhaps lift it up in amazement. Is not a member of the fussers' club.

ALFRED M. EBERLE.—"Al" can be found on the campus at all hours of the day and night. Between his studies, his social duties, and his work at the Aggie building, he orates some, plays in the band some more, and sleeps once in a while. There was a time when Al was not a fusser, but that was before he ever came to college.

C. WILSON GRAY.—“C. Wils” has established a reputation for himself in that in three years he has never been seen fussing with a girl of any kind or description. There are others that have almost as good a record, but it is not quite as good as that of C. Wils. He spends his time in scientific research of one kind or another.

FLORENCE GRAY.—Studies mathematics, and knows more and says less about it than anyone else on the hill. Always has company when she goes home at night and when she comes to college in the morning, and always seems to be having a good time in a very quiet way. Is a good Boost-erine and can always be counted on to help.

WALTER GRIMES.—Walter is somewhat op-posed to fussing himself, quite somewhat. He carries his opposition to that form of amusement so far that certain of his friends are at times converted to his way of thinking. Walter, furthermore, doesn't believe in getting his picture taken and it is only by an extra effort that it appears here.

EDWARD JACOBS.—Is a great believer in the simple life and is never happier than when he comes home and finds that his co-bachelor has cooked an extra fine supper. Ed. likes to fuss and to work for the home science department, sometimes. The rest of his time he spends in drawing at the electric lab. Does the quarter in the spring.

GEORGIA HOLLIER.—Georgia is a very independent young lady and is strongly in favor of speaking her mind fully at all times. She is more than musical, being a member of the Glee Club, playing the drums in the orchestra and having a diploma from the school of music.

RAY S. JONES.—Jonesy is the most popular man on the hill when the freshmen are allowed to vote, that is just before some experiments are expected. He is a whiz when it comes to dramatic art and holds down the position of dramatic club president. Acts as assistant yell leader and can get a yell any time, anywhere, and from anyone.

ROBERT T. KELLEY.—Bob is the busiest man on the hill without any single exception. The word "single" is used in order that it may include those people who have no social duties. And still he has a lead on the field. Runs the Exponent, tends to the annual, gets the finest kind of grades and still has time to tell about his quitting fussing.

ANNA GOODSON.—Likes bacteriology because it is the best way that she has had in a long time for making cultures with "spuds." Blossomed out as a demonstrator during the vocational congress and made a hit as a lecturer. Sheds her smile wherever she goes and on whomever she meets. One of the most popular girls on the hill.

ELMER N. LARSON.—Elmer objects to being called "Greek" and won't say why. Is rather bashful and consequently has nothing to do with the girls, although he will talk to them at times. Is a typical civil engineer and spends his idle time in trying to find the exact height of the mountains around the city.

MARTIN E. KELLY.—“Mart” runs heavy to social stunts and does very well with them. He managed the football team last fall, and did a dandy job of it. Mart has his troubles, but they lie chiefly in the realm of mathematics. Used to go out walking, but claimed that the automobiles on the country roads spoiled the effect of a peaceable stroll.

EVELEEN KENNARD.—Yes, this is Eveleen. She is always happy except when she is deprived of her shadow, and that isn't very often. She says that she cannot imagine why people think that she has a case, and prefers to stay home from dances so that she can get her sewing done. “It must be nice.”

MORTIMER J. LOTT.—Mortimer is a rather busy man himself. He plays some basketball, does some track work and collects and pays out the money for the Exponent. The girls like to watch him play basketball because he is so good looking and does it so nicely. He is very modest and will make several remarks about this little sketch.

ROY MALSOR.—Roy is a boy with a battle scarred past. He used to be president of the Boosters, used to be in love and used to go out with the boys now and then. All that is over now. He stays home and studies, and lets the girls strictly alone, sometimes. Is plain and outspoken, but usually gets away with it.

MAE MYERS—Mae thinks that she is entitled to a nice write-up on account of some nice things that she has done for the annual staff, but it is rather hard to say anything extra nice about Mae, because she deserves all the dictionary allows anyway. Mae will go out with the boys occasionally, but her mail is discouraging to anything like a steady.

CARL F. MORGAN.—Carl is another of those industrious boys that spends his spare time in finding out the height of the hills around Bozeman. Not only that, but he gets grades that make a lot of his less fortunate brethren green with envy. Carl's red hair is a great drawing card and he can be found fussing quite frequently.

EDWARD NOBLE.—“Ed” is the boy with the nice face that captains the football team and was seen at a dance once. However, that once was long ago, and he is doing his best to live down that episode. Started out as an engineer, but came to the conclusion that a life on the farm was what suited him.

AIMEE PIEDALUE.—Says that she doesn't know exactly what course she is taking, but she seems to know what she is going to do with it, for a while at least. Is rather outspoken in some of her remarks, but that makes no difference to her friends, who are aware of her little failings. Was captain of the girls' basketball team in the far dim past.

WILLIAM E. MADDOX.—“Bill” is a star of the first water in anything that he tries, and there are very few things in any line that he hasn't tried. Bill likes to batch, but that is as far as he wants to carry single life. Never uses any language any more violent than “Dad Burn It,” and is a faithful member of the Y. M. C. A.

JOHN V. POTTER.—Used to be proud of his resemblance to the president, but has given that up since the election. Is president of the band and can tell in few words the things that the college should do for that organization. Used to have his troubles as a freshman on account of his double, but aside from that has never had a worry in his life.

FLORENCE POOL.—Has had the most varied experience of any girl on the hill, as far as classification is concerned. Started life as a dorm girl, then helped run opposition at "The Annex" last year, and is now numbered among the downtown girls. Is interested in the Y. W. C. A., the Y. M. C. A., the Exponent, and in one other.

GEORGE A. ROOSEVELT.—"Teddy" is noted as being the man who started the expression, "It must be nice—" and he has given considerable time in proving the truth of it. Teddy's long suit is in running things and that, together with his social duties and his studies, cuts in considerably on his sleep. Teddy took a long vacation just before Christmas and seemed to enjoy it.

W. HAMILTON STEEL.—“Ham” is the electrical wizard of the college. He runs the stereopticon, fixes the bells and gives lectures on wireless in his spare moments. Elects mathematics as he believes in getting all that he can out of his college course. Is kept busy with his glee club and band duties and in walking to and from town.

EMMA TAYLOR.—The only thing that she has worried about in three years is to get a good picture of herself for the annual. Progresses calmly on her way, getting her lessons and worrying about nothing. Is a good Boosterine and can always be counted on to do her share in anything. Expects to put her course to good use some day.

A. PAUL THOMPSON.—Chases news for the Exponent, coaches the under classmen in their debates, attends to the debating council, and even after caring for the Y. M. C. A. and a friend, has time to give to his studies. He ought to make a good distance man, as the time that he puts in running from the classroom to the library and back, is excellent training.

