FOREWORD

Greetings to Montana State College Folks:

Looking forward is one of the great joys of life. We, the Montanan Staff of 1930, hope you have enjoyed looking forward to this book. We also hope you will find in it what you wish in your annual and that you will enjoy reading it as much as we have enjoyed writing it.

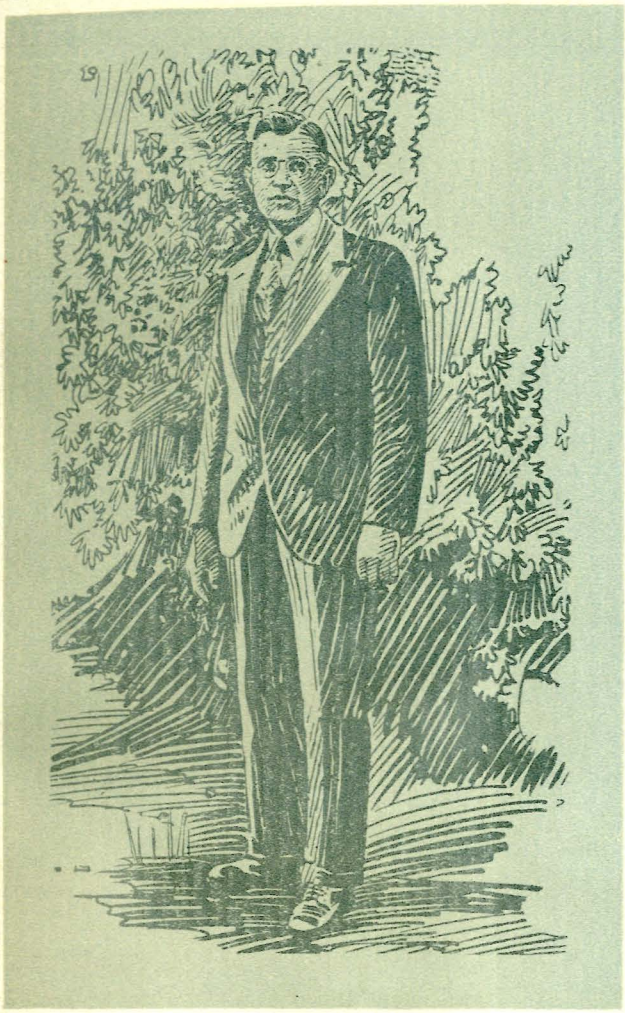

DEDICATION

We, the students of Montana State College, dedicate this, the 1930 Montanan, to Eric Therkelsen, who is professor of Mechanical Engineering, and has been with us since the fall of 1918.

He has his masters degree in Electrical Engineering from the University of Washington but his degrees in Mechanical Engineering are from Montana State College.

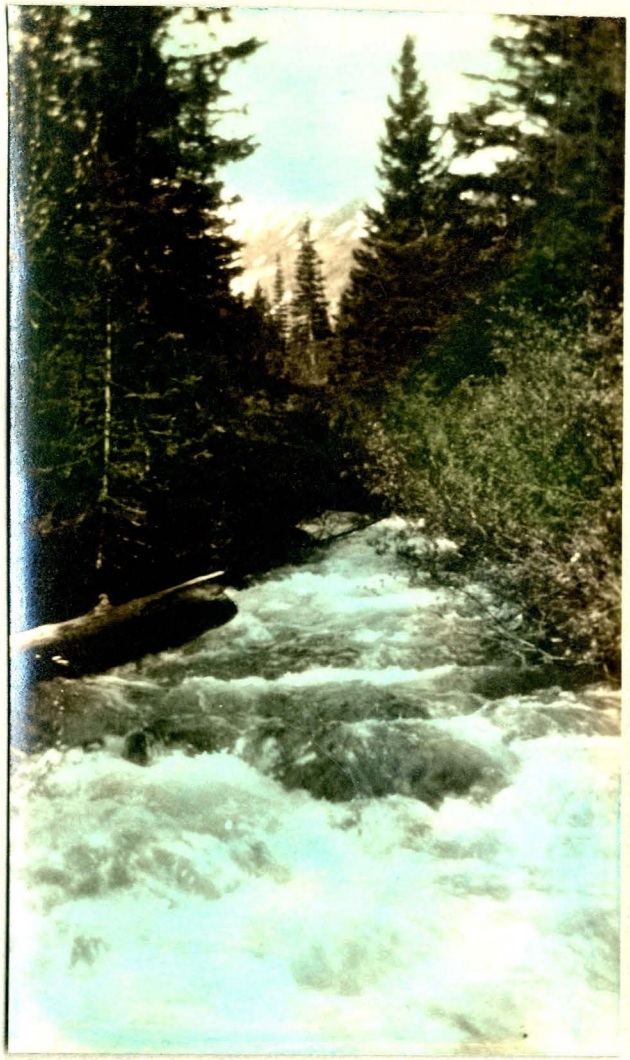

Since he is both a student and a faculty member here we feel he is a real part of our college. We appreciate the interest he takes in all student affairs and the friendliness he shows to all students with whom he comes in contact.

EXPERIMENT

CHANCELLOR BRANNON

Chancellor Melvin A. Brannon

Dr. Melvin A. Brannon, scholar and author, came to Montana in 1923 as Chancellor of the Greater University of this state. Last year he was president of the American Association of State Universities.

Before coming to Montana Chancellor Brannon had amassed an imposing record as an educator. Starting as a laboratory assistant at Wabash College in 1889, he advanced as instructor in natural science at Fort Wayne high school from 1890 to 1894.

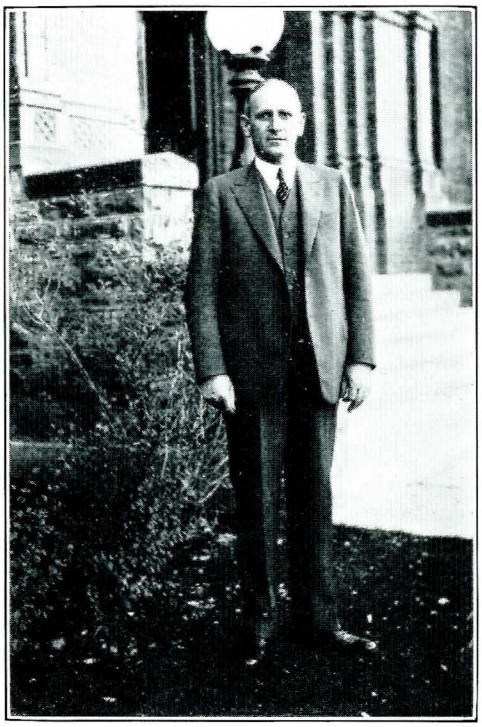

From 1894 to 1914 he was Professor of Biology at the University of North Dakota. During this time he organized the school of medicine there and from 1911 to the end of his term there Dr. Brannon was dean of the College of Liberal Arts.

From North Dakota Dr. Brannon went to Idaho, where he was president of the University until 1917. From Idaho he went to Beloit, as president of that institution, until coming to Montana in 1923.

In 1912 Dr. Brannon received his Ph. D. degree at the University of Chicago. Whitman College conferred its Ll. D. degree on him in 1917. He received his A. B. degree at Wabash in 1889 and his A. M. there a year later.

Dr. Brannon is a member of many societies and clubs, notably Masons, Fellows of A. A. A. S., American Genetic Association, Biological Society of America, Phi Beta Kappa, Sigma Xi, Phi Delta Theta, and Sons of the American Revolution.

President Alfred Atkinson

PRESIDENT ATKINSON

One of the most important developments in the history of Montana State took place in 1913 when the legislature passed the so-called Chancellor Law. The College had been known as the Montana Agricultural College and the students were called "Aggies." Efforts had been made to have the name changed to Montana State College, but without success. In the Chancellor Law the name was changed to Montana State College.

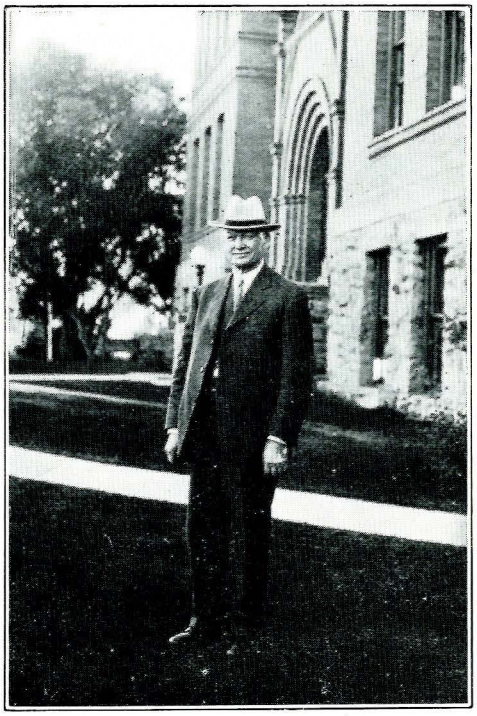

It was not until six years after the College had become Montana State College that Alfred Atkinson became president.

President Atkinson was born at Seaforth, Ontario, Canada, October 6, 1879. For three years he was a student at the Ontario Agricultural College at Guelph, Ontario, and came to the United States in 1902. He became assistant in Agronomy at the Iowa State College. There he graduated with a Bachelor's Degree in 1904, coming to Montana State College as Professor of Agronomy that year. In 1911 he became a naturalized citizen of the United States. In 1912 he received his Master of Science Degree from Cornell University, and in 1920 his Doctor of Science Degree from Iowa State College. In July, 1919, he assumed the position of President of Montana State College.

During the World's War, he was State Food Administrator of Montana. During the year 1924-25 he held the position of District Governor, for District Six of International Rotary.

President Atkinson is a member of the American Association for the Advancement of Science, the American Genetic Association, Phi Gamma Delta, Phi Kappa Phi, Sigma Xi, Gamma Sigma Delta, Alpha Zeta.

In the summer of 1928, President Atkinson, with Mrs. Atkinson, made a tour of Europe, visiting England, Holland, Belgium, Switzerland, Italy, France and Germany. There he studied the general agricultural conditions and the exports and imports in those countries.

DEAN HAMILTON

James McLellan Hamilton

James McLellan Hamilton was born on a farm in Crawford County, near Annapolis, Illinois, October 1, 1861. His paternal grandparents were Scotch-Irish; his mother's parents were from Germany.

James was the ninth of ten children, and grew up on a farm. He attended country school in the winter and worked on the farm in the summer. Since the farm was not large enough to employ the time of all the children, James worked for the neighbors as a hired man during the summers when he was 16, 17 and 18 years old, attending country school in the winter.

At the age of 18 he was able to get a certificate to teach and on November 1, 1880, began to teach his first school in a district adjoining the one he had attended as a boy. He taught country schools for three years and in 1883 entered Union Christian College at Merom, Indiana, where he was graduated in 1887. While in college he earned a part of his expenses as a janitor at first and later as an assistant teacher.

For two years after graduation he was superintendent of the public schools of Summer, Illinois. In 1889, he with his wife, came to Montana, where he has been engaged in educational work for forty years. From 1889 to 1901 he was superintendent of the public schools at Missoula. In 1893 he was appointed a member of the first State Board of Education and served in that office until he entered the faculty of the State University in 1901. The important work of this Board at that time was to select sites for the campuses of the institutions of higher education. For the three years, 1901 to 1904, he was vice-president and Professor of History and Economics in the State University. In the fall of 1904 he was made President of the State College of Agriculture and Mechanic Arts at Bozeman, and served in that capacity for fifteen years.

He retired from the presidency in 1919, when he became Dean of Men and Professor of Economics in the institution at Bozeman, which position he still holds.

In 1898 he studied a term in Harvard University. In 1912 he traveled and studied in Europe. In the summer of 1922 he attended Cornell University; in 1923, the University of California, and in 1925, Chicago University. In 1921 he wrote a Montana Civics.

Una B. Herrick

DEAN HERRICK

Dean Herrick came here in January, 1911, when Hamilton Hall was first opened, and took charge of it. The influence of Hamilton Hall and Dean Herrick on the social life of the women students has been one of the outstanding features of Montana State College.

Dean Herrick was born in Kentucky and spent her early days in boarding school. She later attended an academy at East Lake, from there going to Missouri Wesleyan College. After this preparation she took a teaching position in Trinity University at Tehnacona, Texas.

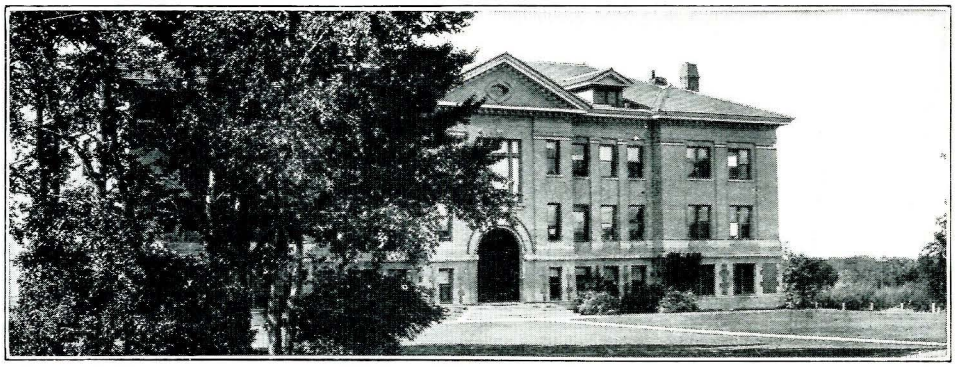

She was married while quite young to Dr. Clinton G. Herrick, who was a member of the medical staff of the Bellnean Hospital, New York City.

After Dr. Herrick's death she taught at Kallsa School and the Chicago Conservatory. In rather rapid sequence the following events of her life came: She played in a stock company theater for three seasons, then spent five years in the teachers' college at Valley City, North Dakota, before coming to Montana State College in 1911.

Her career at M. S. C. has been most interesting and diversified. She first formally opened Hamilton Hall; later was an instructor in English Drama, and organized the first physical education department for women here. In 1918 full appreciation of her work was expressed when she was appointed dean of the Home Economics and Industrial Arts departments.

Dean Herrick has been very active in various plans on the campus. The women of Montana State College under her supervision have organized the Associated Women Students and are supported by her in their various projects and activities.

Her guidance among the women students has been very well appreciated. She has aided in the writing of a social courtesy book for the use of the sororities, which has won national recognition.

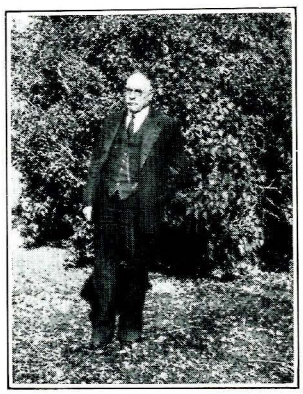

AGRICULTURE BUILDING

AGRICULTURE COLLEGE

The history of agriculture in Montana has been a constant battle against adverse conditions. Due to the distance of the State from the great agricultural markets, the building up of an agricultural empire within the state has been primarily based upon the superiority of Montana agricultural products. This is true even today, but developments within the past quarter of a century have been constantly working to remedy this condition, through the moving of the wheat market westward, and through ever-improving methods of commerce.

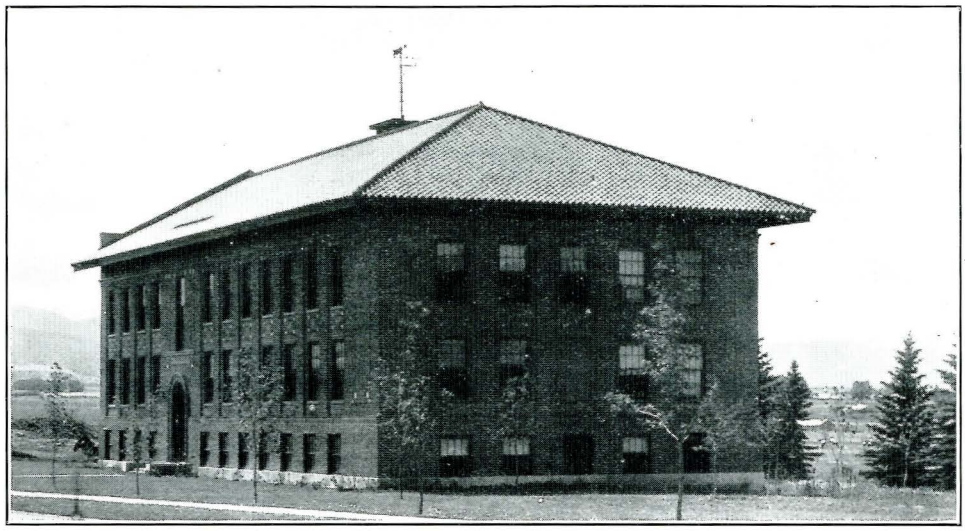

The growth of the College of Agriculture of Montana State College has followed the same steps as the development of agriculture in the state. Although the Department of Agriculture was founded with the inception of the State Colloge in 1893, for many years its growth was slight, and by 1903 it had graduated only four students. From this time on, however, the college grew steadily, and since 1922 its graduates have averaged close to twenty per year.

DEAN LINDFIELD

The growth of this department has not been limited to the number of students graduated, however, as the scope of work covered by the department has been constantly increasing in obedience to the demand for well-trained workers in all the branches of agriculture.

Undoubtedly, in the early history of the College of Agriculture, little thought was ever given to the possibility of there ever being any field open to graduates of the college, other than that of practical farming. The same forces which have developed pure agriculture in the state have also created new and varied fields for the

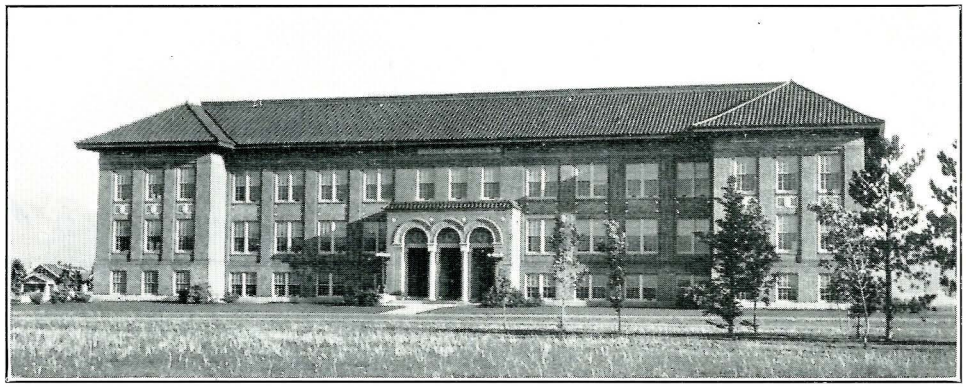

CHEMISTRY BUILDING

agricultural workers, however. At the present time, the graduates in agricultural courses who are engaged in practical farming constitute only one-fifth of the entire number of graduates. The remaining four-fifths are divided between teaching, county agent work, college and experiment station work, work in the U. S. Department of Agriculture, and industrial pursuits. The largest number have positions in the industries and other organizations either handling or manufacturing agricultural products.

In the future, the call for trained workers in agriculture will be even greater than in the past. Agriculture is just now going through a definite stage of evolution; the application of greater power, more machinery, and improved technique in agricultural practice is just coming into being. All these things create places which cannot be filled except by technically trained agricultural workers.

The courses of the College of Agriculture are designed to fill the need and to prepare the graduates to take places in any of the wide fields which lay open to them.

At present the Agricultural College has seven departments with an instructing staff of nineteen members.

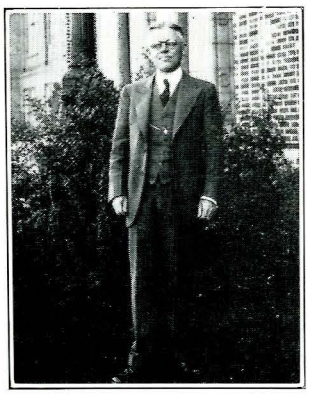

ENGINEERING BUILDING

ENGINEERING COLLEGE

Engineering education in the United States is the outgrowth of a popular movement early in the last century to promote the "application of science to the common purpose of life." The engineers of the early part of the nineteenth century were self-taught. There were no educational opportunities for securing a scientific foundation to govern engineering practice and procedure.

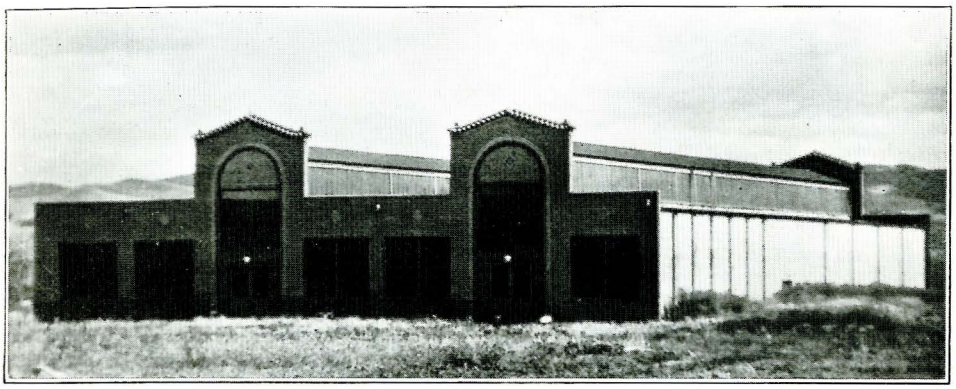

This kind of engineering ability was not adequate when it became necessary to promote the development of natural resources on an adequate scale to meet the changing needs of the country. The construction of railroads, steam and electric power plants, with the accompanying lighting systems, the development of community life and manufacturing industries, require an application of the principles of science far beyond the capacity of men skilled only in the art of engineering practice through processes of self-education.

DEAN COBLEIGH

There arose out of the demands for a greater industrial development of the country and more material prosperity, the system of engineering education of today. This education program provided systematic and rigid mental discipline, and formal training for the professional practice of engineering in its several branches.

Federal and state legislation has made provisions for establishing and maintaining engineering colleges. The Montana State College, with its division of engineering, was created by legislative enactment in 1893. The engineering division is organized in harmony with the definition: "Engineering is the art of organizing and directing men and controlling forces and materials of nature for the benefit of the human race."

ENGINEERING SHOP

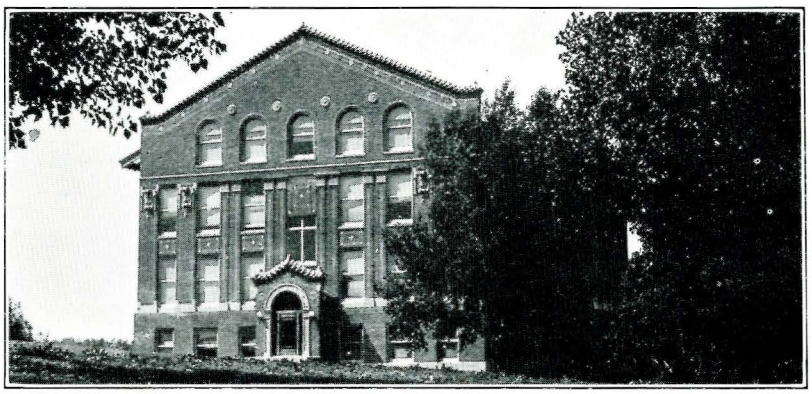

A well-rounded program for an engineering college, therefore, calls for instruction, research, and extension.

The engineering instruction covers the fields of mathematics, fundamental science and engineering principles and procedures for the purposes of developing the ability to "control the forces and materials of nature." Further, "upright character, correct living, service to society, agreeable personality, and good citizenship are objectives in the training of the engineer."

The institution recognizes that the engineering college is organized primarily to offer instruction to students who can attend systematic classroom instruction. On the other hand, it is recognized that there is an opportunity for public service in extending the benefits of teaching and research activities to those in the state who are unable to take advantage of the regular instruction at the college. The service rendered in this field is along the line of conferences for groups interested in engineering procedures and in the line of publication of circulars and bulletins.

For a period covering more than three decades the college of engineering has been contributing to educational and economic progress. These decades represent a period of great activity in engineering research, and in the consequent development and application of engineering knowledge to the "common purposes of life."

Including the graduates of 1930, the college of engineering has granted 540 degrees in the various curricula: architecture, chemical, civil, electrical, mechanical, and industrial engineering. Over 150 graduates are serving Montana enterprises. They are employed as architects in four of the larger cities of the state; as electrical and mechanical engineers in power production; power utilization, in transportation and in the industries; as civil engineers in five municipalities, and in highway constructon and ralroad betterment; as industrial engineers in business administration and as chemical engineers in the production of cement, sugar, and petroleum products.

LEWIS HALL

COLLEGE OF APPLIED SCIENCE

The Applied Science course was established for those students who wish the opportunity to gain a thorough training in some fundamental science, together with adequate supplementary training in supporting sciences, languages and mathematics. It is the aim of the course to develop in the student not only a sound fundamental knowledge of the sciences pursued, but also to indicate clearly the application of science to industry, agriculture and the arts.

At Montana State College it is a general course in which the student may major in any of the several recognized subjects, according to his choice. The department includes the courses of Botany and Bacteriology, which is divided into two divisions; premedic with special work in chemistry, language and zoology and the second division known as Botany and Bacteriology, in which the emphasis is laid on the natural sciences.

The Botany and Bacteriology course has been planned to meet the needs of the students of agriculture, general students, students who plan to teach botany and the allied subjects in high schools, students interested in specializing in the lines of botanical and bacteriological work. To meet these requirements the course has been made as flexible as possible and at the same time consistent with essential fundamental training.

The second division of the department is known as the Entomology course. This course aims to meet the needs of students who desire to make entomology their life work. Students who pass the necessary qualifications and who

show special aptitude for this kind of work will find ample opportunities for service in the teaching profession, or as research workers in government bureaus and state experiment stations.

Bio-chemistry is the third division of the department of Applied Science. This is one of the newer fields of work and leads to positions of laboratory technicians and research workers. A study of chemistry and physics is essential to a thorough comprehension of the processes of nature and of human industry. The aim of all courses is to give a strong fundamental knowledge of the basic principles of the subject and to enable the student to apply this knowledge toward the solution of the many problems of the present age.

By taking the courses offered in Physical Education the graduates in Applied Science may become athletic directors and coaches. This is one of the favorite courses among the young men of Montana State College.

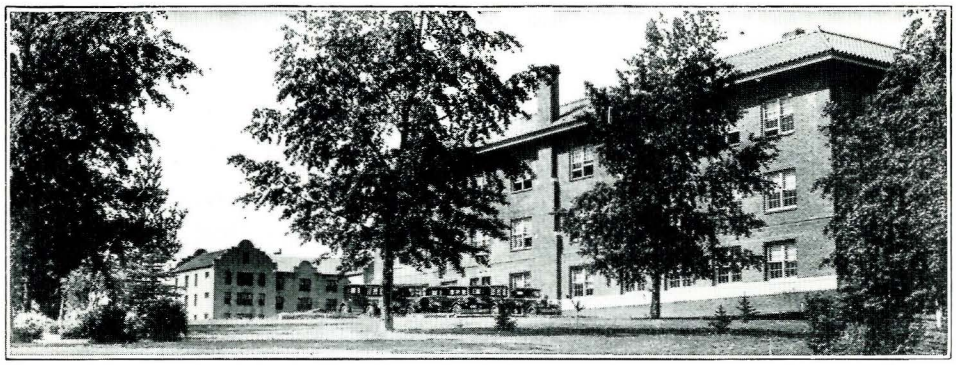

As the courses are arranged now students may take the Applied Science course with a major in English, Languages, or Mathematics. Very few students are doing this work as yet and the courses are not highly developed, but as the demand for them increases the courses will be improved.

The aims of the department are to train people for the important professions of life, to teach the fundamentals of natural science and to direct attention of the students to the technical values of the courses.

Lewis Hall is the home of the natural science courses. It is one of the newer buildings on the campus, and in it one finds several departmental libraries and laboratories for both the research staff of the college and for the students. There is also a natural science museum on the top floor, which as yet has not been very highly developed but is added to from time to time as persons become interested in it.

The chemistry courses are given in a special building known as the Chemistry Building, which is considered one of the best equipped plants of its kind. The English and Physics courses are taught in Montana Hall, one of the original campus buildings.

In the fall of 1929 Dean R. A. Cooley, who had been the head of the department for several years, resigned. No one was appointed to take his place during the school year of 1929-30. D. B. Swingle, W. D. Tallman and M. H. Spaulding are the advisers for the various branches of the work.

HERRICK HALL

COLLEGE OF HOUSEHOLD AND INDUSTRIAL ARTS

Courses in Home Economics, Applied Art, and Secretarial Science are offered in the College of Household and Industrial Arts. Although the majority are women, the courses in Applied Art and Secretarial Science are open to men as well, and each year finds a number of them registered in these courses.

During the modern period woman's progress has indeed been rapid. Age-old customs and ideals have been done away with and the shackles which have bound her have been broken. Today a wide variety of careers is open to her, and she must choose one which suits her and become well trained in it. To modern women a successful career is just as important as to modern men.

For many years the college of Household and Industrial Arts has been graduating women who have taken successful positions in the many fields open to them. Thus it has been proved that properly trained women are essential in the modern scheme of industry and all the arts.

Homemaking, as old as man, has greatly changed in aspect during the last few years. It has become both a science and an art. The department of Home Economics has as its aim the improvement of the home in all its various phases. In the process of the evolution of the modern home, much that was considered essential in the past has been eliminated. Consequently, new problems requiring delicate adjustment have arisen. Being intended, as it is, to serve the various needs of the family group, the home must be sensitive in its adjustment to changing conditions, yet preserving its heritage of emotional and

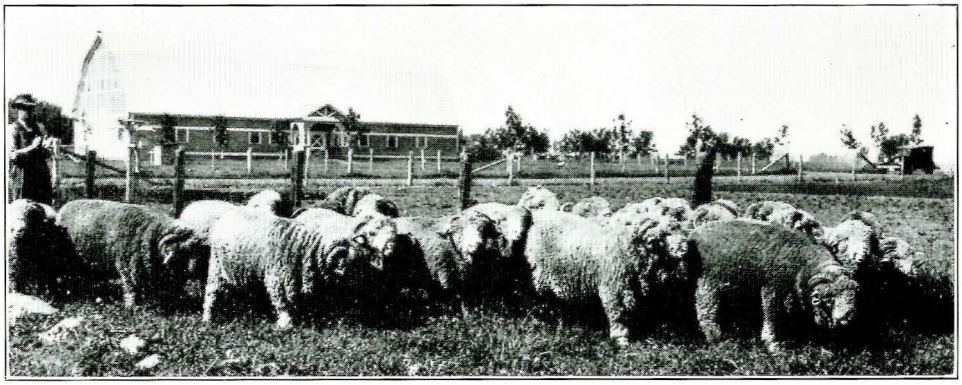

FIREPLACE ROOM AT HERRICK HALL

spiritual values. The Home Economics course is designed to equip graduates of this department with the necessary functional knowledge and also to develop within them ideals, appreciations, and an inquiring and open-minded attitude, which will enable them to successfully solve their own life problems and yield to each of them a satisfying personal philosophy.

Modern industry is dependent upon artists for many things. They are necessary in the design of clothing and of many other articles, but in the field of advertising they have probably become most essential. It is their duty to furnish the color, life and attractiveness of modern advertising, and when one considers the importance of this branch of industry, the field which is open to trained artists indeed seems vast. However, the Applied Art course is not confined to the one branch of art, but rather deals with it in all its phases, both antique and modern. Art is probably the most far-reaching of all the elements of civilization, and it indeed furnishes an inspiration for the young man or woman who is talented along that line.

The Department of Secretarial Science not only prepares men and women for business fields, but also allows elective studies in education sufficient to meet the requirements for teaching commercial subjects. In modern industry it is the province of the accountant, the statistician and the business executive to translate the work of the engineer, chemist, and farm specialist into terms of financial efficiency in the business enterprise by an analysis of production cost and the forecasting of market values. There is always a demand for good secretaries, as a result of which the course offers training in the keeping of business records and in the work of the office in the carrying out of the routine of communication between the executive and his contacts, both within and outside of the business organization.

SHEEP FOR BREEDING EXPERIMENTS

EXPERIMENT STATION

The Montana Experiment Station is the agricultural research division of Montana State College and along with the instruction department and the extension department is one of the three major divisions of the institution. F. B. Linfield, who is dean of the college of agriculture, also is director of the Experiment Station.