MAXWELL J. WILCOMB.—"Slim" is the captain of the basketball team and is proud of it. Ate dinner at Hamilton Hall once, but has avoided the social whirl ever since. Is a believer in "Votes for Women," and even goes so far as to wear a button, advocating that fact at times. As a result of this zeal, he isn't liable to go fussing again soon.

KATHLEEN WILSON.—Is secretary of the class and gives her minutes from her double-barreled memory. Is given to blushing, especially when her brightness is remarked upon by Prexy in the class room. Believes in getting the best grades that the teachers will give, but doesn't let that interfere with her having a good time. Is interested in the C. E's.

CHARLES A. WHIPPLE.—Chickey answered an advertisement for a sociable roommate last fall and is still in good spirits. He has more trouble with his love affairs than anyone else on the hill, but that doesn't have the effect that it has on most people. Chickey is the premier alto artist in the band and is more than proud of it.

Freshman History

The class of '17 sprang into existence at Montana State last fall, the largest and healthiest infant that has ever registered at the institution. "We should worry" seems to be the general sentiment of the class so it was at once adopted as a motto.

The first few weeks were spent in getting acquainted with the Sophs and while several of our own number were given free hair cuts, we managed to even things up with the second year men.

Our "class" began to show in the tug-of-war when we easily treated our Soph friends to a bath in the frog pond. The '17's lost the debate, but then the '16s were always noted as howlers so we did not complain.

On the gridiron and on the basketball floor the Freshman class has always been prominent. Five of our number made the college foot ball team and one played a star game at guard on the championship quintette. The class series in basketball proved "pickins" for the youngsters, as not a single defeat was registered against them.

In track, too, a number of Freshmen are assured of places which proves the all around ability of the class. "Round-ups" had little terror for our studious body and only a few faces were missing when the second semester opened.

If former performances are a criterion as to what is to follow, the class of '17 should be leaders in athletics, scholarship and student activities for several years.

E. L. C. '17.

Special Short Courses

The special short courses held at the College for the farmers of the state and those held for the home-makers were fully as successful as those of the first year which were voted ideal by those taking them.

A large attendance in all branches and increased interest marked the sessions which were held from January 21 to 29, 1914. Among the lecturers, aside from the College Faculty, were: Herbert W. Mumford, Frank A. Waugh, William Dietrich, Prof. Thomas Shaw, T. A. Hoverstad, O. C. Gregg and Mrs. Bertha Dahl Laws.

Each day of the week was devoted to some special feature of rural life, and the arrangement of the program reflected great credit upon those in charge of this work. The first day was given over to Rural organization, and was featured by the meeting of the State Grange; the second day was given over to Rural Schools, and the chief address of the day was given by C. W. Tenney, Inspector of Rural Schools for the State of Montana. Better Seed Day was given over to a discussion of ways and means of improving plants and their seeds. "Live Stock Day" followed with a number of valuable talks on the raising and care of Live Stock. Other days were "Dairy Day," "Rural Recreation" and "Country Church Day." A feature of the week was the basketball game between the College Team, Champions of the State of Montana, and the State School of Mines.

The School of Agriculture

The men taking the three-year course in agriculture are being recognized more and more as one of the real, live departments of the institution. Within the past year or two, they have effected a permanent organization, which means much to the members, and through which they are enabled to lend valuable support to the outside projects carried on by the college—notably the basketball tournament. This organization takes the form of a literary society, which meets once each week, at which time debates are held; talks are given by members of the club and by outsiders.

This year for the first time the College Faculty has one man who devotes his entire time to building up the short course in agriculture, and though he has been here but a short time, a notable advance has been made. The three men who graduated from the course this year—Allphin, Higgins and Carpenter, have already secured responsible positions in their line of work for next year; and Lindsay, who has completed the three years' work has accepted a position with the Holt Manufacturing Co.

The members of the department carry on various activities. Each spring a stock judging contest is held, in which the winner is awarded a substantial prize. Athletics receive their share of attention; it was impossible to stage the annual football game this year, but a basketball game was held with the preparatory department, in which the agricultural students came out victorious. At regular intervals during the year, dances are held in conjunction with the preparatory department, which are well attended and greatly enjoyed.

BOOK III

ORGANIZATIONS

The Student Senate

Reorganized in the fall to fill the need for some student government, the student senate has accomplished in every way all that was expected of it. A number of problems have been solved by its action and the general tone of student government improved beyond all expectations.

The 1915 Montanan

STAFF

LYNDALL P. DAVIDSON
GEORGE A. ROOSEVELT
ROBERT T. KELLEY
JOHN M. FISKE

First appearing as the "Blue and Gold" in 1907, the Junior Annual of Montana State College, has come to be one of the most important student activities on the hill. Time, money, and especially work and worry are contributed by the members of the junior class each year until another volume has been disposed of and the bills for it paid.

As stated above, the first annual appeared as the "Blue and Gold" in 1907. The year following the name was changed to "Montanian," which was changed the following year to "Montanan," the name which it now bears. Always improving and growing, it has come to take its place with publications of like nature in a manner reflecting credit both on the school and the class under whose direction it is issued.

The editors of the different volumes have been: James A. Peterson, Orville S. Peters, Eugene C. Quaw, Elmer J. Williams, Charles H. Draper, J. Frank McGuire and Wm. B. Vestal, Jr.

The general purpose of the book is too well known to need mention here. The recording of the events of the college year, together with a pictorial record has come to be a necessity in college life. These two features, together with a glimpse of the lighter side of college life, make up the essence of the junior annual.

The Staff also wishes to thank those whose aid has made this volume of the Montanan whatever success the reader considers it. Especially to Miss Baldwin and Miss Lane of the Art Department, to Hazel Coffey, Arthur E. Seamans and B. W. Whitlock, March Merigold, Max W. Kenck and Tracy H. Abell are given thanks for valuable and helpful work due.

The Band

Organized in 1907, the State College Regimental Band under the leadership of Louis Howard has been one of the most prominent student organizations on the hill. The first years of existence were made prominent by the fact that each year it made a tour of the state—playing before the principal high schools. Reasons of one kind or another have made this annual tour impossible for the past two years, but all indications point toward the fact that it will be resumed again in 1914.

However, in the past year the College Band has made two short trips, when it accompanied the College Basketball team to Helena for the championship game a year ago, and when it accompanied the football team to Missoula last fall. Some sacrifice on both these trips was necessary by members of the band, and the fact that they were willing to make these trips, speaks volumes for their worth as a College organization.

A feature that has been introduced in recent years is that of having several people who have not as yet entered College play with the Band, in order that graduation will not seriously affect the efficiency of the organization.