The work of the Experiment Station is divided into 11 divisions: chemistry and meteorology, entomology, horticulture, agronomy, agricultural engineering, home economics, botany and bacteriology, animal husbandry, veterinary science, grain laboratory and agricultural economics.

The function of the Experiment Station is to conduct experiments and investigations in the various branches of agriculture and home economics and to prepare and assemble such facts and information as have a bearing upon the advancement of agriculture in the State. Through the instruction departments the findings of the Experiment Station are passed on to students and through the Extension Service they are taken to the farmers, stockmen and farm women of the State.

It is impossible to determine accurately how much the Experiment Station has contributed to the upbuilding of agriculture in the state, but it is not difficult to realize that the information that has come out of this center of investigation has added millions to the income of farmers and stockmen of Montana. New varieties of grains have been introduced which have added many bushels to the average per-acre yield, systems of tillage and farm management have been developed which are far more efficient than those which they replaced; methods of controlling planting and livestock diseases have been discovered; new markets have been found, the quality of Montana products has been improved, standardization has been introduced. In short, the Montana Experiment Station is engaged in the work of reducing the hazards of crop and livestock production, and it has made very material progress in this direction.

RAY BOWDEN

The Montana Collegian

The Montana Collegian is now in its fifth year. This publication is financed jointly by the State College and the M. S . C. Alumni Association. Its circulation is among the alumni, ex-students, and faculty of the institution, more than 4,000 names being on the mailing list.

The Collegian was created to keep alumni and ex-students in closer touch with Montana State College and, judging from all reports, it is doing that job successfully. The editors invite all alumni and former students to send in their addresses, that the Collegian may be sent to them regularly.

The Montana Collegian is published from five to seven times during the college year. It carries general news of happenings on the M. S. C. campus, acts as a medium of contact between alumni officials and members, and specializes in news stories, briefs and personals about former students of this institution.

H. E. Morris, '09, is alumni editor of the Montana Collegian and deserves high credit for the manner in which the publication has been made to serve the interests of our large body of alumni. President Atkinson is listed as editor-in-chief, with R. B. Bowden and John Dexter of the college publication department also listed on the editorial staff. The organization of the alumni office at Bozeman has, with Mr. Morris' help, been of great value to the Collegian.

The editors of the publication invite and urge all former students to send in news that they may pick up, from time to time, about "M. S. C. folks." One full page in this four-page publication is devoted to alumni each issue.

JOHN DEXTER

MONTANA CROP EXHIBIT

EXTENSION SERVICE

The Montana State College Extension Service in agriculture and home economics is one of the three major divisions of the state institution. J. C. Taylor, who is the chief administrator of this branch of the State College, graduated from Montana State College in 1912. Assisting Director Taylor in his administrative duties are Fred Bennion, county agent leader, who is immediately in charge of agricultural extension work; Miss Blanche Lee, home demonstration leader, who has supervision of home economics extension work; and Charles E. Potter, state club leader, who has charge of boys' and' girls 4-H club work.

The Extension Service carries the findings of the Montana Experiment Station and the latest developments in the field of agriculture and home economics to the people of the state, thus actually extending the State College campus throughout Montana.

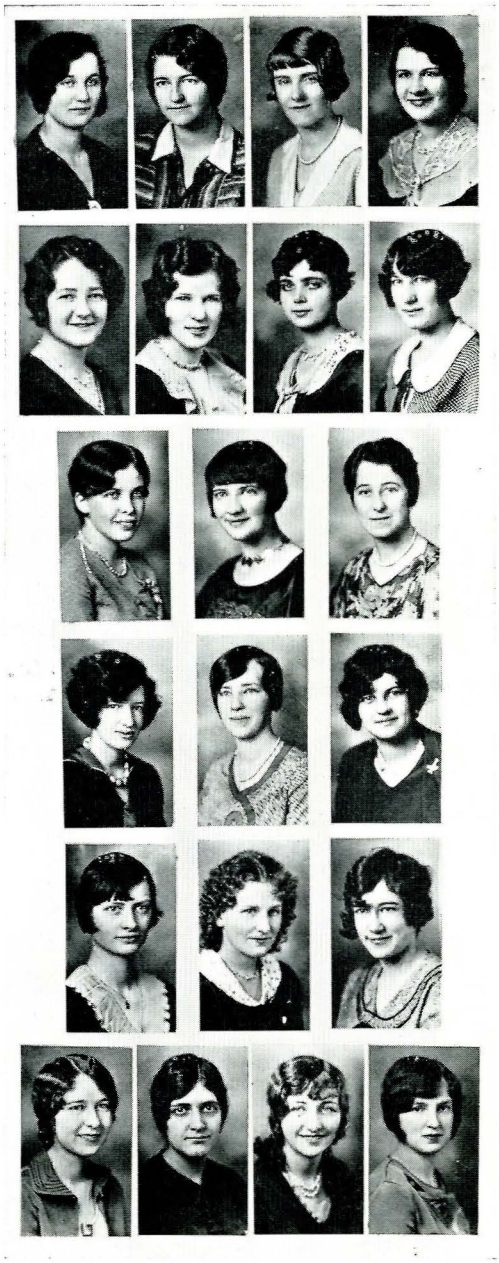

The non-resident instructors who direct the activities of the extension service in districts, counties, and on irrigation projects are known as extension agents. At this time there are a total of 44 of such agents—34 county and project agricultural agents, nine county and district home demonstration agents and one county club agent.

The Montana Extension Service, for the state as a whole and for various districts and counties, has definite programs of work, modified from time to time as changing conditions demand, but always looking forward to the agricultural development of the state.

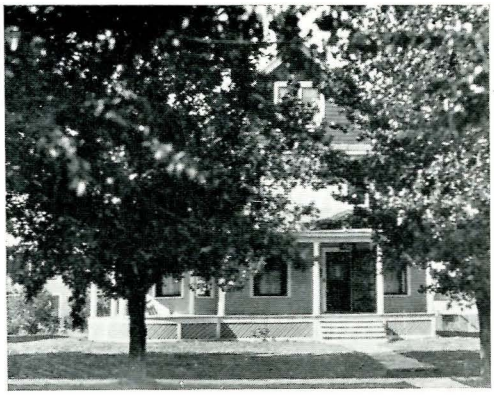

SORORITIES

Sr. O'Leary, Fogler, Monroe, Bowden

H. Thompson, Soph. Wisner, Keyes
Hanson, Griffith, Pope, Boulware

Alpha Omicron Pi

Alpha Omicron Pi was founded at Barnard College.

Alpha Phi of Alpha Omicron Pi grew out of a local group called the Arenes Club, which was the second sorority organized on Montana State College campus, in April, 1915.

Alpha Phi chapter was installed in 1917 as the first national sorority at Montana State College. It was the twelfth chapter of the national organization to be chartered.

The first chapter house was located on South Fifth, and at present the chapter owns its house at 119 South Sixth.

The chapter roll includes 145 members. There are 22 active members and 17 pledges.

Mary O'Leary was president for 1929-30; Martha Hawksworth, vice-president; Katherine Fisher, secretary, and Mary Hakala, treasurer.

The Jacqueminot rose is the flower of the sorority and the colors are red and white.

Members of Alpha Omicron Pi who were members of Mortar Board for 1929-30 were Mary O'Leary and Irma Monroe. The Spur representatives were Elizabeth Pope, Betty McNeil, Dorothy Baker and Dorothy Schneider.

SONG

Alpha Omicron Pi,
Friends as the years go by,
Loving sisters are we,
Loyal forever,
Alpha to thee.

Chi Omega

Chi Omega was founded in the South, April 5, 1895, at Fayetteville, Arkansas, which is almost in the center of the area south of the Mason Dixon line, and at the time Chi Omega was founded no Greek letter society for women had been organized in institutions of collegiate and university rank in the south. Now one-third of Chi Omega's chapters are in this area.

Chi Omega was the first to enter many of the country's oldest colleges, among them being William and Mary College, Transylvania, Marietta, the first college to be established in the Northwest territory, and Culver-Stockton, the first co-educational college west of the Mississippi.

Chi Omega is represented in a larger number of colleges and universities than any other woman's group, having a total of eighty-seven chapters, representing nearly every state in the union.

The total membership of Chi Omega approximates 14,000, and its chapter houses are valued at $1,400,000.

Sigma Beta of Chi Omega at Montana State Colloge grew out of a local group. Theta Xi, as it was called, was organized in February, 1917, and hoped from the beginning to become a part of some national organization. They established their home and through the aid of the local Chi Omega Alumnae from other schools, succeeded in getting Chi Omega at Montana State College.

On October 25, 1920, Mrs. Mary C. Love Collins, National President of Chi Omega, installed the local chapter, which was the second sorority on Montana State College's campus. At that time Chi Omega was housed where Kappa Delta now lives.

The officers for this year are: President, Irene Seil; Vive-President, Kathleen Bird; Secretary, Mila Tanner; Treasurer, Grace Anderson.

There are 13 active members, 17 pledges, and 125 alumni members.

The colors are Cardinal and Straw.

Chi Omega, this year, furnished the sophomore class secretary, Gretchen Van Voast. The Spur representatives are: Mila Tanner, Mary Frances Spain and Irene Seil. Mila Tanner is treasurer for the organization.

I love you truly, Chi Omega dear
Vows we have taken we'll hold ever dear.
Now and forever we'll always be,
True to Chi Omega, true to thee.

Pi Beta Phi

In the spring of 1912, eight 4-year colloge women organized the Keseke Club at Montana State College. This club was secretly known as Phi Gamma until May, 1916, when Greek letter organizations were admitted to the campus. The following fall Phi Gamma established the first sorority chapter house on the campus.

While Phi Gamma was the first sorority on the campus it was the third to become a national. Montana Alpha of Pi Beta Phi was installed in September, 1921.

Pi Beta Phi is the oldest women's fraternity. It was founded at Monmouth College, Monmouth, Illinois, in April, 1867, as the I. C. Sorosis Club by twelve women. At the present time there are 78 chapters.

Montana Alpha owns its chapter home at 712 South Willson Avenue.

There are 30 active members, three pledges, and 95 alumnae members. The Chapter is represented on the faculty by Mrs. Lois Butler-Payson, librarian; and Miss Lenore Sullivan, Director of Hamilton Hall.

The chapter is well represented in the major activities of the college. Martha Flynn is commissioner of social affairs for the Student Senate. Elizabeth Gardiner and Martha Flynn are Mortar Board members. The Spur members are Margaret and Helen Souders, Laura Brown, and Helen Oliver.

The officers for the year were: Elizabeth Gardiner, president; Lois Cobleigh, vice-president; Martha Flynn, treasurer; Esther Bowman, house manager, and Josephine Gary, secretary.

The flower of the sorority is a wine carnation, and the colors are wine red and silver blue.

PI PHI HONEYMOON

On a Pi Phi honeymoon,
In the merry month of June,
Together we'll go strolling,
Where the wine carnations bloom.
We'll buy a toy balloon,
And sail up to the moon,
To the land of love and kisses,
On our Pi Phi honeymoon.

Alpha Gamma Delta

When Miss Branegan came to Montana State College she became interested in a group of girls and with her help the girls organized a local, Zeta Kappa, in 1920. Miss Branegan is a member of Alpha Phi chapter of Alpha Gamma Delta at Wisconsin. With her help the local organization became Delta Gamma chapter of Alpha Gamma Delta on March 14, 1924.

The national was founded at Syracuse University, Syracuse, New York, May 30, 1904. There are now 40 chapters throughout the United States.

At present Delta Gamma chapter has 95 alumnae members, 32 active members and five pledges. Miss

Freida Bull is the sorority's other faculty member.

The officers for the year 1929-30 were: Lillian Tubb, president; Norma Beck, vice-president and treasurer; and Gretchen Lehrkind, secretary.

The colors of Alpha Gamma Delta are red, buff, and green and the sorority's flowers are red and buff roses.

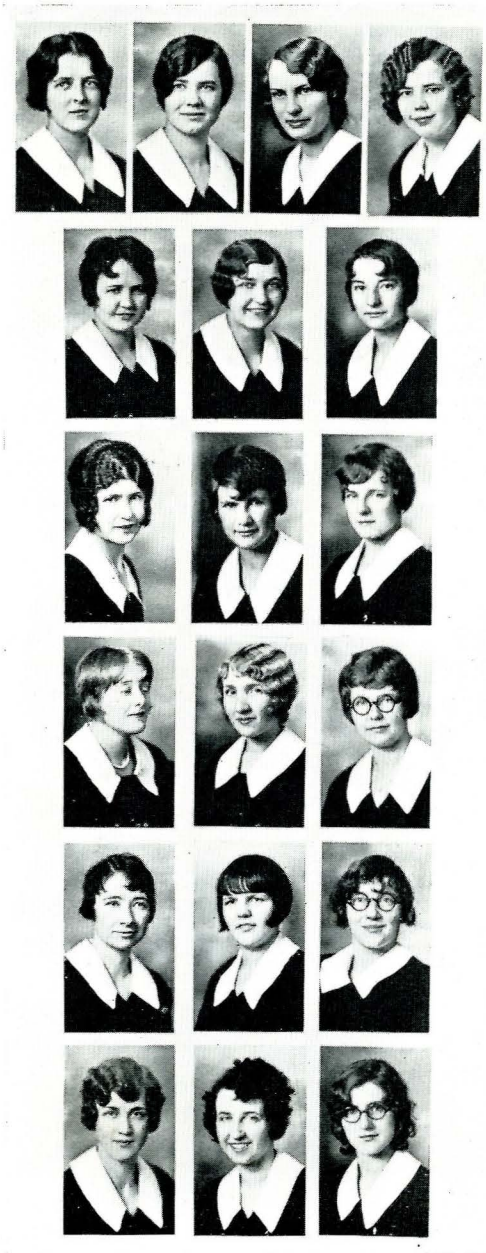

The chapter was represented in the major activities on the campus by: Norma Beck, president of the Associated Women's Students and of Mortar Board; Lillian Tubb, secretary of Associated Women's Students, and Marguerite Roscoe, president of Spurs. The other Spur representatives were Catherine Henkel and Margaret Choat.

GLOWING

Glowing through twilight dusk,
Rose, warm, tender and bright,
Touching our hearts' desires
With light of love and hope.
Shining from land of dreams
Strong, pure, unwavering,
Alpha Gamma Delta,
Thy torch forever guides.

Kappa Delta

Iota Delta was started by five girls in Hamilton Hall, May 23, 1919. In the spring of 1920 they moved into a house at 401 South Black.

On October 23, 1924, the local Iota Delta was installed as Kappa Delta by the national president, Gladys Pugh Redd. At this time 31 girls were pledged and initiated.

Kappa Delta was founded at Virginia State Normal in 1897 and the first chapter north of the Mason-Dixon Line was installed in 1904. At present there are 66 chapters in 34 states and a membership of around 8,000 actives and alumni.

Sigma Omega of Kappa Delta has lived at 411 West Olive for several years. For the year 1929-1930 Virginia Mills was president; Ruth Dudley, vice-president; Helen Bradbury, secretary, and Arlone Crane, treasurer.

Kappa Delta was represented in Mortar Board by Virginia Mills and Helen Allen; in Spurs by Helen Bradbury, who was secretary of the chapter, and by Leota and Leona Isaac. Vera Ann O'Neil was editor of The Montanan.

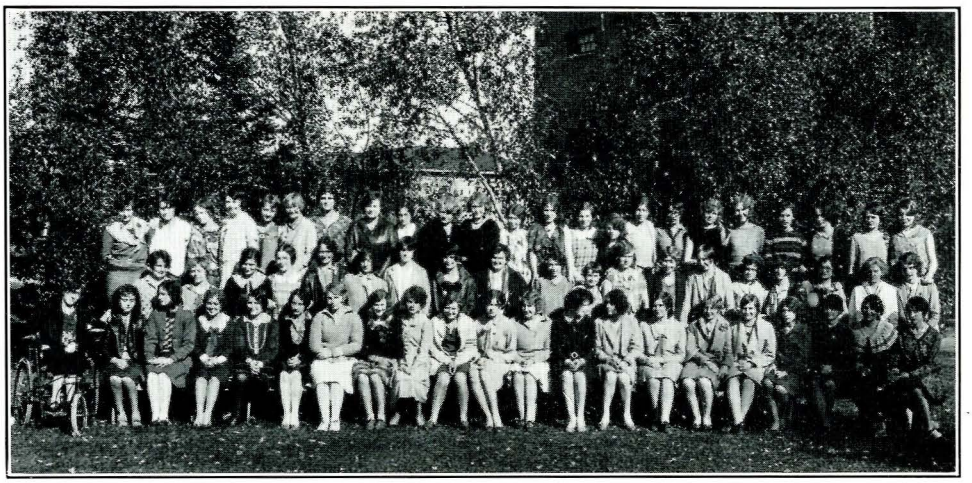

The chapter has 75 alumni members, 27 active members and 11 pledges. Its colors are green and white and its flower is the white rose.

SONG

Not to rose of Zeta,
Nor pansy, flower of Theta,
Did Venus yield her favor
As the flower she loved the best;
But for gladdest hours,
For its beauty Venus chose
Queen of all the flowers
Kappa Delta's own white rose.

HAMILTON HALL HISTORY

Hamilton Hall, the women's dormitory at Montana State College, was built in 1910 by an appropriation which had been made by the State Legislature in 1909.

Dean Herrick came to take charge of the dormitory in January, 1911. At the present time there is a house staff of five under the direction of Miss Lenora Sullivan. Miss Sullivan is a Montana State College woman, having taken her B. S. degree here in 1927.

Since the establishment of Hamilton Hall a number of traditions have grown up, which makes the life here different from that at the average dormitory. Among the customs, dear to the hearts of every girl who has had the privilege of living in the hall, are the Thursday afternoon teas and the monthly birthday dinner.

Student affairs at the hall are directed by a house council. The president is elected by the girls at a house meeting early in the fall. She, in turn, chooses the members of the council. Elizabeth Graham was president for 1929-30; Margaret Lord, Dorothy Ford, Lucille Westover and Vera Ann O'Neil were the members of the council.

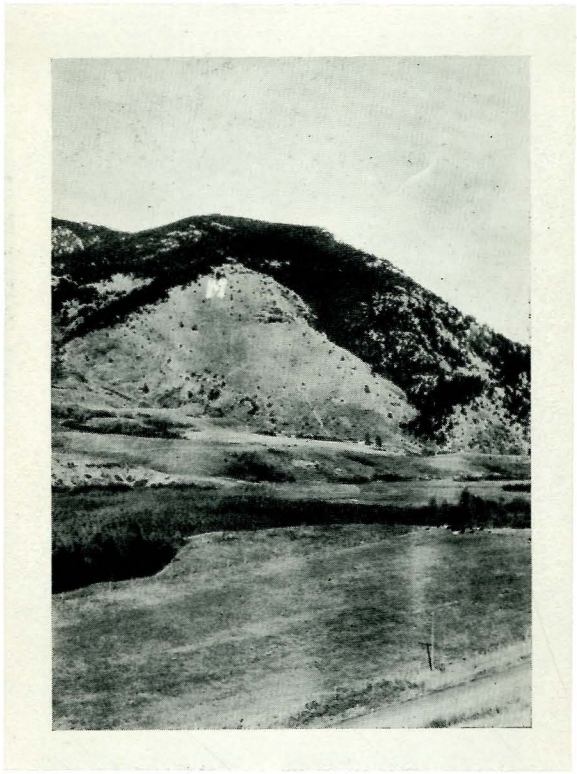

PAN-HELLENIC

The first mention of a Pan Hellenic council is made in the history of 1919. At this time a governing body of two representatives from each Greek organization at Montana State College was formed. Alpha Omicron Pi, which had been made a national in 1917, and Phi Gamma, which later became Pi Beta Phi in 1921, were represented on this first council, along with the fraternities.

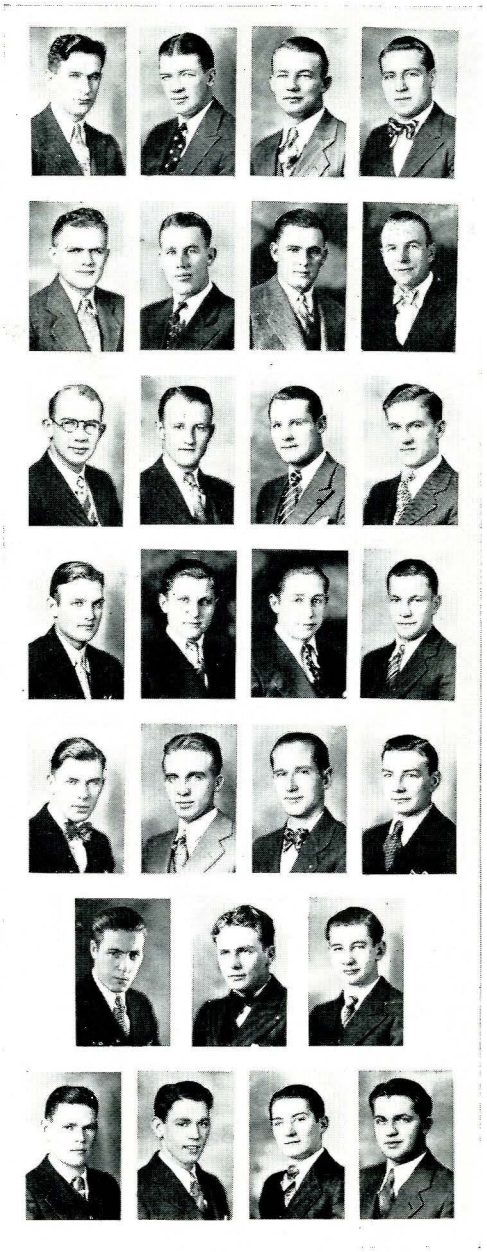

On May 19, 1923, Pan Hellenic was formally established under that title. Since that time it has built up its own traditions and customs.

The Courtesy Book of Montana State College, which is prepared and kept up to date by the members of Pan Hellenic, is making a name for the campus with the national officers of the different groups who visit here. This little book is written under the guidance of Dean Herrick and covers the house rules and social customs of the sororities.

Once a quarter a general Pan Hellenic meeting is held where all the members of the sororities get together to sing each other's songs.

FRATERNITIES

Sigma Chi

Delta Chi was the first fraternity organized at Montana State College. Beta Rho chapter of Sigma Chi is the outgrowth of the early organization. It was organized in the fall of 1911 and since the intention of the group was to petition the national, Sigma Chi, the name Delta Chi was chosen. There were 13 members in the first group.

After Montana State College became a part of the Greater University of Montana, the faculty voted to have Greek letter fraternities and the name was again changed to Delta Chi.

The local chapter petitioned Sigma Chi and were granted a charter. Members of Beta Delta chapter of Sigma Chi at the University of Montana came here and the chapter was officially installed by them on November 2, 1917.

The present home of Beta Rho is at 722 South Wilson Avenue. The fraternity has 41 active members, 9 pledges, 4 faculty members, 20 town members and 185 alumni.

The officers of the chapter are: Frank Coffin, president; Frank Brown, vice-president; Jack Bartlett, secretary; and Orland Ward, treasurer.

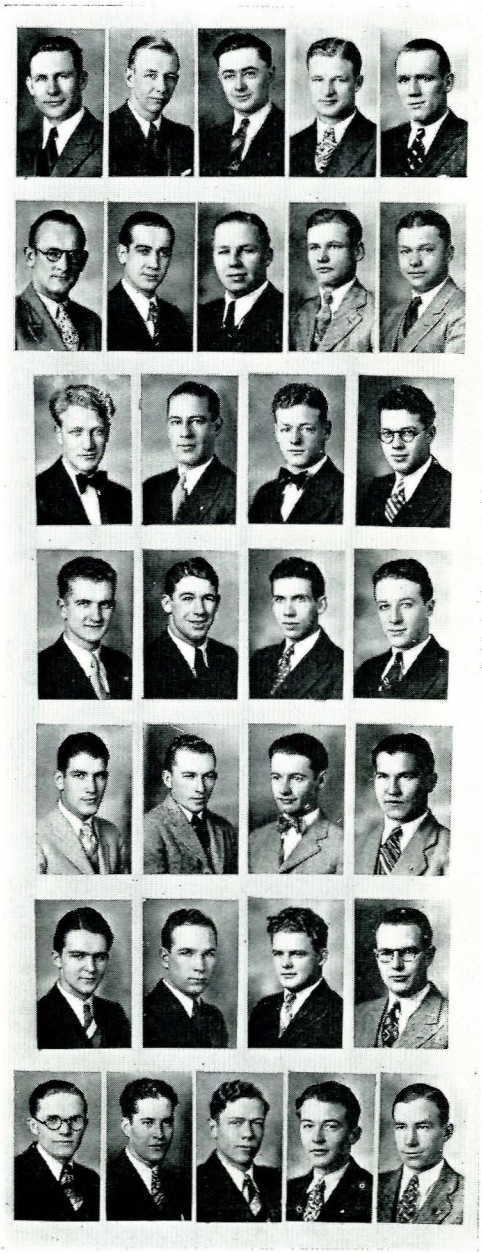

The following members of Sigma Chi are in major activities: Ashworth Thompson, commissioner of athletics, is a member of the Student Senate; Frank Ward is a member of Septemviri; Frank Ward, Orland Ward and Ashworth Thompson are members of Les Bouffons; Frank Brown is basketball manager; Ashworth "Cat" Thompson is captain of the Wonder Team; and Jim Loftus, Jack Bartlett, and Tony Veazy are the Fang representatives.

The fraternity flower is the white rose and the colors are blue and gold.

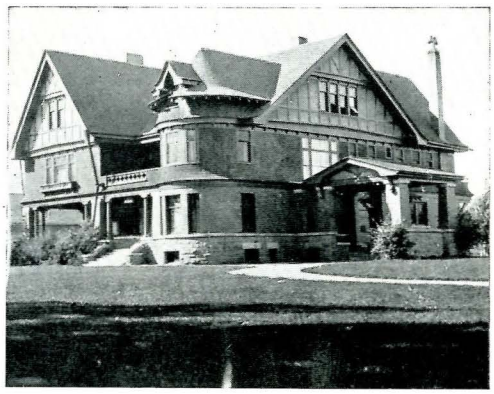

The girl of my dreams is the sweetest
girl,
Of all the girls I know,
Each sweet co-ed like a rainbow trail,
Fades in the after-glow.
The blue of her eyes and the gold of
her hair,
Are a blend of the Western sky,
And the moon light beams
On the girl of my dreams;
She's the Sweetheart of Sigma Chi.

Sigma Alpha Epsilon

The local chapter, which became Sigma Alpha Epsilon, was founded in March, 1912, under the name of Kappa Nu. Faculty opposition forced the chapter to dissolve and continue under the name of the K. N. Club, which was in existence until the units of the University of Montana were under one head.

Fraternity records of the Kappa Nu local show that two nationals were considered, Kappa Sigma and Sigma Alpha Epsilon. It is not definitely known whether a petition was ever drawn up for Kappa Sigma, but Sigma Alpha Epsilon was petitioned in 1917 under the guidance of Professor Schoppe, faculty advisor and he himself a member of Sigma Alpha Epsilon. The national convention held in June, 1919, granted a charter and Montana Alpha of Sigma Alpha Epsilon was installed November 2, of that year.

At the present time Montana

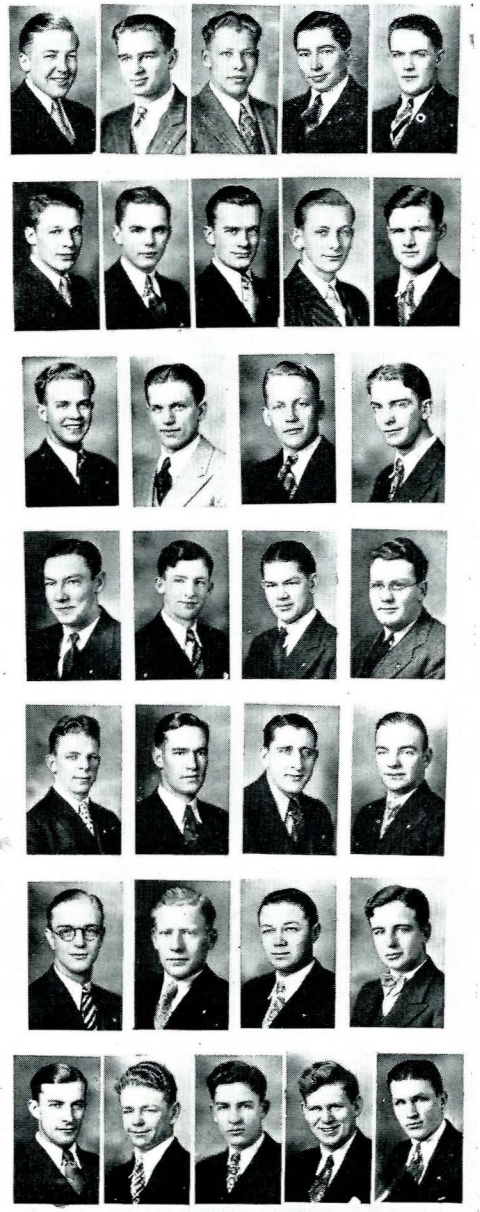

Alpha numbers 54 active members, 9 pledges, 13 town members, 200 alumni and a faculty member.

The officers of the fraternity are: Bernard Brown, president; Harold Wylie, vice-president; Kenneth Wheat, treasurer; Richard Brunner, secretary; and Edward Fisher, corresponding secretary.

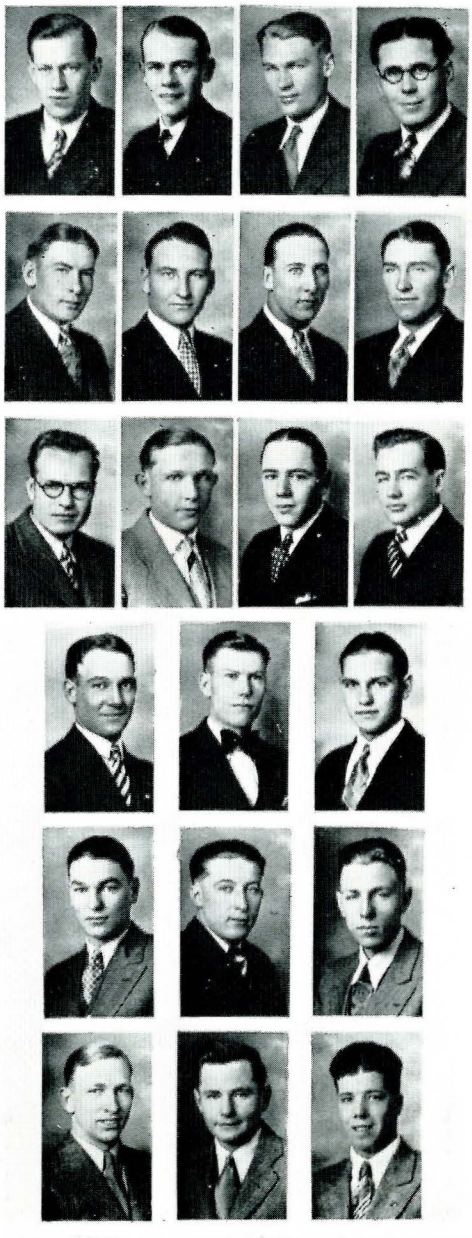

Offices held in the Student Senate by members of Montana Alpha are: Bernard Brown, president; William McCall, commissioner of publications; Henry Eagle, commissioner of forensics; and Max Worthington, president of the junior class. Harold Wylie captained the 1929 football team and Max Worthington was elected captain of the 1930 football team. Earl Semingsen was captain of the 1929 track team. Henry Eagle and Bernard Brown are members of Septemviri. Bernard Brown, Harold Wylie, and Earl Semingsen are members of Les Bouffons. Their Fang representatives are Harry Adams, Harold Hanson, and Ellsworth Hastings.

The fraternity flower is the violet and the colors are purple and gold.

Violets, violets, you're the fairest flower to me,
Violets, violets, emblem of fraternity;
With your perfume memories come
Of Sigma Alpha Epsilon;
Fairest flower beneath the sun,
My violets.

Alpha Gamma Rho

What is now Alpha Gamma Rho fraternity was organized as the A. G. R. Club in the fall of 1925 by a group of twelve students. After the official recognition by the college fraternity committee on May 14, 1925, the group gathered material and prepared a petition which was sent to the national convention of Alpha Gamma Rho.

The local chapter, admitted by the convention, was installed December 12, 1925, by H. F. Wilson, Grand Vice President, and W. H. Toussaint, Epsilon chapter, who were assisted by Professor Clyde McKee, Eta chapter; Doctor Joseph, Alpha chapter; and Professor Post, Sigma chapter; all of whom are on the faculty at Montana State College.

During the installation of the national, seventeen members of the A. G. R. Club were formally initiated at the Elks' Home and offi-

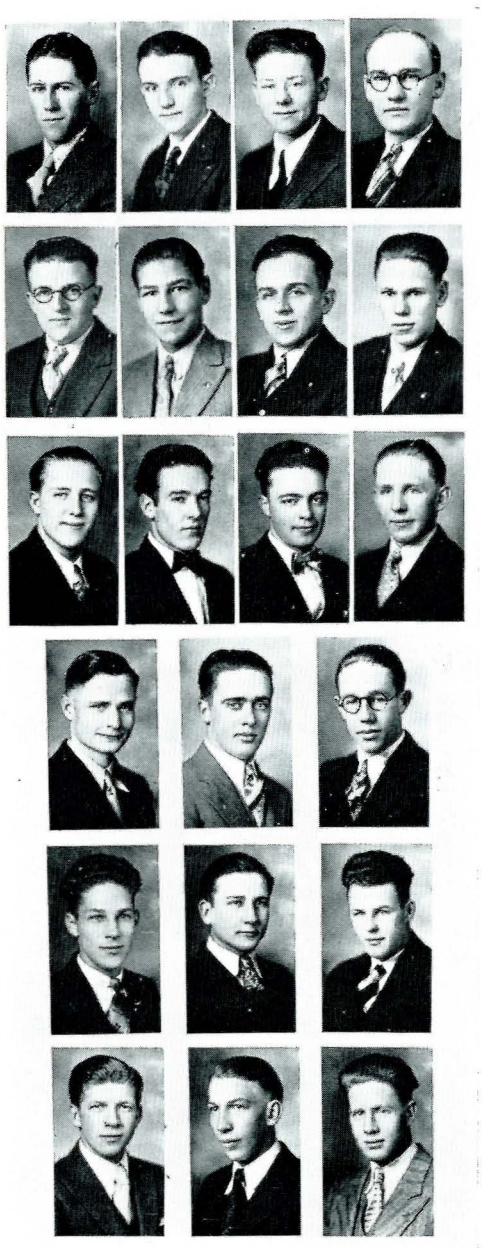

cers were immediately elected and the first regular meeting was held. At a banquet following the initiation, Doctor Alfred Atkinson, President of Montana State College; F. B. Linfield, Dean of Agriculture, and J. M. Hamilton, Dean of Men, welcomed Alpha Delta of Alpha Gamma Rho to Montana State College.

In 1926 the group rented a house which proved to be too small, so they purchased the present chapter home in the summer of 1927. Since its establishment four years ago Alpha Delta has been growing steadily. At present the chapter has 6 faculty members, 2 town members, 22 alumni members, 29 active members, and 13 pledges.

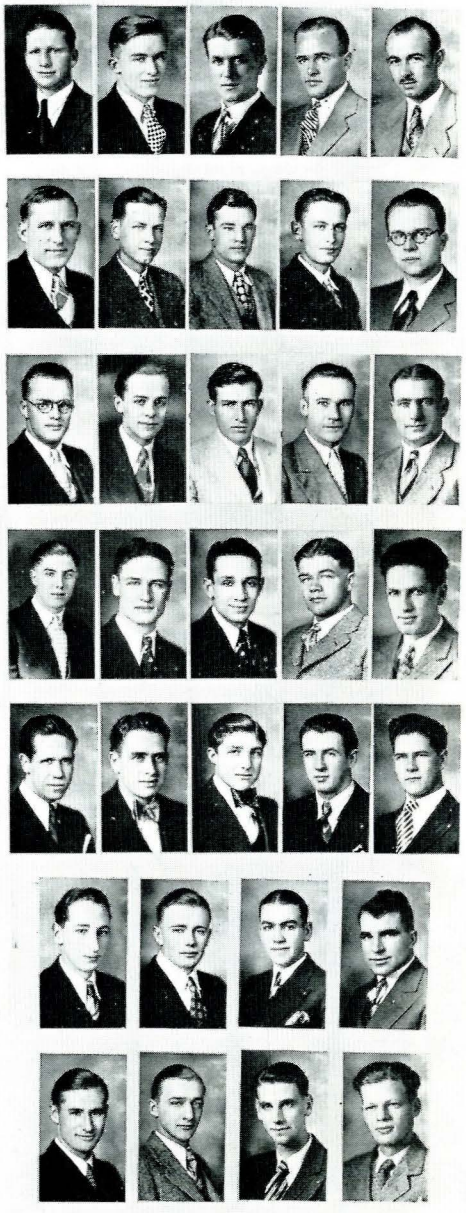

The officers of the fraternity are: Scott Hoskinson, president; Lee Martinell, vice president; Melbourne Parker, secretary; and Alton McIlhattan, treasurer.

The fraternity colors are green and gold and the fraternity flower is the pink rose.

Here's to you, to you Sweetheart,
Sweetheart of Alpha Gamma Rho,
We'll love you true, always love you too
Wherever we may roam;
Our days may not all be sunshine,
But the gray will change to blue;
And then will come fond thoughts of you,
Sweetheart of Alpha Gamma Rho.

Kappa Sigma

The H. O. M. Club was founded January 1, 1922, for the purpose of affiliation at a later date with some large national organization. A house was rented during the summer of 1922 on West Olive and occupied by the group until the autumn of 1923 when a larger home became necessary and the organization moved to a rented house at 319 South Black Avenue.

Following the granting of an informal petition by the national fraternity of Kappa Sigma in May, 1925, a formal petition was prepared and presented to the national in the autumn of 1925. The charter as Delta Lamba Chapter of Kappa Sigma was granted May 23, 1926, and installation held September 20 to 22 of the following autumn.

Continuing the policy of expansion and strengthening, the home at 409 South Grand Avenue was deemed

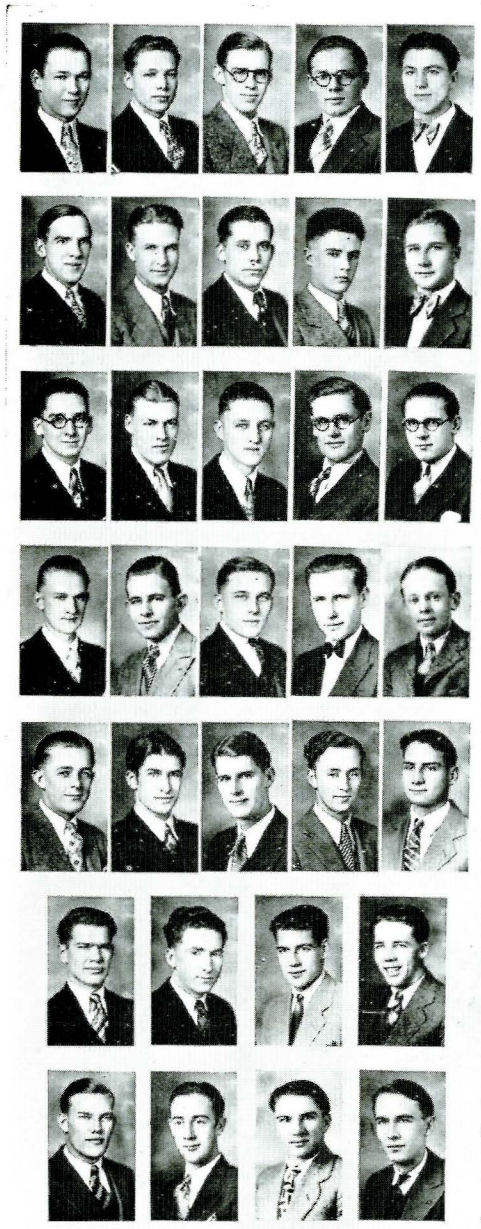

unsuitable to the needs of the group and plans were drawn up during the year of 1927 for a new house to be built near the college. Accordingly, the site at 1120 South Sixth Avenue was selected and the house built during the summer of 1928. The structure was erected at a total cost of $25,000 and was made possible by the efforts to three faculty members of the organization, Eric Therkelson, J. R. Parker, and W. M. Cobleigh.

At the present time Delta Lambda has 47 active members, 19 pledges, 4 faculty members, 4 town members and 54 alumni. The officers of the fraternity are: H. N. Zwisler, president; H. C. Helland, vice-president; J. H. Delaney, master of ceremonies; R. E. Slattery, scribe; and H. H. Mahon, treasurer.

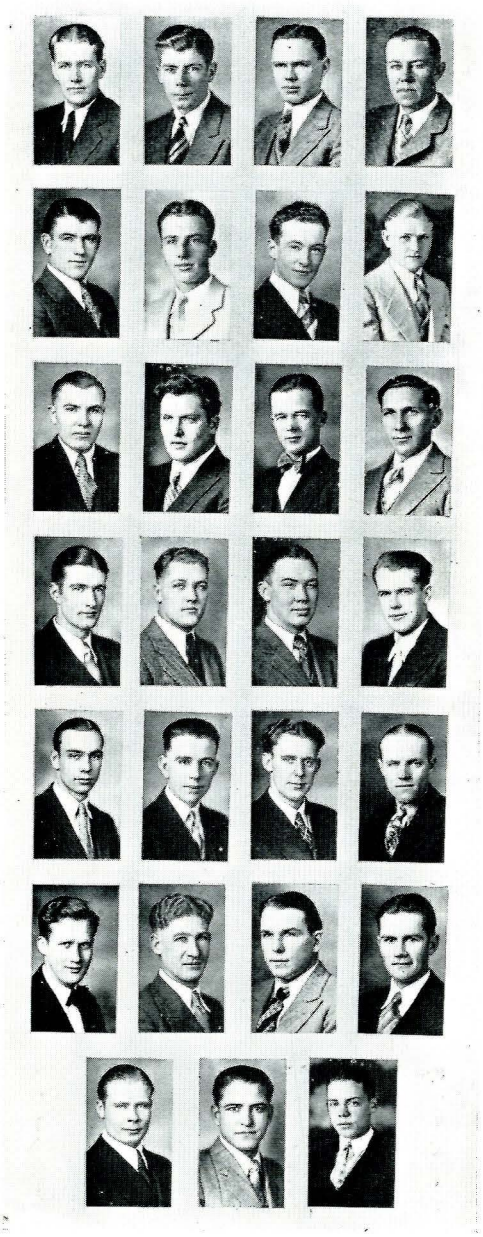

H. N. Zwisler is vice-president of Associated Students and the Fang representatives are H. Moore Tice, Richard Slattery, and John Kaiserman.

The fraternity flower is the Lily of the Valley and the fraternity colors are scarlet, white and emerald green.

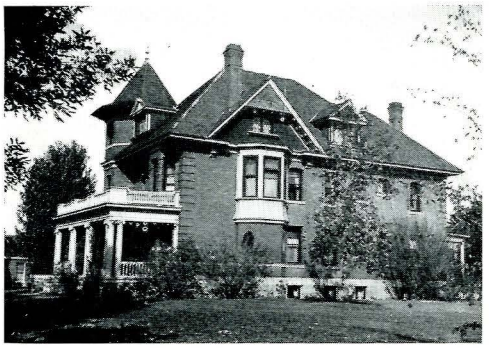

Kappa Sigma queen of friendship,
One deep toast to thee.
We, thy sons, with true devotion
Pledge our hearts so free.
Marching o'er the starlit campus,
Hear the song we raise.
And our Crescent and Star we will
fling afar
In Kappa Sigma's praise.

Pi Kappa Alpha

Gamma Kappa chapter of Pi Kappa Alpha had its inception at Montana State College in the local Lambda Phi. The local was founded March 17, 1923. Its founders were four in number. These men had foresight enough to see that another organization would have room at the institution and feeling the need of such an organization to supplement the unsatisfactory existing group, they founded Lambda Phi. Lambda Phi existed as a local on the campus for five years and on November 24, 1928, it became Gamma Kappa Chapter of Pi Kappa Alpha.

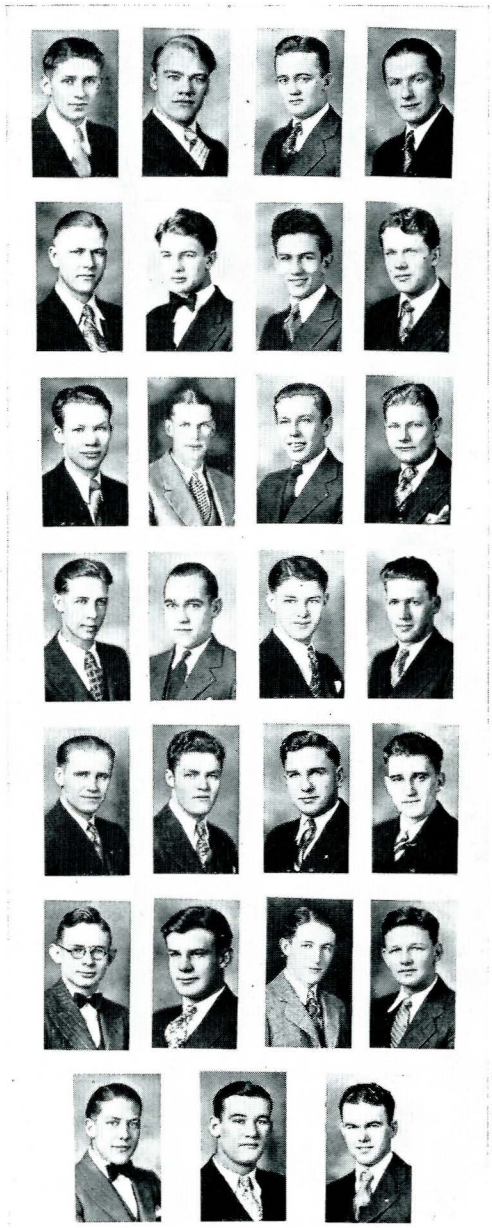

Pi Kappa Alpha fraternity was founded March 1, 1868, at the University of Virginia. One of the six founders of the fraternity is still living. The fraternity has enjoyed a steady growth and now there are 78 chapters scattered throughout the country. An interesting point in the expansion of Pi Kappa Alpha was that it did not expand above the

Mason-Dixon line until after 1915. The flower of the fraternity is the lily of the valley and its colors are garnet and gold.

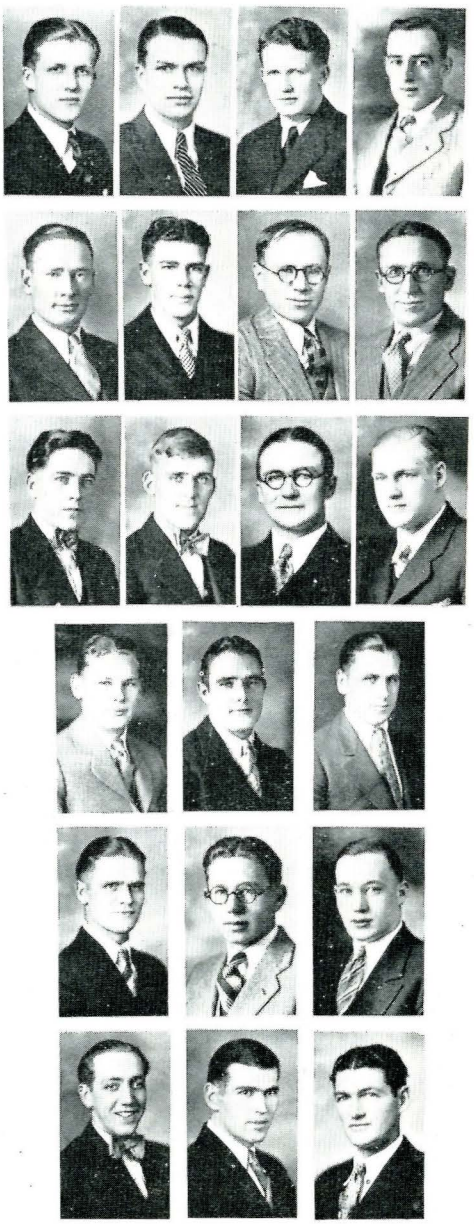

Pi Kappa Alpha at Montana State College has 42 active members. There are 4 members on the faculty, 2 in town and 50 alumni. The officers of the group for the current year are: Robert Gjullin, president; Leonard Larson, vice-president; Wallace Harrity, secretary; Edwin R. Becraft, correspondent; and Wendall Wall, guard.

In campus activities, Pi Kappa Alpha has furnished the president of the sophomore class, Robert Long; one member of the Septemviri, Robert Dull; cadet major in the fall quarter in Dexter Moser; three members of the Fang organization, Jack Erkkila, Carl Wall, and James Watters.

When the night birds are singing
their love songs,
And you sit by the firelight and
dream,
There's a thought of a girl puts
your brain in a whirl,
For her eyes like the bright embers
gleam;
She's as fair as the heavens above
her,
She is true to the trust that she
bears,
For, though, she is far away,
She'll be yours some sweet day,
She's the Dream Girl of Pi K. A.

Omega Beta

Omega Beta, the third fraternity to be organized at Montana State College, was founded May 14, 1915, as the Anatnom Club. The club was organized as a protest against abominable living and boarding-house conditions. In the fall of 1915 the Anatnom Club was named the Omega Beta fraternity. The sixteen charter members were Anker L. Christensen, Charles W. Cook, Roland Brooks, Hilmer L. Dahl, Renan DeCamp, Ralph Jorgensen, Raymond Kuhns, Carl Borton, Roy C. Hagen, Robert Clarkson, David S. Thomas, and Homer Taylor.

Sixty-two of the sixty-seven members answered the call to the Colors when America entered the World War, a large number of whom became officers in the army. This depletion necessarily caused the fraternity to become practically inactive until the members returned from military service.

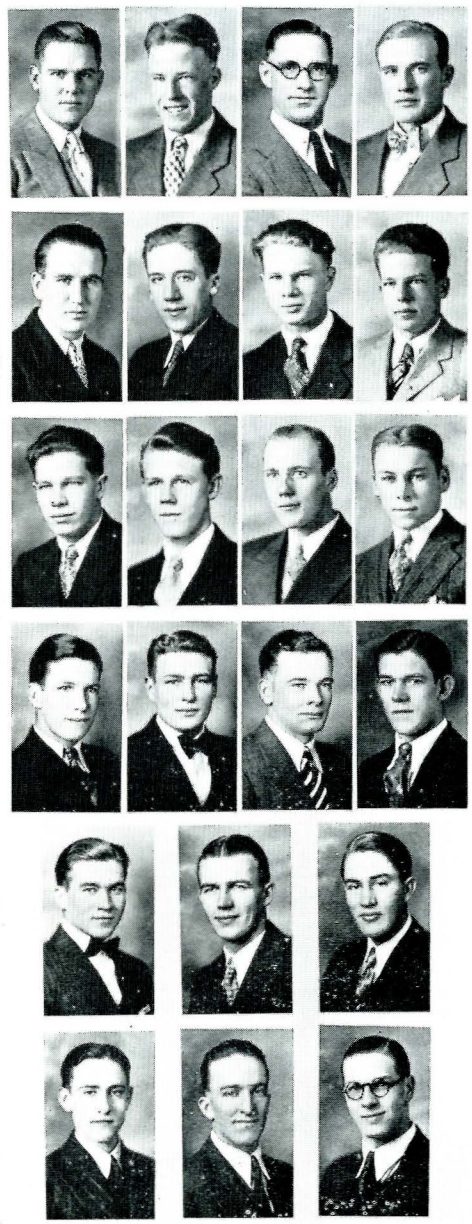

In 1919 the fraternity was reorganized with a strong and well organized alumni association, including a board of directors to assist the active chapter in an advisory capacity and in matters of policy and administration. In 1928 the fraternity purchased several lots adjoining the campus with the expectation of building in the future.

The officers of the fraternity are: Jack N. Conrady, president; Clarence Connell, vice-president; Elwin G. Richards, second vice-president; James A. Watters, steward; James C. Deeney, corresponding secretary, and Sam R. Kirkes, social secretary. At the present time the fraternity has 39 members, 7 pledges, 105 alumni, 5 town members, and a faculty member.

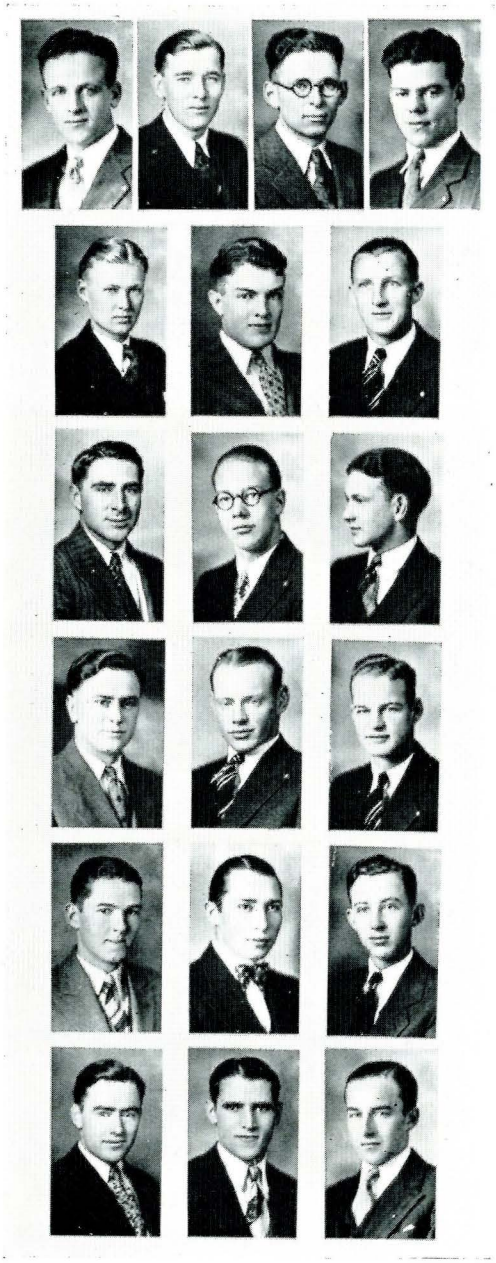

Elwin G. Richards and Jack N. Conrady are members of Les Bouffons. John Howe, Eric Blannin and Ernest Myers are members of the Fangs. Harrell Renn is captain of the track team, and Elwin G. Richards is commissioner of finance in the Student Senate.

The fraternity flower is the red rose and the colors are green and gold.

Omega Beta, our fraternity,
We are united in our love for thee.
Constant, undying may our friendship be,
Omega Beta, Hail to thee.
Working together for a common goal,
Giving the best of heart and soul,
For we are there to win
New laurels for the green and gold.

Beta Epsilon

Beta Epsilon was founded May 10, 1919, by Lester Bachman, Wesley Brown, Ralph Kenck, Oliver Pouder, Ambrose Ryan, Thomas Shoebotham and Eugene McLaughlin with the intention of petitioning Sigma Phi Epsilon. In 1923 this petition was withdrawn and the fraternity petitioned Phi Delta Theta immediately. There were only three fraternities on the campus when Beta Epsilon was founded and the increasing enrollment at Montana State College led these men to decide there was need for a new fraternity to care for the many non-fraternty men of high standing on the campus.

The first home of Beta Epsilon was at 2 East Babcock. This home was temporarily leased until arrangements could be made to have

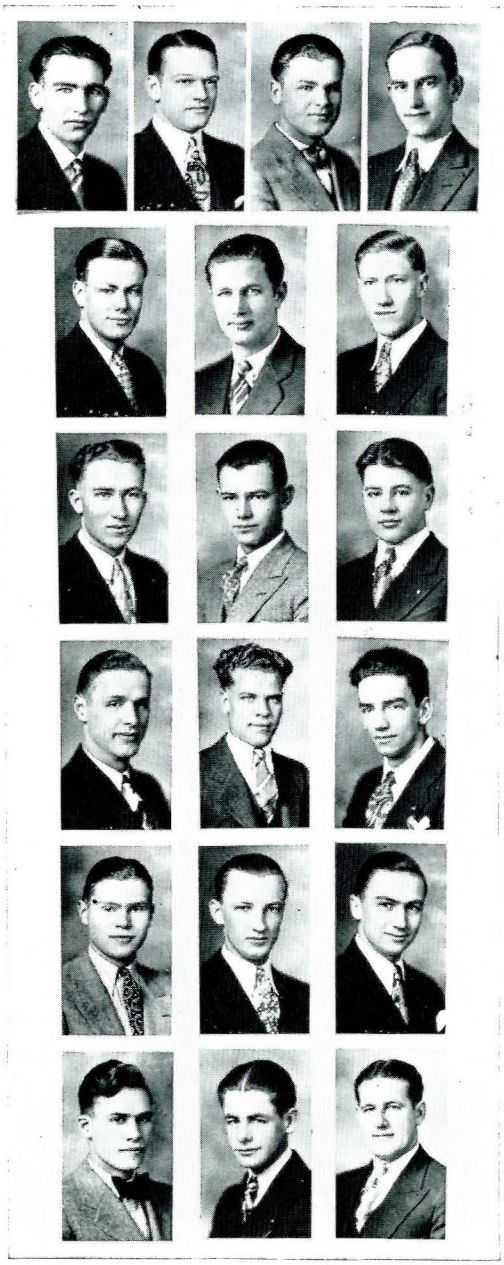

a permanent one. In the fall of 1920 Beta Epsilon purchased the present home at 501 South Grand Avenue. Additions and repairs on the house were made through the efforts to the members.

At present Beta Epsilon has 28 active members, 9 pledges, and 138 alumni. Professor Tallman and Professor Burke are the honorary faculty members, and Joe Livers, Edward Fuller, Ralph Kenck, M. A. Belland, Glenn Sands are the alumni faculty members.

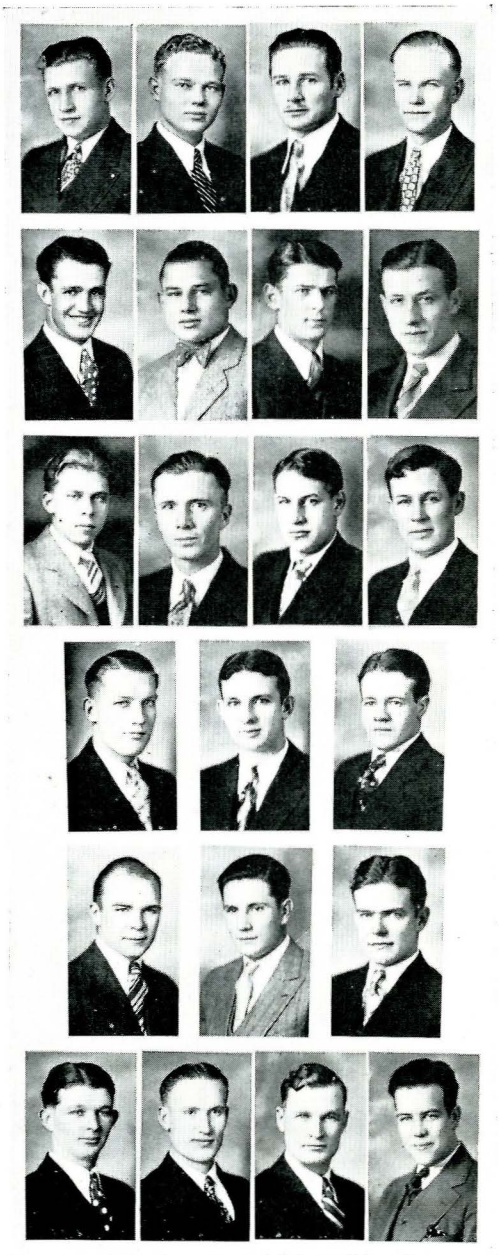

The officers of the fraternity are Chester Nelson, president; Lewis Barnes, vice-president; Raymond Ferguson, secretary; Milo Sands, treasurer; George Graham, corresponding secretary; Jordan Burk art, historian; Adolph Roseneau, guard, and John Tolson, house manager.

Frank Ralph, commissioner of dramatics, and Lewis Barnes, commissioner of demonstrations, are members of the Student Senate. The Fang representatives are George Graham, Raymond Ferguson, and Raymond Hixon. Lewis Barnes is a member of Les Bouffons.

The fraternity colors are black and white.

Amigo

The Amigo fraternity is a local social group living at 201 South Third Avenue. This group was founded in the fall of 1923 by two members of the Alpha Tau Omega fraternity who were anxious to see their national represented on the campus at Montana State College. These men were John Loy, formerly of Washington State College, and Wilbur Vaughn, who had previously attended the University of Montana. Others who were interested and became charter members of Amigo were: LeRoy Powers, Dave Savage, Alvin Cleveland, Grove Dutton, Lois Newman, Luke Dagnall, Lysle Wood, Lawrence Wilson, Robert Tootell, Al Constans, and Ray Miller.

"Amigo," rather than some Greek letter, was adopted as the name of this organization because at that time Alpha Tau Omega and many other national social fraternities looked with disfavor upon the use

of Greek names by local petitioning groups. Amigo is the spanish word for friend.

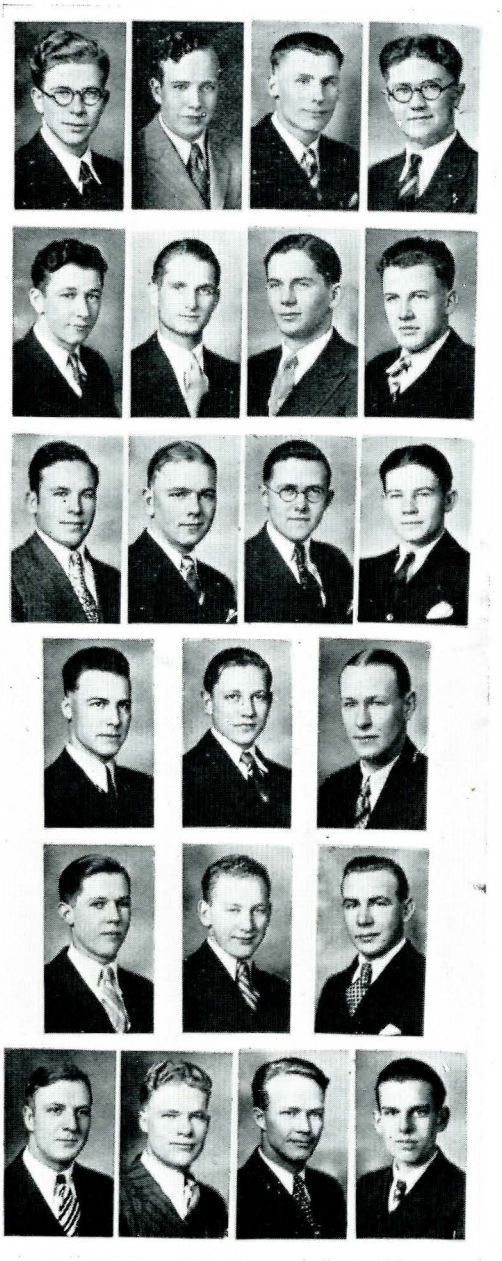

At the present time there are 36 active members and 10 pledges. Twenty-six alumni of Amigo have received their degrees at Montana State College and most of them are employed in Montana. A number of alumni, however, are located with industrial firms in the Atlantic states, and some are in business on the Pacific coast. Of the four faculty members of this group, only one, R. B. Tootell, is on the campus at the present time. A. D. Jones, former varsity track and freshman coach; F. M. Weida and J. Wheeler Barger, the other three, have gone to other institutions.

The fraternity officers are: Albert Greiner, president; Robert Jones, vice-president; Howard Freeman, secretary; George Hart, treasurer; and Leonard Wing, house manager. Most of the members are taking part in activities along with their academic work. Leonard Wing is chairman of Septemviri, editor of the Exponent, and assistant editor of the Montanan. Arthur Buckley was elected in February to succeed Harold Greiner as Duke of the Fangs.