The Orchestra

The College Orchestra was organized only two years ago, and since that time has been one of the most prominent of the musical organizations at the College. It has at present a membership of 19, composed of both Faculty members and students. Prof. F. O. Jackson, the leader, has had a vast amount of experience in this line of work, and in practically no time, developed an orchestra of an extremely high grade. With two regular practices a week, they are ready at all times to appear in public, and have been called upon on a variety of occasions during the past year.

In addition to their assembly appearances and on other occasions, at which times they have rendered a high grade of classical music, they have an extensive repertoire of dance music, and have furnished the music for a large number of the College dances in the past.

Those who were instrumental in getting the College Orchestra started are to be congratulated, as is their leader, for having developed a high-class organization in an extremely short time.

The Men's Glee Club

The Men's Glee Club, though it is one of the comparatively new organizations on the hill, is one of the most prominent. It was organized in the fall of 1911, by Prof. U. H. Bishop, the present Director. Each year the Club has made several public appearances, and they have always met with the favor of the audiences.

The Club has been greatly handicapped this year by an apparent scarcity of good material, but they have held practices regularly twice a week, and it is their intention to give a concert, together with the Ladies' Club, late in the spring.

It is the aim of those interested in the Glee Club to gradually raise the work to a higher standard; to develop more material, and within a very few years, to develop a Club which will rank well with similar organizations in other Colleges, and to take a somewhat extended trip over the state every year.

Ninety-one

The Ladies' Glee Club

PROF. U. H. BISHOP, Director

Georgia Hollier
Lillian Shepherd
Kate Wilson

Second Sopranos:

Inez Everett
Cecil Walker
Madge Switzer
Grace Wilcomb
Lillian Axtell

Second Altos

Pearl Heighton
Helen Spain
Adelaide Stanley
Marsa Riddell

Accompanist:

Maud Alexander

The Ladies' Glee Club

The Ladies' Glee Club is also a comparatively new organization, but during its short existence, has reached a high degree of excellence. It is an outgrowth of the Hamilton Singing Society, and at present has a membership of twenty. The Ladies' Club has been more fortunate than the men's, in that they have had a greater amount of material to work with, and as a result have been doing finished work during the entire year. They have appeared on various special occasions, and are looking forward to giving a concert in the spring.

The two Clubs carry on their business as one body, and the officers are elected from either Club.

Prof. Bishop deserves a large amount of credit for his work with both Clubs, as each individual member has received a large amount of valuable training, and the organizations have satisfied a long-felt want in the Institution.

	Mrs. Una B. Herrick

The Jack O'Lanterns

The Dramatic Club or the Jack O'Lanterns, was organized in the fall of 1911. Most of the members had been in the staff of the "College Widow," which was presented the spring before under the auspices of the class of 1912. Mrs. Una B. Herrick, dean of women, had coached this play and seeing that there was need of some such organization at the College, suggested the formation of some such club.

Its first production was "The Rivals," which was followed in the spring of the same year by "The Final Word." Three plays were presented last year: "Lend Me Five Shillings," "The Faraway Princess" and "My Lord in Livery," in addition to the big play of the year, "The Professor's Malady."

This year the Club presented Howell's "Sleeping Car Farce," as an assembly program and shortly after that begun work on "Fanny and the Servant Problem," which is to be presented at the opera house in conjunction with the Orchestra.

Some of the most prominent results of the work of the Jack O'Lanterns are the benches that stand at different places on the campus as their memorials.

The Booster Club

Organized in 1909, the Booster Club since its inception has been one of the most, if not the most active organization on the hill. Cheering sections have been organized; work on the Athletic Field was commenced; better feeling between College teams and teams from other Institutions has been promoted, and in a large part, the annual Basketball Tournament was the result of work by the Boosters, though the idea for the Tournament originated with the Faculty. It appeared almost impossible to raise the necessary funds, and the Boosters stepped in; canvassed the town, and by raising money and arousing interest, made the event possible. The Boosters have been the general body before which all questions concerning the College as a whole have been brought. It is the one organization where all the male students of the College can get together to boost the Institution, no matter whether they are Engineers or Aggies or what-not, as long as they are four-year men. In earlier years, it was the custom to elect officers from the two upper classes, but the idea of giving the Freshmen and Sophomores more influence has grown from year to year until now the President and Vice-President are chosen from the two lower classes.

Among the most prominent activities with which the Boosters have concerned themselves this year, have been the Tournament, Feeds for the Football men, and promotion of interest in College Athletics.

The Boosterines

After the organization of the Boosters, it was apparent among the women of the institution, that some like organization was needed among them, and to fill this need, the Boosterines was organized. Appearing at Football games in all sorts and conditions of weather, cheering the Blue and Gold on to victory, or consoling them in defeat, they have been an ever present help to College Athletics.

In the different Basketball tournaments, the Boosterines have always done their share. The first year they gave a luncheon, each of the three days, to the visitors. While in later years this has been impossible, nevertheless they have done all that was possible to aid in the success of this event, and their efforts have been greatly appreciated.

They have conducted correspondence with high school graduates with a view of securing their attendance at Montana State, and so to the Boosterines, in no small measure, can be attributed the ever growing attendance at the College.

Civil Engineering Society

Organized in 1908 with a charter membership of thirty, the Civil Engineering Society has held since its organization a prominent place in the activities on the hill. Each year it has worked along engineering lines, to show the undergraduates what may lie ahead of them in their chosen profession. Talks and papers by prominent Alumni and members of the Faculty, have helped in this work.

In 1911 and 1912, the Society published an Engineering Journal, but owing to the expense and the difficulty attending such an enterprise, it has been abandoned the past two years. Roy B. Williams, of the class of '11 was the first editor—the other being issued by Harold E. Wolpert, '12.

Under the leadership of an enterprising set of officers, the Club this year has taken on new life, and a greater interest in Civil Engineering topics has been shown at each of the many meetings.

The Electric Club

The Electric Club was organized in 1907, and at the same time a Student Branch of the American Institute of Electrical Engineers was instituted at the College. All students registered in Electrical Engineering were made members of the Electric Club, and in addition those who cared to do so, joined the Student Branch of the American Institute of Electrical Engineers. The total membership the first year was 35.

As with the other Department Societies, the aim of these organizations is to promote interest in this particular branch of the Engineering profession. The meetings this year have been full of interest—prominent men in the profession giving talks and demonstrations, which were well received by their eager listeners. A pleasant feature of the year's work is the annual entertainment given the members of the Club by Professor Thaler, at his home.

In past years it was customary for the Club to give an Electric Show, but last year this was done away with, and instead an Assembly Program was given. This innovation proved very successful, and will be repeated again this year.