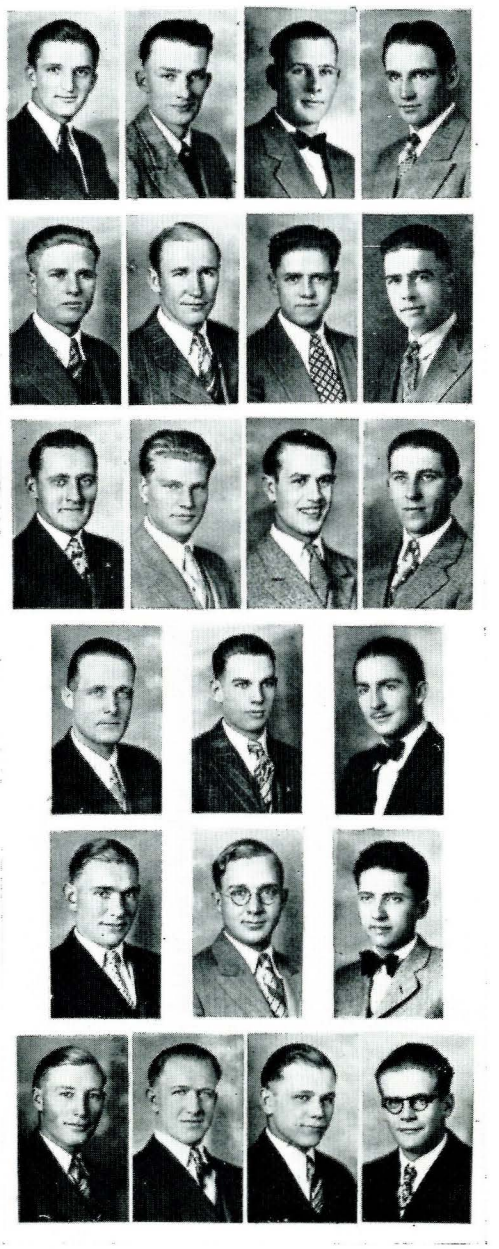

The fraternity flower is the pink carnation and the colors are crimson and gray.

So let's cheer for our brothers true
Let's cheer for the gold and blue
A cheer for her who wears our crest
Amigo, here's to you.

Delta Tau

During the years 1917 to 1924 a strong antifraternity feeling developed at Montana State College, which resulted in the formation of an independent organization called Order of the Barb.

The Za Dale Club was formed from the members of the Barb organization, and for a time existed as an independent club. Some of the members, feeling that a spirit of antagonism was growing against the club, decided that there was no need for such an organization on the campus.

In the spring of 1926 the Za Dale Club was dissolved by an overwhelming vote. A few of the most active men, such as James Thompson, Paul Clark, Everett Crumley, William Keith, Emmett Coon, B. W. Hollensteiner, James Holmes and Francis Kelly, brought about the dissolution and organized a new fraternity named Delta Tau.

INTER-FRATERNITY COUNCIL

The Inter-Fraternity Council was founded in October, 1919, by representatives of all the fraternities and sororities on the campus. The sororities organized their own governing body on May 9, 1923, and was named the Pan Hellenic Council.

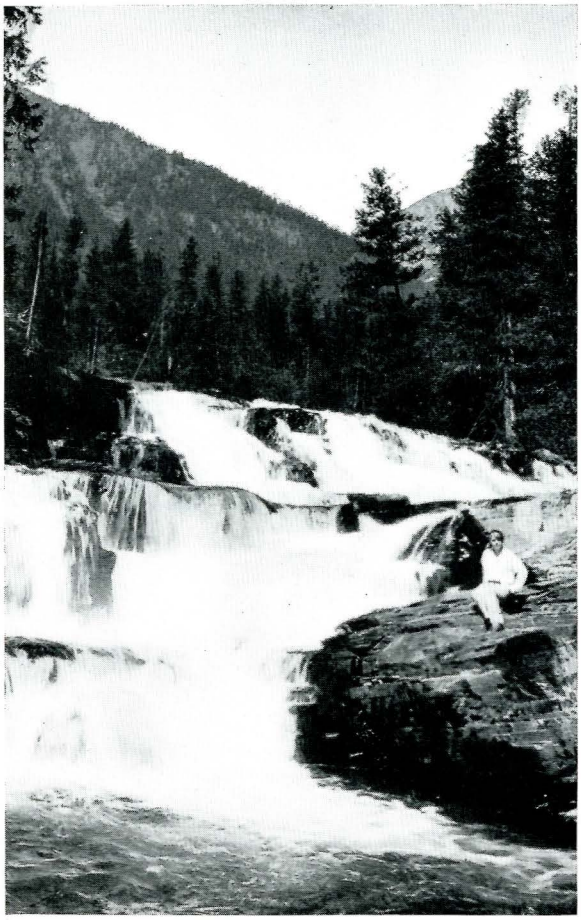

The Inter-Fraternity Council is composed of the president and vice-president of each men's social fraternity on the campus. The advantages of co-operation were apparent and fraternities organized this body to stimulate effort in student activities, to advance the interests of their college, and to promote unity among the fraternal organizations for their individual and collective benefit.

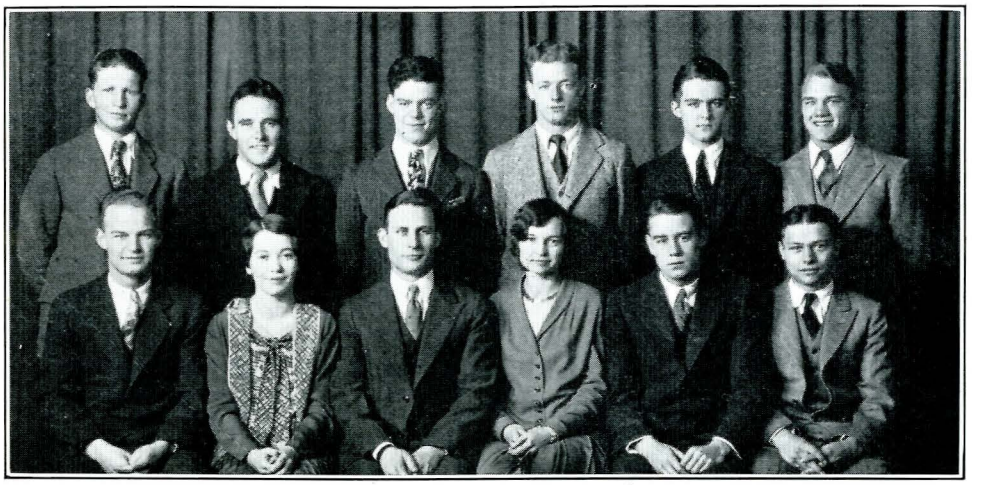

The duty of the council is to act as a governing body with general control over men's Greek letter organizations. The council has been of great assistance in settling any problems that come up among the fraternities, as well as bringing the fraternities into a closer relationship for their mutual benefit.

One of the duties is to make rules pertaining to rushing and pledging. The closed system of rushing was adopted in 1928 and has been used for two years. This year the council created a standing committee to investigate the methods of rushing used at various colleges in an attempt to get a plan satisfactory to both the fraternities and the rushees.

The officers are Bernard Brown, president, and Jack Conrady, secretary-treasurer. No two officers may be chosen from the same fraternity.

The Inter-Fraternity Council sponsors an annual dance in the spring quarter, to which the members and pledges of all the fraternities are invited. This dance serves to bring the groups into closer relationship.

BERNARD BROWN
President A. S. M. S. C.

PRESIDENT OF ASSOCIATED STUDENTS

"Our common goal is an all-around development, which should be our primary purpose here at College. In this rounding-out process, scholarship is naturally predominant, because that is the reason for this entire organization, the College; but in order to prevent excessive study developing a one-sided college graduate, we must participate in school activities.

"It is the wish of the Student Senate to have every student interested in at least one activity a quarter. This condition will insure a school spirit while overcoming any tendency toward unbalanced education. A great deal of personal satisfaction will be reaped by the student who faithfully follows this course throughout his college career."

BERNARD C. BROWN.

NORMA BECK
President of A. W. S.

PRESIDENT OF A. W. S.

"As the year closes we may note certain milestones of achievement among the various activities of the A. W. S., and those women's groups fostered by it, which are commensurate with the general tendencies of advancement throughout M. S. C.

"The efforts of the administration body of our organization have centered in the development of a point system, the purpose of which is to affect a better distribution of activities among the women by encouraging many to participate, and preventing the over-ambitious from being burdened.

"The Iris Gardens were sponsored by Associated Women Students this year and achieved only with the willing co-operation of the students and faculty of Montana State College. This project is as yet unfinished, and it is the hope of this organization that continued interest and enthusiasm will carry the work forward in the year to come."

MARY O'LEARY

In 1918 an honorary organization of senior women called Cap and Gown was started on the campus, consisting of six girls who had done outstanding work during their college career. On April 8, 1927, Cap and Gown became a member of the national organization known as Mortar Board. The members of Mortar Board are chosen on Woman's Day from the junior class. They are selected because of outstanding achievements in scholarship, leadership and service.

The members of Mortar Board carried on an extensive program the past year. During the fall quarter they called on women living outside Hamilton Hall or of organized houses. They also entertained at a tea for the women who had transferred from other schools. The Ladies' Choice dance was started by Mortar Board in 1927 and has now become an annual event. Mortar Board, this year, undertook the study of prominent women of all lands.

Les Bouffons, an honorary social society, was organized in 1900. Its members are chosen from among the upperclassmen, their selection being dependent upon character, social qualities and popularity. The organization holds its meeting on the first Sunday of each month at one of the various fraternity houses, for the purpose of discussing and outlining the social functions that are under its sponsorship.

Les Bouffons take a leading part in the social life of the college. The society acts as sponsor for many of the after-the-game dances which are so popular with M. S. C. students, and which help to fulfill one of the society's primary purposes, the promotion of good-fellowship among the students. Les Bouffons' Formal is an annual affair which comes in the spring quarter as a fitting climax to the organization dances of the year.

Phi Alpha Tau is an honorary speech arts fraternity founded in 1907 and has, at the present time, fourteen chapters, located at various universities and colleges throughout the country. The purpose of the organization is to promote dramatics, oratory and debate. Members are chosen from among those who have won distinction in some public activity such as participation in inter-collegiate debate, or who have had a part in a dramatic production. Montana Rho of Phi Alpha Tau was nationalized in 1922.

National Eurodelphian Literary Society was founded in 1918 at Kansas City. The purpose of the society is to improve its members in literary, musical and artistic appreciation. In 1926 Alpha Epsilon Theta petitioned and was admitted into National Eurodelphian as Eta Chapter.

Eta Chapter has been fortunate the past year in having many of the faculty members talk at their bi-monthly meetings. Musical programs have been furnished by the members at many of the meetings.

Phi Kappa Phi is composed of graduate and under-graduate members of all departments of American universities and colleges. Its prime object is to emphasize scholarship and character in the thoughts of college students, to hold fast to the original purpose for which institutions of learning were founded, and to stimulate mental achievement by the prize of membership. As secondary objectives, it seeks to bind more closely the alumni to their Alma Mater, to furnish an additional tie of college friendship, and to encourage the product of noble thought in whatsoever direction extended.

Tau Beta Pi is a national honorary engineering fraternity, whose purpose is to foster a spirit of honor and high attainment among the students majoring in engineering. The national fraternity was founded at Lehigh University in 1887. The Montana Alpha chapter was installed in 1926.

To be eligible to Tau Beta Pi an engineering student must be ranked among the upper fourth of the senior class or the upper third of the junior class.

Alpha Zeta is a national honorary agricultural fraternity, having for its purpose the fostering of interest in agricultural development. The Fraternity was founded at Ohio State College in 1897. To be eligible for membership in Alpha Zeta a candidate must have completed one and one-half years of his four years' college course, must have an average of grades that will place him in the upper two-fifths of his class, and must be possessed of the qualities of character and leadership.

Montana Chapter of Alpha Zeta has for its principal activities the direction of high school agricultural contests and projects of various agricultural developments. The organization selects each year the outstanding freshmen in agriculture, whose name is engraved on the award cup in the Agriculture Building.

Pi Kappa Delta is an honorary forensic organization. It was founded at Ottawa University in 1913, and now has an enrollment of 119 chapters. The purpose of this organization is to foster the college forensics of debate, oratory and extemporaneous speaking.

Every year the Montana Beta chapter is active in sponsoring the freshmen-sophomore debate and forensic contests with other schools, and in entertaining visiting teams. Last year the organization purchased a silver loving cup to be presented to the best freshman debator each year. Any fraternity winning it three consecutive times through its freshman debators may retain it permanently.

Scabbard and Blade is a national honorary military fraternity established for the purpose of bringing the students into closer contact with the Montana State College R. O. T. C. unit, and to offer the ideals of military practice to the members. Scabbard and Blade was founded at the University of Wisconsin in 1904 and has since been installed at practically all of the American educational institutions supporting an R. O. T. C. unit. The M. S. C. chapter was installed in June, 1925. The members are chosen each year from among those taking the advanced courses in Military Science on the basis of rank, personal qualities and leadership. Scabbard and Blade sponsors the annual Military Ball and each year presents marksmanship medals to the two high-point men on both the freshmen and sophomore rifle teams.

Alpha Omicron Chapter of Alpha Chi Sigma, professional chemistry fraternity of M. S. C., had its foundation in Alpha Pi, a local organization of chemistry students. The local chapter petitioned Alpha Chi Sigma in 1924, and Alpha Omicron of Alpha Chi Sigma was installed on January 26, 1926.

For the year 1929-30 Alpha Omicron brought Dr. Harrison Howe to M. S. C. for a series of three lectures on the science of chemistry. The chapter was also instrumental in sponsoring an award plaque to be placed in the Chemistry Building, on which will be engraved each year the name of the freshman majoring in Chemistry or Chemical Engineering who makes the highest scholastic average in the regular freshman curriculum.

In the year 1907, the M. S. C. Regimental Band organized a "Band Club," with Fred Homann as first president and Charlie Fisher as secretary. It is believed that this was the first organization of its kind in the United States. The ultimate aim of the organization was to create a national organization such as that which now exists. The director, Louis L. Howard, was instrumental in its organization. In 1920 the local club was installed into Kappa Kappa Psi.

Tormentors is an honorary dramatic club, organized for the purpose of putting on plays for college and Bozeman audiences. It is the aim of the organization to sponsor one play every quarter. Any student who has taken a major part in one three-act play is eligible for membership.

The past year was a very successful one for the organization. The club was very fortunate in having Mr. Bert Hansen as director. Under his competent direction the play, "The Doll's House," by Ibsen, was given the fall quarter. During the winter quarter, Mr. Hansen directed Barrie's "Mary Rose." It is the desire of Tormentors to foster a keener interest in dramatics at Montana State College, and they are endeavoring to produce high-class plays, which will be of value to everyone.

Pi Delta, a local honorary journalistic fraternity, was organized in the spring of 1929, to promote excellence and to stimulate interest in college publications, as well as to give credit and recognition to those who have done good work. Eligibility requirements are two years' work or its equivalent on the Exponent or on the Montanan. New members are chosen each spring. As their contribution to M. S. C. publications, Pi Delta intends to publish a Razz Sheet each year.

Iota Pi, honorary chemistry fraternity for women, was organized at Montana State College in March, 1929, in order to encourage a professional attitude among the women majoring in chemistry and to keep them acquainted with current events in the field of chemistry.

Meeting programs are confined to discussions and reports of particular fields of applied chemistry. This year Iota Pi aided in financing Dr. Howe's trip to Montana State College by giving a benefit bridge party. Through this organization social contact and a more complete understanding between the chemistry faculty and students are effected.

The Engineering Council is a governing and advisory body composed of representatives elected to the Council by the different Engineering Departments of the college.

The purpose of the organization is to foster better relations between the different engineering groups on the Hill, to govern the policies concerning engineering in general and to act in an advisory capacity to the Dean of Engineering.

Meetings are held by special arrangement and are called by the Dean of Engineering on such occasions when co-ordination between the several departments is required.

The Engineering Physics club was organized in November, 1927, by the students and faculty of Engineering Physics to foster and promote the interests of the students of Engineering Physics and to further the spread of knowledge in this field. Its members are chosen from the graduate and undergraduate students in the Engineering Physics course. Faculty members and engineers of distinction may be elected to an associate membership in the club. At present the club has fourteen student members and three faculty members. The group meets once every two weeks in Montana Hall for the purpose of transacting club business and of discussing developments in the field of physics.

Mrs. Olga Ross Hannon

Miss Jane Moss

Miss Emma Starr

OFFICERS

Kathryn Kellett - - - - - - - - - - - - - - - *President*

Helen Oliver - - - - - - - - - - - - - - - *Vice-President*

Dorothy Schneider - - - - - - - - - - - - - *Secretary*

Every student majoring in Applied Art is a member of the Art Club, which was organized in 1900. The club meets every two weeks for the discussion of art subjects.

It is the object of the club to stimulate a better appreciation of art, not only among its own members but on the campus at large. Every year it is responsible for bringing many art exhibits to Montana State College.

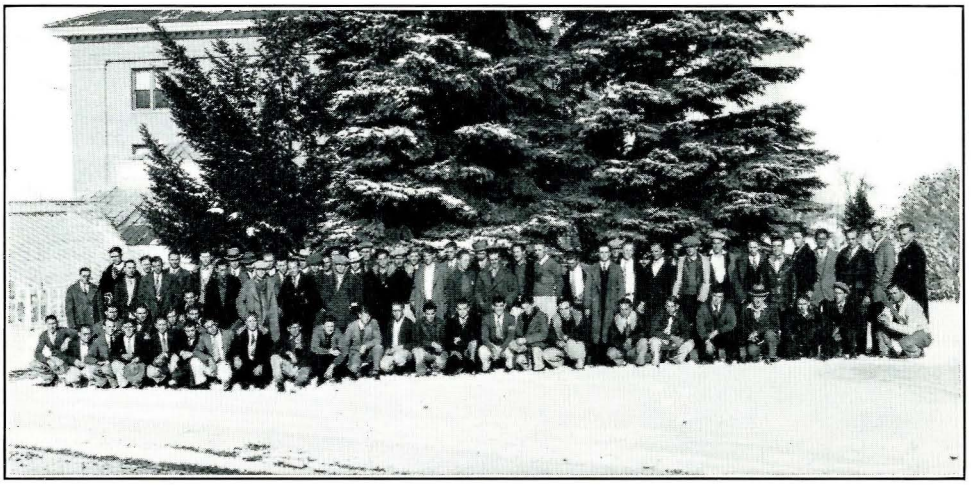

HOME ECONOMICS CLUB

OFFICERS

HELEN ALLEN - - - - - - - - - - - - - - - - *President*
AMELIA HINCHCLIFF - - - - - - - - - - - - - *Vice-President*
MILDRED ERB - - - - - - - - - - - - - - - - *Treasurer*
ALICE TAYLOR - - - - - - - - - - - - - - - *Social Chairman*

The Home Economics Club, organized at Montana State College in 1895, includes in its membership every student and faculty member of the home economics department. The club fosters interest in home economics generally, and strives to keep abreast of the work done nationally in Research Extension.

This year's programs included two national speakers of note, educational movies and department reports. A very successful food sale was held in December. Funds were raised for redecorating and furnishing a room in Herrick Hall. A representative was sent to the National Convention in Boston by the Home Economics Club.

AGRICULTURAL CLUB

OFFICERS

HERBERT ZWISLER	*President*
CHARLES JARRETT	*Vice-President*
HORACE BOLSTER	*Treasurer*
VIRGIL HURLBURT	*Secretary*

The Agricultural Club was founded at Montana State College in 1920 for the purposes of creating a wider interest along agricultural lines, of promoting wider acquaintance among students of agriculture, and of providing discussions on up-to-date practices by leaders in agriculture.

The club holds its meetings in the Agricultural Assembly or in the Engineering Assembly. On "Ag Day" the club sponsors a number of contests such as livestock judging, grain and hay judging, and dairy products judging. During the winter quarter the Short Course students meet with the club. The "Ag Ball" has become an annual event. The Agricultural Club is becoming stronger each year as its membership increases.

JAMES FRANKLIN	LILA FAIRBURN	RETA BROWNBACK
FRED HAIDLE	ELIZABETH MAYNARD	HERBERT LEWIS

The Alumni 4-H Club was organized in January, 1929, for the purpose of extending 4-H Club work through the state by helping county agents and extension agents. It is also the object of the club to advertise Montana State College through the outside contacts of this character.

The club has been endeavoring this year to secure college and high school credits for those who act as local leaders of 4-H Clubs, and to be of service in the state whenever needed.

American Society of Mechanical Engineers

HONORARY CHAIRMAN

Professor Eric Therkelsen

OFFICERS

James Watters - - - - - - - - - - - - - - - *President*
Harvey Lott - - - - - - - - - - - - - - - *Vice-President*
Gerald Pessman - - - - - - - - - - - - - - *Treasurer*
Cleon Norcutt - - - - - - - - *Engineering Council Representative*

The M. S. C. branch of the American Society of Mechanical Engineers is organized for the purpose of promoting interest in engineering and a better understanding of engineering practice.

The Society is open to all students registered in Mechanical or Industrial Engineering. During 1929-30 the group consisted of thirty-five student members and three faculty members from the Mechanical and Industrial Engineering Departments.

Meetings are held for the transaction of such business as may come before the organization. Moving pictures, illustrating engineering practice and recent development in this field are obtained and presented by the Society at its meetings.

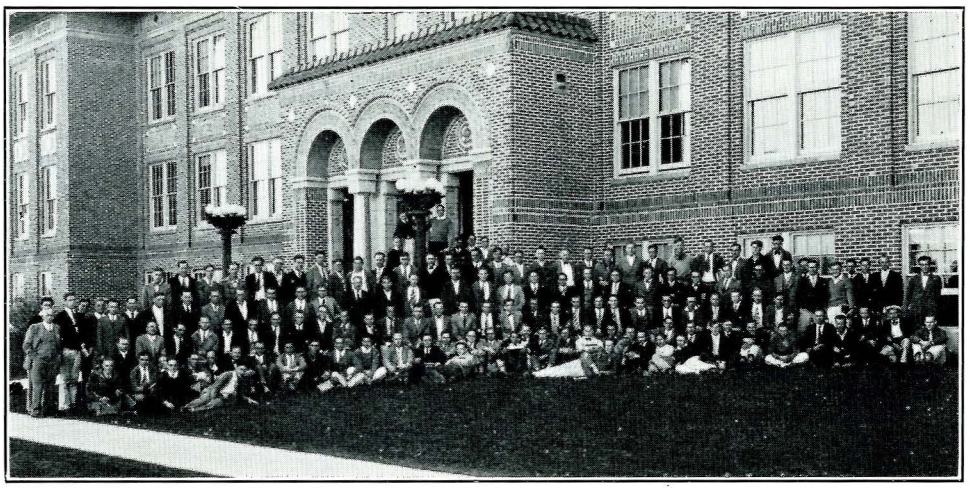

Civil Engineers' Club

OFFICERS

Henry Eagle	*President*
Murel McGrath	*Vice-President*
Joseph Sonntag	*Secretary*
Henry Helland	*Engineering Council Representative*

The American Society of Civil Engineers is a national society and was organized in 1908. The local section was installed at M. S. C. in January, 1922, having as its members all students registered in the Civil Engineering course. Forty-three students are registered as members of the group.

This chapter has performed several important surveys for the college, and has taken a considerable part in procuring noted speakers to address the student body at the engineering assemblies. The members themselves speak on different topics of interest at the section's meetings, following a schedule prepared by the class advisor. The organization also obtains from its national headquarters a series of photographic slides which are shown at engineering assemblies.

American Institute of Electrical Engineers

OFFICERS

Eric B. Wilson	*President*
Earle Rudberg	*Vice-President*
Otto Van Horn	*Secretary*
Robert Jones	*Treasurer*

The M. S. C. branch of the American Institute of Electrical Engineers was organized in 1906 and became affiliated with the national organization in May, 1907. Members are required to be registered as full-time students pursuing a regular course of study in preparation for the profession of Electrical Engineering. Meetings are held once each week in the Engineering Assembly room. Student papers are presented, business and social matters are discussed, and educational moving pictures are reviewed.

The expressed object of the organization is the advancement and dissemination of knowledge of the theory and practice of electrical engineering, in which the local branch assists by obtaining lecturers of note in the electrical field, and by arousing public interest in this science by its annual Electrical Demonstration and the Electrical Engineers' Dance.

The Newman Club is a national organization to which all Catholic students are eligible for membership. The club received its name from Cardinal Newman, a noted educator, who believed that education consisted of acquiring knowledge for its own ends. Newman Club received recognition as a campus organization at Montana State College in 1917, and in 1925 became affiliated with the national club, which now includes 105 chapters. The purpose of this organization is to foster a spirit of fraternalism and friendship among Catholic students.

Agricultural Judging Teams

Montana State College was represented by three agricultural judging teams at the 1929 Pacific International Livestock Exposition held annually at Portland, Oregon. These teams were chosen from a large number of candidates. Traveling expense, including railway and Pullman fare, was supplied by the contest committee. Other expenses were met by the individual members of each team. Montana's three teams made a higher average score than any other institution.

LIVESTOCK

The livestock judging team tied with California for first place. Each team made a total score of 4,783 out of 5,000 possible points. The team, coached by Prof. Ross Miller, consisted of Leonard Wing, Lee Martinell, Jesse Bequette, Bill Shanklin and Albert Cook. Five northwestern colleges entered teams in this contest. Four of the five members of the Montana team placed among the eight high-point men of the contest. Wing took third place, with the high-point man leading him by only five points. This year was the first time that Montana State has placed first in the livestock judging contest.

DAIRY

Anthony Kinney, Martin Nelson and William Corkins, coached by Prof. J. A. Nelson, won third place in the Dairy Products Judging Contest, also held in connection with the Pacific International Livestock Exposition. The Montana team took second place in milk and ice cream judging. All three members of the team won places among the ten highest men in the meet. The team missed first place in milk judging by four points, and was beaten out of second place in the contest by only five points.

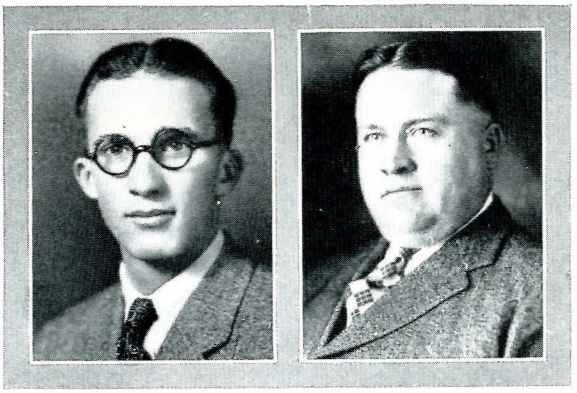

GRAIN

The grain judging team, under the tutelage of Prof. Arthur Post, won

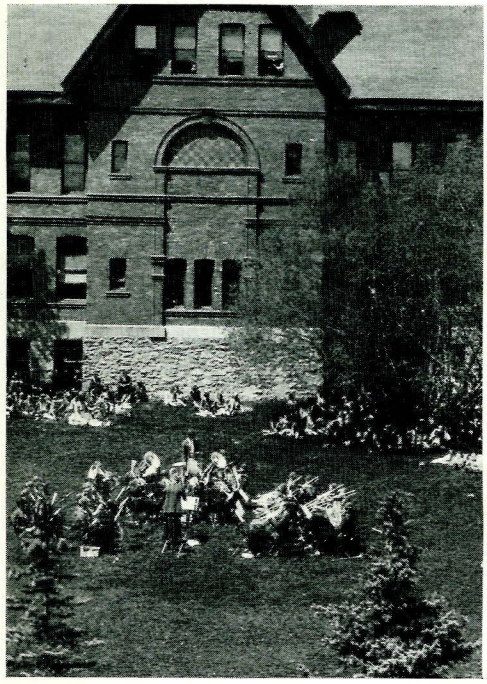

Grain—Coach, Post, Nelson, McIlhattan, Lammers

first place. The team consisted of Oliver Lammers, Alton McIllhattan and William Nelson. They competed in the Northwest Grain Show, held in connection with the Pacific International Livestock Exposition, and directed by officials of the Northwest Grain Supervision Office of Portland. Four schools entered the competition. McIlhattan and Nelson were first and second high point men, respectively. The Montana men made 88.2 per cent of the possible score, which is two-tenths per cent higher than any team has made since 1923, the first year of the Exposition. The past season's victory makes a total of five years out of seven that Montana has carried away first honors.

The College Mixed Chorus, organized in 1912, is open to students possessing voices of good color who are capable of following and reading vocal music. The chorus makes a tour of the state each spring quarter, giving recitals in seven or eight cities. It also gives recitals at music assemblies and on other special occasions, besides singing at Commencement Day exercises.

COLLEGE ORCHESTRA

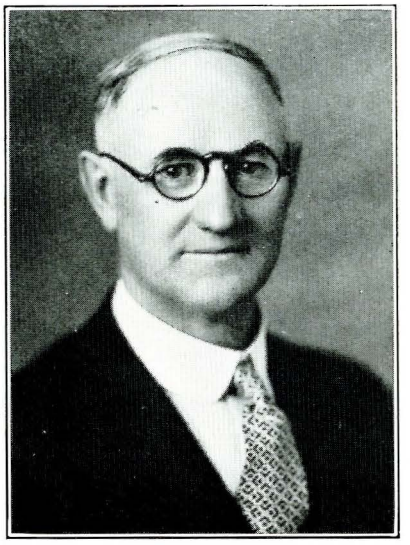

The College Orchestra serves as a cultural organization for those students interested in instrumental music. It offers to them an excellent chance for musical recognition and for development of their talents in orchestral music.

The Montana State College Orchestra has evolved in the last few years into one of the finest musical organizations in the state. Taking its talent from among the students, it has acquired an excellent string ensemble supported by gifted players of other musical instruments. The orchestra gives performances at various public and semi-public college functions. It appears with the college chorus at musical assemblies and also provides music for the Commencement services.

The college orchestra meets for practice once each week under the direction of Mr. Donn Kintz, whose fine work in musical development has brought a great deal in the way of musical appreciation to Montana State College students and to the people of Bozeman.

FORENSICS

PROFESSOR W. F. BREWER

DEBATE COACH

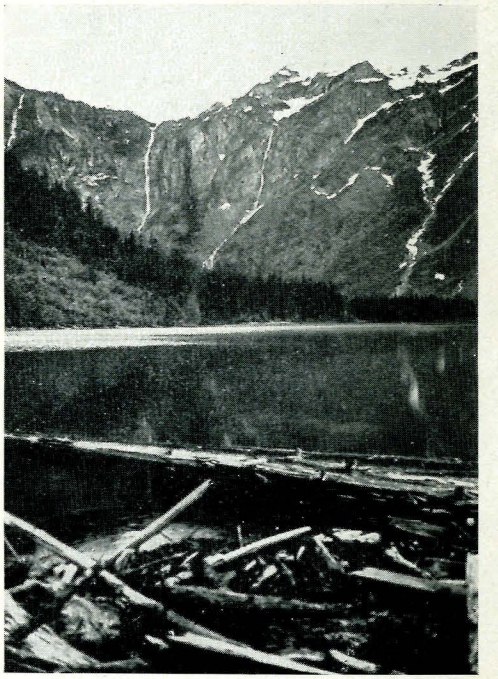

"Forensics in the Montana State College began about 1900. Our earliest contests were with other institutions of the state. No contests were undertaken outside the state during the first few years. By 1910 we were holding contests with Gonzaga University of Spokane, and the Utah institutions.

"The state oratorical contest was established about 1902 and has been maintained nearly continuously since, with intermittent extemporaneous speaking contests.

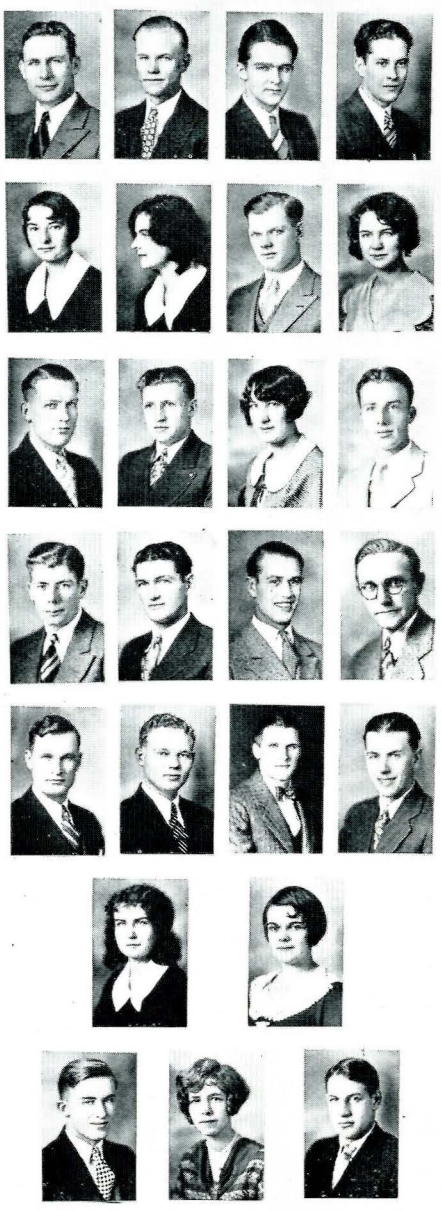

"During the early years expenses of all intercollegiate contests had to be defrayed from the receipts at the door. But when deficits piled up and had to be defrayed by private subscription, the activity ticket system was established and debating was recognized from the first. The first activity ticket, I believe, was $10.00.