The Agricultural Club

Composed at first of short-course men, as well as regular four-year Agricultural students, the Agricultural Club in its early days had more or less of a vague existence. However, in 1910, it was decided to restrict the membership to four-year College men only, and with this move the Club took on new life. Regular meetings were held—talks by prominent Agriculturists and members of the Agricultural Faculty were given at these meetings, and an awakened interest was everywhere manifest. At the same time the Society organized a book store, which retails books and supplies—the profits of which are distributed among the stockholders of the enterprise.

Home Economics Club

Reorganized in 1910, the Home Economics Club has been one of the most active Department Organizations on the hill. Centering its social activities on the Joint Party with the Aggie Club, it has made this event one to be looked forward to each year. Membership since reorganization is limited to girls taking the four-year College course.

Meetings of the Club have been held every two weeks, at which prominent members of the Faculty and those whose work is along Home Science lines have addressed the Club on different subjects.

HANDICRAFT CLUB

The Handicraft Club

Feeling that more interest should be shown in the line of handicraft work, the Handicraft Club was organized last fall to correct this deficiency. A meeting of all the women of the College and town that were interested in this line of work was called, and as a sequel to the meeting, a constitution and by-laws were adopted.

The aim of the Club is to keep up the interest in handicraft and crafts and this is held to strictly. Work along this line is done at the meetings, which are held at the College Art Department rooms, every two weeks.

The membership is limited to those who are taking or have taken courses in crafts at the College. The work in these courses is compulsory, but at the meetings, work on original designs is done, either for the maker or for sale.

The Stags

OFFICERS

C. ALONZO TRUITT.....President
GEORGE A. ROOSEVELT.....Vice-President
LYNDALL P. DAVIDSON.....Secretary
RAY S. JONES.....Treasurer

Organized in 1904, by a crowd of disgruntled students, the Stags has come to be the great means of celebrating the passing of examination week and each year about a hundred of the men gather in one of the halls down-town to initiate the freshmen and then enjoy a big feed and program.

The 1914 session was one of the best that has ever been held, and the interest and activity shown at the meetings hold forth great promise of better things in years to come.

The Does

Not to be outdone by their brethren in the way of celebrating the passing of the examination season, the girls of the College organized in 1909, the Does. Each year the regular four-year girls are compelled to undergo tortures weird and fearful and after the fearful ordeal has been gone through with, stunts are given by each class.

The first two Doe parties were given at the homes of members, but after a year at Hamilton Hall, and one in the Home Science rooms, the rooms of the College Union were selected as the best place to hold the meetings and it is there that the past two sessions have been held.

The "M" Club

The "M" Club, an honorary club for those who have won their letter on a college athletic team, was organized in the fall of 1912. At the close of each athletic season a feed is held and the new members elected. At this time the events of the past season are talked over and humorous stories on the various members are always an important feature. At this time too, plans are made for the coming year in football, track or basketball. While organized primarily as a social organization, the club exerts a noticeable influence on athletics of the college. While practically in its infancy, the club already has attained prominence and even greater success awaits it in the future.

One Hundred Thirty-five

EDWARD
G. NOBLE

Football Captain

After two years of sterling work on the line Noble was elected captain of the 1913 eleven. Words fail to express his worth. He was one of the best captains that ever wore the blue and gold. He was re-elected for 1914.

MAXWELL
J. WILCOMB

Basketball Captain

Montana State enjoyed a glorious year under the leadership of the elongated center and as a fitting tribute both to his ability as a player and a captain he was again chosen to lead the Montana State quintette.

One Hundred Thirty-seven

F. WILBUR
SCHUMACHER

Track Captain

A grand little man on the cinders himself and an ideal leader sums up the characteristics of the track captain. He is a constant winner of points himself and no man can watch him run a race without getting out and fighting until he drops on the track.

One Hundred Thirty-nine

EUGENE F. BUNKER
Football Coach

"Bunk" learned football at Wisconsin, where he played halfback on the varsity eleven and he learned it in such a manner that he was able to teach it to a squad that had never seen a "pig skin" before. Coach Bunker worked hard with the eleven last fall and tried hard to instill enough fight and pep into the team to win games. While he was rather firm in his handling of the men—as all those who participated in the first practice after the Missoula defeat can testify—he never lost their confidence and no squad ever worked more willingly than they did for him. Another year with the team and the effects of his coaching would undoubtedly show more prominently than they did during the past season.

One Hundred Forty-one

One Hundred Forty-two

EDWARD G. NOBLE, Captain and Right Tackle.

With several teeth missing from a furious campaign in 1912, but still wearing a golden smile, Ed Noble returned to school last fall to assume the duties of a captain. It is doubtful if a more popular man ever captained a Montana State team and the esteem in which he was held by his fellow players cannot be adequately expressed in a few short sentences. The same spirit of aggressiveness that characterized his work during the two preceding years was again evident last fall. Capt. Noble will always be looked upon as one of the best men that ever wore a blue and gold uniform.

JOHN GARVIN, Left Guard.

"Little Eva" with his two hundred pounds of avoirdupois and a year's preparation with the Methodists, arrived at Montana State last fall and soon anchored onto a job as guard. His weight alone tells something of his caliber as a player, but coupled with his ability to do a hundred yards nearly as fast as a back and a spirit that would rather die than give an inch to an enemy, Johnny's first year's work was surprising, during the next three he ought to land a place on the all-American.

WILLIAM HEAGNEY, Right End.

Bill's playing last fall was, if anything, better than his work in 1912. His most noticeable improvement was in the handling of the forward pass. He had a knack of getting away from opposing players on this play and with a clear field ahead of him and the ball tucked safely under his arm he registered many of the Blue and Gold's longest gains. In the last game of the season Bill injured his shoulder. This did not dampen his enthusiasm for the game and he can be depended upon when the next call is issued for candidates.

CYRUS GATTON, Halfback.

Cy is one of those natural football players that would rather run back punts and tackle the "dummy" for two hours every afternoon than go to a Terpsichorean dance. Even that alone tells his caliber as a gridiron warrior. Cy landed a job at halfback on the 1913 eleven and his work through the season was all that could be desired. When carrying the ball he was one of the hardest men on the team to stop and his defensive playing was on a par with any of the other backs. The spirit Cy possesses alone wins football games and it is such men as he that Montana State needs on its teams.

C. ALONZO TRUITT, Center.

After a year of idleness, "Tubs" came back last fall, won a position, and undoubtedly handled the ball more than any other one man on the team. He played center. As kingpin of the line "Tubs" played a good, consistent, steady game. His aggressiveness enabled him to handle an opponent much larger than himself and he proved himself a capable man in passing the ball. "Tubs" is another regular who should play a whirlwind game next fall.

One Hundred Forty-four

LEWIS JOLLEY, Halfback.