"Mrs. Mabel K. Hall, the author of the College Alma Mater Song, and the first coach in dramatics, was also the first regular debate coach. She began her work about 1901. She was succeeded by Edward A. Duddy, now a distinguished member of the University of Chicago faculty. During his four years of service the first debates with outside institutions were established. His place was taken by Irwin T. Gilruth, now a Chicago lawyer. Professor Duddy returned later and remained until 1920. J. Q. Owen succeeded him. It was during his incumbency that the college secured a chapter of Pi Kappa Delta, honorary forensic fraternity, thereby launching upon a career of very widespread relations with other colleges. J. W. Barger was the next debate coach; he helped to organize the Rocky Mountain Orotorical Conference. W. C. Stone took up the forensic work in 1926 and carried it with distinction until 1929.

"The forensic program for 1920-30 included the national forensic tournament at Wichita, Kan., debates with the North Dakota Agricultural College, Brigham Young University, and the Montana Normal College at Dillon at their respective cities. Debates were held in Bozeman with Eastern Montana Normal College, Intermountain Union College, University of Idaho, Brigham Young University, Dillon Normal, and Montana School of Mines. A dual debate for freshmen was held with the State University. The State Oratorical Contest in May was the last important forensic event of the year."

BOBCAT BATTALION

In July, 1920, during the term of President Wilson, a National Defense plan was created. This Act provided for the mobilization of industry and man-power. In this defense chain the R. O. T. C. units were important links.

The object of this defense chain is to train the men of universities and colleges for peace-time preparation of citizen soldiers to take the place of ex-officers and enlisted men. It solves the problem of securing capable leaders for the proper conduct and execution of a successful campaign without enormous expenditures of funds to maintain a sufficiently large number of men in the Regular Army and the National Guard. Leadership fundamentally requires a man of education and sound physique and colleges and universities were the only logical place where the supply could be had. As a result, R. O. T. C. units have been placed in all leading colleges and universities in the United States.

RIFLE TEAM

The 1930 R. O. T. C. Rifle team made a very creditable showing, considering the calibre of the teams with which matches were fired. In making up the schedule no attention was given to the size of the institution or the strength of its team. Consequently, matches were made with no expectation of winning. Such teams included the Universities of Illinois, Nebraska, Maryland, Cincinnati, Oregon, Washington, Culver Military Academy, Oregon State, Kansas State, Cornell and North Dakota State. The latter was intercollegiate champions in 1928 and 1929.

Of the matches with schools of its own class the team won practically all. Victories were recorded over the following: Universities of Idaho, Wyoming, South Dakota and Wichita, Lafayette College and New Mexico State.

Captain Nevins and Captain-elect Erb made the best average scores for the season. Clarence Holst was the best of the new men, and gave Nevins and Erb a close race for team high score. Warren O'Meara, another first-year man, made an excellent showing after a slow start.

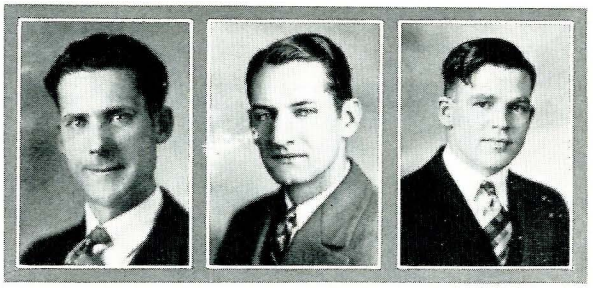

SCHUBERT DYCHE
Director of Athletics

COACH DYCHE

Schubert Dyche again conducted his Bobcats to victory. This is the second year Dyche has been head coach at M. S. C., and the victories to his credit prove him worthy of the position. The football team, though not winning all of its games, owes much to the coach. Dyche directed the squad to win the State Championship, as well as other victories outside of the state. As coach of the Bobcat basketball squad, Dyche has shown his abilities. The consecutive winning of the Rocky Mountain Conference has won the coach national recognition. The department has been successful financially and the outlook for the future is favorable.

The coolness, strategy and humor with which Dyche coaches his teams commands their respect and admiration. The sportsmanship he shows and the successes he has had insures him future honors in the coaching field.

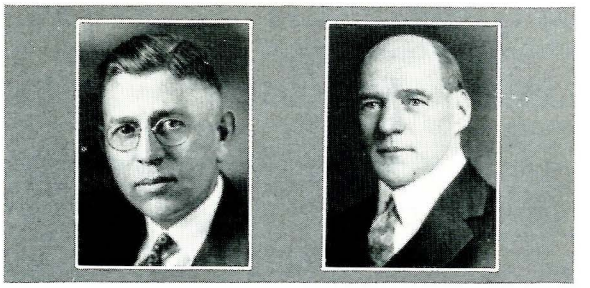

ELLIS ADAMS DOLAN

ATHLETIC COUNCIL

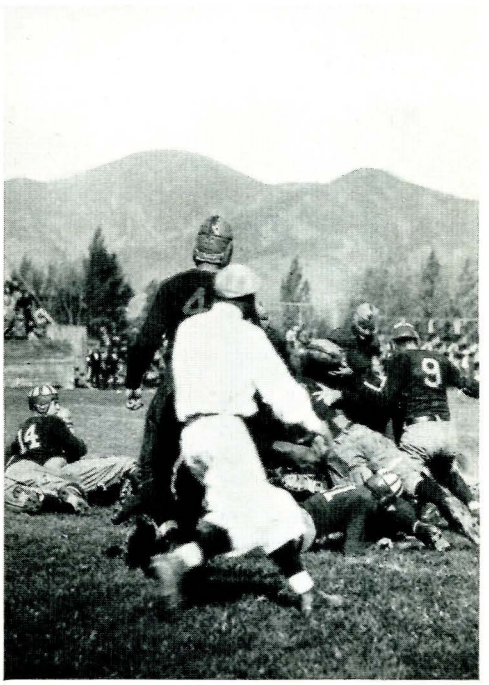

Athletics at Montana State College are directed and supervised by a Board known as the Athletic Council. This Council consists of six members, as listed: Professor Dean B. Swingle, chairman; Professor Eric Therkelsen, faculty representative and treasurer; Schubert Dyche, director of athletics; Vincent Dolan, alumni representative; Ashworth Thompson, commissioner of athletics from the Student Senate; and the manager of the seasonal sport then in function. The Council acts as a regulatory body, whose purpose is to direct and further the interests of athletics for the college.

ASSISTANT COACHES

Montana State College is fortunate in having several able assistant coaches. Bob Adams from Knox College coaches freshman football and the track squad in the Spring. Pat Dolan, who graduated from Montana State, is acting trainer and coaches boxing and swimming. D. B. Swingle is coaching the wrestling squad. H. P. Ellis has charge of the Physical Education and Gymnastics.

THERKELSEN SWINGLE

FOOTBALL

DYCHE
Coach

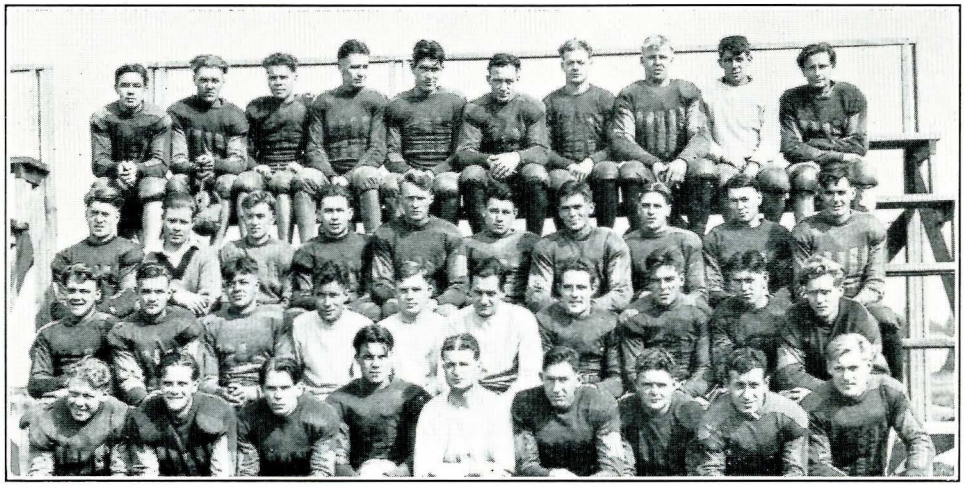

FOOTBALL 1929

About 40 men reported for Coach Dyche's early football camp last fall. That number included several last year's letter men. Also a goodly number from the Frosh squad of the previous year reported for this pre-season work-out.

CENTERVILLE

The Bobcats first battle was with Centerville, an independent team from Butte. The Bobcats took the game by romping over Centerville by the one-sided score of 26 to 0. Wylie, DeFrate, Kleffman, and O'Leary were a combination which the Butte boys found impossible to stop. However, Centerville put up a good fight, with Grady seeming to be their best man.

Score: Bobcats 26 Centerville 0.

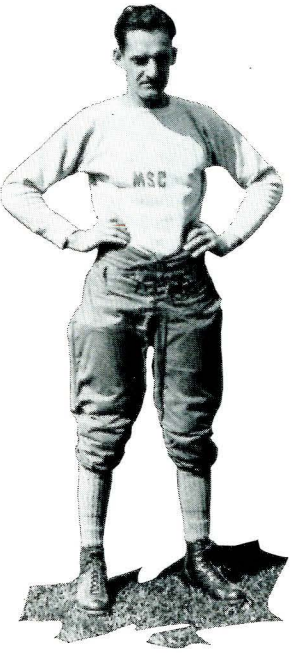

VARSITY SQUAD

IDAHO UNIVERSITY

The first game with college competition was with the powerful Vandal team of Idaho University at Moscow on September 28. The Dychemen were unable to hold the heavier line of the Vandals and were defeated by a 39 to 6 score. The Bobcats were forced to use an aerial attack and though they were quite successful with it, they were unable to gain consistently through the Idaho defense. The Vandals, using straight football, marched down the field repeatedly for scores. With the exception of one touchdown scored by Captain Diehl, all of the Vandal points and practically all of the ball toting was done by the five quarter-backs whom Coach Catland used during the contest.

UTAH AGGIES

The Bobcats met the Utah Aggies on October fifth in what was the first conference game for each team. Although both squads showed lack of polish, the Utah Aggies put over a touchdown and a safety to get a win from Montana by a 9 to 0 score. The contest was played at Bozeman and a high wind made passing and kicking impossible. Joe Call, the quarter-back and captain of the Aggies brought the crowd to its feet several times during the fray by his sensational runs. The Bobcat back-field lacked the punch to score and the line was a bit ragged at times. Preston was the shining light for the Dychemen on defense and Worthington at end was down on every punt in fine shape.

Score: Aggies 9 Montana 0

BRIGHAM YOUNG UNIVERSITY

Montana State won its first conference victory in the game against B. Y. U. when a 60 yard run by DeFrate, a pass from DeFrate to McFarland, and a point after touchdown by Worthington, netted a 13 to 12 win. The Cougars, playing on their own field at Provo, got off to a rather bad start. Fumbles, coupled with sensational open field runs by Bobcat backs, gave M. S. C. a 6 to 0 advantage at the end of the first quarter. This score was made when DeFrate got away late in the first period to race over half of the length of the field for a touchdown. The Bobcats were unable to convert the extra point. The Blue and Gold warriors

BOBCATS GO AROUND END

made their second score as a result of a long heave from DeFrate, and Worthington converted the extra point which proved to be the deciding margin. B. Y. U. staged a desperate rally in the third quarter and scored two touchdowns, but was not able to count the extra points.

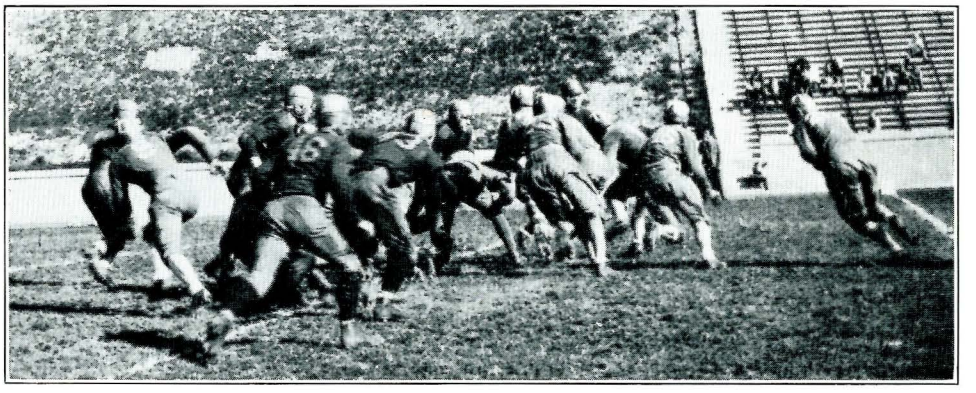

Score: Bobcats 13 Cougars 12

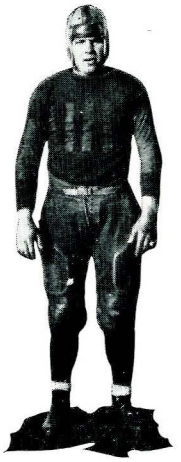

WORTHINGTON
Cap't.-Elect

MONTANA UNIVERSITY

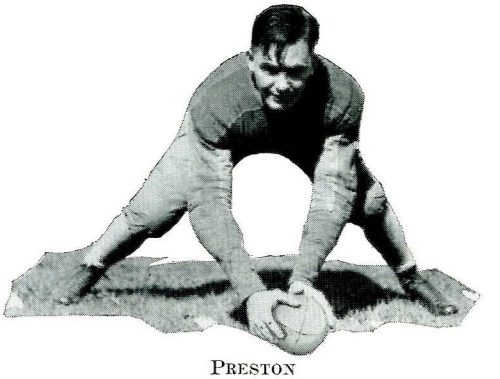

The annual classic between the State College and the University was again held at Butte. Before a crowd of 7,000 enthusiastic football fans the Aggies' twenty years jinx was broken when a pack of fighting Bobcats clawed their way to a 14-12 win over the Grizzlies. The echo of the referee's opening whistle had hardly died down when the Bobcats were on their way to the first touchdown. They received the opening kick-off, and three minutes later had scored on a 29 yard pass, DeFrate to Worthington. The Grizzlies immediately retaliated by recovering a Bobcat fumble and marching 32 yards on five line smashes to come within one point of tying the score. In the second quarter the Bobcats marched 71 yards to score, and again the Grizzlies came right back, receiving the kick-off to march 68 yards for a touchdown. Two added points on drop-kicks by Twilde gave the Bobcats a 14-12 lead at half time. In the second half the Grizzlies came back fighting harder and more desperately, but the Bobcats had a lead that no team from Montana State, or any other

BOBCATS AT PROVO

SEMINGSEN
Tackle

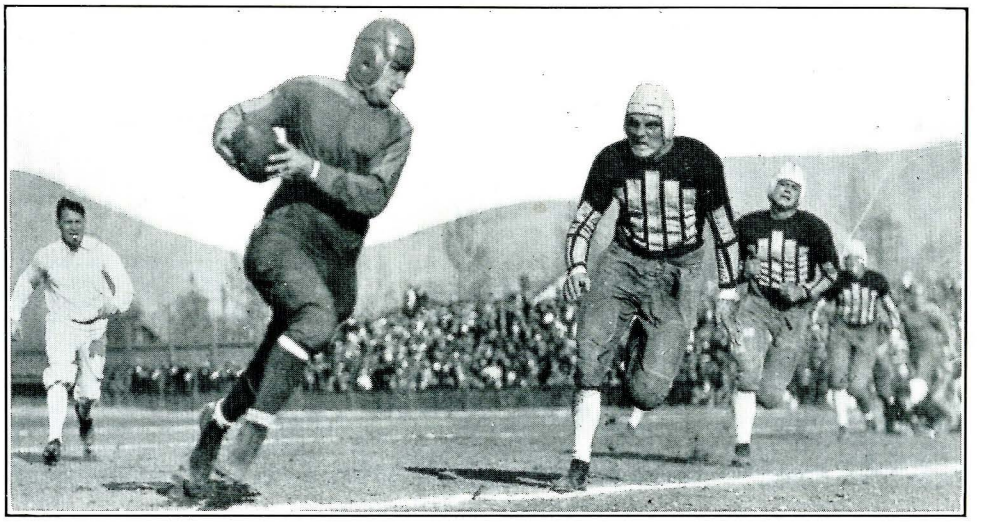

PRESTON
Center

DEFRATE
Quarter

college for that matter, ever fought so desperately and successfully to save.

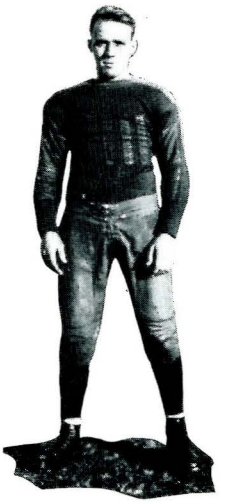

Both teams tried unsuccessfully to score for the rest of the half, and the final gun found the score still Montana State 14, University 12. As the whistle blew, the Bobcats were fighting ferociously to hold the Grizzlies in the shadow of their goal posts. Every man on the Bobcat squad played a commendable game, but the heroic efforts of DeFrate, Twilde, Wylie, Worthington, Preston and McFarland will always be remembered in Bobcat circles. This was the last game for many of the men against their old traditional rivals. With the inspiration of this year's victory the next few years ought

to see Montana State going forward to many more victories over their old rivals.

Score: Bobcats 14 Grizzlies 12

WYOMING UNIVERSITY

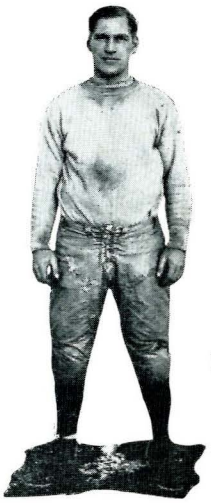

Montana State kept up its winning streak by defeating the Cowboys to the tune of 13-0. The game was played on a wet, snow covered field before a record crowd of Montana and Wyoming fans. Playing careful, even football in the first quarter, neither team was able to score. In the next two periods the Bobcats, with spectacular long runs and passing, brought the game to a climax in the last quarter. Wyoming and Montana State have met six times on the football field. Wyoming won 18-17 in a famous game at

Laramie in 1924, and repeated again the next year at Bozeman by a rally with a 7-0 score. Since that time, Montana has won four times: 10-0; 6-0; 14-7; and 13-0. The Wyoming game has been one of the feature cards for both schools. In eastern Montana, and Wyoming, the Cowboys were touted to win in spite of the Bobcat victories over B. Y. U and the Grizzlies, and the Cowboys list of five defeats. Wyoming was kept on the defensive during most of the tilt, and in the last period the aggressiveness of DeFrate, Wylie and Worthington could not be denied. The Bobcats put across their first score when, with the ball 16 yards from the goal-line, DeFrate plunged over for a touchdown. O'Leary took a pass from Worthington to score the extra point. De Frate also made the other score when, after a series of long gains, he went over tackle for the second touchdown. Worthington missed the kick for point. This was

BOBCATS PUNT

NORTH DAKOTA STATE

The Blue and Gold squad defeated the North Dakota Bisons with a score of 6 to 0, on a slippery and icy field. Bobcat reserves played the greater part of the game, and the first string men were on the field only a few minutes of the last quarter. Sadler, quarterback, made the most outstanding play and the only touchdown of the game, by returning a punt 90 yards.

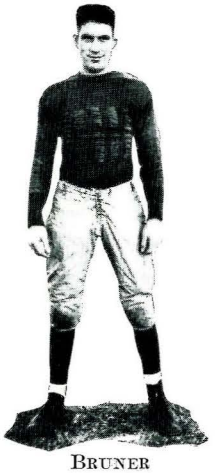

Neither team was able to gain ground through the line and both resorted to a passing game. The game was slowed up by the

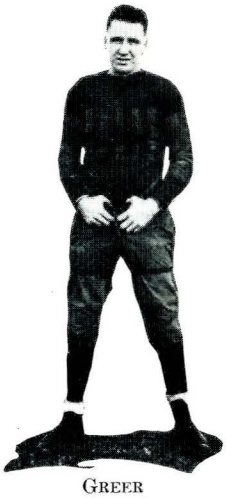

LONG
End

WORTHINGTON DOWNED ON THE TEN YARD LINE

inability of the men to hold their feet, and the slickness of the ball made fumbles frequent. North Dakota uncorked a passing game in the last period and was constantly threatening to cross the Bobcat goal. In the last quarter three consecutive passes were intercepted, two by the Bisons and one by the Bobcats.

The fine, consistent work of the reserves came as a surprise to the fans. Kleffman, Long, Bauer, and Dyer were the high lights in the line, while Sadler was the steadiest man in the backfield. The ground gaining ability of Lonsborough made it possible for the Bisons to outscrimmage Montana State.

MOUNT SAINT CHARLES

The state championship was decided when Montana State defeated Mount Saint Charles with a score of 7-0 in Great Falls on Thanksgiving day. The game was played on a snow covered field which handicapped the speedy backs of both the Saints and the Bobcats. Three forward passes early in the second quarter, the last from DeFrate to Captain Wylie for a touchdown, gave the Bobcats their victory. A drop kick tried by Ivar Twilde, was low, but the Saints were off side on the play and the point counted. The excellent defensive work coupled with the steady line plunging of O'Leary enabled the Cats to protect their lead during the remainder of the game. Both teams were forced to kick when steady gains through the line proved impossible. The Saints made one march to

BOBKITTEN FOOTBALL

Freshman football is carried on for two main reasons: to supply competetive sport to the participants, and to furnish the varsity squad with competent scrimmage opposition. There are, then, two bases upon which we may judge the success of a Bobkitten football season, and judging by either of them, the year of 1929 marked one of the best Frosh "outfits" that the college has ever produced. At all times Coach Adams was able to supply the varsity with scrimmage material that took delight in holding down the more experienced squad. In fact, the varsity reserves suffered a defeat at the hands of the Freshmen early in the season.

The Kittens won four out of six games, dropping two on the same day owing to a necessary split in the squad which made it possible to send two of the best possible elevens to different places. However, both teams of the split squad were barely edged out; one by the Dillon teachers, and the other by the Miles City High School eleven. Of course, the most decisive and valued victory was the 19 to 7 trouncing that the Kittens handed the Cubs, in the last game of the season. That victory went to make up the completion of a successful season.

Much credit goes to Coach Adams, who was able to whip a team into shape from the very different sorts and styles of material at hand. It is no small task to conjugate the different types of material coming from the high schools into a team that will work harmoniously together.

STOPPED ON THE LINE

Coach Adams was able to produce a team in one weeks time that gathered a victory from the varsity reserves.

The style of plays used by the Kittens was the most simple type of straight fundamental football. The plays were either straight line bucks, simple end runs, or short passes. No complicated or deceitful plays were in the list.

The entire left side of the line was made up of the three veterans from Butte: Ball, O'Brien, and Dyer. The backfield was composed of the diminutive Manlove and Stimps, Burns, Breeden, Keenan, and Mills. Mencer of Indiana, Jacobson, Nagle, McLean, Dale, and Hendrickson all look like good material for next year's varsity.

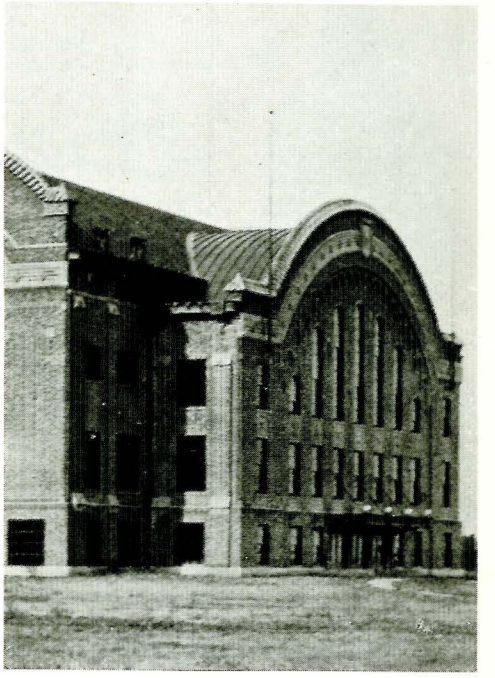

Men earning numerals were: Keenan, Mencer, E. Breeden, Manlove, Stimps, Burns, Jacobson, Mills, Dyer, Ball, O'Brien, Hendrickson, Dale, McLean, and Nagle.

RESULTS OF THE SEASON

Bobkittens	15	Intermountain	7
Bobkittens	12	Reserves	6
Bobkittens	12	Butte Central	7

KITTENS SMASH THE LINE

BASKETBALL

CAPTAIN THOMPSON

BASKETBALL

BOBCAT-SAINTS GAME

Montana State's Rocky Mountain conference champion basketball team opened its 1929-30 season, December 10 and 11, with two victories over Mt. St. Charles The opening games were watched with special interest as fans were anxious to see the new combinations which Coach Dyche would use in an effort to balance up a squad without "Brick" Breeden.

In the first contest the starting lineup was Thompson, F. Ward, O. Ward, Max Worthington and Peck McFarland. Five new men were given their first taste of varsity competition. Wally Wendt, all-state center from Great Falls, Mencer, Keenan, Ray Buzzetti and Keneth Ario all saw action, but were a bit ragged and nervous in their first fray. At times the wonder team showed spurts of their former speed but also displayed early season weakness. Garner and Scheewe looked best for the Helena team. The score was 52-23.

SECOND GAME

In the second game with the Saints the Bobcats appeared in better form with a closer defense and spurts of speed approaching last year's style. Ed Breeden, a freshman and brother of the famous "Brick," started at guard position and played a commendable game. Ray Buzzetti, another promising freshman and his brother Ed, sub last year, both played a fast, scrappy game.

Gross lead the Saints scoring with 11 points and played a heady consistent game throughout. Captain "Cat" Thompson was high scorer for the Bobcats with 18 points with Orland Ward a close second with 17. The final score was 57-22.

In their first two games the Bobcats averaged well over a point a minute, garnering 109 points. Of these 98 were gained from field goals.

BOBCAT-LIVINGSTON RR CLUB

On December 13 and 14, the Bobcats piled up two of the largest scores in their history, when they trounced the Livingston Railway Club 116-10 and 96-10.

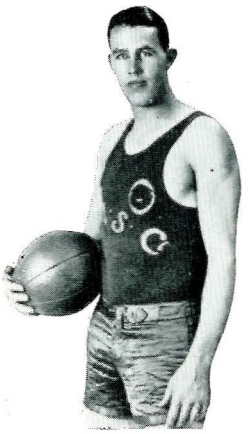

The M. S. C. team displayed all its masterful passing and shooting, and from the start in both contests, kept the Livingston boys completely bewildered. In these games Coach Dyche used all of his candidates and no combinations had trouble in keeping the advantage over the opponents. In fact, the second and third strings were given most of the burden as their showing decided who was to make the eastern trip. Practically every man on the Bobcat squad broke into the scoring column and several very promising new-comers were uncovered.

O. WARD

BOBCAT-BUTLER

On December 23, at Indianapolis, in the first game of their invasion into the east and middle west, the Bobcats lost to the powerful Butler University squad 49-32. The Bobcats opened up with a brilliant offense and led for the greater part of the first half. They were unable to maintain this speed, however, and the Bulldogs forged ahead, due principally to Hilbrand, Butler center, who led a fast last half drive which netted the university 28 more points. The Bulldog center was high point man of the game with 11 field goals and two free throws. Cat Thompson was the star for the Bobcats and led their attack with 12 points. Both Thompson and Frank Ward were eliminated from the game early in the second period on personal fouls.

F. WARD

MARQUETTE

The "Wonder Team" came back strong in their second game and lived up to their point a minute record, when on December 28, they took Marquette University of Milwaukee, into camp 39-30. Thompson scored 21 points during the contest and proved to the eastern audience his place as one of the greatest scoring forwards in America. The Bobcats played their usual baffling offensive game and got away time after time to score on the Hilltoppers. Frank Ward was close on Thompson's heels in the scoring column and was responsible for six field goals. The game was fast and hard, but the Milwaukee school was forced to bow before the whirlwind attack of the "Cats."

LOYOLA GAME

On Tuesday night, December 31, at Chicago, the Bobcats were defeated when Loyola University of Chicago downed them 38-28. Loyola by this win scored its 27th consecutive victory.

The Bobcats were unable to get started in the forepart of the fray and the Ramblers acquired a 10-2 lead by the middle of the opening period.

The Bobcats held Captain Murphy of Loyola to three field goals but Burtzen, guard, got away for five. Cat Thompson was closely watched but Frank Ward stepped in with six field goals. Montana spurted at the start of the second period and cut Loyola's lead to four points but weakened and was outdistanced.

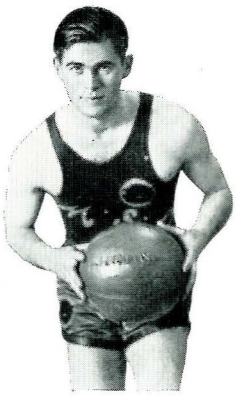

WORTHINGTON

PURDUE

On New Year's night the Bobcats flashed a second half comeback to win from Purdue 38 to 35 after holding the short end of a 25-14 count at half time. The game was played at Lafayette, Indiana.

The Boilermakers defense went to pieces shortly after the start of the second period and the Montana State five scored under the basket almost at will. Frank Ward led the scoring for the Bobcats with a total of 14 points, one short of game honors which went to "Stretch" Murphy, Purdue center. Each scored six field goals but Murphy made good three free throws to Ward's two.

McFARLAND

PENN-STATE GAME

On January 7 the Cats triumphed over the strong Penn-State quint 51-42. Montana State grabbed an early lead and held the margin throughout the game. Superior passing and floor work on the part of the Bobcats, which put their offense under the basket time after time, accounted for the victory. The score at half time was 26-19.

Penn State put up a good fight and gave the Western invaders unexpected opposition but the whirlwind attack of the Bozeman team was not to be stopped and Frank Ward and Thompson emerged from the fray tied for high scoring honors with 6 field goals and two free throws each. Mazess, speedy forward and Beard, center, were the high lights for the Pennsylvania squad.

BOBCAT-PITTSBURGH GAME

The Bobcats led during the greater part of the game, leading at the half 18 to 15, but the Panther quint tied them at 36-36. Max Worthington netted a free throw which placed the Bobcats in the lead. Just before the gun Captain Hyatt of the Panthers, made the winning basket. Hyatt was the ace of the eastern quint making two-thirds of his teams' points.

Frank Ward made twelve points and was high man on the Montana team. Throughout the game the Bobcats held the audience tense with their passing and floor work.

NEBRASKA

Holding the upper hand throughout the game the Bobcats scored almost at will to defeat Nebraska with a 61 to 30 score in the last game of their eastern trip.

The Montana quint had a very good passing game and piled up a 30 to 16 count at the end of the half. "Cat" Thompson led the scoring and together with F. Ward's good floor playing toyed with the Nebraska five in the second half of the game.

MONTANA "U"

The Bobcats romped over the "U" by a 55-35 victory. Frank Ward proved himself the mainstay of the Bobcat machine. It was his passing and feeding the ball to team mates that made the victory possible.

The Grizzlies played one of the best games they have played in many years, opening with a flashy attack and piled up a 10 to 2 lead in the first few minutes of play. The Bobcats had a hard time in bringing the score to 12 all. From then on through the remainder of the half the Cats hit their stride and the score was 28 to 12 when the gun sounded.

The Grizzlies staged a fast comeback in the second half. Putting up a stiff defense, they narrowed the margin to 37-35 for the Bobcats with only four minutes to go. Things looked bad for the Bobcats. Then Frank Ward was put in and the fireworks started. With his entry into the game, eight points were made in two minutes which put them safely ahead.