Jolley came to Montana State with a reputation. As a rule reputations are hard things to live down, but Jolley delivered the goods in such a manner that everyone forgot that he had a reputation behind him. As a back field man his chief asset is speed. His ability to gain ground on short end runs was always a menace to opposing ends. Jolley is another man who should have little trouble in acquiring a regular berth next fall.

V. S. CONNOR, Halfback.

Pug had the misfortune of hurting his knee during the early part of the season, consequently was kept out of some of the more important games. When given a chance, however, he showed flashes of that same driving power that characterized his work in 1912. Pug runs low and hits hard, which earns the respect of those who tackle him. Barring another injury he should occupy a regular berth next season.

ALBERT OSENBRUG, Left End.

Few men have ever been able to play a stellar game at guard one season and repeat the performance while playing end during another year. This feat, however, was accomplished by "Mike" Osenbrug and in neither instance has his work suffered. Mike was out for his old position at guard last fall, but was soon transferred to end by Coach Bunker. Mike is above anything else a defensive player and his work as guardian of the left end showed most brilliantly in this respect. No telling what position Mike will try for next year, but it is safe to say versatility makes him capable of playing almost any position.

GENE STREET, Halfback.

After finishing a season with the champion Gallatin eleven Gene registered at Montana State last fall and was soon assigned to a regular back position. He has everything that a back field man should have; strength, speed, and on the defensive was invaluable in breaking up the dangerous forward pass. In the Utah game Gene earned the title of a "mudder" by his consistent gains on a field that was ankle deep with mud. Street is another man whose work will be watched with interest when another moleskin season rolls around.

RADFORD TAYLOR, Left Tackle.

"Punk" is another product of the Gallatin Valley that came to Montana State last fall. He easily landed a position on the line and played a strong, steady, consistent game through the season. "Punk" always plays good football, but on one or two occasions nothing seemed to be able to stop him; he tackled runners behind their own line, blocked punts and generally played a stellar game. It later became known that "Punk" was financially interested in these games. However, at any time he always played a wonderful game and should prove a bulwark in Montana State's line during the next three years.

MYRON L. CARR, Fullback.

Carr earned the reputation of being one of the hardest hitting backs in the state in 1912, and his work last fall fully demonstrated his ability to plough through the line for the necessary yardage. The "Chief" showed more brilliantly during the past season by his defensive playing. Time and again he prevented serious gains by opposing runners by his savage tackling just as they were breaking through the line. A rare combination of speed and weight makes him an ideal man for his position and Montana State can well expect even greater deeds of the "Chief" in the next two years.

WALTER GRIMES, Quarterback.

Smallest in body, but biggest in nerve are the characteristics of Grimes on the 1913 gridiron. As a field general Walt was not excelled in Montana. He was quick to grasp an enemy's weaknesses and his own plays were selected with care and judgment. Although somewhat weak in advancing the ball himself, he overbalanced this inability by his clever manipulation of the forward pass. As a safety man he seldom missed the most difficult punts and no runner ever escaped his tackle. "Speck" has the caliber that makes championship teams.

WALLACE WALTERMIRE, End.

Waltermire was, perhaps, the fastest man on the team and this speed, together with a bulldog determination, helped him where his weight was a handicap. Like Cotner, his work with the forward pass was his long suit, and a gain was almost certain when he was on the receiving end.

VICTOR COTNER, End.

"Vic" was a comer in the game until some broken ribs and a fractured arm put him out of the running. His work with the forward pass was almost phenomenal, and whenever he made the pass or caught it, a gain was certain. With better luck he will be a find in 1914.

WILLIAM HODGSKISS, Guard.

Playing his second year as a regular, "Bill" showed decided improvement in his attack and defensive playing. His weight enabled him to care for the majority of his opponents. Bill leaves school this year and a hole in the line will have to be plugged when another season rolls around.

One Hundred Forty-eight

EVERETT McSPADDEN, Center.

Mac received his preliminary training on the Missoula High eleven and made a strong bid for the center position in the line last fall. His weight told against him, however, and consequently he was unable to get into all of the games. Mac is a natural football player and in another year should make the regulars hustle to hold their jobs.

JAMES KRUMM, End.

When Jim really wanted to get in and play there was not a better man on the squad. He had a habit, however, of loafing on the job at times, which prevented him from landing a regular berth. Although a little weak in breaking interference on the defense, Jim played a good offensive game. He handled the forward pass well and hustled the safety man on punts. His work will be missed next season.

GEORGE COOLEY.

Although his first acquaintance with the moleskin, George made a decided impression by his playing during the past season. Although a little slow for a back, it seemed impossible to stop him when he once was under way. His work will be watched when another call for the gridiron squad is issued.

MAXWELL WILCOMB.

Max did not get out until late in the season, but he showed enough in that short time to land a position on the first squad. Slim was in the game all the time and with another year's experience should make a good line man.

WILLIAM MADDOX, Halfback.

After Bill's phenomenal work as back in 1912, a banner season was predicted for him last fall. In one of the first practice games, however, Bill hurt his leg and for a time was confined to the hospital with his injury. He was unable to enter any of the important games of the year and his loss was keenly felt. Barring another accident, he should make a strong bid for his old position next fall.

ALBION JOHNSON, Guard.

In competition with some of the line material last fall Johnson had a hard fight and that he did not make the first team is no disparagement of his ability. With his weight and natural football ability he should profit by a year's experience to such an extent that the team in 1914 will be blessed by his presence.

GEORGE MILBURN, Halfback.

Jack has plenty of the fighting spirit necessary to make a football player, but lacks the experience to land a job on the first team. He is a clean, aggressive player and is a hard man to stop. He should make a strong bid for a first team position next year.

WILLIAM FLUHR, End.

Although Bill did not make the first team he aided materially in turning out some good ends. He tried all the time and in another year should make the regulars hustle.

ADOLPH SCHATTENBURG, Guard.

"Aggie Goo-Goo" had the necessary beef to make a football player and tried hard whenever given a chance. With a few more years' experience he should make a strong bid for first team honors.

One Hundred Fifty-one

Review of the Season

After the disastrous campaign of 1912 the football season opened last fall with prospects that were none too bright. However, with Bunker on the job and four of the championship Gallatin team in school and eight of the veterans back on the job, it was not long before the student body was congratulating each other over the winning of a championship.

The first couple of weeks put Maddox and Connor out of the running; the former with a bad leg, which prevented him from playing during the entire season and the latter with a bad knee kept him from playing his best game. Capable substitutes were available for these backs and still the championship seemed within easy reach.

The first game was played against the Anaconda Independents and the Blue and Gold fairly walked over the visitors to the tune of 32 to 6. This showing seemed to confirm the opinion of those who imagined the pennant was already hanging from the top of the flag pole and the season continued with no further injuries to the team.

The Utah "Aggies" were the next victims. On a field that was ankle deep in mud, Montana State's warriors trounced the Mormons, the score standing 13 to 0 when time was called. Confidence reigned supreme from then on and even the members of the team caught the "bug" and when it was mentioned that the Missoula aggregation was yet to be dealt with they scoffed at the idea and continued on with their signals.

One Hundred Fifty-three

At last the fatal day arrived and just how it happened no one knows, but when the smoke cleared away the College of Missoula emerged victorious by a score of 7 to 0.

The majority of the boosters joined the "I-told-you-so" crowd after this disastrous and disgraceful defeat and Coach Bunker passed around a football to the team so that they might familiarize themselves with its appearance and he then explained thoroughly, with ample illustrations, both with his hands and feet, the object of the game.

Two weeks later the crew journeyed to the land of the Flatheads and while every man was scared to death before the game started, they did manage to keep the Missoulians from making only twenty points, while they were again let down with a goose egg. This closed the 1913 season and the players returned home to again tell how it happened.

Nearly every man of the 1913 squad will again be back in school next fall and under the leadership of Captain Noble, Montana State should have a good team. One thing is certain, however, they must learn a lesson from the basketball five and that is, WIN THE GAME, EVEN THOUGH THEY ARE DEFEATED IN THE FIRST HALF!

One Hundred Fifty-seven

One Hundred Fifty-eight

Basketball Coach and Team

The basketball season opened with four of the members of the 1912 championship team in school and "Sliker" Rice on the job to grab the vacant position at guard. The five got along fairly well under the direction of Captain Wilcomb, but still a coach was needed to bolster up the weak places.

Immediately after the Christmas holidays Joe L. Markham, Captain of the famous Triple B's. was secured to coach the quintette. He arrived scarcely more than a week before the first game with the College of Missoula and in that short period worked wonders with the team. His proteges gave indications of becoming first-class basketball shooters in this contest, while the Flatheads watched the register roll up a score of 31 to 23 against them.

Markham had little opportunity to teach the quintet much basketball on the trip through Utah and the team was defeated in all of the games played, although they made a good showing at all times.

Arriving home he went to work in earnest and the brand of basketball that he instilled into the team made itself evident in the two Gonzaga contests. The season closed with the second annual spanking of the Missoula team.

Too much cannot be said of the ability of Markham as a coach. He had complete confidence of every man on the squad and every man worked, and worked hard, for him. His work during the basketball tournament also demonstrated his ability as an official, as he gave complete satisfaction in every game. Montana State was fortunate in securing such a man as Joseph L. Markham to coach its basketball team.

HUBERT RICE, Guard.

Although picked as an all-state scholastic center, "Slicker" decided to play guard last season and immediately began to look for a job. He did not have to look very long, however, for he soon landed a place on the five. The scoring column speak for his work against opposing forwards, while a glance at his own figures shows that he pushed some of the forwards to retain the high scoring honors. His floor work was excellent and his passing was probably more accurate than any man on the team. "Slicker" is another veteran who will seek new laurels for Montana State next season.

MORTIMER J. LOTT, Forward.

With one year's experience as substitute forward on the 1913 quint, Mort came back last season and won a regular berth. While not as consistent a basket shooter as Cotner he could be depended upon at any time. His floor work was the noticeable feature of his playing. He covered the whole floor, passed and handled the ball well and fitted into the team work like one part of a well oiled machine. He also guarded his man well and held some of the best guards in the state down without a basket. Lott is another man who should have little trouble in making the five next year.

WILLIAM MADDUX, Guard.

Although injuries kept him out of football most of the season, Bill regained his strength in time to land his old job as guard. Bill believes it is nothing short of a sin to allow an opposing forward a basket, or even a free throw at the netting, and be it said in his favor that he committed few sins during the year. Besides his wonderful work at guard he entered well into the team work of the five and on a few occasions took it upon himself to enter the Blue and Gold scoring column. Bill's work during the past season stamps him as one of the best guards that ever represented the College.

MAXWELL WILCOMB, Captain.

After playing two years at center on the College five "Slim" came back last season and was even better than during the preceding years. His extreme height gave him the "tap" against nearly every center he played, which enabled the College team work to start with a jump. Besides getting away good on signal plays Slim guarded his man like a fiend and every basket made against him was surely earned. Max was re-elected to captain of the 1915 quintette, which insures a capable, energetic, hard-working player to again guide the formations of Montana State on the basketball floor.

VICTOR COTNER, Forward.

When the season's totals were counted up this wiry forward led the Blue and Gold basket tossers. And this does not half tell the story. His floor work during the season was sensational at times and his ability to throw baskets from any position made him a terror to any guard. On the foul line he also added many a point to the Montana score. Besides playing on the team Vic also acted as manager and due to his efforts an excellent schedule of games was arranged. With another year's experience behind him he should be a whirlwind on the floor next year.

HOWARD SEAMANS, Substitute.

Hod jumped in to fill a vacancy at forward in the Mines game and his work in that contest showed that he knew basketball. Although the smallest man on the team, his speed made up for his lack of avoirdupois and with an open shot at the netting two points were invariably added to the College score. In another year Hod should push the regulars for a place on the team.

Basketball Season

The basketball season opened at Montana State last fall with four of the 1913 champions back on the job. Cotner and Lott were again out for the forward positions, Wilcomb at center and Maddox at guard, leaving only Hodgskiss' place to be filled. Thirty men turned out for the first practice, and after three weeks of preliminary work under the direction of Captain Wilcomb, Rice, a former high school star, was chosen for the other guard position.

The first games were played during the Christmas holidays at Billings, where the College participated in a tournament held there. Four games were played with the Billings and Joliet fives and the college emerged with a clean slate and the championship of southern Montana. The first game on the home floor was played with an independent five from Three Forks and the score keeper wore his pencil out tallying the baskets made by the Blue and Gold. The final count being 83 to 25.

About the middle of January Joe L. Markham was secured to coach the team and from then on wonderful improvement was noticeable, both in team play and basket shooting. With Cotner out of the game, the Mines arrived for the first collegiate game played on the College floor. Due to the excellent team work and guarding the College five was never in danger and when time was called the score stood 43 to 12 against the Miners.

A week later the Missoulians were given a glimpse of real basketball on their own floor and the college trimmed them to the tune of 31 to 23. A trip into Utah followed. The Utah Aggies, University of Utah, Latter Day Saints University and Brigham Young University were played during the trip. Due to long jumps on the railroad and late hours and injuries to Wilcomb and Cotner, the team could not get going and the five was defeated in every game.

A great deal of basketball was learned however, and on their return home this new knowledge became noticeable in the passing of the ball and in the general work of the team.