BUTTE

With the regular lineup in the start of the game, the Bobcats piled up a 23 to 8 lead, and then left their team mates to keep up the record of no defeats

from any other state collegiate quints. The first string lineup gave a large crowd an exhibition of the "Wonder Team" form in their floor work and spectacular shots.

When the reserves came in, the game showed new vigor, and despite the Miners' valiant attempts to narrow the margin, they garnered more points to end the game with a 38-18 win.

Matlock played the best game for the Miners and showed his ability in keeping down the scoring of the Cats in some of their shots.

WENDT

ST. CHARLES

Montana State Bobcats gave the Helena fans a real exhibition of their basketball ability when they defeated the Mount St. Charles quint with a 61-35 margin on February 15. The Bobcats easily pulled away from the Saints, who offered battle at the start, with a score of 39-19 at half time and from then on were never in danger.

For the first time this season Cat Thompson led in the Bobcats scoring with a total of 15 points. Gross of the Saints was high point man of the game with a total of 16 points.

UTAH "U"

The Bobcats won their first conference tilt with an extra five minute period to defeat Utah University 50-49 here Friday, January 17. The game was practically a duel between two centers, Frank Ward and Cox of the Utes.

At the end of the half the Bobcats were leading 24-23, and later piled up a 43-37 lead and then Cox of Utah began to score and held the Bobcats to one basket to even the score at 45 at the end of the second period.

Ray Buzzetti was fouled when dribbling in to shoot, and converted his two free throws. Lyhbert, Utah guard, then shot his one and only basket to tie the score. Orland then converted an overhead shot from the side and Cox fouled F. Ward, who connected to make the score 50-49.

Worthington was put out on fouls early in the first half and was replaced by Ray Buzzetti, who showed his ability on the basketball court.

Frank Ward was high point man with 26 points, followed by Cox, who garnered 23. "Cat" Thompson was held to four field goals by the Utah guards.

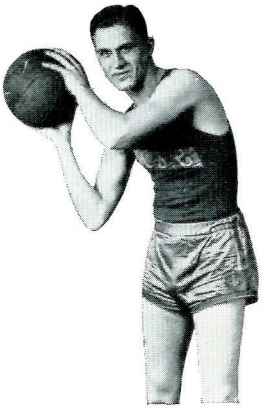

UTAH—Again

The Bobcats defeated Utah in the second game of their first conference series 55-32.

Frank Ward was again the star of the game with his stellar floor work and shooting ability. Ray Buzzetti played an outstanding game when he held the sure-shot Cox, Utah center, to two field goals. The outstanding Utah player was Dow who tied with "Cat" Thompson with six field goals apiece.

B. Y. U.

The Montana State College basketball team trounced Brigham Young University Friday, January 24, by a score of 59-43. It was the first of a two-game series which the Bobcats played the Cougars at Provo. The

E. Buzzetti

Rocky Mountain Conference champions flashed their usual form and maintained a commanding lead throughout the greater part of the game.

The Bobcats grabbed a 17-4 lead early in the game but Magleby and Romney scored several goals in rapid order to give the Cougars a temporary 21-20 lead. The Cats soon rallied and ran up a safe lead in quick order.

Frank Ward caged ten goals from the field to continue his record as the leading scorer in the conference, scoring over 60 points in his first three games. "Cat" Thompson was able to elude Cooper, brilliant "Y" guard for only three field goals.

B. Y. U.—Second Game

On Saturday night, the Bobcats fell before the fast Cougar five 45-42. Brigham Young University got away to a quick start and seized an eight point lead before the conference champions found the hoop. Throughout the game the Cougars kept up a whirlwind passing attack and were successful in maintaining the lead all during the contest.

Magleby, flashy "Y" guard, took individual scoring honors of the fray with 20 points, beating Frank Ward, high scorer of the conference by a one point margin. Frank Ward sank eight field goals and three free throws to net 19 points for the "Cats." Cat Thompson was again so closely covered that he managed to annex only 6 scores to the column. Ray Buzzetti continued his flashy work and succeeded in scoring 8 counters.

UTAH STATE—First Series

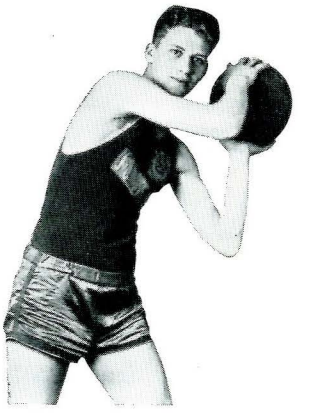

Friday, January 31, the Bobcats in a second speedy attack succeeded in overcoming the strong Utah Aggie quintet to win 53-44. This victory placed the Bobcats in the lead for conference honors with four wins and only one loss.

Utah Aggies started with a terrific pace and assumed an early lead to hold the upper hand 25-20 at half time. Parkinson, sharp shooting forward, led the attack and caged seven field goals in the first half before the Bobcat guards could check him.

The second period was a different story. With Parkinson kept under guard the old Bobcat combination of F. Ward, Thompson and O. Ward, began to function and the Montana score began to swell. Orland Ward was the most consistent player of the game, and emerged high point man of the fray with a total of 22 points.

Davis, Utah forward, and one of the leading scorers of the conference played a very creditable game and counted seven field goals, doing most of his scoring in the second half.

Before the main contest the Bobcat reserves defeated Montana School of Mines 29-24 in a game which, for the most part, was a bit ragged and slow. Wendt, Bobcat center, looked good for the reserves and sank several pretty one-handed tries,

R. Buzzetti

while Trueworthy played the most consistent game for the Butte team.

K. Ario

SECOND UTAH STATE GAME.

In the second contest with Utah State, the Bobcats appeared with not only a much tighter and more careful defense, but also with their old style championship type of offense and downed the Aggies by the more decisive score 62-37. By virtue of this win they climbed to a two game margin over their nearest competitors in the race for the championship of the western division of the Rocky Mountain conference.

Both "Cat" Thompson and Frank Ward showed the fans their all American and all-conference prowess were not to be denied. Ray Buzzetti, who has been attracting so much favorable attention as successor to the famed "Brick" Breeden, broke into the scoring column with 16 points.

MONTANA "U"—Second Game

Montana State College's skillful basket shooting gave the Bobcats a 44 to 32 decision from the State University. The Blue and Gold pulled away in the last few minutes, when a sudden flurry of shots brought a dozen points.

The Grizzlies jumped into a four point lead at the whistle, with the Bobcats quickly knotting the count. They struggled on even basis, goal for goal, for several minutes. With count 15 to 15, a first Bobcat flurry brought four field goals and permitted them to leave the floor ahead at the half, 25-19.

The first ten minutes of the second half passed with the two contenders battling at a startling pace. Shots by Chinske and Kilroy brought the Grizzlies within two points of their final score.

B. Y. U.—Second Series

The Brigham Young University Cougars took the Bobcats into camp with a 47-41 victory of the first night of their two-game series. The Cats were below par with their shots and met with a fast team that were well able to take care of the ball when they had it.

Romney, of B. Y. U., opened the scoring but O. Ward came back with a difficult side shot that evened the game up. Both sides connected again with the score deadlocked again at 4-4.

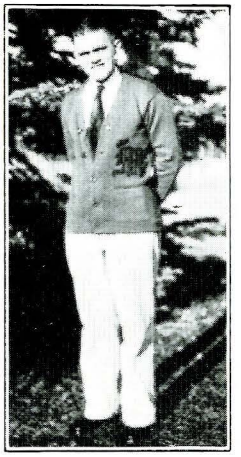

Fast playing and shooting on both sides closed the half with the Cougars on the long end of a 22-19 score.

During the second half the lead passed back and forth several times until the last two minutes when Romney put the Cougars ahead. Two baskets in quick succession gave B. Y. U. a 47-41 victory.

SECOND WITH BRIGHAM YOUNG

The second game saw the Bobcats come back with all of their old form and the B. Y. U. Cougars were no opposition for them, going to a 70-39 defeat. The entire style of the Bobcats was changed and the Mormons seemed at a loss to fathom the champions' offense and could not get through the Bobcat defense.

Thompson played the greatest floor game that he has played getting the ball off the backboard continually and playing great defense beside working

MANAGER BROWN

the ball into the basket. The Wards ran the score higher and higher while Worthington and R. Buzzetti played a great defensive and a brilliant offensive game.

UTAH STATE—Second Series

The Aggies led the Bobcats during the entire game except for the first three minutes of play. After having gained a substantial lead the Utah boys fought valiantly to prevent the division title from falling into Montana's hands. Young and Alsop, outstanding Utah guards, kept Frank Ward down to four goals. The tall Bobcat is still high point scorer of the division.

SECOND GAME WITH UTAH STATE

The Utah Aggies defeated the Montana State Bobcats in a game that could have determined the western division championship, 48-40, making it necessary to play off the tie in a three game series at Salt Lake City, March 7, 8, 10.

The Aggie victory threw the western division race into a tie, the Bobcats and the Aggies having a standing of seven games won and five lost.

UTAH U—First and Second Game

By staging a fast shooting spurt in the closing minutes of play, the Utah University quintet defeated the Bobcats in a sensational game with the score of 52-45. The Bobcats amassed a 32-24 score at the half. At the start of the second frame the Utes began a scoring spree and continued to score consistently until the final gun, despite the hard fighting of the Bobcats.

Returning to their championship form the Bobcats avenged the defeat of the night before to the tune of 56-39. Montana scored almost at will and held Utah far behind during the contest.

CONFERENCE SERIES.

A hard fighting Utah crew rushed the champion Bobcats off their feet and took the first game of the play off series for the Western Division title. At the half the Aggies had amassed a ten point lead, which the Bobcats by hard playing cut to five points only to lose by a 40-35 score.

Montana Bobcats took the second and most thrilling game of the series from the Aggie crew. The regular period ended with a tie at 35 all. Thompson scored on the first play of the second period. Davis of Utah sewed up the score again. F. Ward put the Bobcats in the lead but Young, of the Aggies, sank two free throws as the gun sounded.

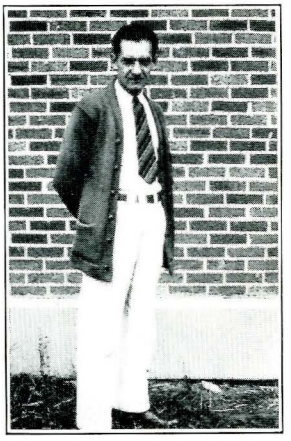

Soon after the beginning of the second extra period F. Ward made a long one to give the Bobcats the lead. He scored again, and O. Ward soon added another. As the period ended Utah sank a goal to fall short of a tie.

Beginning the decisive game as even bets, M. S. C. opened with a long one by Worthington. Utah then scored eight without a return. F. Ward and Worthington added five making the score 7-10 for the Aggies. Scoring was even, ending the half 12-14 in favor of Utah. The Aggies scored five at the first of the second half, but Montana brought the score to 20-21. Utah added seven points, but F. Ward retaliated with five points to again put his team in the running. With eight minutes to go, Worthington was forced out on personals, and Buzzetti soon followed. The game ended 43-40 for the Aggies.

The Bobcats went down fighting. Every man gave the best he had.

TRACK

COACH ADAMS

TRACK 1929

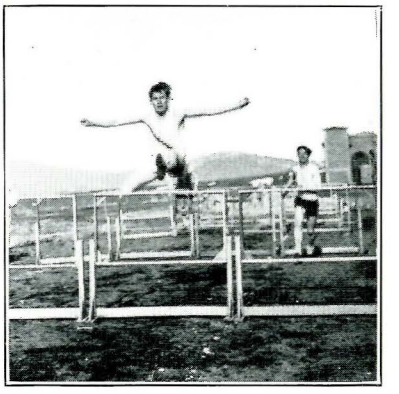

The track season last spring was the most successful that the Bobcats have enjoyed in some years. Under the tutelage of the new coach, Bob Adams, the Blue and Gold squad made a very creditable showing in the track and field events in which it participated.

Although handicapped in the early part of the training season by adverse weather conditions, forcing the candidates to work out in the tanbark, an unusually large number of competent athletes turned out for the sport, and much new material was uncovered in the intramural meet.

Coach Adams put his squad through a rigid and thorough training period before any competetive trials were held. The first bit of competition was held April 19, when the lettermen met the non-lettermen. The "M" men won this annual event from the newcomers by a 67-61 margin. The veterans from the year before included Capt. Semingsen, Cline, DeVries, Sterling, Gardner, Renn, Heikkila, F. Ward, Vogt, Cates, Quillin, and Gill. Some of the yearlings with enviable high school records who showed up good in the meet were: Smart, Bennion, Bjork, Drazich, A. Maxson and Homme.

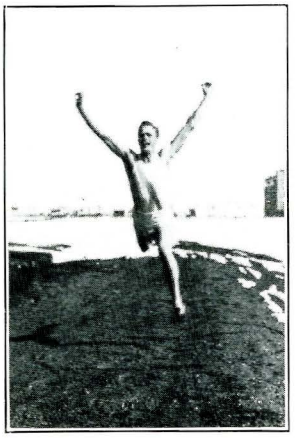

IDAHO UNIVERSITY-BOBCATS

The first meet was against the Southern Branch of Idaho University at Dillon, in which the Bobcats won by a score of 82⅔ to 43⅓. In spite of the fact that the weather was far from suitable, M. S. C. broke one state record and tied another. In the javelin event, Heikkila, stellar athlete for the Montana squad, threw the spear 188 feet to better the record by over four feet. Capt. Semingsen garnered two first places, taking the discus by a heave of 116 feet and then

BENNION
Hurdles

tying the state record in the shot by putting the weight 43 feet 10 inches. Other Bobcat men who made points for the team were: DeVries, Bennion, Sadler, Wylie, Maxson, Bjork, Sterling, Griffin, Bruner, F. Ward, Stoltenberg, Quillin, Skonnard, Homme, Cline, Renn and Gill. In winning, the Bobcats captured firsts in ten events against six taken by Idaho.

RENN
Captain-elect

STATE INTERCOLLEGIATE MEET

The second performance of the Bobcat squad was in Missoula at the State Intercollegiate meet on May 11, in which the Montana University, St. Charles, Intermountain, Montana Mines and the Normal College all participated for the track and field supremacy of the state. The University copped the meet, with a total of 81 points, with the Bobcats being their nearest rival, with 46 points. Nine firsts went to the University and the other six to the Bobcats. The honors in breaking records were evenly divided between the Grizzlies and the Bobcats, when each was able to best one record. The University broke the broad-jump record when Morrow took off to go 22 feet, 4½ inches. Earl Semingson, Bobcat captain, took the shot-putt and the record with a heave of 44 feet 9½ inches.

WARD
Distance

The University took practically all the points in the sprints and were only bested by the College in the 220-yard dash and the two-mile run. The most spectacular race of the entire meet was between Priest of Livingston, Grizzly star, and Bennion, Bobcat sprinter. Priest, by final drive, was able to break the tape a scant foot in front of Bennion.

THE HOME STRETCH

BOBCAT SUMMARY OF INTERCOLLEGIATE MEET

220—Renn, first

2-mile—DeVries, first

Half-mile—Cline, third

Javelin—Heikkila, first; Gill, second

Broadjump—F. Ward, third

Shotputt—Semingson, first; Ward, third

Discus—Ward, first

High Jump—Ward, first

Polevault—Maxson, first.

ROCKY MOUNTAIN MEET

QUILLAN
Hammer

On May 24 and 25 the Bobcats journeyed to Salt Lake and participated in the Rocky Mountain Track and Field Meet. In this meet the Bobcats encountered by far the stiffest competition of the season, as they were twelve member schools of the conference competing. Brigham Young University upset the dope, amassing a total of 48½ points, to take the conference championship. Utah University placed second, with 46½, and Colorado Uni-

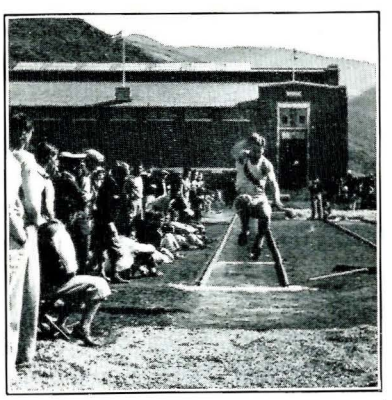

BRUNNER CROSSES THE LINE

versity took 40 to rate third place; Colorado Aggies, fourth, with 32; Denver University, fifth, with 18; Utah Aggies, sixth, with 17½; Colorado College, seventh, with 15; Montana State, eighth, with 11; Wyoming, ninth, with 9; and Colorado Teachers, tenth, with 6½.

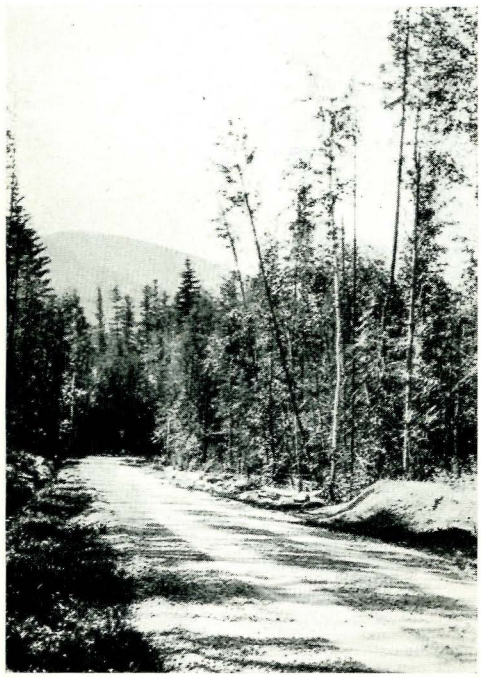

Owen Rowe, B. Y. U.'s star, was the outstanding man of the meet, taking 18 of his team's 48½ points. Byron Grant of Utah U. pressed Rowe hard for individual honors, totaling 17½ points. Montana State College placed higher in the conference meet than ever before in its track history. Heikkila took second in the javelin throw, DeVries won third in the two-mile run, and Semingsen and Renn each gathered in a fourth place in the shot-putt and 220-yard dash, respectively.

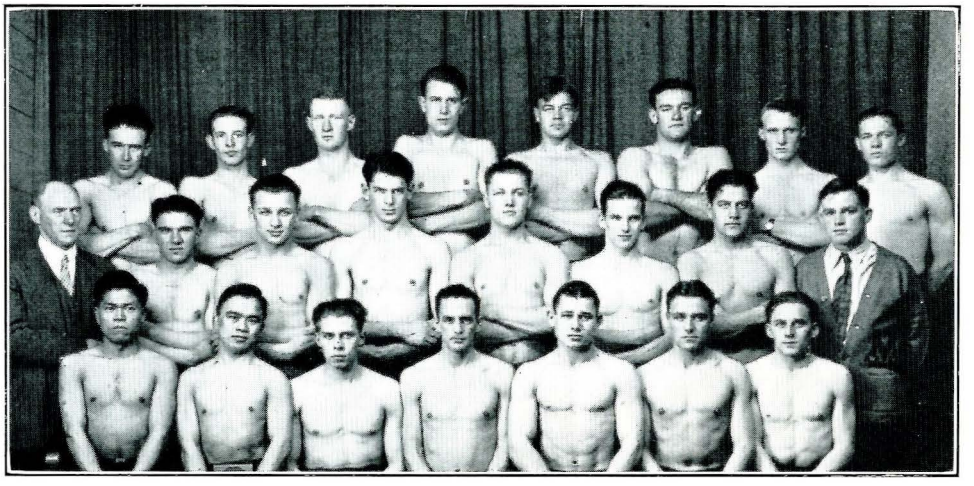

RUTLEDGE

BANFIELD, KEENE, VAN HORN, MARKIN, K. FREESE, MILLS, AMUNDSEN, BREWER
SWINGLE, KESSLER, PAULICH, WAGNER, PEPPER, GREBE, C. FREESE, DOLAN
SIGUERA, ETOW, READ, MORTON, MULL, C. FREEZE, THRAILKILL

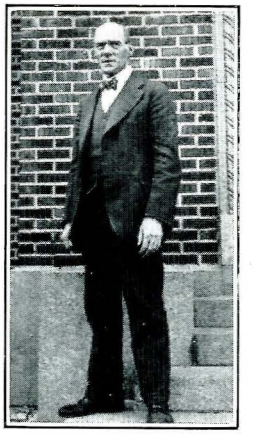

VARSITY WRESTLING

Under the tutorage of Coach Swingle, Montana State's wrestling team had a very successful season. In the conference meet at Salt Lake City they placed second with the Utah University retaining the title. In this meet Mull, K. Freese, and Wagner all scored to give Montana 19½ points. Wagner in 175 pound class defeated Barker of Utah State in one minute and K. Freese in the heavyweight class tossed Jensen of Utah State in four minutes. Mull scored in the 155 pound class when he pinned Nelson of Utah State in an eight minute contest.

Second, third and fourth places were closely contested with only a half point difference between second and fourth places. Utah U won handily with an 8½ point lead.

Montana State won from Idaho in a closely contested meet on their return from Utah. The contest was undecided until the final fall when K. Freese cinched it for Montana by pinning his man with only a few seconds left to go.

Men winning their letters in wrestling as a result of conference victories were: Mull, K. Freese, Wagner, Markin, Thrailkill and Etow.

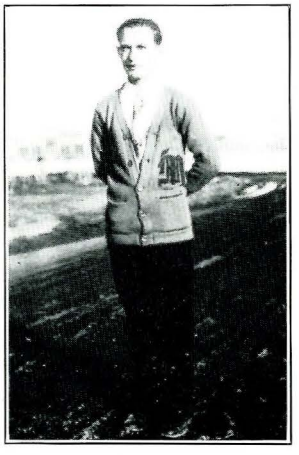

COACH SWINGLE

E. Buzzetti, F. Ward, Pappin
F. Brown, Rowe, Thompson

Volley Ball

Volley ball was inaugurated at M. S. C. in 1928 to fill the gap in intramural sports during the fall quarter. The ten teams entering the contest represented the fraternities and the Independents on the Hill. Intramural volley ball has gained a place in the minor sports schedule at M. S. C.

Delaney
Intramural Manager

Joe Delaney as Intramural manager, and Harold Greiner as assistant, officiated at the games. The games were played in the little gymnasium in the evenings and on Saturday afternoons. There is no award for the winner of this contest, but the honor of winning. Due to the interference of so many other activities, the season lasted until the first week in December.

The season was made much more interesting by the fact that two teams went through the series up until the final contest without the loss of a game. Then the Sigma Chi fraternity defeated the Kappa Sigmas, thus winning the championship. Alpha Gamma Rho and Sigma Alpha Epsilon tied for third place. The whole season was one of fast and hard fought games for each fraternity was out to win the championship.

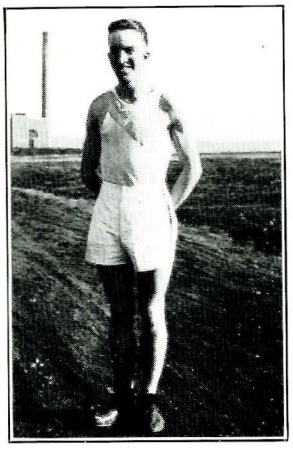

CROSS COUNTRY START

CROSS COUNTRY

Phil Smith, a freshman and a member of Omega Beta, won the cross country race which was held Saturday, November 2. His time was 15:22 minutes and he had a lead of about ten yards over his nearest competitor. His time was the fastest made since Lester (Shorty) Bachman established the record time of 15:08. Smith will receive a Bobcat sweater for his feat.

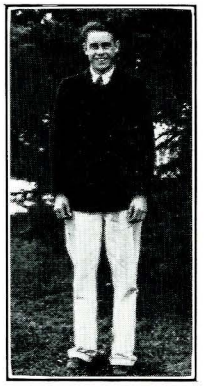

Seventy-nine runners started and seventy-six finished, all of whom showed plenty of reserve, strength and speed. Officials for the cross country were: Starter, Pres. Atkinson; Timers, Prof. L. D. Conklin, R. B. Tootell; Judges, Ray Bowden, P. C. Gaines, and Harry Ellis.

Fraternity standings were calculated on the number that finished times their points divided by 10. The Alpha Gamma Rho fraternity came first, the Omega Betas second and the Delta Taus third. The A. G. R.'s received a silver loving cup given by the athletic department to the fraternity with the highest percentage.

SMITH
Winner

The men who took part in the race in the order of their placing were: P. Smith, A. DeVries, C. Holst, Hughes, McGrath, Peterson, E. Flaxon, Harding, E. Lawson, Leland, Anderson, W. Bjork, Homme, Jarrett, Spiker, Hollenstiener, Pepper, Oswald, Sheldon, Parkin, T. Garry, Tice, M. Fallman, Williams, Young, W. Benson, Blannin, Eliason, Faris, H. DeVries, Bundi, R. Buzzetti, Keene, Dunham, Hould, Whelan, Kelley, Chenowith, K. Freese, Crane, Flynn, Theisen, Reitsch, Hollay, Nelson Hinman, Tolson, B. Gjullin, Pettibone, Erkkila, Hautala, Taylor, Robinson, Leland, Shea, Hankins, Murrils, D. Brown, Munson, Cassidy, Shanklin, A. Peterson, Asbury, Stahl, Billie, Gilman, Pratt, Wendt, Hastings, Ostergren, Watters, Hansen, O. Hammond, and Daley.

LEE

INTRAMURAL GOLF

The golf tournament, the only bi-annual athletic event at Montana State, attracted a large number of entrants the past year.

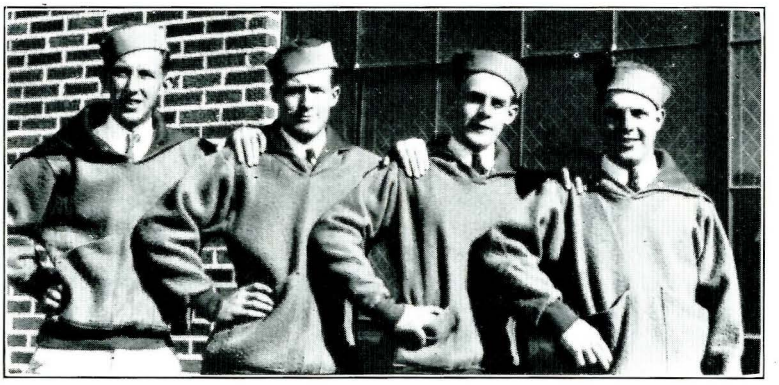

Harold "Lizzy" Lee walked away with the honors when he drove his way to first place in both the spring and fall tournaments. The series is run on the elimination plan and Lee won four straight victories to win the championship medal.

There were 16 participants in the tourney and competition was quite keen during the play. Albert Cooley was runner-up of the league when he won his way up one side of the play, only to lose the final match to Lee. (8 up and 7 to go.)

Special arrangements were made so that the students could play on the Bozeman course for a very nominal sum. The sport on a competitive basis, is comparatively new at M. S. C. and this year should find a larger turnout than ever before.

HANDBALL TOURNAMENT

Joe Sonntag duplicated his performance of last year when he defeated Bud Bauer, 21-7 and 31-7, Saturday, January 12, to win the handball tourney started early in the fall quarter, but due to difficulties in arranging the game the series was not completed until winter quarter. Sixteen contenders entered the race but as the tourney was run on the elimination basis, the field kept narrowing down. In this number were included two former champions, Murphy, winner of 1927-28 and Sonntag, last year's winner, and the others were all fast, hard contenders. The semi-finals found Harry Bowman, Paul Wenaas, Bud Bauer and Joe Sonntag still in the contest from which Bauer and Sonntag emerged victorious to place runner-up and champion respectively. Sonntag is a junior in civil engineering and a member of the Amigo fraternity.

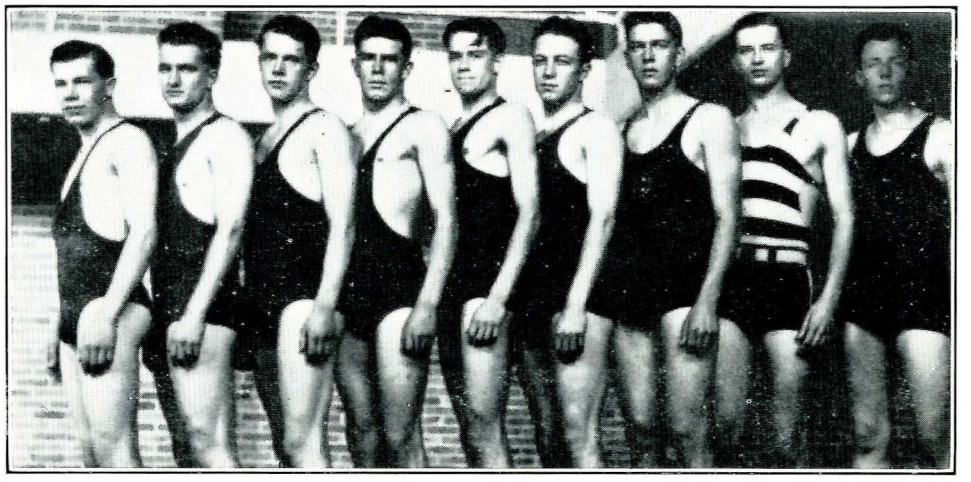

BURKEHART, KELLY, FULMORE, ZION

YELL KINGS

The enthusiasm and support the Bobcat fans give to the teams is kept up by the work of the Yell Kings. These men are on hand at all games to lead and direct the cheering, and to do this they must work hard before the contests, writing new yells and thinking up new performances to keep the interest and support of the spectators at the highest pitch.

Art Zion held the elective office of Yell King the first quarter. Arnold Howland was appointed by the Student Senate the second quarter. The Yell King must have one or more years of experience as assistant Yell King before he can hold this office. Mark Fullmore and Albert Kelly were assistants.

McLeod, Wheat, Erkkila, Nelson, Lee, Garry, Walker, Larrimer, Keifer

Conference Swimming

The Conference Swimming meet was held March 8, at Salt Lake City. The Bobcat team consisted of five men, namely: Jack Erkilla, Tom Garry, Kenneth Wheat, Bill Walker and Harold Lee.

The only man to earn an award this year was Jack Erkilla, who placed third in the 220 free style. Lettermen from last year who made the trip were Garry, Wheat and Erkilla.

Owing to the lack of experience and the small squad, the Montana team was greatly handicapped. Some good men were unable to attend the meet due to illness but represented the Bobcats in the University meet.

The team was coached this year by Pat Dolan.

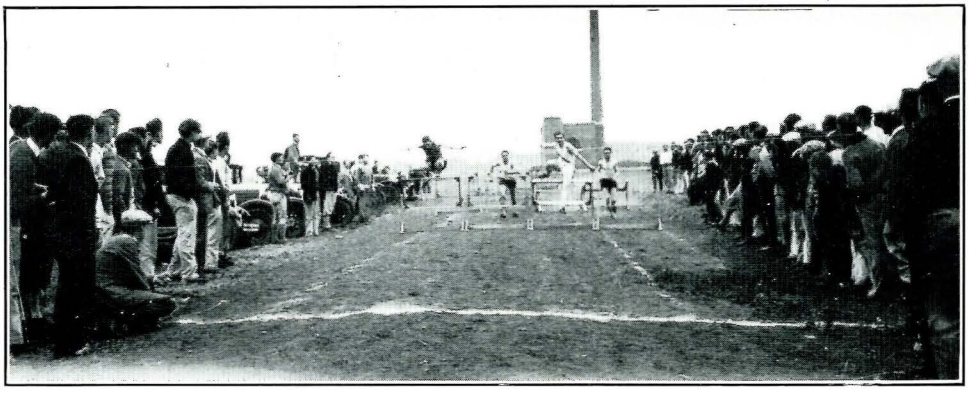

THOMAS, KILLROY, MATHEWS, K. FREEZE

INTRAMURAL SWIMMING

The Kappa Sigmas won the intramural swimming meet, February 22. The Alpha Gamma Rho placed second and Pi Kappa Alpha third. Twenty-four men entered the meet, representing six fraternities and the independent group.

The fraternities placed in the following order: Kappa Sig, 19; Alpha Gamma Rho, 15; Pi Kaps, 15; Omega Beta, 14; Sigma Chi, 12; Sigma Alpha Epsilon, 10; and the Independence, 9.

For individual honors Keefer was high point man with 15 points, McLeod, second, 14; Laitenen, 9; and K. Freese, 8.