The Gonzaga University, considered to be one of the strongest five in the Northwest by virtue of their victories over such teams as the University of Idaho, Washington State and Oregon, were secured for two games. To the surprise of the visitors the College completely out-classed them in the first game and won by a score of 29 to 16. The second game was won by Gonzaga by a score of 25 to 21. The college led in this contest to within three minutes of the end, when a foul and two baskets in quick succession by the visitors won the battle. In regard to this game it might be said that the team work of the college was slowed up considerably, due to the number of fouls that were called. In all fifty-one free throws were granted, which indicate that a large part of the time was consumed in throwing fouls which seriously injured the college team work. A week later the final game of the season was played against Missoula and, as expected, the college retained the championship by defeating the Classics in a listless game by a score of 39 to 25.

One noticeable fact about the College five this year is that they displayed a fighting spirit that every other team in the college would do well to follow. In several of the games they were almost out of the running at the end of the first half, but they came back with a vengeance and in a whirlwind finish nosed out their opponents. Every man on the five will be back in school next season, and barring unforeseen accidents, Montana State should again have "easy pickings" for the championship.

One Hundred Sixty-three

One Hundred Sixty-four

Interclass Games

As was customary in former years the interclass basketball games were played during the early part of February. Owing to the large number that had turned out for the College team, indications pointed to a better class basketball than is usually played in a class series. Each class had every available man out trying for positions and one or two classes employed a coach. A series of three games was arranged and the championship was determined on the percentage basis.

The first two games were played between the Freshmen and Juniors and the Sophomores and Seniors, the two lower classes coming out on top in both contests. The Freshmen won 17 to 11, while the Soph-Senior score was 15 to 11.

The Freshmen and Seniors and Sophomores and Juniors played the second game and again the lower classes won by practically the same margin as they did in the first contests.

The third game of the series was played between the Freshmen and Sophomores and Juniors and Seniors. Upon the outcome of this contest hung the championship. The Freshmen showed better form in every department of the game and had little difficulty in defeating the second-year men by a score of 32 to 14. At the same time the Juniors claimed the cellar championship by losing to the Seniors to the tune of 20 to 8. Cook and Jorgenson played forward for the champs; Street, center, and Gatton, Potter and Bunnell, guards.

Dual Track Meet

University of Montana vs. M. S. C.

MAY 14, 1913. COLLEGE FIELD

Meeting for the first time on the College field, the University Track Team and the College Track Team contested for supremacy on the cinders on May 14, the University winning, 71 to 55. While the College lost fairly and squarely, there was always a chance until the half-mile run that the Blue and Gold might emerge victors, but the might of the Varsity runners proved the undoing of the college team and the advantage that she held in field events was overcome by the supremacy of the Varsity on the track.

The team went into the contest with a fighting spirit and with the knowledge that two certain point winners had left school. Fighting for every point, they gave a display of grit and determination that caused the victors to say in admiration, "You gave us a hard run."

"M" Men in Track

F. WILBUR SCHUMACHER.

After a heart-breaking finish in the mile, in which he was just nosed out of the victory, "Cap" ran the Varsity two-milers off their feet, winning with yards to spare. Faithful in training and a splendid example to his men, he well merited his re-election as captain for 1914.

MAX W. KENCK.

Winner of the high hurdles in 1912, Kenck annexed the low as well last spring, which, together with a stray point in the hundred gave him a good total of points. Willing to do his utmost and with his natural ability, he is one of the valuable men of the track team.

R. ALDEN WEBSTER.

After placing for two years in his event, "Web" came back strong last year and won the pole vault in impressive style. He began working in the fall for the event again and has great hopes for 1914.

WM. L. HODGSKISS.

Placing second in both the hammer and the shot, Bill won his track letter last spring. Doing his best in training and in the final work, he made the winners of both events extend themselves.

WM. B. VESTAL.

While not appearing on the cinders in 1913, Vestal won his letter the year previous in the low hurdles. It is to be regretted that business called him away before the meet in the spring and here's hoping that he will be on the start once more this spring.

MAXWELL J. WILCOMB.

Laboring under the difficulty of having won his letter in his Freshman year, "Slim" fared rather badly last spring. He annexed a place in the mile run, but in his own event, the discus, he was out of luck, placing third. A better record is looked for in 1914.

Interclass Track Meet

MAY 7, 1913

Extemporaneous Speaking Contest

First Place—Lee Park.....Gallatin County High School
Second Place—Miss Hazel Baird.....Stevensville High School
Third Place—Miss Margaret Miller.....Flathead High School

THE CONTESTANTS

LEE PARK, Gallatin County.

“The possibility of foreign warfare is too remote to justify the agitation that is maintained by politicians and the public press.”

EDGAR GUTHARD, Billings.

“The United States should take immediate steps toward improving conditions of life in the American army.”

STEPHEN C. PIERCE, Park County.

“The Federal Government should aid in building and maintaining good roads.”

MISS MARGARET MILLER, Flathead County.

“America’s welfare does not demand that the Monroe doctrine should be abandoned in the near future.”

MISS HAZEL BAIRD, Stevensville.

“America’s policy with regard to the appointment and maintenance of her foreign representatives should be revised immediately.”

SCOTT MURPHY, Missoula.

“The Alaskan railway should be built with public money.”

MISS FAY FAIRCHILD, Broadwater County.

“The Federal Government should co-operate with the state in lessening the evil of the unemployed.”

FRANK BOWMAN, Carbon County.

“Manual training should be offered in every high school of the state.”

One Hundred Ninety-nine

Janitor Engineering

This course is designed to fit the student for a practice in Janitor Engineering. The courses for the freshman year are arranged with an idea of giving the first-year student an insight into the work of the coming year. The courses taken together with a short description of each one follows:

Janitor Engineering 1. A five-hour course, designed to teach the elementary principles of sweeping and the art of covering as little ground in as much time as possible. Lectures by Prof. Fluhr.

Janitor Engineering 2. A five-hour course in general cleaning, designed to increase the efficiency of the student at the expense of the time slip. Not given except in conjunction with Math. 19.

Janitor Engineering 3. Stove and blackboard cleaning, designed for use in institutions where a quantity of blackboard work is given and where Home Science is taught.

Janitor Engineering 4. A course in window-washing. This course is briefer than the other Janitor Engineering courses, as less is done in this line: Lectures by Dean Johnson.

Sanitation 4. A course designed to give the rudiments of janitorial sanitation. Laboratory in charge of Asst. Prof. McSpadden.

Textiles 3. A two-credit course in toweling and mop-rag materials. Dust cloths are also discussed. The four courses in Mathematics are given with regard to the practical side of the work. The names are self-explanatory, except the last one. This course is designed to show how the time slip can be made to check with the current expenses.

Psychology 4. Is given with an aim toward teaching the art of keeping the employer pacified. Instruction in working only at the psychological moment is also given.