INTRAMURAL TRACK

The intramural track meet held last spring was won by the Sigma Chi's. There was more interest shown in this contest than ever before and keen competition marked the events. One of the main purposes of intramural track is to develop the individual. Bobcat coaches watch the contests and many of the high point men later make the Varsity squad. Freshmen, especially, are watched, and those who were high school stars are given special attention.

Rutledge, track manager, and Moser, intramural manager, had charge of the contests. Large turnouts from each fraternity made it necessary to hold preliminaries before the finals.

Only the winners of first and second places qualified for the finals. The Sigma Chi's, though not winning first or second in all the contests managed to place consecutively.

RANKING OF FRATERNITIES	HIGH POINT MEN
Sigma Chi	Sadler, B. E.
Sigma Alpha Epsilon	Bennion, S. C.
Omega Beta	Smart, S. C.
Pi Kappa Alpha	Kleffman, O. B.

RELAY RACE

1. Sigma Alpha Epsilon
2. Sigma Chi.
3. Beta Epsilon.

Track is at a disadvantage at Montana State because of the weather interfering with out-door work-outs. Most of the training must be done on the indoor course. Even with this disadvantage, intramural track is becoming more popular. The meets emphasize this growing interest, for turnouts are becoming larger each year. It appears that intramural track will be permanently established at Montana State.

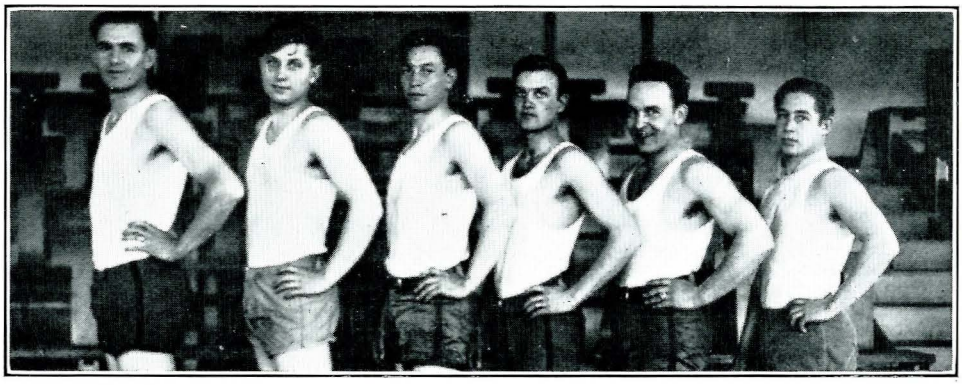

Intramural Baseball

Baseball is coming to mean more to the students of Montana State. The season last spring was outstanding. The keen competition in the series brought to light the outstanding teams and players and the quality of sportsmanship that is being developed in intramural athletics. George Jackson was baseball manager. The series was of the 'Round Robbin' type when each fraternity played every other fraternity and the team with the greatest number of victories won the series. Due to the fact that games were played after school hours they were cut to five innings. Umpires were selected by the captains of the teams. Due to the shortness of the season and the large number of games to be played, three new diamonds were constructed on the grounds in front of the Barracks. This made it possible for three games to be played at the same time. For the first time in many years lettermen were allowed to play. Since there was no varsity baseball, MacFarland, Cannon, and Briscoe, lettermen, took part in intramural.

The Omega Beta fraternity copped first place in the series winning all of their games. The Sigma Chis, and the Beta Epsilons placed second and third respectively.

The award of the President's Cup for the winning team must be won three times by the same group before it becomes a permanent possession. Since baseball is becoming a favorite intramural sport, the prospect of winning this cup will make the 1930 season one to look forward to.

PRESTON, WINN, BOHART, LELAND, WELLINGTON, BELKE

INTRAMURAL BASKETBALL

The intramural basketball series this year was one of outstanding competition and interest. Contrary to former practice, there were two separate leagues, the Blue and the Gold. In former years, each organization was represented by an A and a B team, but players were transferred from one team to the other. This year the placing on the teams were permanent.

The games were hard fought with many extra periods being played to decide the winners. Basketball is the most popular intramural sport at M. S. C. Probably no other sport offers participation to so many individuals, since twenty teams usually enter the series.

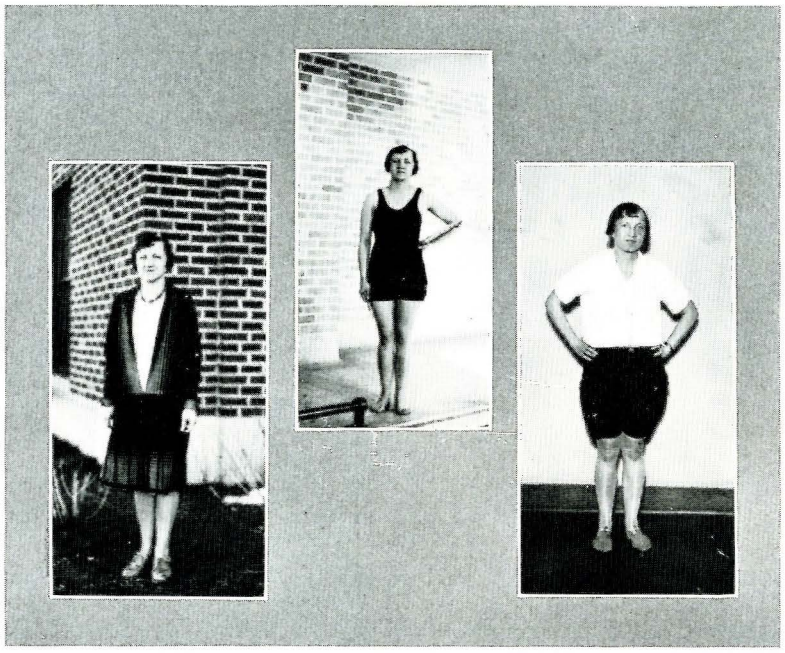

The A. G. R. quintet came out first in the Blue league. The Sigma Chi team won first place in the Gold league. In the Blue league the O. B.'s copped second, dropping only one game, this to the A. G. R.'s. Kappa Sigma Sigma Chi and Amigo tied for third place, while in the Gold league Delta Tau, Beta Epsilon and Amiga tied for second.

HOSKINSON, COOK, DEVRIES, JARRETTE
WINDECKER, CORKINS, MACILHATTAN

Women's Athletics

MARY STEWART

ATHLETIC OBJECTIVES

The women's athletic program aims to offer sufficient and varied opportunity for every woman at M. S. C. to develop skill that will insure regular joyous participation throughout life.

That she may be aided in realizing, through organic vigor, her highest attainable optimal health; that physical fitness may be bound up with desirable womanly graces, and admirable physical poise and emotional stability seasoned with a spirit of magnanimous service and fair play that builds for the home and community, we maintain the motto: "A team for every girl, and every girl on a team."

COURSES OFFERED:

P. E. 101, 201—These courses offer instruction in swimming, athletic sports, and dancing.
P. E. 304 —Theory of athletics—practice training.
P. E. 311 —Rhythmic dancing—prerequisite of aesthetic dancing.
W. A. A. —Basketball, hockey, baseball, volleyball, track, swimming, tennis and tumbling.

HAZEL THOMPSON

AGNES NUGENT

MARTHA HAWKSWORTH

ATHLETIC AWARDS

The Laist medal is awarded annually by Mrs. James Laist of New York to the woman with the highest number of points won during the year. For 1928-29 it was won by Hazel Thompson.

Mrs. Miles last year awarded her medal for tennis honors to Martha Hawksworth, who won the finals from Marguerite Roscoe, 8-6, 6-8, 9-6.

Agnes Nugent was easily the winner of the Draper track medal. Agnes won seven out of a possible eight first places in the track and field meet conducted in the spring.

The Dean's cup is awarded annually to the sorority that has obtained the greatest number of points throughout the year in athletic activities. Alpha Omicron Pi last year was awarded permanent possession of the cup, as it had won it three out of five years.

The W. A. A. cup awards are given to women who have won four first places in the same or different sports during their college career. Women who have won these cups are: Erma Monroe, Esther Stockton, Dorothy Garrett, Hazel Thompson, Helen Fechter, Margaret Crest and Frances Fogler.

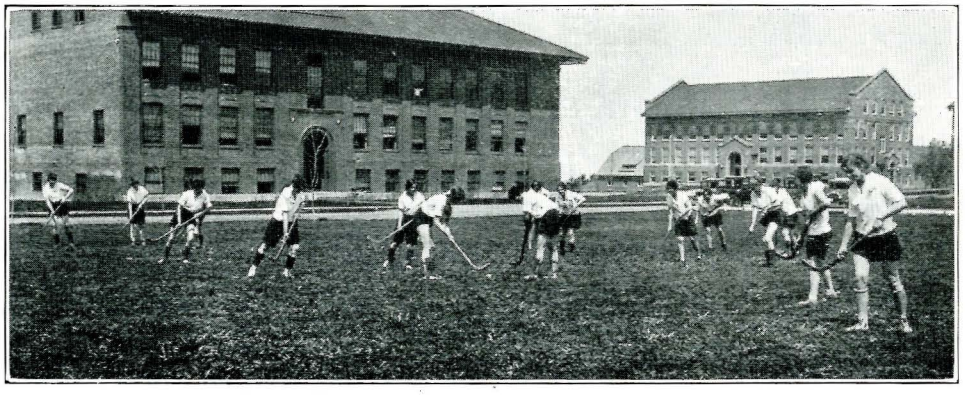

W. A. A. Council

The W. A. A. Council is composed of Pres. Erma Monroe, Sec.-Treas., Lillian Tubb and the following managers: tennis, swimming, winter sports, hiking, rifle and two managers-at-large. The Council considers the business pertaining to athletics and then presents it to the managers-at-large. It sponsors two parties for the members, a Jamboree preceding the fall election, and a spring party to award athletic honors.

Hockey

Hockey is a W. A. A. major sport offered during the fall quarter. Interclass contests are conducted in a round-robin tournament. After the tournament an all-star team of the best players in each position was chosen. The following members were awarded tri-letters: P. Wirak, H. Benjamin, L. Westover, L. Tubb, L. Bowman, C. Delaney, M. Richards, A. Tokerud, A. M. Carr, N. Cole, S. J. Barringer and A. Nugent.

Hockey

KELLETT, HAWKSWORTH, GARRETT, FOGLER
MONROE, THOMPSON, NUGENT

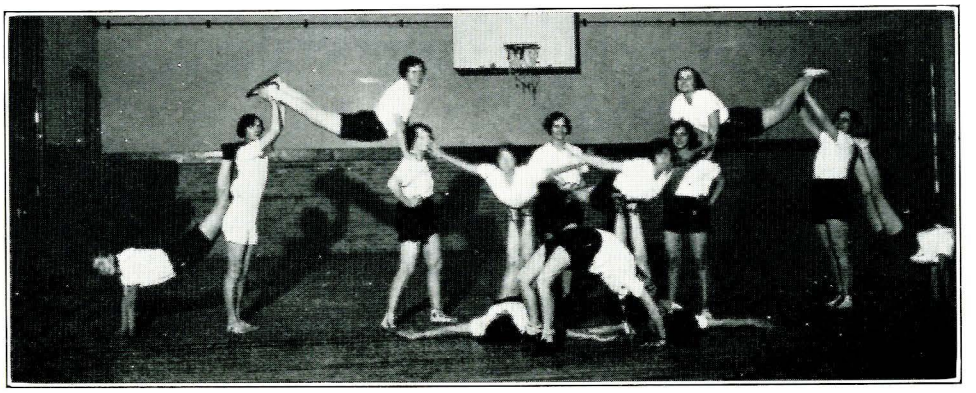

BOBCAT SWEATERS

Bobcat sweaters are awarded to upperclassmen who have won 87 Bobcat points. These points are won by participation in sports. Any woman that is not a superb athlete can become an owner of this emblem by persistent participation. The sweater is the only distinction given to the person who works for a goal, and is the true emblem of the W. A. A., whose motto is "A team for every girl, and every girl on a team."

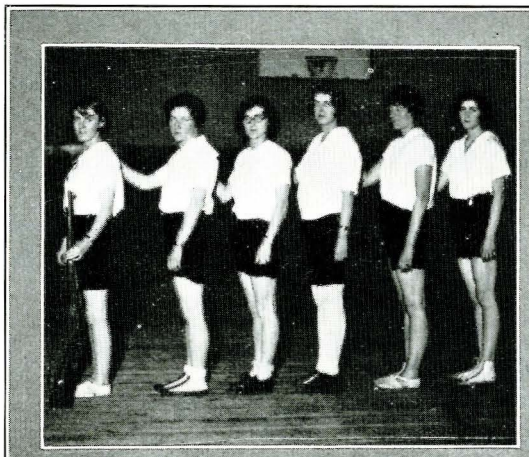

Other women who have won their sweaters are Helen Fechter, Esther Stockton, Gretchen Thornton and Berneice Norris.

TUMBLING

Tumbling is a comparatively new W. A. A. activity. It aims to teach women the art of building pyramids, turning cartwheels, handsprings, rolls, animal walks, flips, and all kinds of stunts.

TUMBLING

MONROE, BRADBURY, GARRETT
BOYD, MILLS, KIRKES

MAY BOYD

RIFLE

Rifle, a minor sport, is becoming more popular among the co-eds. Each year finds many participating in the rifle meet for individual honors, the incentive for greater efforts being intramural competition. Last year May Boyd won the Anceney medal, awarded by Mrs. C. L. Anceney of Bozeman, with a score of 96. Alpha Gamma Delta was victorious in the sorority contest, which was conducted previous to the individual meet.

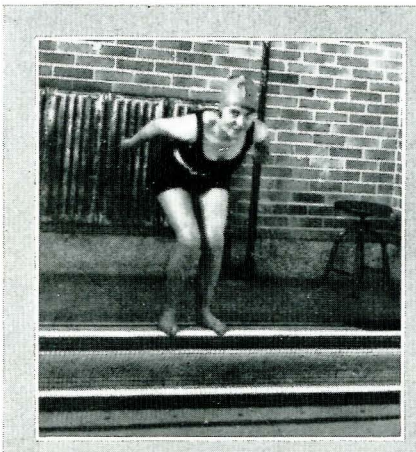

DOROTHY GARRETT

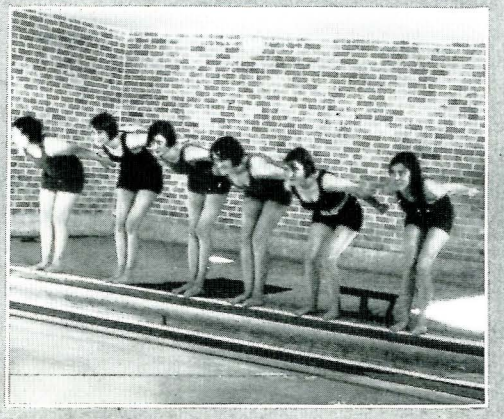

SPEED HIKES

Another minor sport is speed hiking, which is conducted in series of a quarter-mile, mile, and three-mile hike.

Dorothy Garrett won the Martin speed hiking medal, after having been runner-up the year before. Miss Garrett walked the three-mile course in 26 minutes, which is two minutes slower than the record.

ERMA MONROE

SWIM TEAM

SWIMMING

Among the sports creating the greatest amount of interest is swimming. Every spring more students participate in the swimming meet than in any other sport. Last year Erma Monroe was victorious, thus winning the Miller medal for individual excellency in diving, races and form events. She had a score of 76 points, five points being for each first place. Others who ranked high in individual honors were Dorothy Garrett, Helen Oliver and Emma Baldwin.

DISTANCE HIKING

Distance hiking is a major athletic sport. For one month during the spring quarter, students record their distances, which are tabulated at the end of this period.

Mary Wisner, with a total of 396 miles, won the Martin medal. Gertrude Wilkins, Frances Fogler, Betty McNeil and Helen Fechter were close rivals of the winner.

MARY WISNER

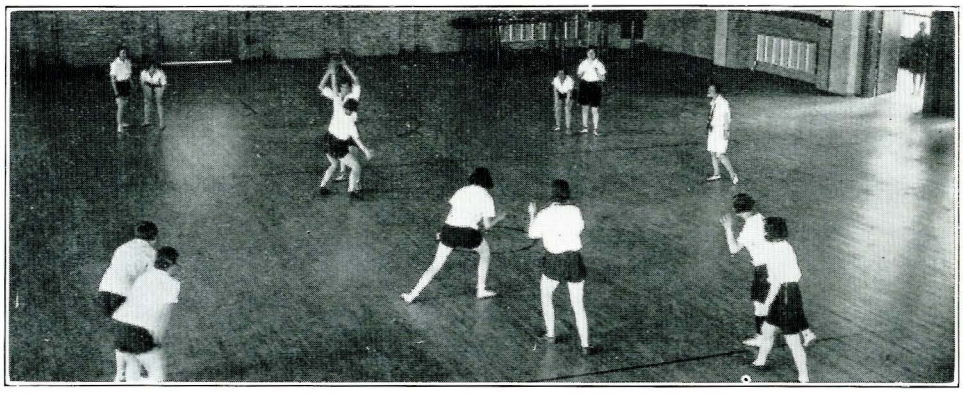

HAWKSWORTH, SAUNDERS, GARRETT, GOULD
TAYLOR, ELLIOTT, KUHNS

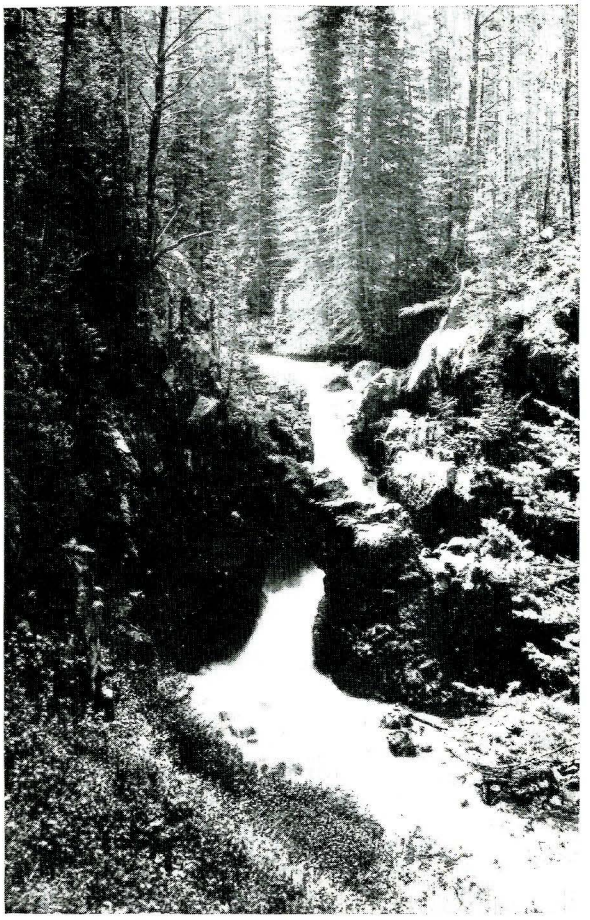

MASS SPORTS

Sports offered for mass participation are all conducted by managers of W. A. A., and include basketball, hockey, volleyball, tumbling and baseball. Tri-letters are offered to those making the all-star team in hockey, baseball and volleyball, while little silver basketballs are given to the championship basketball team.

Last year tri-letters were won by Helen Fechter, Agnes Nugent, Martha Hawksworth, Hazel Thompson, Mary Taylor, Gretchen Thornton, Doris Kuhns, Carolyn Delaney, Dorothy Garrett, Erma Monroe, Aleda Tokrud, Margaret Small, Mary Hawks, Margaret Crest, Margaret Aajker, Frances Fogler, Betty Brain, Betty McNeil, Lillian Tubb, Ruth Riddell, Jane Palmer, May Boyd, Helen Allen, Lucille Morgan, Marjorie Nye, Mary Taylor, Helen Bradbury and Marie Dolzelich.

BASKETBALL

CHRISTINE STAFFORD

JUNIOR PROM OF 1929

The class of 1930 was host to the class of 1929 at the annual Junior Prom, held Friday, May 17, at the new Baxter Hotel. The Prom committee appropriately carried out the simple decorative scheme of the ballroom in all of the appointments. The programs were of Mortar Board design with black silk tassels.

Christine Stafford was chosen queen of the Prom and was crowned "Christine the First of Promenade" by John Breeden, President of the Associated Students, as one of the features of the evening.

Chaperones were President and Mrs. Alfred Atkinson and Prof. and Mrs. W. A. Murray. Norma Beck was chairman of the general Prom committee.

PROM COMMITTEE

BROWN, BECK, RICHARDS

WHO IS HAPPY NOW?

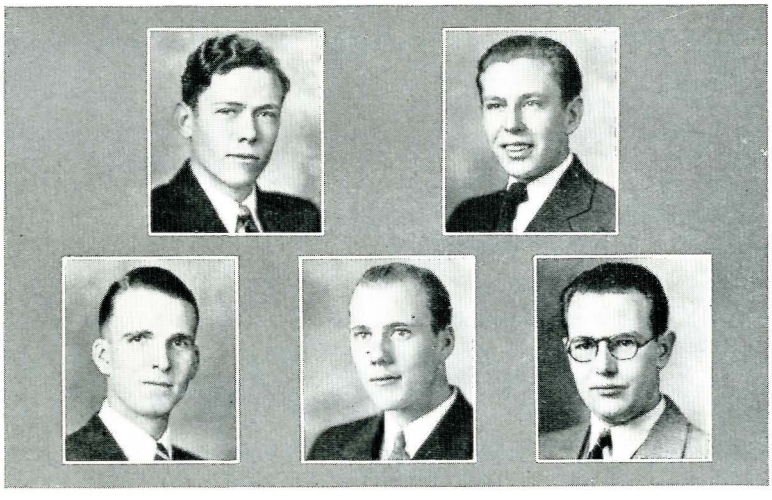

LES BOUFFONS FORMAL

Les Bouffons, honorary social fraternity, gave their annual formal dance Friday, April 19, at the Baxter Hotel. The dance was one of the most successful social functions of the year. During the course of the evening new pledges to Les Bouffans were announced. The pledges for 1929 were: Jack Conrady, Frank Ward, Harold Wylie, Earl Semingsen, Lewis Barnes, Orland Ward, Elwin Richards, Bernard Brown and J. Ashworth Thompson.

THANKSGIVING DANCE

The class of 1932 gave the traditional Thanksgiving Dance in honor of the Senior class Wednesday, November 27, in the college gymnasium. The sophomore class dance committee included: Harry Adams, Armon Hill, George Hould, Eric Blannin and Saxon Martin.

It befalls the lot of every fourth incoming freshman class to entertain the senior class at the annual Thanksgiving dance, according to established tradition. The sophomore class will carry the tradition until their senior year.

H. Adams, Hould
Hill, Blannin, S. Martin

MORTAR BOARD DANCE

Mortar Board, Senior Women's honorary organization, held their third annual "Ladies' Choice" dance in the college gymnasium January 18, 1930.

Starting three years ago during the "Leap Year" of 1928, Mortar Board has sponsored a "Ladies' Choice" dance each year and it has become a function that promises to be continued as one of the pleasing traditions of our Alma Mater.

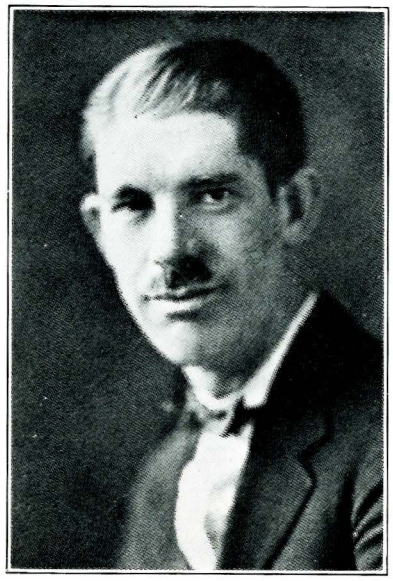

FANG PLEDGE DANCE

Friday evening, January 31, 1930, the Fang Chapter of Intercollegiate Knights held their first annual pledge dance in the college gymnasium. The feature event of the evening was the announcement of the pledges for the year.

The freshmen pledges of the Fang chapter were: Charles Blakely, James Gannaway, Raymond Hixon, Donald Asbury, John Kaiserman, Ernest Myers, James Waters, Ellsworth Hastings, Stockton Veazey, Ralph Lund and Lloyd Eyre.

THE "M" CLUB DANCE

The "M" Club entertained the associated students at an informal dance Friday, February 7, 1930, in the college gymnasium. Nearly 125 couples attended. Chaperones for the evening were: Capt. and Mrs. Luke D. Zeck and Mr. and Mrs. Bob Adams. This dance was one of a series of social functions held in the gymnasium following basketball games during the season.

BERT B. HANSEN

DRAMATICS

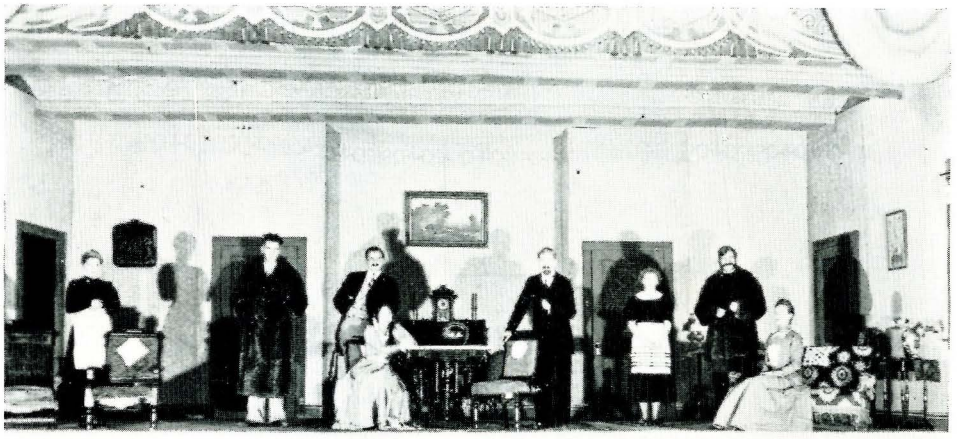

The Tormentors' organization has been very fortunate in having for their director, Mr. Bert B. Hansen, who was formerly of the English department at the University of Washington.

The Tormentors have this year succeeded in bringing to the Bozeman audiences a new type of College Dramatics. The plays that have been produced are of the highest artistic value and have required the appreciation of imaginative audiences.

The plays have been by Ibsen and Barrie. Such plays have brought out not only acting ability, but have given the students an opportunity to show their ingenuity in costuming, scenery and lighting effects.

Mr. Hansen's class in Play Production has charge of all technical work for the Tormentor productions. All the work that has been done on the plays was under their auspice. The students in this class have also been offered courses in Diction, Play-writing and Acting. Dean Herrick conducted the class in Diction the first six weeks of the Winter Quarter.

This year's work has been conducted wholly on experimental lines, but it has opened a new era in College Dramatis, an era of higher class plays, more polished acting, and more perfect productions.

A Doll's House

Henrik Ibsen

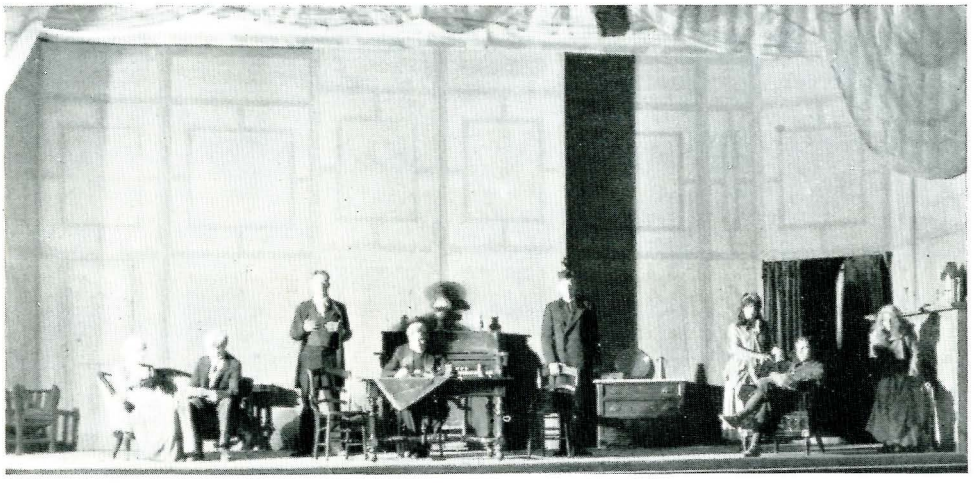

A Doll's House was the first stage production given by the Tormentors last fall. It was declared to be the best directed and acted of any Tormentor production, director Bert Hansen giving a new interpretation of the play which first introduced the modern drama. The play is in three acts and is a famous drama of Scandinavian life.

Alice Vandenhook gave an intriguing depiction of Nora Helmer, the "doll" wife, carrying a difficult role most ably. A vivid characterization of the self-satisfied business man was given by Sam Wynn as Torvald Helmer. Stockton Veazey fitted the role of the well-wishing friend of the Helmers, Dr. Rank, perfectly. Ray VanFleet as Nils Krogstad, the black shadow, brought melodrama and action to the role. Miss Helen Oliver made an amusing Mrs. Linden, with her curiosity and prying ways. Minor roles in the play were capably filled by Muriel Eaton, Elizabeth Pope and Melvin Rollins.

One of the interesting features of the show was the detailed costumes, depicting the vogue of the 1890 period. These were designed by Miss Ada Wort and made in the home economics department of the college. The stage settings and the lighting effects were excellent and did much toward establishing the success of the play. Much credit is due Mrs. Beatrice Freeman Davis, who directed the voice culture of the cast, for the manner and ease with which the actors were heard in all parts of the hall.

The cast:

Nora Helmer	*Alice Vandenhook*
Torvald Helmer	*Sam Winn*
Doctor Rank	*Stockton Veasey*
Nils Krogstad	*Ray Van Fleet*
Mrs. Linden	*Helen Oliver*
Ellen	*Elizabeth Pope*
Anna	*Muriel Eaton*
Porter	*Melvin Rollins*

MARY ROSE

Sir James Barrie

Mary Rose is one of the most beautifully staged and impressive plays that the Tormentors have ever attempted. Apart from its popular appeal in a fanciful mystery plot, the high quality of acting shown by the collegians goes far to place it beside professional plays of that type.

The character portrayal of Mary Rose by Elsa Hendrickson was excellent and with Chester Huntley as Simon, they made a delightful pair of young lovers. Mary Rose's parents, Mr. and Mrs. Morland were ably portrayed by Lora Brown and Fred Bennion. Rudolph Davison was a typical Australian soldier as Mary Rose's son, Harry. Dale Bohart brought bits of humor into the part of the Rev. George Amy with his differences with Mr. Morland. A clever bit of characterization was done by Mabel Smith as Mrs. Otery, the old woman. Henry Helland fitted well into the character of the Scotch theologue, Cameron.

Prof. Donn Kintz contributed a great deal to the climax of the play with his original composition, the "Call Song." The stage settings and lighting effects were excellent and did much to make the play more impressive. The costumes and scenery sets used, were designed and made by members of the play production class. Much credit is due Prof. Bert Hansen, who directed the play, for the manner in which it was delivered to an appreciative audience.

The cast:

MRS. OTERY	*Mabel Smith*
HARRY	*Rudolph Davidson*
MR. MORELAND	*Fred Bennion, Jr.*
MRS. MORELAND	*Lora Brown*
REV. GEORGE AMY	*Dale Bohart*
MARY ROSE	*Elsa Hendrickson*
SIMON	*Chester Huntley*
CAMERON	*Henry Helland*

One Act Plays

In the play production class, conducted by Mr. Hansen, a number of one act plays were produced during the fall quarter. Mr. Hansen was the author of the four plays, which were very interesting and highly entertaining. Arthur Roberts was in direct charge of the rehearsing and production of these plays.

OLD LADIES

The first play to be given before the class was called the "Old Ladies."

The cast included:

Margaret Bowman	*Mrs. Holman*
Adena Schumaker	*Mrs. Queen*
Ada Wort	*Mrs. Gettel*
Harold Sadler	*The Stranger*

ARCHIBALD DODO

This play was a parody on the modern business man, the golden-haired heroine, and the villainous spinster.

Harold Greiner	*Archibald Dodo*
Helen Oliver	*Amelia*
Mammie Crum	*Sarsasparilla*

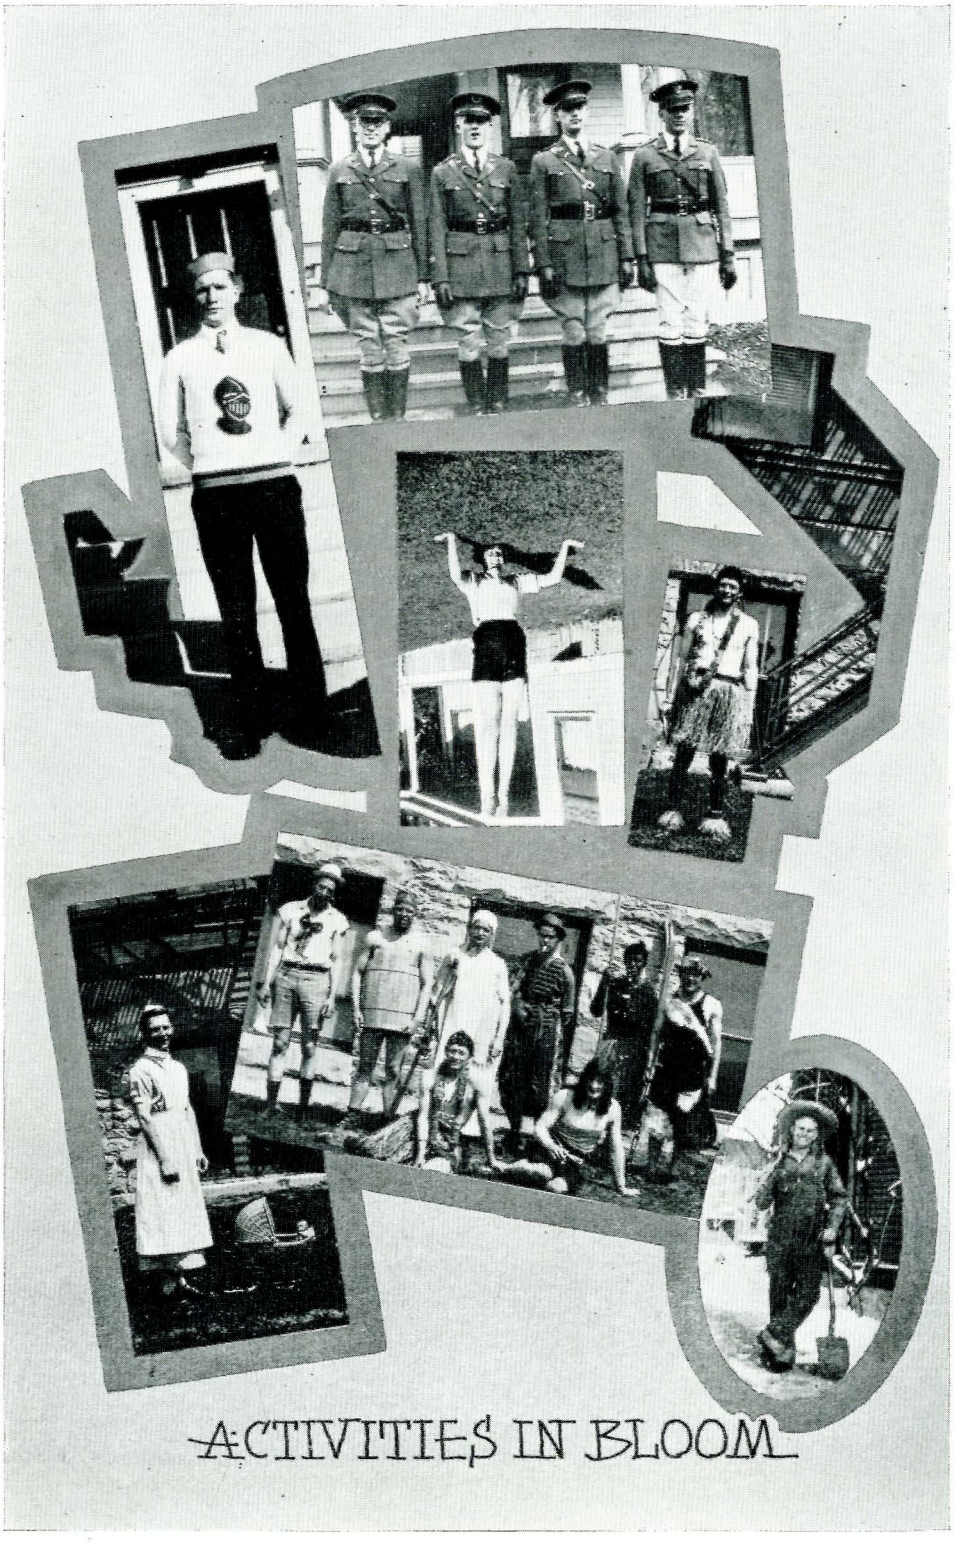

OLD ABE

Old Abe was an interesting incident in Lincoln's life.

Frank Ward	*Honest Abe*
Peggy Scott	*Mrs. Lincoln*
Margaret Chenoweth	*Mrs. Edwards*
Howard Erwin	*The Mayor*
James Smart	*Mr. Hendron*

THE SENTIMENTALIST

Jay Leland	*The Boy*
Ruth Platt	*The Girl*
Dale Bohart	*The Policeman*
Edward Buzzetti	*The Plain Clothes Man*

ACTIVITIES IN BLOOM

INTERSCHOLASTIC BASKETBALL

The nineteenth annual State Interscholastic Basketball Tournament, sponsored by Montana State College March 12, 13, 14 and 15 brought together sixteen of the most evenly matched teams in the history of the state tournament. Chinook high school, making their first appearance in state championship competition, won the state interscholastic crown by defeating Wolf Point 22 to 19. Helena high school and Mount St. Charles Academy played for third and sixth places with the veteran Helena team emerging victorious. Fourth and seventh places were decided when Park county, the surprise team of the tournament, defeated Butte Central in a spectacular floor battle. A one point margin decided the winner of the Billings-Fergus County encounter for fifth and eighth places with the flashy, popular Lewistown quint leading until a minute before the final gun when Billings looped a long shot.

While there was a scarcity of outstanding players in the tournament there was an abundance of exceptional material. Teams from outlying districts seemed to be especially well provided with man-power.

The nineteenth tournament will long be remembered by sport followers for the large number of close games, twelve of the twenty-six contests being decided by a margin of less than five points per game.

Immediately after the final game the official All State team was announced, as selected by a committee of sports writers and tournament officials and the trophies were presented to the members of the winning teams.

THE ALL STATE TEAM

OVERCAST, Chinook	*Forward*
BECHTAL, Wolf Point	*Forward*
PROCTOR, Chinook	*Center*
STUART, Helena	*Guard*
WEEKS, Wolf Point	*Guard*
FLADAGER, Billings	*Utility*

HOW THEY PLACED

FIRST	Chinook
SECOND	Wolf Point
THIRD	Helena
FOURTH	Park County
FIFTH	Billings
SIXTH	Mount St. Charles
SEVENTH	Butte Central
EIGHTH	Fergus County

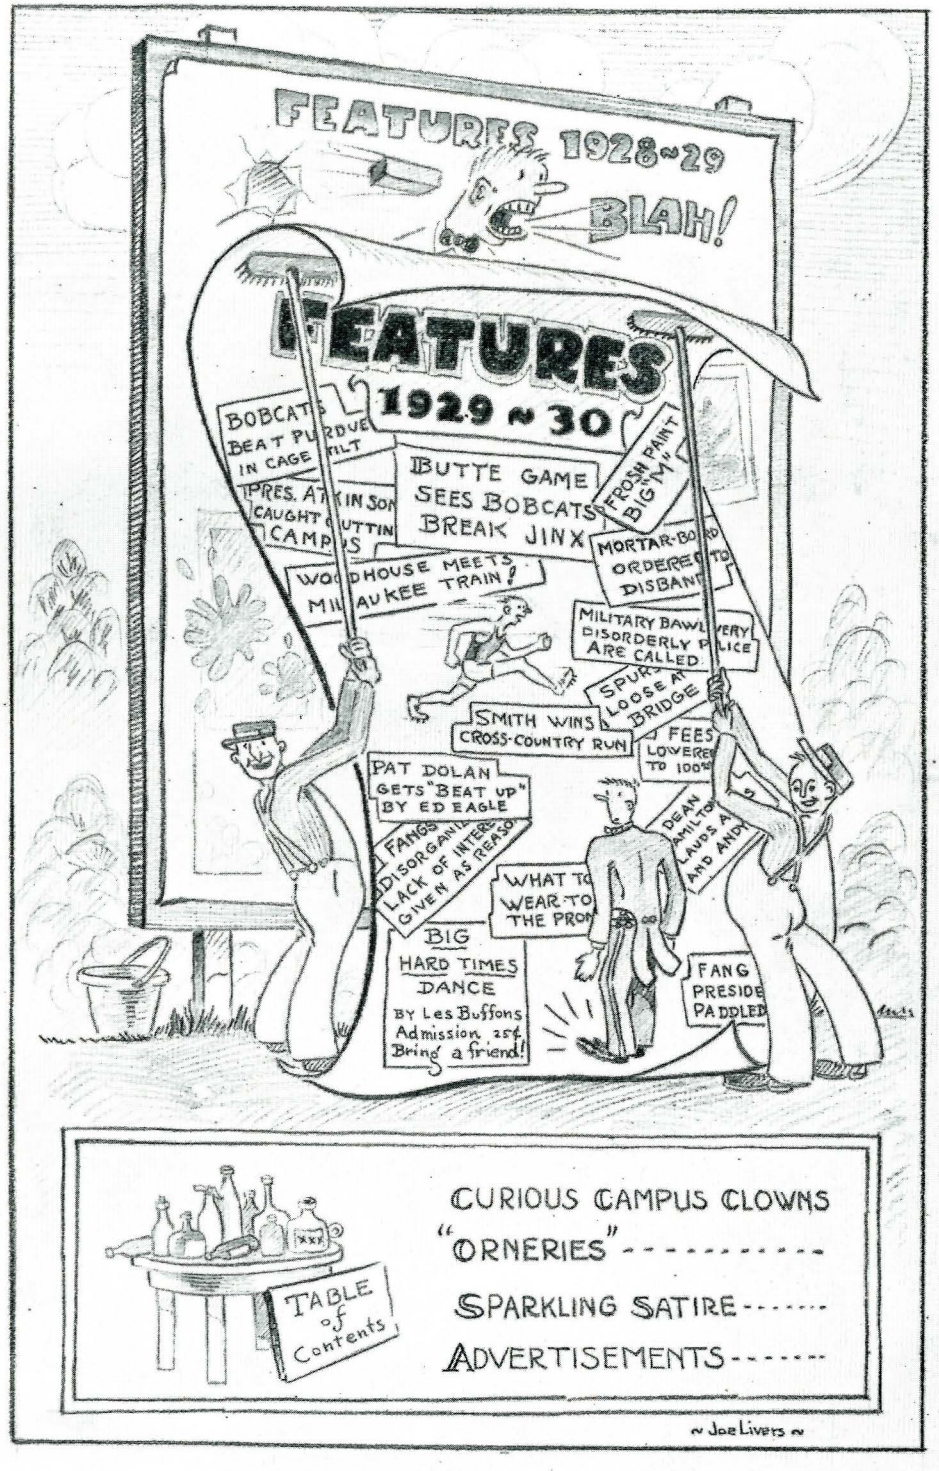

QUEEN HIGH

Queen High, a musical comedy was the stage production put on by the Looter's this year. It was an outstanding success in every way and it will take its place with the best of the Looter's productions, who each year sponsor a musical play. The farce comedy with its choruses and singers, who were selected from the college student body exclusively was one of the best shows ever put on by this organization and did much to maintain the high quality of productions presented each year by the Looters.

Jimmy Ovens as T. Boggs Johns and Jack Bartlett as George Nettleton, the two garter business partners made a clever comedy team with their differences. Bruce Garlinghouse as Richard Johns, the nephew of Mr. Johns and Vivienne Boulware as Polly Nettleton, Mr. Nettleton's niece pleased the audience with their singing and clever acting. Bess Eyre as Mrs. Nettleton the understanding wife, carried this difficult role like a professional.

Ruth Platt as Florence Cole, the clever gold digger did much credit to her role and was a most able comedienne. Robert Manlove as Jmimy, the office boy, brought humor to the play with his wise-cracks and showed exceptional ability in acting this part. Charles Ille as Jerry Vanderholt, the lawyer, brought dignity to his part by his able portrayal of a competent barrister. Dorothy Garrett as Coddles, the English maid, fitted the part perfectly and her acting and dancing did much to further the humorous element of the production. Carolyn Haley and Edith Waterman as Patricia and Kitty, were the models.

The dances and choruses were a feature of Queen High and were directed by Miss Georgianna Fisher. The production was directed by George C. Davenport.

Curious Campus Clowns
Items of Interest to All
1929-1930

POPULAR COUPLE SURPRISED

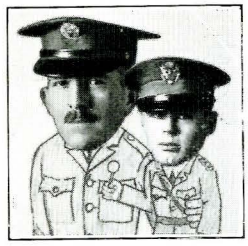

Youngsters Foiled

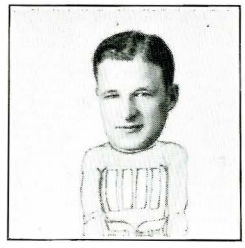

What promised to be one of the outstanding surprises of the season was frustrated when the elopement plans of Miss Martha Flynn and J. M. MacCormick were learned by John Coey. Coey learned of the proposed nuptials when Wall, the best man, set a grip that Mac had borrowed from Coey on the Pi Phi porch. The accompanying cut shows Wall spilling the beans.

B. C. Brown as he looked after paying the bills for the 1929 Montanan.

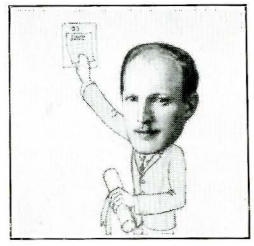

Dexter Moser and the Sargeant, better known as the big and little of the Army.

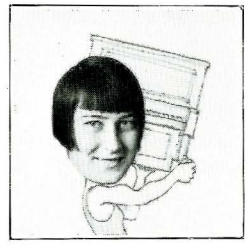

Gus Wylie, third squad sub on the Varsity, has accepted a position on an all-American football team as drawback. This team was recently organized with the object of showing that football can be played after all the objectionable roughness has been eliminated. "I owe my success in securing this position to my physique," said Gus, "Ever since I was a child I have been taking Tanlac."

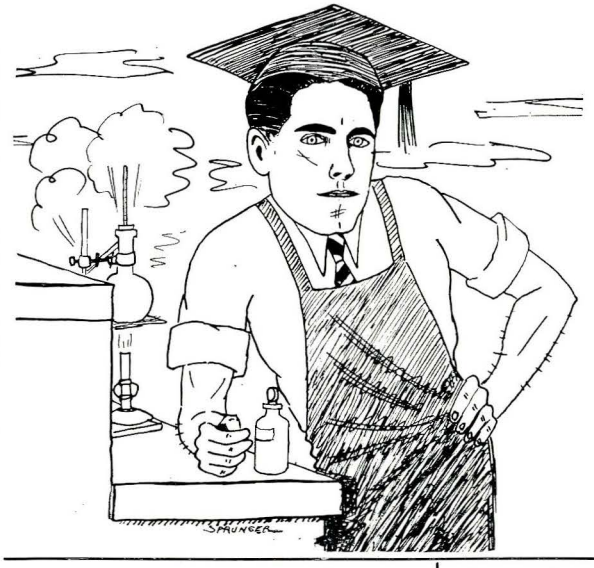

SCHWARTZ GRADUATES

Kenneth Schwartz recently threw a bomb shell into the camp of Lou Howard when he announced his intention of graduating this spring. Lou begged on bended knee but to no avail. Schwartz was obdurate and would not listen to reason. With his leaving, Montana State College loses one of its old and firmly established traditions.

They laughed when Dot stepped up to the piano, they thought she couldn't lift it.

NORMA BECK ARRIVES ON TIME

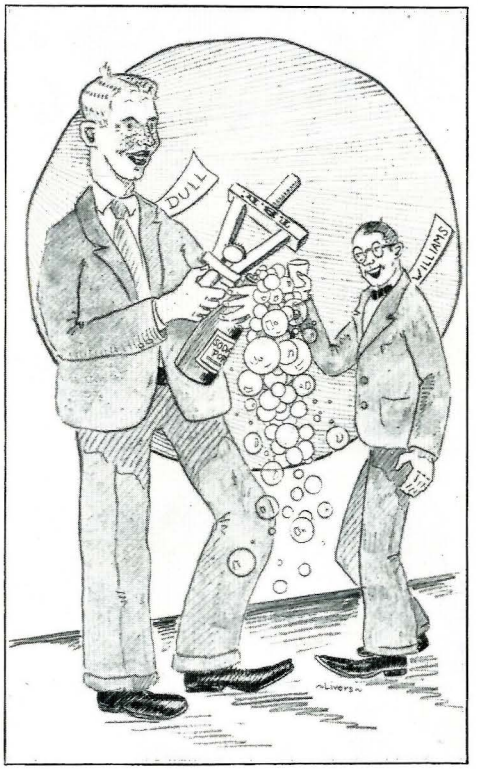

Norma Beck, president of the Associated Women Students, recently surprised the entire economics class by arriving on time. She made no attempt to explain this unusual proceedure but calmly walked in and took her seat. Dean Hamilton in his surprise forgot to notice that the bell had rung and it was time to close the door. The Aggies forgot to masticate their gum and the Sigma Chis did not even put their feet up on the chairs in front of them. So great was the shock that the class was dismissed ten minutes early.

CASSIDY BECOMES FAMOUS.

Conceives Answer Constant

John Cassidy, B. S., M. A., Ph. D., P. D. Q., distinguished mathematician and chemist, in the pose he worked out the greatest boon to college students, the answer constant, also known as the Cassidy Factor.

It can be used to solve any problem whether the problem has an answer or not. The procedure is exceedingly simple. The result obtained is simply multiplied by the Factor and the correct answer is obtained. It can be used under all circumstances and conditions and is not limited by the knowledge of the student. Dr. Cassidy early in life realized the necessity of such a factor. His work in Mechanics and Physical Chemistry made this all the more apparent. Finally after years of work and studious application on Einstein he was able to develop the factor. At first he had trouble in naming it but at last this problem was solved. He simply called it the constant K.

The picture above needs no explanation. It shows the ingenuity displayed in making use of instruments available when none others are to be had.

CURIOUS CAMPUS CLOWNS

FAT DeFRATE LOSES SHIRT.

Fat Defrate was added to the long list of Pi Phi victims when he relinquished his shirt to that group. Very little is known as to just how it happened. Early one evening Defrate came dashing out of the house minus his shirt. He was much disturbed but was evidently afraid to make an attempt to recover it. Libo Gardiner was well pleased with the affair and for several days she sang the old song, "I Want My Shirt."

ANDES MAKES AN A FLUSH.

A. Andes, on the first day of April, was seen making the most weird grimances, and going through the most difficult contortions imaginable. It is well known that for years Andes had been attempting an almost impossible feat, the making of an A flush, and at last the Registrar's records showed that he had done so. He was taken into custody immediately and sent to Warm Springs. It is hoped that he will recover in time for graduation.

PI K. A. ATHLETES BECOME FAMOUS

A team of Pi Kappa Alpha for the first time in the history of that organization lost an intramural game. According to the managers of the Pi Kap wonder team, the players had broken training and had not had their usual rations of ice cream and pickles before the game was played. Since this was the last game of the season and meant the championship, the Pi Kaps were very blue. Next year, however, they vow to take the championship. It will be remembered that this organization was founded on purely an athletic basis and since its founding has lost very few games. Therefore, it is always a surprise when this enterprising bunch comes up on the short end of the score.

BUTCH MARES NOW SMOKING ROPES.

Here is a most remarkable picture of Butch Mares. Observe the cigar. "I got tired of smoking O. P.'s and pick-ups," said Butch, "I wanted a change and I got it." Butch got a real bargain in cigars. He was able to pick them up at thirty-five cents a dozen and immediately laid in a supply. Friends of Butch all claim that they've quit smoking when he offers them one of these cabbage stumps.

PAT DOLAN STEPS OUT.

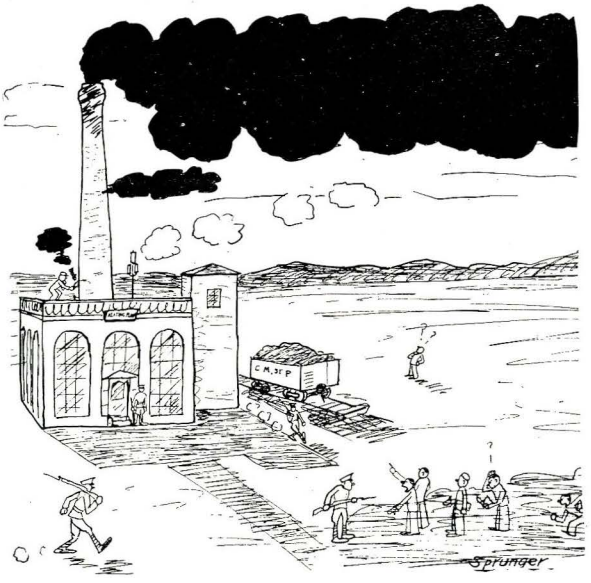

Pat Dolan's reputation as a wrestler was completely shattered when an Alpha Gam pledge, under the stress of hell week, invited Pat to the Mortar Board ball. Pat did his best during the evening but was no match for the versatile Alpha Gam. Pat has been blue ever since. Rumors have leaked out and they only serve to intensify his depression. He has decided to take up swimming as an activity instead of wrestling.

CURIOUS CAMPUS CLOWNS

STACK STOPS SMOKING—FIRES OUT.

Below is shown the heating plant at M. S. C. At one side may be seen the stack that never smokes (much). Note the armed guard surrounding the plant. It was placed there purposely to prevent the chemical engineers from entering. Once a group of these investigators entered the plant to collect some samples of unit processes; it wasn't long before the shortage was noted and the plant had to be shut down. Since then the plant has been operated by non-technical men who don't know their B. T. U.'s, and who do know how to burn coal with a maximum of smoke evolution and a minimum of heat.

The color of the students around and about the campus is not natural, but is due to this nuisance. A movement is on foot to eliminate the plant and go back to the old efficient way of heating the buildings with fireplaces.

SOCIAL FUNCTION A SUCCESS.

Winsome maidens and shy males met in a struggle untold at the annual Plaster Board dance which was held in the gym following the Utah basket ball game. Green was the predominating effect, probably from the eyes of those who—but what's the use of explaining. It is said that the affair turned out to be a fashion show, but perhaps only the floor needed sweeping. The decorative scheme was exceedingly simple, gymnasium apparatus furnishing the theme. This annual unsettled condition of the normal market of available male students is thought to be caused by the women with more method than madness.

ALPHA ZETA WINS MILK PAIL.

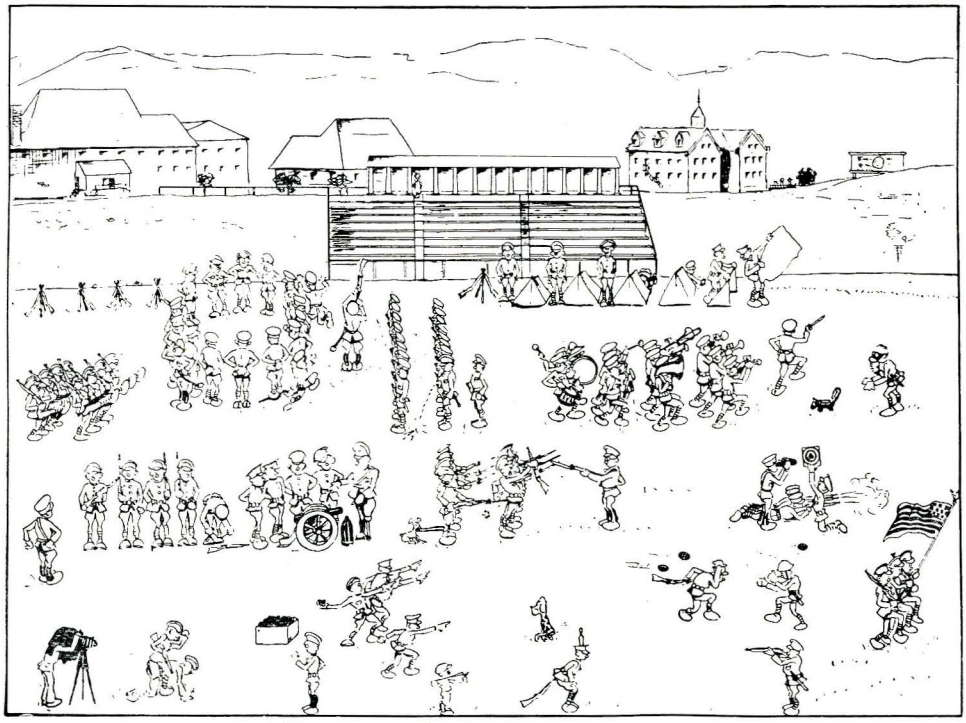

Wing Hoskinson

The members of Alpha Zeta, certified sod-busters, this year presented the Ag department with several handsome new milk pails. Since the new vessels were highly ornate and of some unknown composition, probably tin plate, but nevertheless of striking appearance, it is thought that this is the fore-runner for the movement to put the "French" on farming. It is hoped that next year will see the donation of several more containers to the already large collection. They are of no earthly use except to further the interests of the above mentioned movement.

WING WEEPS.

The editor of the Exponent was found weeping copious tears in his office, and trying to sing "I'm Picking Petals Off of Daisies." The poor boy had been through a siege of trying to collaborate material that had been handed to him by K. D. hopefuls and at the same time trying to carry on conversation with a Chi O. His condition was serious and little hope was held for his complete recovery. With proper care, however, he recovered and is now in the best of health.

THE HORRORS OF WAR—By Quinn

CHANGING STYLES SHOW ODD FORMS.

The spring fashion plate shows many changes in styles and forms. Particularly does the insert show the odd forms revealed by the new fashions. These fashions were obtained direct from Paris and are the latest thing in late styles. They lend freedom to movement and comfort to the wearer. They also lend charm and poise and at the same time do not detract from the physical beauty of the garment. Very few so far have taken up the new modes but it will be only a matter of time until they will become popular.

It is rumored that Alpha Chi Sigma has started an investigation into an entirely new line of chemical research, "The examination of physical curves beneath rayonic surfaces."

It seems odd the way the A. G. R.'s still seem to get good grades. We know a number of students of Agriculture who flunked out last quarter.

We often wonder what happened to the B. E.'s. They still throw good parties though.

CURIOUS CAMPUS CLOWNS

NEW HONORARIES MAKE DEBUT.

Three New Local Groups Organized for Purpose of Filling Annual with Pictures.

New groups appearing on the campus in the past few years have hoplessly cluttered up the year book with trash. There seems no cure or prevention for this. During the past year three more of these nuisances have made their appearance to lend further disorder to the existing chaos. They are merely infants as yet and it is hoped that they may become defunct before the publication of the next year book.

? SKATES VISIT DORM.

The phone rang. It had been ringing all during the meal and to say the least, it was most annoying. Finally someone answered it and heard a masculine voice at the other end in a timid "hello." Inquiry as to who was wanted brought no definite statement but finally it was learned that loneliness preyed upon him and he wanted to come up. This was entirely satisfactory until it was learned that he was not alone, but that all his fraternity brothers were in the same fix. Somehow or other it was arranged so the thundering herd made their appearance about thirty minutes later. Bridge was played all during the evening but the place was so crowded that it was not enjoyed. Foresight locked the ice box. On the whole, the evening was a success.

SOPHOMORE ATTEMPTS SUICIDE.

Lewis Urback, popular campus clown, was foiled recently in an attempt to committ suicide. All the details of the affair are not fully known but it is thought that his unprecedented popularity was a cause for the act. He was heard muttering to himself one afternoon in a Chemical Laboratory and one witness reports he mentioned the A. O. Pi's several times. He did not seem despondent or upset but almost before anyone was aware that anything was wrong Urback had swallowed a test tube full of denatured alcohol. The action of the poison was rapid but timely first aid saved his life. Later in the day he again made an attempt when he dropped his partner's thermometer on the floor and broke it into bits. He is fully recovered now, but his eyes are a shade darker than they were.

to say that you are planning a party for tomorrow night and will probably need more electricity than you usually consume. You may take it for granted that our generating plants will produce enough light and power for all your demands.

Electricity can help in many ways to make your party a success. Lights are essential, of course. Electrical cooking appliances can simplify the preparation of food and allow the hostess to remain with her guests.

The electrical refrigerator provides ice cubes and makes it easier to keep salads and desserts fresh until they are served.

Routine tasks in the home are simplified by enlisting the aid of electricity.

FANGS

A modern descendent of the Spanish Inquisition. The Police Force of the Campus so far as the innocent and unsuspecting are concerned. An insane group of college students organized for the purpose of inflicting torture for minor and unimportant offences.

Membership excluded to those who show mental aberrations, and usually picked from the freshman class.

Sponsor of the Outstanding Social Event of the Year

The Fang Pledge Dance

Motto: "When there's swatting to be done, we'll be there."

I am glad a few fellows at Montana State
Are not wise enough to graduate;
For don't you know that next year's crop
Will have to be told just where to shop.
And if you think that we have been fair
Just tell them who, and why, and where.

We are old in years of service, but there is nothing old-fashioned about us except our business principles as laid down by our founder, General L. S. Willson, sixty-four years ago.

Our creed is an absolute guarantee of quality and satisfaction on all merchandise sold.

That its selling price is based on sound value and service, keeping in mind that true worth commands a price and that real economy lies in buying quality.

That we recognize that by performance alone may we continue to merit the good-will and confidence of our friends and patrons.

In dealing with us please be assured that you are getting the best for the money expended, and that every transaction carries our unqualified guarantee.

Our stocks are complete in the following departments:

Ladies' Ready-to-Wear and Millinery
Hosiery and Lingerie
Jewelry, Accessories, Toilet Articles
Small Rugs, Draperies and Bedding
Shoes and Foot-Fitting Appliances
Complete Line of Men's Wear and Luggage.

MONTANA STATE COLLEGE STUDENTS have come to look upon Hauseman & McCall's as a store vitally interested in college affairs, and ready and anxious to serve M. S. C. and its students in any way possible. It is an institution which supports the college in all of its activities as well as serve the students in their needs.

It is evident from the careful consideration given to the college element that every effort is being put forth to make this concern worthy of the patronage of M. S. C. students.

EDITOR'S APPRECIATION

Now that the 1930 Montanan is nearly ready for the students of Montana State College we can look back and see all that it has taken to make the book what you see.

There is Buckbee-Mears Company, who has had charge of the opening section and the engraving. The interest taken by these people in our book is wonderful and we want to thank them for all the help and kindness they have shown us.

Naegele Printing Company has been delightful to work with and has been untiring in its efforts to solve some of the difficult problems that have arisen as a result of making this book different.

No school annual could be put out by an editor alone, for the best results the efforts of the entire student body are necessary. The cooperation this year has been fine and as a result most of the group pictures represent 100 percent of the membership.

The beauty of the scene section and many of the campus scenes are the result of the work of George Markin. The newness and originality of the feature section is the result of a numer of sleepless nights put in by James Morrison and his illustrator Murril Sprunger.

The financial success of the book is due to the efforts put forth by Joe Delaney, business manager, and Horace Bolster, advertising manager. The conservativeness and reasonableness of the book are the result of the fatherly advice Bernard Brown was able to hand out after a year's experience in the field of editorship.

Every staff member deserves personal mention. Seldom did any of them give the answer, "I am too busy," to a request. It is such loyalty and continuous effort on the part of the school and the staff which makes first-class annuals possible at Montana State College.

I want to thank every one who has made the work on this book such a joy and hope you will enjoy the 1930 Montanan.

Sincerely,

VERA ANN O'NEIL,

Editor-in-Chief.

A CHEER FOR M. S. C.

Let's cheer for M. S. C., boys
What we'll be, boys
All depends on how we down the foe.
Our Bobcats show the spirit
That we all should possess.
If we'd win and guarantee
Our future happiness.
Then Rah! for science
Rah! for Bobcats
Rah! for Victory
And we'll show the West
Can stand with all the best
Of schools in any land.
Three Rahs! for good old M. S. C.