Junior and Senior Years to be arranged

Extracts From An Agronomy Lecture Note-Book

I am returning your quiz papers to you this morning, and on the whole the papers are not as good as they should be. Now, the object of a quiz is two-fold: First, to see if you are getting the work; and second, to see if I am giving it right. And I find that in a number of cases, I am going too fast. You see I am accustomed to lecturing to juniors and seniors, and I find that I am going into the subject a little too deep for you "fellers." I find, too, that there is a great co-relation between your quiz papers and the notes you take in class. Now "co-relation" is a word that we have not taken up in this class before, but what I mean by it is, that those who are keeping the best notes are getting the best grades, and vice-versa.

Now, in studying the crops of the United States, we are going to take it up by geographical divisions, just as you did when studying geography, viz: North Atlantic states, South Atlantic states, etc. Now, I presume those names don't mean much to you, but when you have travelled over the country, "as I have," these terms will have a great significance.

I might say, that the text we are using was written by a man named Hunt, of Cornell. I'll tell you, Hunt is a fine "feller." I'll never forget the first time I met him. I was working at the time at an experiment station in North Dakota, and one day this man Hunt came up and began asking me questions about the work (I didn't know who he was then), and I told him about the work we were doing, and we had a fine little visit. Then he finally told me who he was. Yes, Hunt is a fine "feller."

I want this morning to give you some tables containing data gathered by Briggs & Shantz. I suppose you get a little tired taking down tables, and probably they don't mean much to you. They didn't to me either when I was in college, but when a "feller" gets out into the world, all these things mean a great deal.

Now Briggs & Shantz are prominent men in the Department of Agriculture. I have worked with them there in Washington a good deal. Who is the head of the Department of Agriculture? Bright student: "Wilson." Prof.; "No, Wilson is president. (Cheers from class.)

Finis.

PROMINENT MEN	CHIEF BUSINESS IS	CHIEF TRAIT IS	BEST GIRL IS	MIDDLE NAME IS

Gallatin Valley Milling Co., Belgrade, Mont.

Inez Everett—"Oh, I think that you're just adorable."

The Montana State Normal College

The State Training School for Teachers

Offers both **collegiate instruction and training** in the only **organized training school** in the state

Training for work in the **elementary, rural schools** and **kindergarten** will be offered during the summer session.

Summer Session

The fourth quarter of the year offers also a **summer school** for teachers. Subjects selected from the regular course will be offered and full credit given toward graduation may be earned in these. Every subject required for **teachers' certificates of any grade** will be offered and **credits earned** in those subjects **are applied on teachers' certificates** throughout the state. **No other school can offer this advantage.** The session continues long enough to be worth while, twelve weeks, and definite results may be secured.

Courses in **domestic science, school administration** and **instrumental music** will be offered.

The greater part of the work will be done by members of the regular faculty, thereby insuring expert service. Educators of note from within and without the state will be engaged for special work.

Expenses and Accommodations

Board and lodging for women at the dormitories, \$22.50 per month. Expenses for men can be kept within the same amount by securing table board at the dining room, Normal Hall, and rooms in private families. The matriculation fee is \$5.00 from which railroad fare up to \$5.00 is deducted.

Summer quarter begins June 9, and ends August 28, 1914.

Mart Kelly—"I'm in favor of much sleep."

Did You Know That the Famous Gallatin Valley

"The Egypt of America"

Comprises the richest agricultural land in the world; that it raises more grain to the acre than any other section of the United States or Canada; that grain from the Gallatin Valley has won prizes in competition with that from all parts of the world, and that many trainloads of Gallatin Valley grain are annually shipped to foreign markets because of its superior qualities?

*Here Are Some of the Average
Yields Per Acre:*

Wheat, irrigated	- - - - -	65 bushels
Wheat, non-irrigated	- - - - -	40 bushels
Oats	- - - - -	70 bushels
Barley	- - - - -	45 bushels
Potatoes	- - - - -	200 bushels
Timothy hay	- - - - -	4 tons

THESE ARE FACTS

WRITE FOR THE FACTS ABOUT THE LAST NATIONAL CORN SHOW

It is a fact that approximately \$6,500,000 worth of farm products were shipped into Montana in 1911, simply because of the lack of people to properly develop the agricultural resources of the state and thus supply the demand created for these products by the mining and stock raising sections. Bozeman, the metropolis of the Gallatin Valley, is only 98 miles from Butte, the greatest mining camp on earth, and only 96 miles from Helena, the capital of the state; hence, there is always a ready cash market for all products of the Gallatin Valley farm and garden.

For these and many other reasons, the Gallatin Valley offers unsurpassed opportunities and inducements to both the homeseeker and the capitalist.

If you are looking for a location where you can buy A-1 improved farming lands, irrigated or non-irrigated, at bargain prices; where crop failures are absolutely unknown, and where energy and ability are sure to meet with a substantial reward, then come to the Gallatin Valley. There is no better field in the Northwest today for profitable investment.

For further information regarding farm lands, timber lands, water power, industrial opportunities, business openings, railroad rates, or other things of interest to the investor and homeseeker, address

The Gallatin Valley Commercial Club

TWO WAYS TO SAVE

One is to wait until you have a large sum to
spare, a time which seldom comes.

The other is to put aside at compound interest
small amounts which you can easily spare, and
do it regularly.

You will have great respect for compound
interest when you discover from experience how
it increases your capital.

There is great profit and satisfaction for you
in a savings account with this strong bank.

THIS ONE THING

“Inherent Stability”

Alone makes BITULITHIC superior to other Bituminous Pavements. But BITULITHIC has many other good qualities as well. BITULITHIC Pavement is made of varying sizes of the best stone obtainable and Bituminous Cement, having density and “INHERENT STABILITY,” which a bituminous pavement must have to give the best results.

Facts Concerning Bithulthic

Introduced in 1901.....16,400 sq. yards laid

Laid in 1913.....7,008,295 sq. yards laid

Total yardage in 13 years in 296 cities throughout the United States and Canada, 29,672,003 sq. yards; equivalent to 1,686 miles of roadway, 30 ft. wide between curbs.

Its growth is not an accident. It is due to its great merit. You should study the cause of this wonderful growth, and if you are a municipal officer, it is your duty to know. Your city should be in the advance line.

IT CANNOT BE THERE WITHOUT BITULITHIC THE MODERN, IDEAL, PERMANENT PAVEMENT

BITULITHIC appeals alike to city officials, property owners and automobile drivers. Prepare at once, as the season of 1914 promises to be extraordinarily active in the street paving line. Make your contracts early. It is to your advantage.

We want to help you. If we can convince you Bitulithic is “Best by Every Test,” no harm is done.

But we know we can.

Write today for explanatory booklets and learn more about this modern, ideal, permanent pavement.
